Doing Business 2011
Business Reforms

Doing Business 2011: Making a Difference for Entrepreneurs is the eighth in a series of annual reports investigating regulations that enhance business activity and those that constrain it. *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 183 economies, from Afghanistan to Zimbabwe, over time.

A set of regulations affecting 9 stages of a business's life are measured: starting a business, dealing with construction permits, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts and closing a business. Data in *Doing Business 2011* are current as of June 1, 2010*. The indicators are used to analyze economic outcomes and identify what reforms have worked, where, and why.

The Doing Business methodology has limitations. Other areas important to business such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions, are not studied directly by Doing Business. To make the data comparable across economies, the indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policymakers in designing reform.

The data set covers 183 economies: 46 in Sub-Saharan Africa, 32 in Latin America and the Caribbean, 25 in Eastern Europe and Central Asia, 24 in East Asia and Pacific, 18 in the Middle East and North Africa and 8 in South Asia, as well as 30 OECD high-income economies.

The following pages present the summary Doing Business indicators for Iraq. The data used for this economy profile come from the Doing Business database and are summarized in graphs. These graphs allow a comparison of the economies in each region not only with one another but also with the "good practice" economy for each indicator.

The good-practice economies are identified by their position in each indicator as well as their overall ranking and by their capacity to provide good examples of business regulation to other countries. These good-practice economies do not necessarily rank number 1 in the topic or indicator, but they are in the top 10.

More information is available in the full report. *Doing Business 2011: Making a Difference for Entrepreneurs* presents the indicators, analyzes their relationship with economic outcomes and recommends reforms. The data, along with information on ordering the report, are available on the Doing Business website (www.doingbusiness.org).

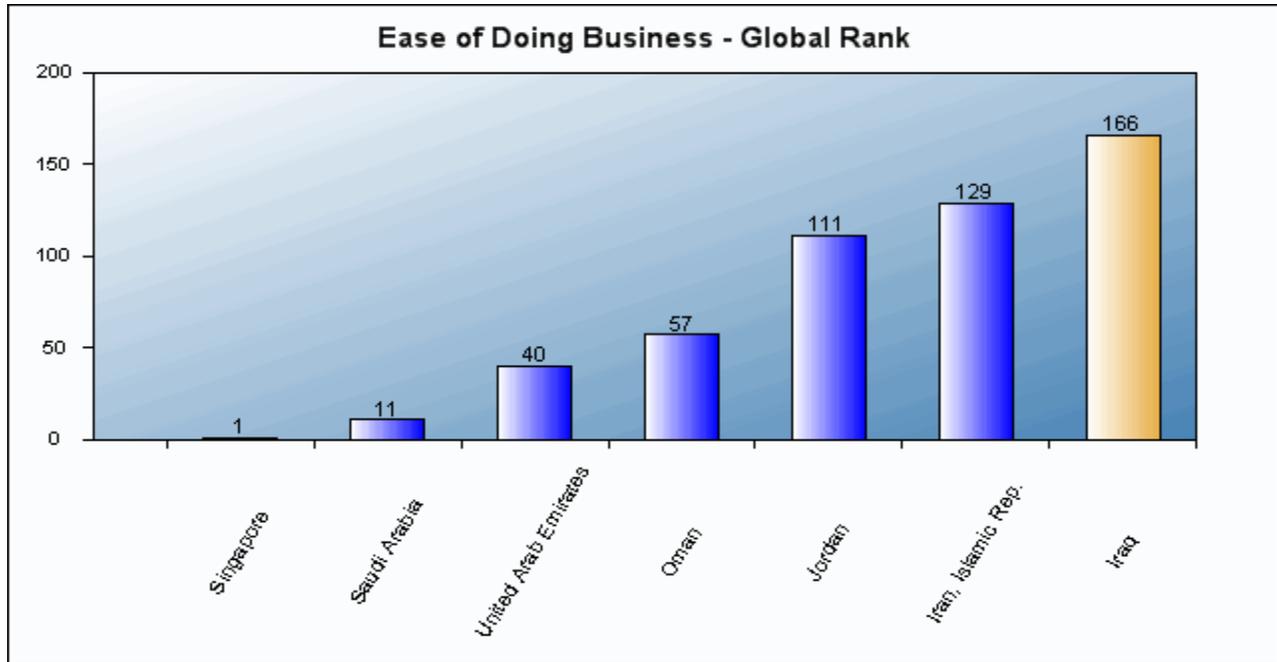

* Except for the Paying Taxes indicator that refers to the period January to December of 2009.

Note: 2008-2010 Doing Business data and rankings have been recalculated to reflect changes to the methodology and the addition of new economies (in the case of the rankings).

Economy Rankings - Ease of Doing Business

Iraq is ranked 166 out of 183 economies. Singapore is the top ranked economy in the Ease of Doing Business.

Iraq - Compared to global good practice economy as well as selected economies:

Iraq's ranking in Doing Business 2011

Rank	Doing Business 2011
Ease of Doing Business	166
Starting a Business	174
Dealing with Construction Permits	102
Registering Property	96
Getting Credit	168
Protecting Investors	120
Paying Taxes	54
Trading Across Borders	179
Enforcing Contracts	141
Closing a Business	183

Summary of Indicators - Iraq

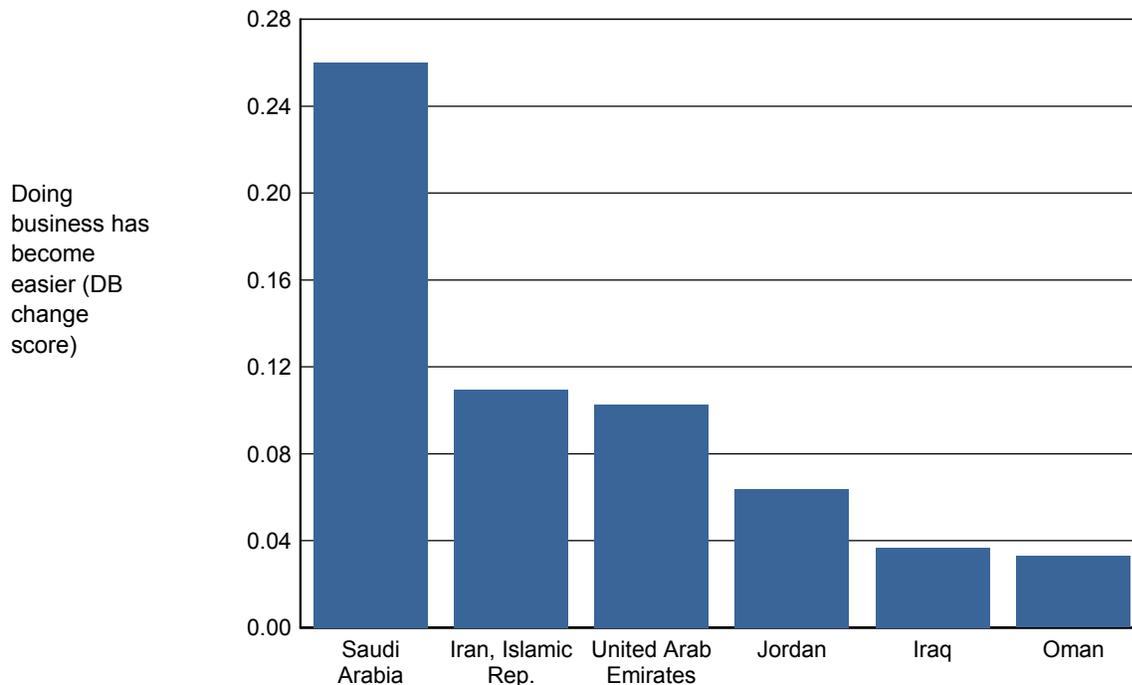

Starting a Business	Procedures (number)	11
	Time (days)	77
	Cost (% of income per capita)	107.8
	Min. capital (% of income per capita)	43.6
Dealing with Construction Permits	Procedures (number)	14
	Time (days)	215
	Cost (% of income per capita)	506.8
Registering Property	Procedures (number)	5
	Time (days)	51
	Cost (% of property value)	6.4
Getting Credit	Strength of legal rights index (0-10)	3
	Depth of credit information index (0-6)	0
	Public registry coverage (% of adults)	0.0
	Private bureau coverage (% of adults)	0.0
Protecting Investors	Extent of disclosure index (0-10)	4
	Extent of director liability index (0-10)	5
	Ease of shareholder suits index (0-10)	4
	Strength of investor protection index (0-10)	4.3
Paying Taxes	Payments (number per year)	13
	Time (hours per year)	312
	Profit tax (%)	14.9
	Labor tax and contributions (%)	13.5
	Other taxes (%)	0.0
	Total tax rate (% profit)	28.4
Trading Across Borders	Documents to export (number)	10
	Time to export (days)	80
	Cost to export (US\$ per container)	3550
	Documents to import (number)	10
	Time to import (days)	83
	Cost to import (US\$ per container)	3650

Enforcing Contracts	Procedures (number)	51
	Time (days)	520
	Cost (% of claim)	28.1
Closing a Business	Recovery rate (cents on the dollar)	0.0
	Time (years)	no practice
	Cost (% of estate)	no practice

The 5 year measure of cumulative change illustrates how the business regulatory environment has changed in 174 economies from *Doing Business 2006* to *Doing Business 2011*. Instead of highlighting which countries currently have the most business friendly environment, this new approach shows the extent to which an economy's regulatory environment for business has changed compared with 5 years ago.

This snapshot reflects all cumulative changes in an economy's business regulation as measured by the Doing Business indicators—such as a reduction in the time to start a business thanks to a one-stop shop or an increase in the strength of investor protection index thanks to new stock exchange rules that tighten disclosure requirements for related-party transactions.

This figure shows the distribution of cumulative change across the 9 indicators and time between *Doing Business 2006* and *Doing Business 2011*

Many economies have undertaken reforms to smooth the starting a business process in stages—and often as part of a larger regulatory reform program. A number of studies have shown that among the benefits of streamlining the process to start a business have been greater firm satisfaction and savings and more registered businesses, financial resources and job opportunities. Economies with higher entry costs are associated with a larger informal sector and a smaller number of legally registered firms.

Some reform outcomes

In Egypt reductions of the minimum capital requirement in 2007 and 2008 led to an increase of more than 30% in the number of limited liability companies.

In Portugal creation of One-Stop Shop in 2006 and 2007 resulted in a reduction of time to start a business from 54 days to 5. In 2007 and 2008 new business registrations were up by 60% compared with 2006.

In Malaysia reduction of registration fees in 2008 led to an increase in registrations by 16% in 2009.

What does Starting a Business measure?

Procedures to legally start and operate a company (number)

- Preregistration (for example, name verification or reservation, notarization)
- Registration
- Post registration (for example, social security registration, company seal)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

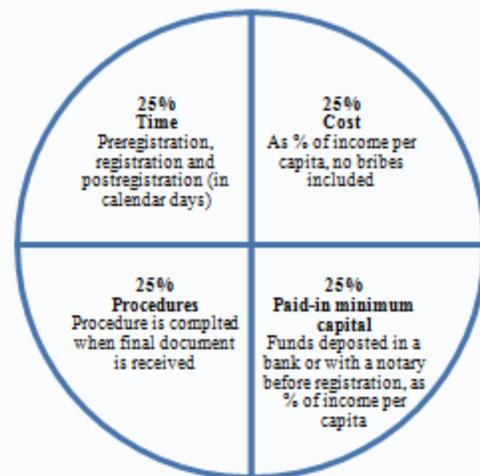

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law

Paid-in minimum capital (% of income per capita)

- Deposited in a bank or with a notary prior to registration begins

Starting a Business: getting a local limited liability company up and running
Rankings are based on 4 subindicators

Case Study Assumptions

- Doing Business records all procedures that are officially required for an entrepreneur to start up and formally operate an industrial or commercial business.
- Any required information is readily available and that all agencies involved in the start-up process function without corruption.

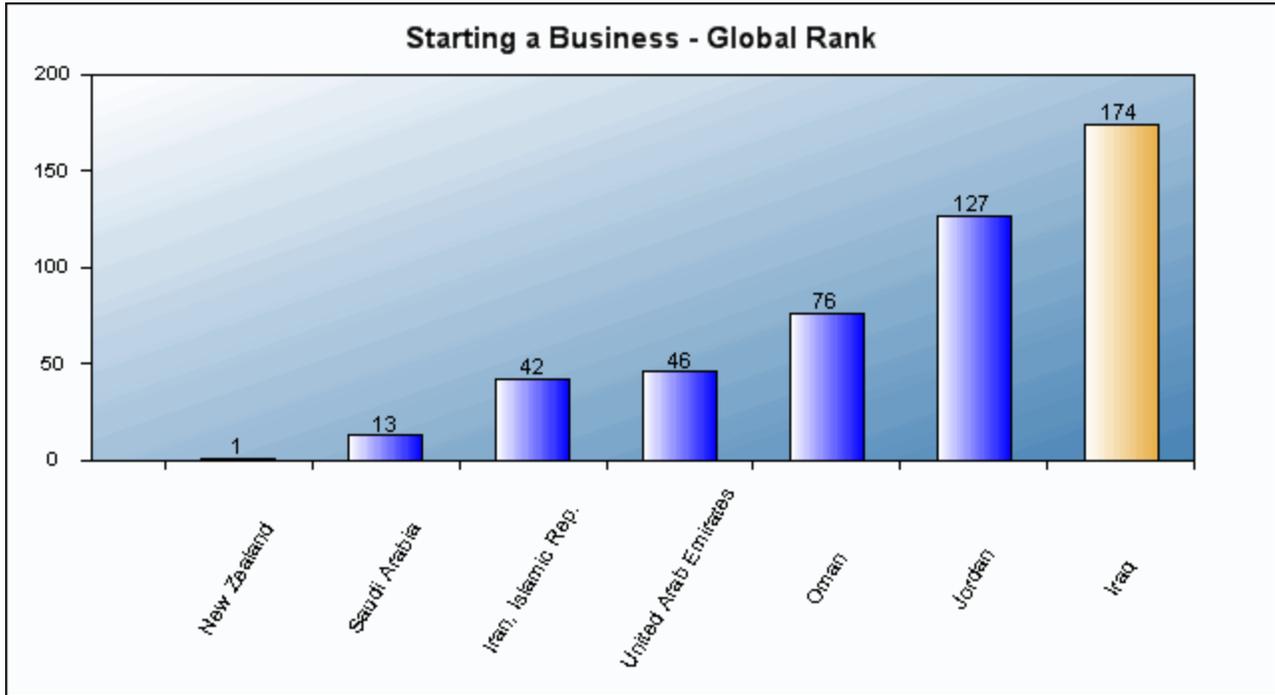

The business:

- is a limited liability company, located in the largest business city
- conducts general commercial activities
- is 100% domestically owned
- has a start-up capital of 10 times income per capita
- has a turnover of at least 100 times income per capita
- has at least 10 and up to 50 employees
- does not qualify for investment incentives or any special benefits
- leases the commercial plant and offices and is not a proprietor of real estate

1. Benchmarking Starting a Business Regulations:

Iraq is ranked 174 overall for Starting a Business.

Ranking of Iraq in Starting a Business - Compared to good practice and selected economies:

The following table shows Starting a Business data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of income per capita)	Min. capital (% of income per capita)
Denmark*			0.0	
New Zealand*	1	1		0.0

<i>Selected Economy</i>				
Iraq	11	77	107.8	43.6

<i>Comparator Economies</i>				
Iran, Islamic Rep.	6	8	4.0	0.8
Jordan	8	13	44.6	17.9
Oman	5	12	3.3	288.4
Saudi Arabia	4	5	7.0	0.0
United Arab Emirates	8	15	6.4	0.0

* The following economies are also good practice economies for :

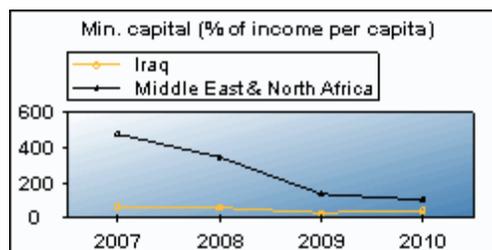

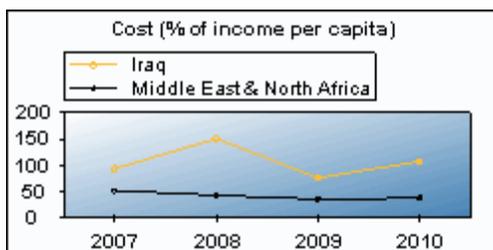

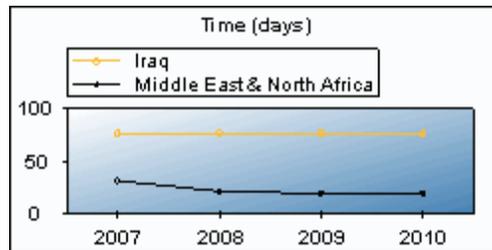

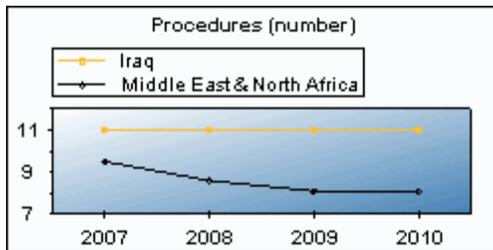

Procedures (number): **Canada**

Cost (% of income per capita): **Slovenia**

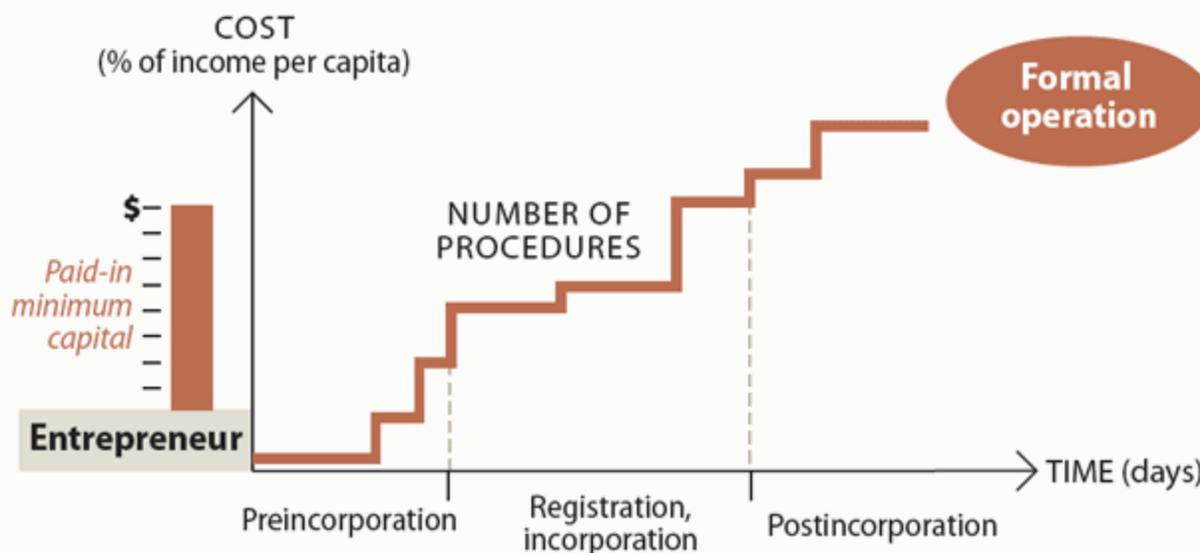

2. Historical data: Starting a Business in Iraq

Starting a Business data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	174	174
Procedures (number)	11	11	11	11
Time (days)	77	77	77	77
Cost (% of income per capita)	93.5	150.7	75.9	107.8
Min. capital (% of income per capita)	65.4	59.1	30.3	43.6

3. The following graphs illustrate the Starting a Business sub indicators in Iraq over the past 4 years:

What are the time, cost, paid-in minimum capital and number of procedures to get a local, limited liability company up and running?

This table summarizes the procedures and costs associated with setting up a business in Iraq.

STANDARDIZED COMPANY

Legal Form: Private Limited Liability Company

City: Baghdad

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Search for a company name; obtain a name reservation letter from the Baghdad Chamber of Commerce	2	IQD 350,000
2	Hire a lawyer to draft articles of association	1	IQD 900,000
3	Deposit initial capital at commercial bank and obtain confirmation receipt	2	IQD 5,000
4	File for registration at the Commercial Registry	14	IQD 300,000
5	Advertise incorporation notice in the newspaper	3	USD 70
6	Make company seal	2	IQD 20,000
7	Obtain registration certificate	1	no charge
8	Report to tax authority to establish tax registration	2	IQD 450,000

9	Legalize accounting books	2	USD 150
10	Register employees for social security	3	IQD 20,000
11	Apply for a trade license	45	IQD 200,000

Starting a Business Details - Iraq

Procedure 1 Search for a company name; obtain a name reservation letter from the Baghdad Chamber of Commerce

Time to complete: 2

Cost to complete: IQD 350,000

Comment: The company name should be an Arabic name. A special department at the Chamber of Commerce, Trade Names, starts by searching the suggested name through their system to see if the name is already taken or reserved by another company. Once a name is agreed upon and available, the name is reserved upon payment of a nominal fee. The Federation of the Chambers of Commerce is informed in order to ensure that the chosen name is not taken through other Iraqi chambers of commerce. This procedure likely requires more than one visit to both chambers and client coordination, ending with filing the name with the Registrar.

Procedure 2 Hire a lawyer to draft articles of association

Time to complete: 1

Cost to complete: IQD 900,000

Comment: Because lawyers are required to draft the articles of association, lawyers are usually also in charge of completing the registration process. The cost varies with the law firm.

Procedure 3 Deposit initial capital at commercial bank and obtain confirmation receipt

Time to complete: 2

Cost to complete: IQD 5,000

Comment: After the company deposit the initial capital and obtains a confirmation receipt, which must be include with the application submitted to the Companies Registrar . The Capital will be recorded in the account of the company, once complete registration accure, it can be withdrawn immediately after certificate assued by the Registrar.

Procedure 4 File for registration at the Commercial Registry

Time to complete: 14

Cost to complete: IQD 300,000

Comment: Fees are paid directly to the Commercial Registrar. The fee schedule adopted by the Companies Registrar at the Ministry combines different fees (Registrar's fee, stamp duty, filing fees, certain checking process, etc.), which are cumulative, according to company capital.

The Company Registrar circulates the registration certificate to the bank, the tax authority, and other relevant agencies, including labor and so forth.

The following documents and information must be presented to the Registrar:

The following documents and information must be presented to the Registrar as attached to the application for registration submitted to the Registrar.

- Baghdad Chamber of Commerce letter (to reserved or trade name).

- Chambers of Commerce Union letter (to ensure the consistency of the company or trade name with other registrations).
- Certified letter from the company's bank.
- Tax clearance for all Founders of the company.
- Iraqi identify cards.
- Iraqi certificated citizenship.
- Ration card (food distribution form).
- Address certificate letter from the mayor's office.
- Phone number(s), email address(es), and P.O. box number(s) of the company's founder(s).

The registration fees are calculated as follows:

- Baghdad Chamber of Commerce fees: IQD 45,000.
- Chambers of Commerce Union fees: IQD 15,000.
- Bank fees: IQD 25,000.
- Company registration fees: based on company capital.

Procedure 5 Advertise incorporation notice in the newspaper

Time to complete: 3

Cost to complete: USD 70

Comment: Once the registration has been approved, the Companies Registrar issues a letter to request the two required publications, but the process must be followed up by the registration agent (lawyer), who must submit a copy of each publication to the registry.

Procedure 6 Make company seal

Time to complete: 2

Cost to complete: IQD 20,000

Comment:

Procedure 7 Obtain registration certificate

Time to complete: 1

Cost to complete: no charge

Comment: Once all related procedures, including both publications, are complete, the Companies Registrar issues the certification of registration. On the date of issuance, the company acquires its legal personality. A registration circular will be sent to all entities concerned.

Procedure 8 Report to tax authority to establish tax registration

Time to complete: 2

Cost to complete: IQD 450,000

Comment: The initial tax registration is important to commence company operations. On a date set by the tax authority, the company must submit its first balance sheet to the tax authority, which will then provide the company its tax identification number on the same day.

Procedure 9 Legalize accounting books

Time to complete: 2

Cost to complete: USD 150

Comment: The General Body of Taxes must notarize or register the company accounting books and any new accounting books.

Procedure 10 Register employees for social security

Time to complete: 3

Cost to complete: IQD 20,000

Comment: The cost for social security registration depends on the number of employees. Any company employing more than three employees is bound, under the Social Security Law, to enroll their employees into the social security insurance program. The employer will deduct 5% from the employee's salary and add to it an amount equal to 12% of the employee's salary, resulting in a total payment of 17% to the Social Security Authority.

Procedure 11 Apply for a trade license

Time to complete: 45

Cost to complete: IQD 200,000

Comment:

In many economies, especially developing ones, complying with building regulations is so costly in time and money that many builders opt out. Builders may pay bribes to pass inspections or simply build illegally, leading to hazardous construction. Where the regulatory burden is large, entrepreneurs may tend to move their activity into the informal economy. There they operate with less concern for safety, leaving everyone worse off. In other economies compliance is simple, straightforward and inexpensive, yielding better results.

Some reform outcomes

In Burkina Faso, a one-stop shop for construction permits, "Centre de Facilitation des Actes de Construire", was opened in May 2008. The new regulation merged 32 procedures into 15, reduced the time required from 226 days to 122 and cut the cost by 40%. From May 2009 to May 2010 611 building permits were granted in Ouagadougou, up from an average of about 150 a year in 2002-06.

Toronto, Canada revamped its construction permitting process in 2005 by introducing time limits for different stages of the process and presenting a unique basic list of requirements for each project. Later it provided for electronic information and risk-based approvals with fast-track procedures. Between 2005 and 2008 the number of commercial building permits increased by 17%, the construction value of new commercial buildings by 84%.

What does the Dealing with Construction Permits indicator measure?

Procedures to legally build a warehouse (number)

- Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates
- Completing all required notifications and receiving all necessary inspections
- Obtaining utility connections for electricity, water, sewerage and a land telephone line
- Registering the warehouse after its completion (if required for use as collateral or for transfer of warehouse)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes

Case Study Assumptions

The business:

- is a small to medium-size limited liability company in the construction industry, located in the economy's largest business city
- is 100% domestically and privately owned and operated
- has 60 builders and other employees
- has at least one employee who is a licensed architect and registered with the local association of architects

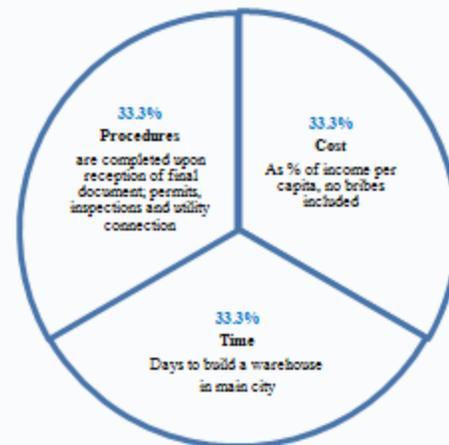

The warehouse:

- is a new construction (there was no previous construction on the land)
- has 2 stories, both above ground, with a total surface of approximately 1,300.6 sq. meters (14,000 sq. feet)
- has complete architectural and technical plans prepared by a licensed architect
- will be connected to electricity, water, sewerage (sewage system, septic tank or their equivalent) and a land telephone line
- will be used for general storage of non-hazardous goods, such as books
- will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements)

Dealing with Construction Permits:

Building a warehouse

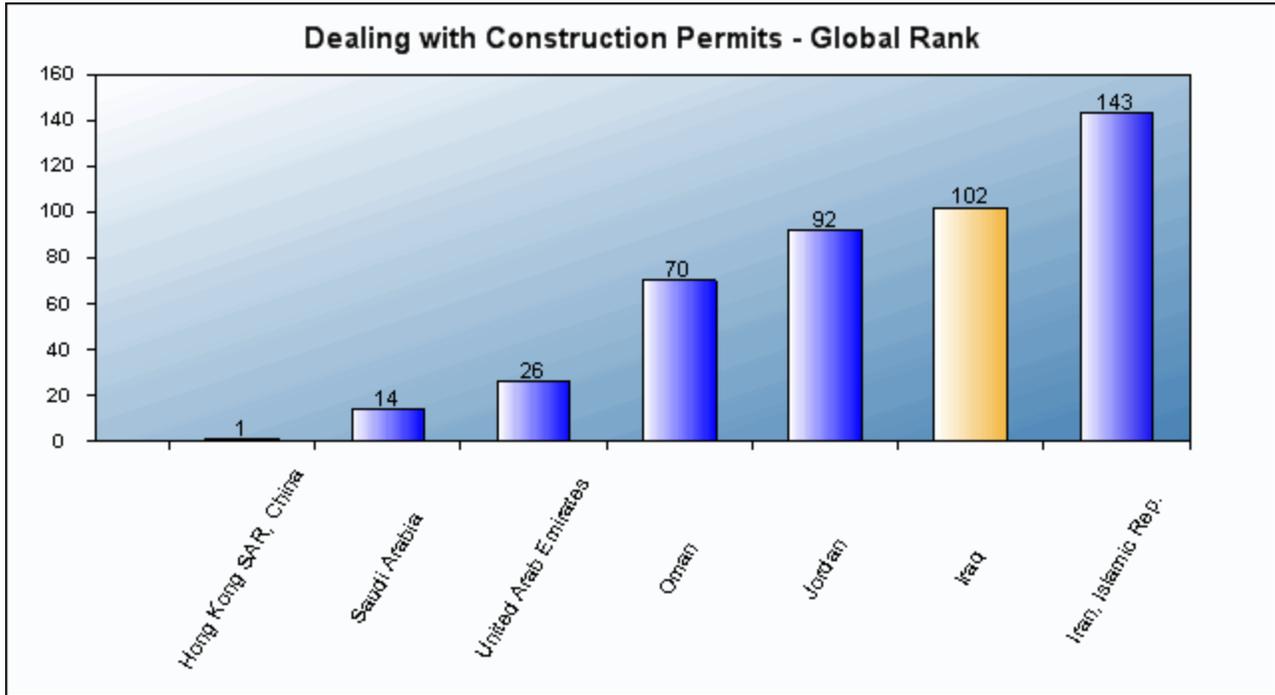

Rankings are based on 3 subindicators

1. Benchmarking Dealing with Construction Permits Regulations:

Iraq is ranked 102 overall for Dealing with Construction Permits.

Ranking of Iraq in Dealing with Construction Permits - Compared to good practice and selected economies:

The following table shows Dealing with Construction Permits data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of income per capita)
Denmark	6		
Qatar			0.8
Singapore		25	

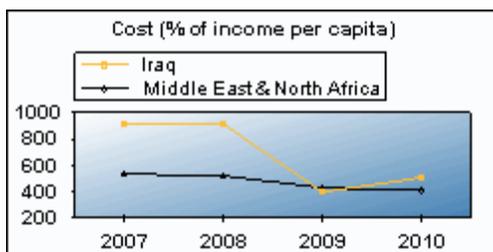

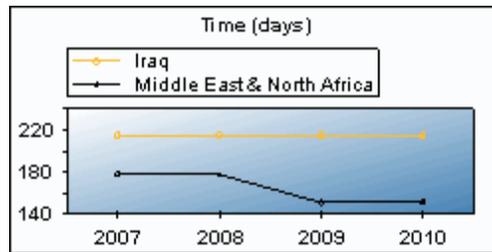

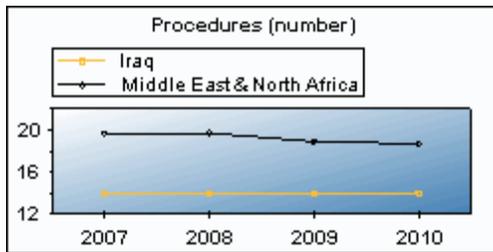

<i>Selected Economy</i>			
Iraq	14	215	506.8

<i>Comparator Economies</i>			
Iran, Islamic Rep.	17	322	382.3
Jordan	19	87	634.1

Rank	95	102
Procedures (number)	14	14	14	14
Time (days)	215	215	215	215
Cost (% of income per capita)	915.0	915.0	397.9	506.8

3. The following graphs illustrate the Dealing with Construction Permits sub indicators in Iraq over the past 4 years:

What are the time, cost and number of procedures to comply with formalities to build a warehouse?

The table below summarizes the procedures, time, and costs to build a warehouse in Iraq.

BUILDING A WAREHOUSE

City: Baghdad

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Pay paving and inspection fees to the municipality	3 days	USD 100
2	Obtain planning permission and location clearances from the municipal authority	28 days	USD 200
3	Obtain location clearances and guidelines for construction from the regional authority	14 days	USD 100
4	Obtain a lot plan with site map from the municipal authority	14 days	USD 500
5	Obtain project clearance from Ministry of Communications	30 days	USD 400
6 *	Obtain project approval from the electric power company	21 days	USD 8,000
7 *	Obtain project clearance from the water and sewerage directorate	14 days	USD 500
8	Obtain a building permit from the municipality	30 days	no charge

9	Obtain approval of completed project from the municipal authority	1 day	no charge
10	Obtain approval of the completed project from the National Center of Construction Laboratory	30 days	no charge
11 *	Request and receive final inspection by the National Center of Construction Laboratory	14 days	no charge
12 *	Obtain water and sewerage connection	65 days	USD 500
13 *	Obtain power connection	30 days	USD 300
14 *	Obtain telephone connection	30 days	USD 600

* Takes place simultaneously with another procedure.

Procedure 14 Obtain telephone connection

Time to complete: 30 days

Cost to complete: USD 600

Agency: Iraqna Telephone Company

Comment:

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. *Doing Business* records the full sequence of procedures necessary for a business to purchase a property from another business and transfer the property title to the buyer's name. In the past 6 years 105 economies undertook 146 reforms making it easier to transfer property. Globally, the time to transfer property fell by 38% and the cost by 10% over this time. The most popular feature of property registration reform in these 6 years, implemented in 52 economies, was lowering transfer taxes and government fees.

Some reform outcomes

Georgia now allows property transfers to be completed through 500 authorized users, notably banks. This saves time for entrepreneurs. A third of people transferring property in 2009 chose authorized users, up from 7% in 2007. Also, Georgia's new electronic registry managed 68,000 sales in 2007, twice as many as in 2003.

Belarus's unified and computerized registry was able to cope with the addition of 1.2 million new units over 3 years. The registry issued 1 million electronic property certificates in 2009.

What does the Registering Property indicator measure?

Registering Property: transfer of property between 2 local companies

Rankings are based on 3 subindicators

Procedures to legally transfer title on immovable property (number)

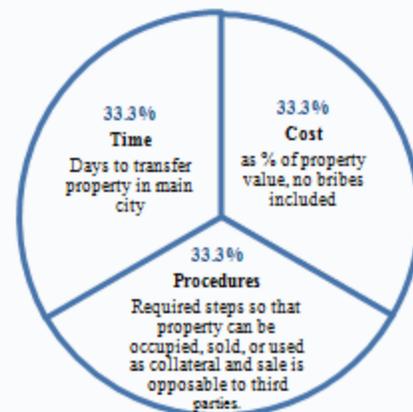

- Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)
- Registration in the economy's largest business city
- Post registration (for example, transactions with the local authority, tax authority or cadastre)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior personal contact with officials

Cost required to complete each procedure (% of property value)

- Official costs only, no bribes
- No value added or capital gains taxes included

Case Study Assumptions

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned.
- Are located in the periurban area of the economy's largest business city.
- Have 50 employees each, all of whom are nationals.
- Perform general commercial activities.

The property (fully owned by the seller):

- Has a value of 50 times income per capita. The sale price equals the value.
- Has no mortgages attached and has been under the same ownership for the past 10 years.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Is located in a periurban commercial zone, and no rezoning is required.
- Consists of a 557.4 square meters (6,000 square feet) land and 10 years old 2-story warehouse of 929 square meters (10,000 square feet) located on the land. The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. The property will be transferred in its entirety.

1. Benchmarking Registering Property Regulations:

Iraq is ranked 96 overall for Registering Property.

Ranking of Iraq in Registering Property - Compared to good practice and selected economies:

The following table shows Registering Property data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of property value)
New Zealand*		2	
Norway*	1		
Saudi Arabia			0.0

<i>Selected Economy</i>			
Iraq	5	51	6.4

<i>Comparator Economies</i>			
Iran, Islamic Rep.	9	36	10.5
Jordan	7	21	7.5
Oman	2	16	3.0
Saudi Arabia	2	2	0.0
United Arab Emirates	1	2	2.0

* The following economies are also good practice economies for :

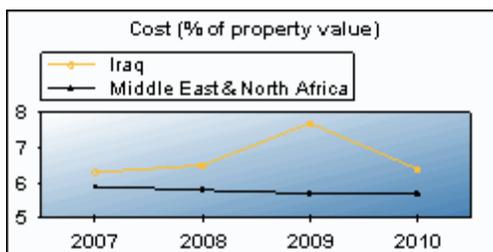

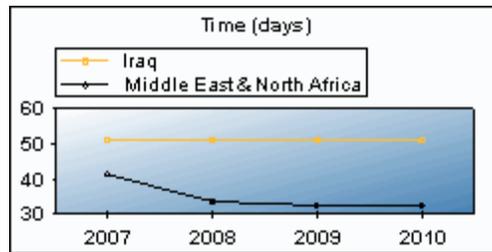

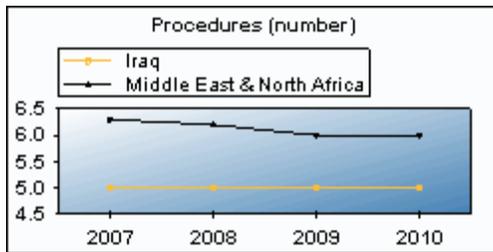

Procedures (number): United Arab Emirates

Time (days): Saudi Arabia, Thailand, United Arab Emirates

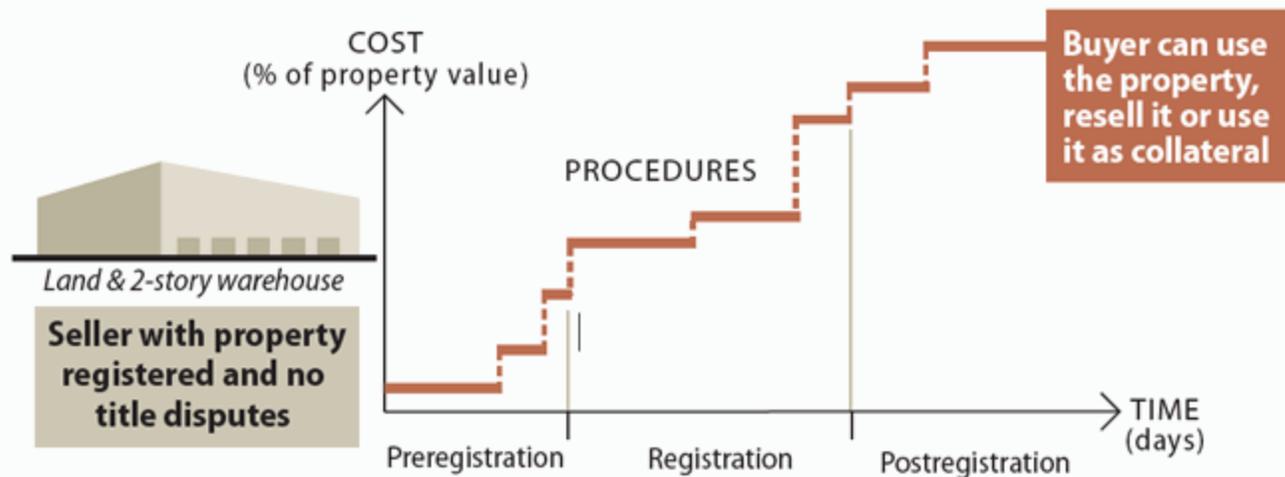

2. Historical data: Registering Property in Iraq

Registering Property data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	104	96
Procedures (number)	5	5	5	5
Time (days)	51	51	51	51
Cost (% of property value)	6.3	6.5	7.7	6.4

3. The following graphs illustrate the Registering Property sub indicators in Iraq over the past 4 years:

What are the time, cost and number of procedures required to transfer a property between 2 local companies?

This topic examines the steps, time, and cost involved in registering property in Iraq.

STANDARDIZED PROPERTY

Property Value: 114,779,904.16

City: Baghdad

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Obtain a new form for the property title and a cadastral map at the Real Property Registry	7 days	IQD 5,000 (copying Map and Deed)
2	Obtain an approval determining the type of the real property and zoning restrictions	21 days	IQD 10 000
3	Property inspection for valuation by the Real Estate registry	10 days	No cost

4	Evaluation by Tax Authorities	10 days	Income Tax is paid according to the following cumulative values: Value of Property (in IQD) First 20 million dinar Exempted 3% on the next 30 million dinars; 4% on the following 30 million up to 60 million dinars; 5% on the following 60 million up to 90 million dinars; and 6% of any amount over the following 90 million dinars (in practice for property values over 110 million dinars).
5	Apply for registration at the Real Property Registry	3 days	3% of property value (Registration fee)

Registering Property Details - Iraq

Procedure	1	Obtain a new form for the property title and a cadastral map at the Real Property Registry
Time to complete:		7 days
Cost to complete:		IQD 5,000 (copying Map and Deed)
Agency:		Real Property Registry
Comment:		<p>A new title elucidation (statement of data relevant to the property under registration) is drafted. This is free of charge.</p> <p>A competent team is formed to estimate the value of the property. This does not involve an inspection of the property. The team consists of the following persons:</p> <ul style="list-style-type: none">- The Director General of the Real Property Registry of his representative- The representative of the State Commission of Income Tax- The applicant for survey or his representative. <p>- A request is submitted to the registry manager to obtain new title elucidation</p> <p>- The seller and the buyer must be present in person or their legal representative together.</p> <p>- Checking the seller record in the computer Database to identify if he was former official in the previous regime and if the property was inalienable.</p> <p>- Checking on computer whether there is any mortgage, encumbrances or not, then fix the information on the new deed title draft.</p> <p>- checking the IDs issuance for both the seller & buyer. (Proof of identity is obtained by sending a letter sent to the nationality authority - jinsiya).</p> <p>- Food card, Baghdad resident card, Iraqi Nationality Certificate, Jiseea, Land Deed. The cadastral map of the property should be in the file and send sent to the zone municipality.</p> <p>Note: sometimes the old file & documents of the property are missing from the archive and checking requires more time.</p>
Procedure	2	Obtain an approval determining the type of the real property and zoning restrictions
Time to complete:		21 days
Cost to complete:		IQD 10 000
Agency:		Municipality
Comment:		<p>An approval to the transfer should be obtained from the Municipality Office, determining the type of the real property and the way to occupy it (zoning restrictions). It is quite easy to obtain this approval because it will not alter the way to use the property but only confirm that the way to occupy the property will be as per the purpose being set by the Municipality.</p> <p>The Municipality will check for any inconsistency on the property, if there are any required charges have to be paid.</p> <p>An investigation team from the Municipality will visit the property to confirm its status and if there were any changes done since its last investigation and in correlation with the old property map. Investigators are governmental employees only. Arrangement of the investigation team and fulfillment of the visit take 2-3 days. The new investigation report will be attached to the new cadastral certificate.</p> <p>The Municipality will check all services charges owe by the property owner in order to be paid prior to the approval that the property is free from any outstanding charges, such as Electricity, Drinking water, waste water and road asphaltting.</p> <p>Unless the Seller have the receipt that the asphaltting charges were paid, even it was done more</p>

than 10 years ago, he will have to pay about 2000 IQD / meter length of asphalted road in front of the property, in addition of time delay.

After completion all requirements, Municipality will send the New Cadastral Certificate (NCC)by mail to the Cadastre.

The overall time elapsed from receipt of the NCC by the municipality by mail - property investigation - pay all due charges until reception by the Cadastre by mail as well, the average time is 21 days.

A committee to visit the property for inspection to check if there is any changes or additions with reference to the original construction map, this will determine the amount of fines to be paid.

- inspection fees 4000 IQD.
- numeration fees 6000 IQD.
- paving fees = the front of the property $m^2 \times 2455$ IQD / m^2 .
- in case of fines impsed in the past , all fine should be paid.

Procedure 3 Property inspection for valuation by the Real Estate registry

Time to complete: 10 days

Cost to complete: No cost

Agency: Real Estate Registry

Comment: Upon receipt of the New Cadastral Certificate from the Municipality, a competent team is formed by the cadastre (Real Property Registry Office) consisting of the following persons in order to estimate the current value of the property. There is fixed day for the purpose of property evaluation of each area covered by the same property registry office.

- Representative of the real property registry office.
- Representative of the Province Main real property registry office.
- Representative of the state commission of income tax.

The evaluation team have regulations for the evaluation range of each land location depending on the degree of civilization, how close to the city center, type and level of the property building, how old it is, the type of roofing and finishing with endeavor of evaluation with the minimum price / meter square or higher. From the time the New Cadastral Certificate is received by the Real Estate Registry and the time the inspection appointment is confirmed, it will take approximately 3 days.

The inspection will take place, and the team will provide a report that will be used for the evaluation of the property. However, if the buyer objects to the estimate, then there is another inspection and a final report will be re-issued. All documents will then be sent to the Tax Authority once the report is final. This report will be used as a base by the Tax Authority to estimate the amount of taxes to be paid. Transmission of documents to the Tax Authority is done by mail.

Note: The buyer will provide transportation for the evaluation team and will be charged an amount between 10000-15000 Dinars. This is an unofficial cost. There is possibility to request a certificate showing that the property is free of mortgage and encumbrances from the Registry Office by a governmental authority only.

Procedure 4 Evaluation by Tax Authorities

Time to complete: 10 days

Cost to complete:	Income Tax is paid according to the following cumulative values: Value of Property (in IQD) First 20 million dinar Exempted 3% on the next 30 million dinars; 4% on the following 30 million up to 60 million dinars; 5% on the following 60 million up to 90 million dinars; and 6% of any amount over the following 90 million dinars (in practice for property values over 110 million dinars).
Agency:	Income Tax Authority
Comment:	<p>The Seller or his representative has to follow up on the receipt and measures in the Tax Commission Office. First, the Tax commission will check whether the property is occupied or not and compare with information they have in their files.</p> <p>Then both the Seller and the Buyer must obtain several tax clearances even from other Tax Authorities offices. And all documents are sent to the Tax Authority by mail. The time needed is 2 days on average for this step.</p> <p>The Tax Authority might or might not object the evaluation of the Property Registry Office. If they decide to evaluate the property with higher price, the seller cannot object and the tax calculation will depend on the new evaluation, whichever is higher.</p> <p>The seller pays the tax for the property evaluation according to the following fee schedule (this amount is apportioned among partners if the land is owned jointly);</p> <p>First 20 million dinar exempted. 3% up to 30 million dinars; 4% of any amount over 30 million up to 60 million dinars; 5% of any amount over 60 million up to 90 million dinars; and 6% of any amount over 90 million dinars.</p> <p>Payment is made by certified check from a named Bank (Governmental) by all amounts of tax decided by the Tax Authority. The final Tax cleared Cadastral Certificate will be resend to the Property Registry Office by mail.</p>

Procedure 5 Apply for registration at the Real Property Registry

Time to complete:	3 days
Cost to complete:	3% of property value (Registration fee)
Agency:	Real Property Registry
Comment:	<p>The buyer applies for registration and a new title at the Real Property Registry. Afterwards, the transaction process will be recorded in the official registers and the buyer will then be granted a new title of property on the same day.</p> <p>New remarks:</p> <p>The same section which opened the new cadastral document will calculate the amount of property transfer fees which is equal to % 3 of the property evaluation, Payment is made by certified cheque from either Named Governmental Bank or Named Private Bank. Payment can also be made in cash at the Property Registry Office.</p> <p>Once payment is received, the Property Registry Office will issue a new Property Deed in the name of the Buyer, then the process regarded finalized. The Property Registry Office will send later the new ownership details to the Main property registration office.</p> <p>The registration fee, equal to 3% of the value of the property, is paid by means of an endorsed cheque to the account of the Real Property Registry before applying for registration.</p>

Through two sets of indicators, *Doing Business* assesses the legal rights of borrowers and lenders with respect to secured transactions and the sharing of credit information. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through either a public credit registry or a private credit bureau. Credit information systems mitigate the ‘information asymmetry’ in lending and enable lenders to view a borrower’s financial history (positive or negative), providing them with valuable information to consider when assessing risk. Credit information systems benefit borrowers as well, allowing good borrowers to establish a reputable credit history which will enable them to access credit more easily. The Legal Rights Index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. Sound collateral laws will enable businesses to use their assets, especially movable property, as security to generate capital while having strong creditor’s rights has been associated with higher ratios of private sector credit to GDP.

Some reform outcomes

After Vietnam’s new Civil Code was enacted in 2005, a decree further clarified the provisions governing secured transactions. Since the inclusion of the new provisions, the number of registrations increased from 43,000 (2005) to 120,000 (end of 2008).

In 2008, when Zambia established a private credit bureau, its database initially covered about 25,000 borrowers. Thanks to a strong communication campaign and a central bank directive, coverage has grown 10-fold in the past 2 years, exceeding 200,000 by the beginning of 2010.

What do the Getting Credit indicators measure?

Strength of legal rights index (0–10)

- Protection of rights of borrowers and lenders through collateral laws
- Protection of secured creditors’ rights through bankruptcy laws

Depth of credit information index (0–6)

- Scope and accessibility of credit information distributed by public credit registries and private credit bureaus

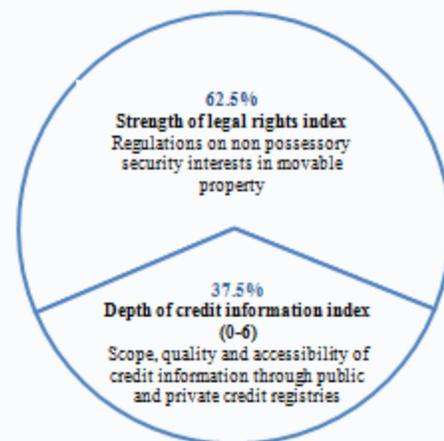

Public credit registry coverage (% of adults)

- Number of individuals and firms listed in public credit registry as percentage of a adult population

Private credit bureau coverage (% of adults)

- Number of individuals and firms listed in largest private credit bureau as percentage of a adult population

Getting Credit: collateral rules and credit information

Note: Private bureau coverage and public credit registry coverage are measured but do not count for the rankings.

Case Study Assumptions (applying to the Legal Rights Index only)

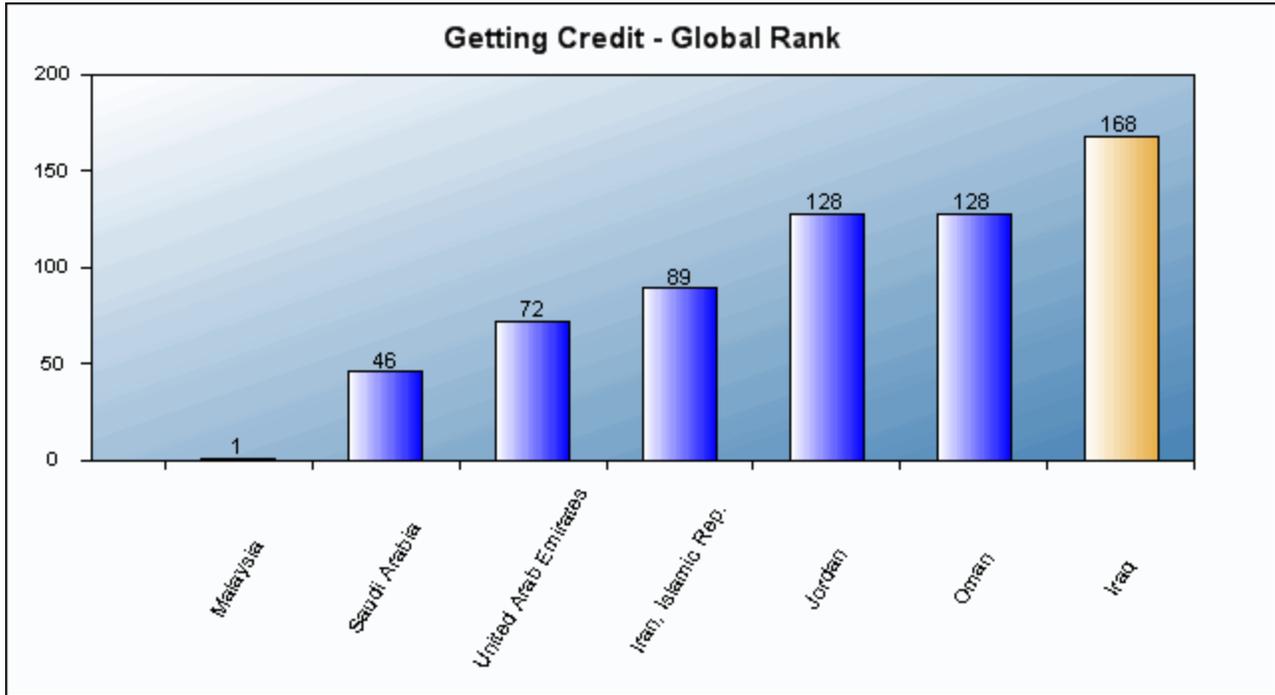

The Debtor

- is a Private Limited Liability Company
- has its Headquarters and only base of operations in the largest business city
- obtains a loan from a local bank (the Creditor) for an amount up to 10 times income (GNI) per capita
- Both creditor and debtor are 100% domestically owned.

1. Benchmarking Getting Credit Regulations:

Iraq is ranked 168 overall for Getting Credit.

Ranking of Iraq in Getting Credit - Compared to good practice and selected economies:

The following table shows Getting Credit data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Strength of legal rights index (0-10)	Depth of credit information index (0-6)	Public registry coverage (% of adults)	Private bureau coverage (% of adults)
New Zealand*				100.0
Portugal			67.1	
Singapore*	10			
United Kingdom		6		

<i>Selected Economy</i>				
Iraq	3	0	0.0	0.0

<i>Comparator Economies</i>				
Iran, Islamic Rep.	4	4	22.7	4.5

Oman	4	2	19.6	0.0
Saudi Arabia	5	6	0.0	18.0
United Arab Emirates	4	5	8.4	17.7

* The following economies are also good practice economies for :

Strength of legal rights index (0-10): Hong Kong, China, Kenya, Kyrgyz Republic, Malaysia

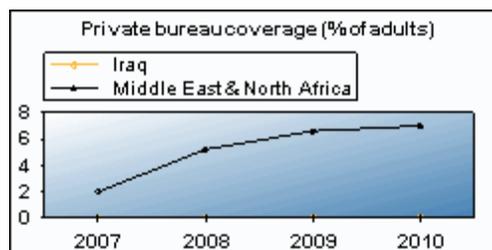

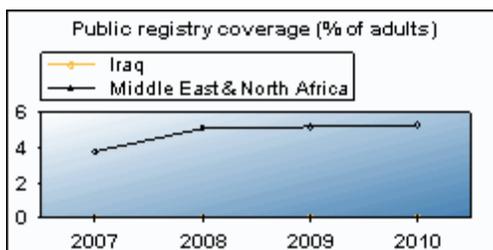

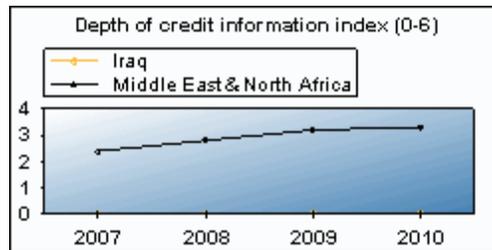

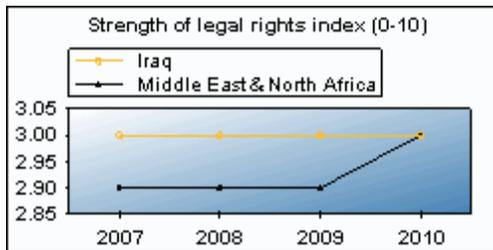

Private bureau coverage (% of adults): Argentina, Australia, Canada, Iceland, Ireland, Norway, Sweden, United Kingdom, United States

27 countries have the highest credit information index.

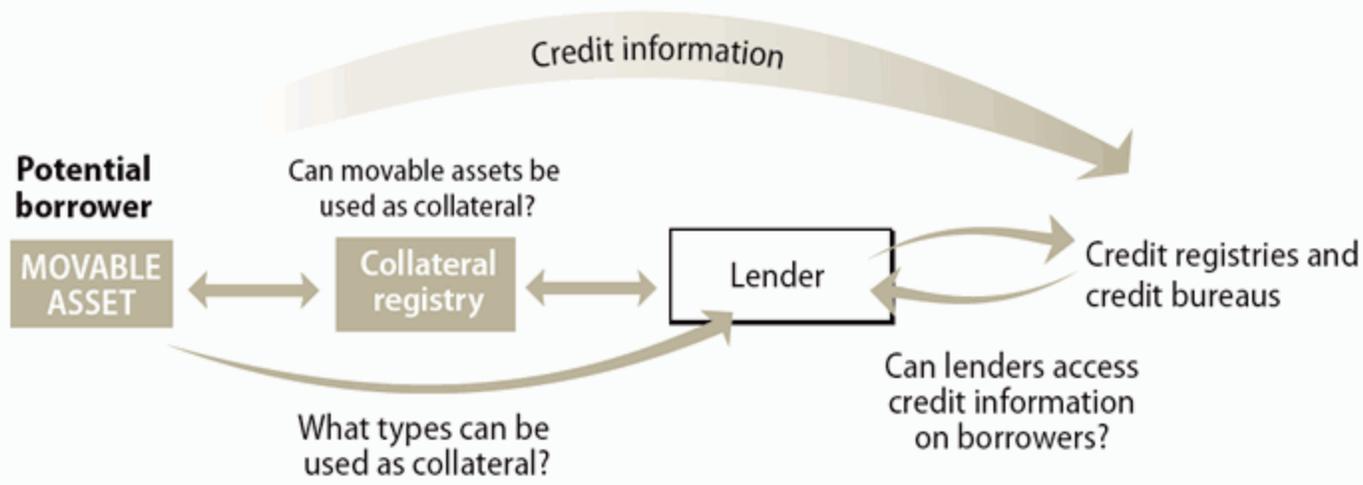

2. Historical data: Getting Credit in Iraq

Getting Credit data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	167	168
Strength of legal rights index (0-10)	3	3	3	3
Depth of credit information index (0-6)	0	0	0	0
Private bureau coverage (% of adults)	0.0	0.0	0.0	0.0
Public registry coverage (% of adults)	0.0	0.0	0.0	0.0

3. The following graphs illustrate the Getting Credit sub indicators in Iraq over the past 4 years:

**Do lenders have credit information on entrepreneurs seeking credit?
Is the law favorable to borrowers and lenders using movable assets as collateral?**

The following table summarize legal rights of borrowers and lenders, and the availability and legal framework of credit registries in Iraq.

Getting Credit Indicators (2010)			Indicator
Private bureau coverage (% of adults)	Private credit bureau	Public credit registry	0
Are data on both firms and individuals distributed?	No	No	0
Are both positive and negative data distributed?	No	No	0
Does the registry distribute credit information from retailers, trade creditors or utility companies as well as financial institutions?	No	No	0
Are more than 2 years of historical credit information distributed?	No	No	0
Is data on all loans below 1% of income per capita distributed?	No	No	0
Is it guaranteed by law that borrowers can inspect their data in the largest credit registry?	No	No	0
Coverage	0.0	0.0	
Number of individuals		0	0
Number of firms		0	0

Can any business use movable assets as collateral while keeping possession of the assets; and any financial institution accept such assets as collateral ?

Yes

Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral?

No

Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral?

No

May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets ?

No

Is a general description of debts and obligations permitted in collateral agreements, so that all types of obligations and debts can be secured by stating a maximum amount rather than a specific amount between the parties ?

No

Is a collateral registry in operation, that is unified geographically and by asset type, as well as indexed by the grantor's name of a security right ?

No

Do secured creditors have absolute priority to their collateral outside bankruptcy procedures?

No

Do secured creditors have absolute priority to their collateral in bankruptcy procedures?

Yes

During reorganization, are secured creditors' claims exempt from an automatic stay on enforcement?

Yes

Does the law authorize parties to agree on out of court enforcement?

No

Stronger investor protections matter for the ability of companies to raise the capital needed to grow, innovate, diversify and compete. This is all the more crucial in times of financial crisis when entrepreneurs must navigate through defiant environments to finance their activities. Using 3 indices of investor protection, *Doing Business* measures how economies regulate a standard case of self-dealing, use of corporate assets for personal gains. Since 2005, 51 economies have strengthened investor protections as measured by *Doing Business*.

Some reform outcomes

In Indonesia, an economy that consistently improved its laws regulating investor protections, the number of firms listed on the Indonesia Stock Exchange increased from 331 to 396 between 2004 and 2009. Meanwhile, market capitalization grew from 680 trillion rupiah (\$75 billion) to 1,077 trillion rupiah (\$119 billion).

After Thailand amended its laws in 2006 and 2008, more than 85 transactions that failed to comply with the disclosure standards were suspended. Thirteen were deemed prejudicial and were therefore canceled, thus preventing damage to the companies involved and preserving their value. Companies were not deterred either, as more than 30 new companies joined the stock exchange since 2005 bringing the number of listed companies to 523.

What do the Protecting Investors indicators measure?

Extent of disclosure index (0–10)

- Who can approve related-party transactions
- Requirements for external and internal disclosure in case of related-party transactions

Extent of director liability index (0–10)

- Ability of shareholders to hold the interested party and the approving body liable in case of a prejudicial related-party transaction
- Available legal remedies (damages, repayment of profits, fines, imprisonment and rescission of the transaction)
- Ability of shareholders to sue directly or derivatively

Ease of shareholder suits index (0–10)

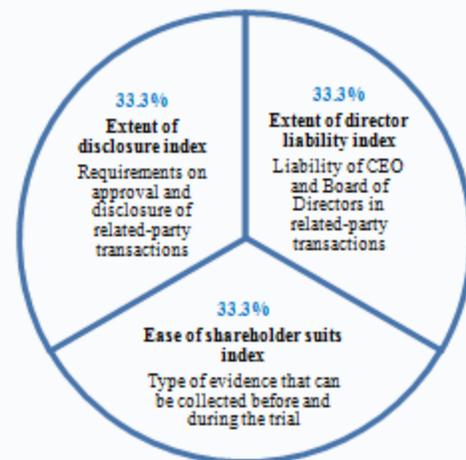

- Documents and information available during trial
- Access to internal corporate documents (directly or through a government inspector)

Strength of investor protection index (0–10)

- Simple average of the extent of disclosure, extent of director liability and ease of shareholder suits indices

Protecting Investors: minority shareholder rights in related-party transactions

Rankings are based on 3 subindicators

Case Study Assumptions

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders),
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

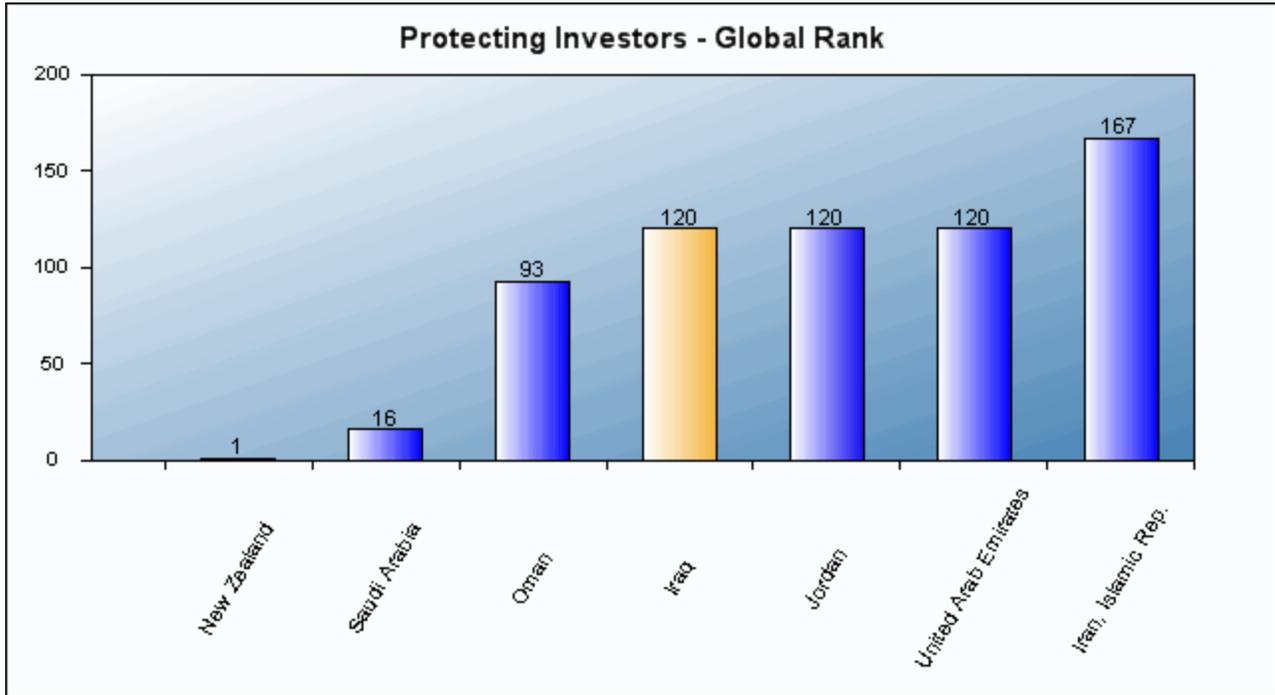

The transaction

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.
- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to the purchasing company.
- Shareholders sue the interested parties and the members of the board of directors.

1. Benchmarking Protecting Investors Regulations:

Iraq is ranked 120 overall for Protecting Investors.

Ranking of Iraq in Protecting Investors - Compared to good practice and selected economies:

The following table shows Protecting Investors data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Strength of investor protection index (0-10)
New Zealand	9.7

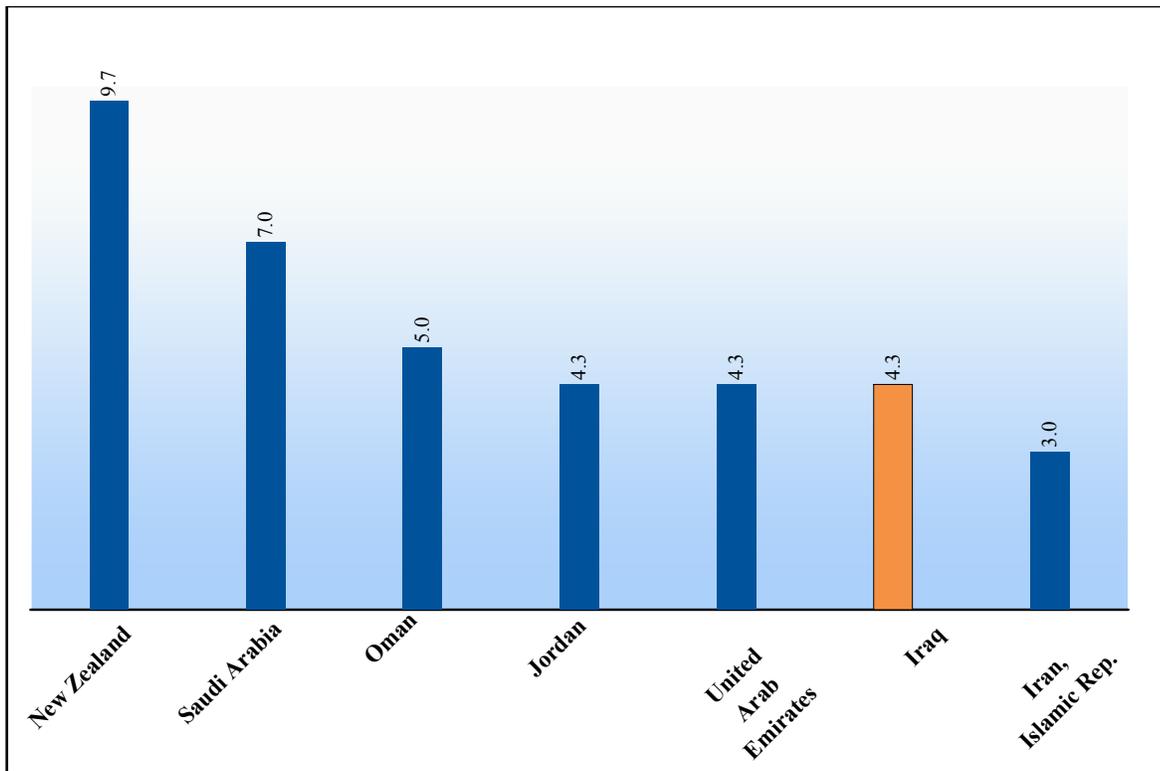

<i>Selected Economy</i>	
Iraq	4.3

<i>Comparator Economies</i>	
Iran, Islamic Rep.	3.0
Jordan	4.3
Oman	5.0
Saudi Arabia	7.0
United Arab Emirates	4.3

2. Historical data: Protecting Investors in Iraq

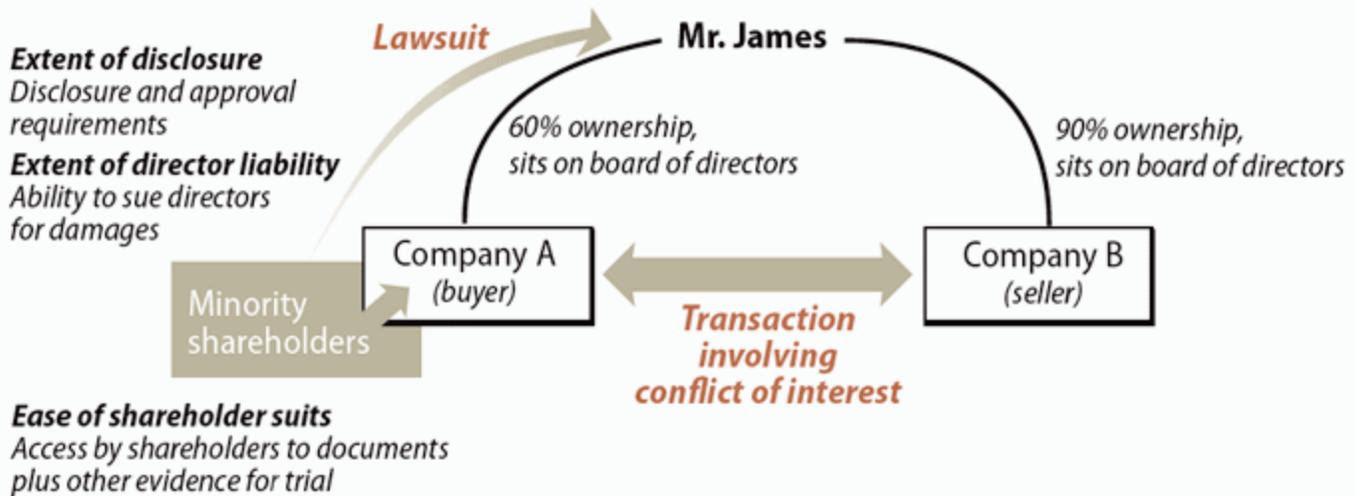

Protecting Investors data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	119	120
Strength of investor protection index (0-10)	4.3	4.3	4.3	4.3

3. The following graph illustrates the Protecting Investors index in Iraq compared to best practice and selected Economies:

Note: The higher the score, the greater the investor protection.

How well are minority shareholders protected against self-dealing in related-party transactions?

The table below provides a full breakdown of how the disclosure, director liability, and shareholder suits indexes are calculated in Iraq.

Protecting Investors Data (2010)	Indicator
Extent of disclosure index (0-10)	4
What corporate body provides legally sufficient approval for the transaction?	1
Whether immediate disclosure of the transaction to the public and/or shareholders is required?	0
Whether disclosure of the transaction in published periodic filings (annual reports) is required?	1
Whether disclosure of the conflict of interest by Mr. James to the board of directors is required?	2
Whether an external body must review the terms of the transaction before it takes place?	0
Extent of director liability index (0-10)	5
Whether shareholders can hold Mr. James liable for the damage that the Buyer-Seller transaction causes to the company?	1
Whether shareholders can hold the approving body (the CEO or board of directors) liable for the damage that the Buyer-Seller transaction causes to the company?	1
Whether a court can void the transaction upon a successful claim by a shareholder plaintiff?	2
Whether Mr. James pays damages for the harm caused to the company upon a successful claim by the shareholder plaintiff?	0

Whether Mr. James repays profits made from the transaction upon a successful claim by the shareholder plaintiff?	0
Whether fines and imprisonment can be applied against Mr. James?	0
Whether shareholders can sue directly or derivatively for the damage that the Buyer-Seller transaction causes to the company?	1
Ease of shareholder suits index (0-10)	4
Whether the plaintiff can obtain any documents from the defendant and witnesses during trial?	3
Whether the plaintiff can directly question the defendant and witnesses during trial?	1
Whether the plaintiff can request categories of documents from the defendant without identifying specific ones?	0
Whether shareholders owning 10% or less of Buyer's shares can request an inspector to investigate the transaction?	0
Whether the level of proof required for civil suits is lower than that of criminal cases?	0
Whether shareholders owning 10% or less of Buyer's shares can inspect transaction documents before filing suit?	0
Strength of investor protection index (0-10)	4.3

Taxes are essential to provide public amenities, infrastructure and services which are crucial for a properly functioning economy. *Doing Business* data show that economies where it is more difficult and costly to pay taxes have larger shares of informal sector activity. More than 60% of economies have reformed in the last 6 years and are starting to see concrete results.

Some reform outcomes

Colombia introduced a new electronic system for social security and labor taxes in 2006 and by 2008 the social security contributions collected from small and medium-size companies rose by 42%, to 550 billion pesos.

Mauritius reduced the corporate income tax rate from 25% to 15% and removed exemptions and industry-specific allowances in 2006 and saw their corporate income tax revenue grow by 27% in the following year, and in 2008/09 it increased by 65%.

What do the Paying taxes indicators measure?

Tax payments for a manufacturing company in 2009
(number per year adjusted for electronic or joint filing and payment)

- Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)
- Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

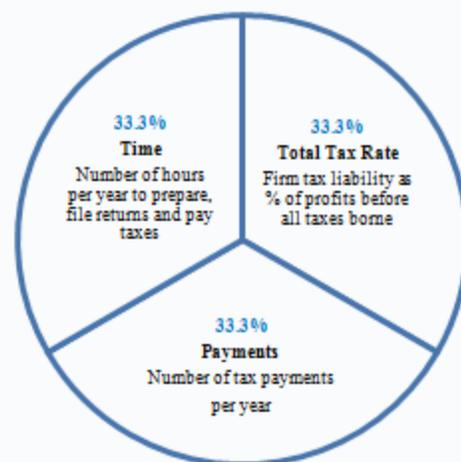

- Collecting information and computing the tax payable
- Completing tax return forms, filing with proper agencies
- Arranging payment or withholding
- Preparing separate tax accounting books, if required

Total tax rate (% of profit)

- Profit or corporate income tax
- Mandatory social contributions and labor taxes paid by the employer
- Property and property transfer taxes
- Dividend, capital gains and financial transactions taxes
- Waste collection, vehicle, road and other taxes

Paying Taxes: tax compliance for a local manufacturing company

Rankings are based on 3 subindicators

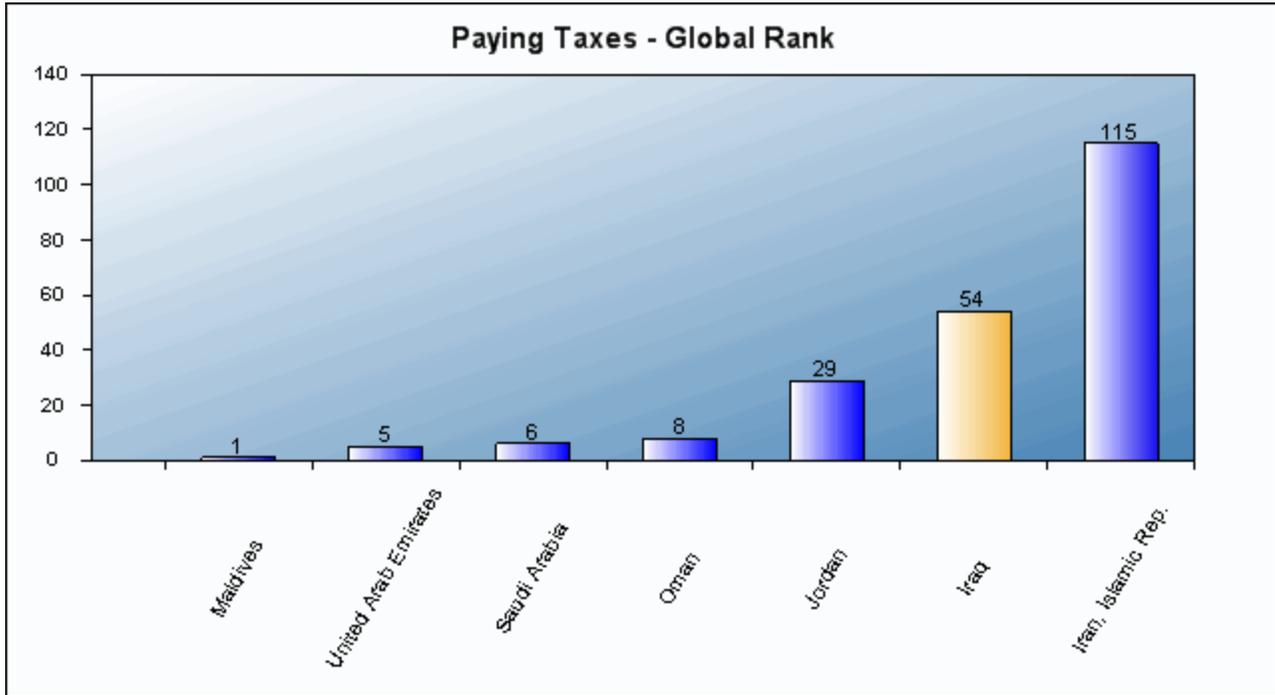

Case Study Assumptions

- TaxpayerCo is a medium-size business that started operations 2 years ago.
- Tax practitioners are asked to review its financial statements, as well as a standard list of transactions that the company completed during the year.
- Respondents are asked how much in taxes and mandatory contributions the business must pay and what the process is for doing so.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions paid during the second year of operation are recorded.
- Taxes and mandatory contributions are measured at all levels of government
- Taxes and mandatory contributions include corporate income tax, turnover tax, all labor taxes and contributions paid by the company.
- A range of standard deductions and exemptions are also recorded.

1. Benchmarking Paying Taxes Regulations:

Iraq is ranked 54 overall for Paying Taxes.

Ranking of Iraq in Paying Taxes - Compared to good practice and selected economies:

The following table shows Paying Taxes data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Payments (number per year)	Time (hours per year)	Total tax rate (% profit)
Maldives*	3	0	
Timor-Leste			0.2

<i>Selected Economy</i>			
Iraq	13	312	28.4

<i>Comparator Economies</i>			
Iran, Islamic Rep.	20	344	44.1
Jordan	26	101	31.2
Oman	14	62	21.6
Saudi Arabia	14	79	14.5
United Arab Emirates	14	12	14.1

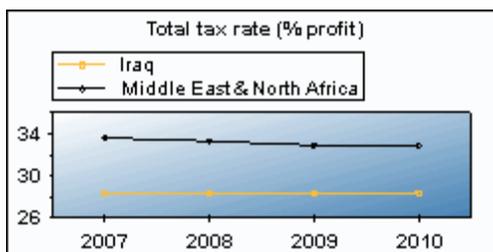

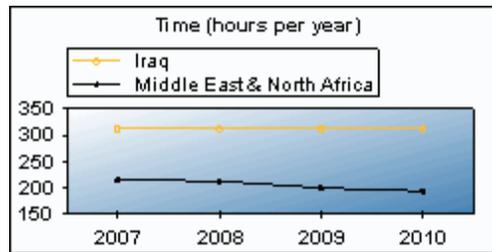

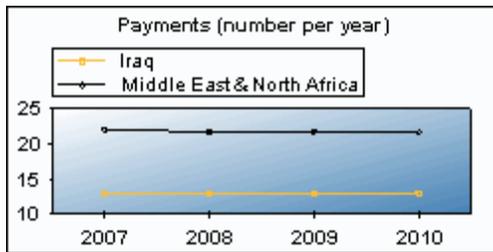

* The following economies are also good practice economies for :

Payments (number per year): Qatar

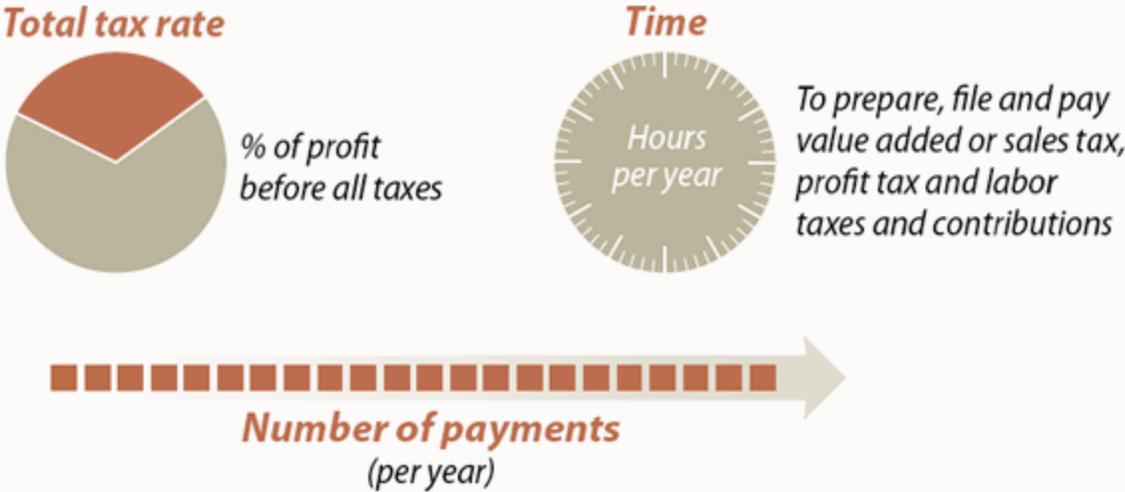

2. Historical data: Paying Taxes in Iraq

Paying Taxes data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	52	54
Total tax rate (% profit)	28.4	28.4	28.4	28.4
Payments (number per year)	13	13	13	13
Time (hours per year)	312	312	312	312

3. The following graphs illustrate the Paying Taxes sub indicators in Iraq over the past 4 years:

What are the time, total tax rate and number of payments necessary for a local medium-sized company to pay all taxes?

The table below addresses the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year in Iraq, as well as measures of administrative burden in paying taxes.

Tax or mandatory contribution	Payments (number)	Notes on Payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% profit)	Notes on TTR
Social security	12		288	12.0%	gross salaries	13.50	
Corporate income tax	1		24	15.0%	taxable profit	14.90	
Totals	13		312			28.4	

Making trade between countries easier is increasingly important for business in today's globalized world. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Trade facilitation tools such as electronic data interchange systems, risk-based inspections, and single windows help improve an economy's trading environment and boost firms' international competitiveness. *Doing Business* trade indicators take into account documents, cost and time associated with every procedure for trading a standard shipment of goods by ocean transport. Research indicates that exporters in developing countries have much more to gain by a 10% drop in their trading costs than from a similar decrease of the tariffs applied to their products in global markets.

Some reform outcomes

In Georgia, reducing customs clearance time by a day has led to operational savings of an estimated \$288 per truck, or an annual \$133 million for the country's whole trading community given the growing amount of cross-border trade in recent years.

In Korea, predictable cargo processing times and rapid turnover by ports and warehouses provide a benefit to the Korean economy of some \$2 billion annually.

What do the Trading Across Borders indicators measure?

Trading Across Borders: exporting and importing by ocean transport

Rankings are based on 3 subindicators

Documents required to export and import (number)

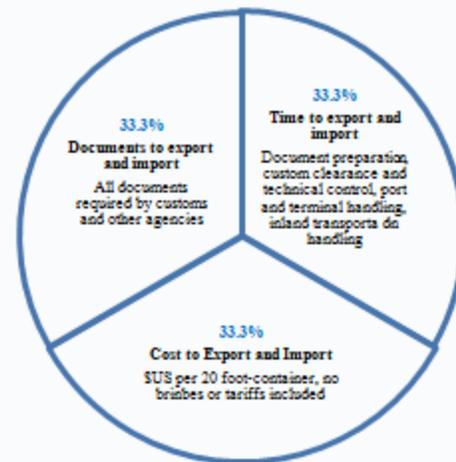

- Bank documents
- Customs clearance documents
- Port and terminal handling documents
- Transport documents

Time required to export and import (days)

- Obtaining all the documents
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Does not include ocean transport time

Cost required to export and import (US\$ per container)

- All documentation
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Official costs only, no bribes

Case Study Assumptions

The Business

- Has at least 60 employees and is located in the economy's largest business city
- Is a private, limited liability company, which exports more than 10% of its sales. It is fully domestically owned and does not operate in an export processing zone or an industrial estate with special export or import privileges

The traded product

- Is transported in a dry-cargo, 20-foot full container load; weighs 10 tons and is valued at \$20,000
- Is not hazardous or include military items; it does not require special phytosanitary or environmental safety standards, refrigeration or any other special environment
- Is one of the economy's leading export or import products

1. Benchmarking Trading Across Borders Regulations:

Iraq is ranked 179 overall for Trading Across Borders.

Ranking of Iraq in Trading Across Borders - Compared to good practice and selected economies:

The following table shows Trading Across Borders data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Documents to export (number)	Time to export (days)	Cost to export (US\$ per container)	Documents to import (number)	Time to import (days)	Cost to import (US\$ per container)

Time to export (days): Estonia

2. Historical data: Trading Across Borders in Iraq

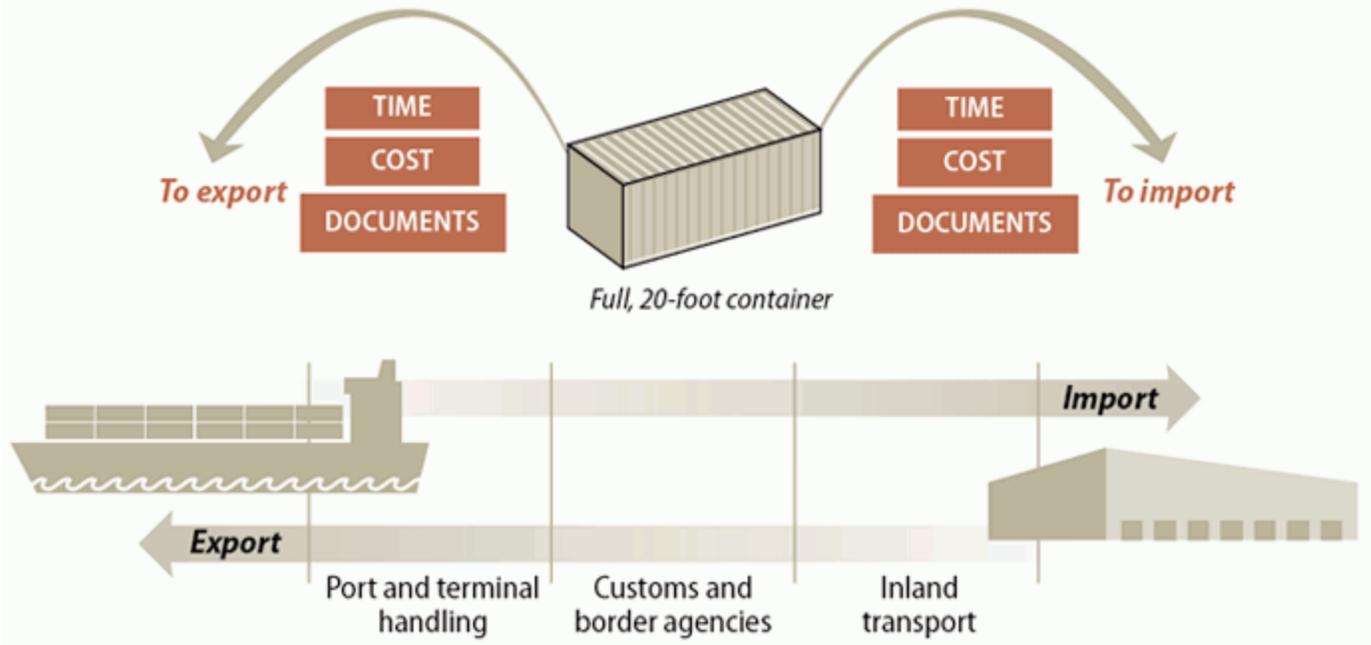

Trading Across Borders data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	180	179
Cost to export (US\$ per container)	3400	3900	3900	3550
Cost to import (US\$ per container)	3400	3900	3900	3650
Documents to export (number)	10	10	10	10
Documents to import (number)	10	10	10	10
Time to export (days)	102	102	102	80
Time to import (days)	101	101	101	83

3. The following graphs illustrate the Trading Across Borders sub indicators in Iraq over the past 4 years:

How much time, how many documents and what cost to export and import across borders by ocean transport?

These tables list the procedures necessary to import and export a standardized cargo of goods in Iraq. The documents required to export and import the goods are also shown.

Nature of Export Procedures (2010)	Duration (days)	US\$ Cost
Documents preparation	50	1050
Customs clearance and technical control	13	700
Ports and terminal handling	7	300
Inland transportation and handling	10	1500
Totals	80	3550

Nature of Import Procedures (2010)	Duration (days)	US\$ Cost
Documents preparation	50	1150
Customs clearance and technical control	15	700
Ports and terminal handling	12	300
Inland transportation and handling	6	1500
Totals	83	3650

Well functioning courts help businesses expand their network and markets. Where contract enforcement is efficient, firms have greater access to credit and are more likely to engage with new borrowers or customers. *Doing Business* measures the efficiency of the judicial system in resolving a commercial sale dispute before local courts. Following the step-by-step evolution of a standardized case study, data relating to the time, cost and procedural complexity of resolving a commercial lawsuit are collected through study of the codes of civil procedure and other court regulations, as well as through surveys completed by local litigation lawyers (and, in a quarter of the countries, by judges as well).

Some reform outcomes

In Rwanda the implementation of specialized commercial courts in May 2008 resulted in a significant decrease of the case backlog, and contributed to reduce the time to resolve a commercial dispute by nearly 3 months.

In Austria a "data highway" for the courts that allows attachments to be sent electronically has produced savings of €4.4 million in postage alone.

What do the Enforcing Contracts indicators measure?

Enforcing Contracts: resolving a commercial dispute through the courts

Rankings are based on 3 subindicators

Procedures to enforce a contract (number)

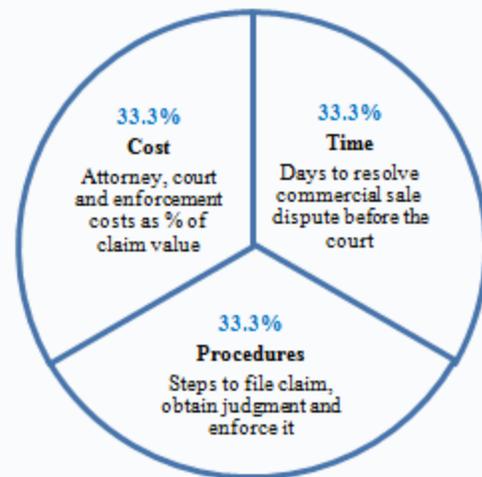

- Any interaction between the parties in a commercial dispute, or between them and the judge or court officer
- Steps to file the case
- Steps for trial and judgment
- Steps to enforce the judgment

Time required to complete procedures (calendar days)

- Time to file and serve the case
- Time for trial and obtaining judgment
- Time to enforce the judgment

Cost required to complete procedures (% of claim)

- No bribes
- Average attorney fees
- Court costs, including expert fees
- Enforcement costs

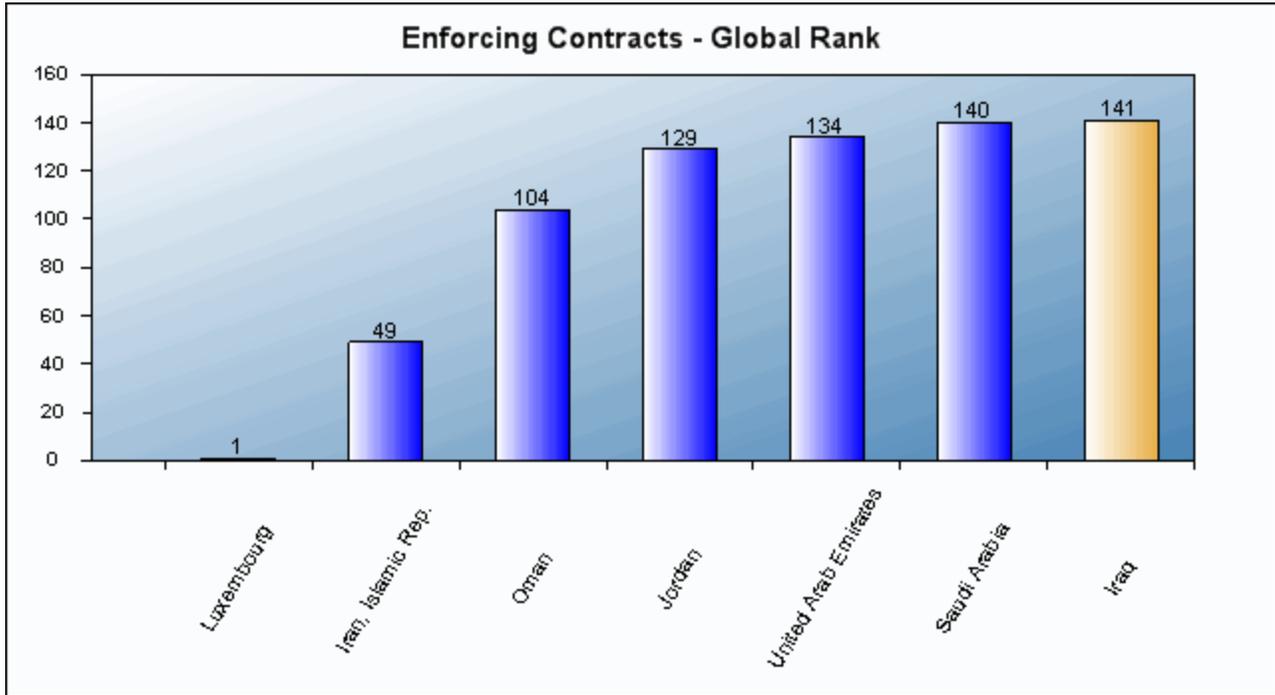

Case Study Assumptions

- Seller and Buyer are domestic companies
- Buyer orders custom-made goods, then does not pay
- Seller sues Buyer before competent court
- Value of claim is 200% of GNI per capita
- Seller requests pre-trial attachment to secure claim
- Dispute on quality of the goods requires expert opinion
- Judge decides in favor of Seller, no appeal
- Seller enforces judgment through a public sale of Buyer's movable assets.

1. Benchmarking Enforcing Contracts Regulations:

Iraq is ranked 141 overall for Enforcing Contracts.

Ranking of Iraq in Enforcing Contracts - Compared to good practice and selected economies:

The following table shows Enforcing Contracts data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of claim)
Bhutan			0.1
Ireland	20		
Singapore		150	

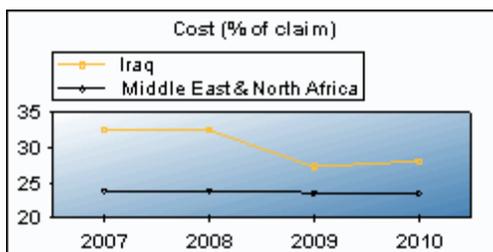

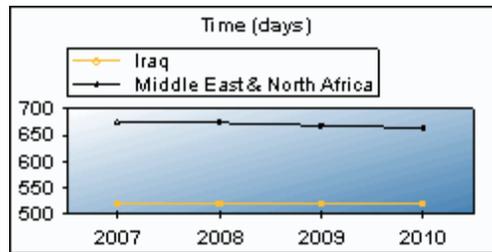

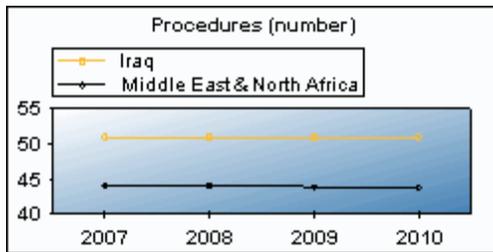

<i>Selected Economy</i>			
Iraq	51	520	28.1

<i>Comparator Economies</i>			
Iran, Islamic Rep.	39	505	17.0
Jordan	38	689	31.2
Oman	51	598	13.5
Saudi Arabia	43	635	27.5
United Arab Emirates	49	537	26.2

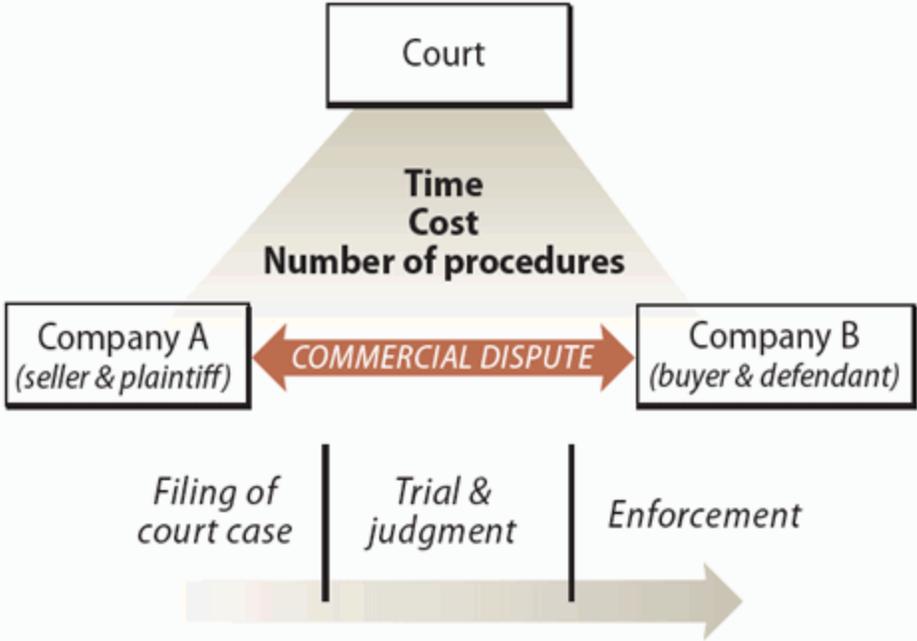

2. Historical data: Enforcing Contracts in Iraq

Enforcing Contracts data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	138	141
Procedures (number)	51	51	51	51
Time (days)	520	520	520	520
Cost (% of claim)	32.5	32.5	27.3	28.1

3. The following graphs illustrate the Enforcing Contracts sub indicators in Iraq over the past 4 years:

What are the time, cost and number of procedures to resolve a commercial dispute through the courts?

This topic looks at the efficiency of contract enforcement in Iraq.

Nature of Procedure (2010)	Indicator
Procedures (number)	51
Time (days)	520
Filing and service	60.0
Trial and judgment	360.0
Enforcement of judgment	100.0
Cost (% of claim)*	28.10
Attorney cost (% of claim)	22.5
Court cost (% of claim)	2.3
Enforcement Cost (% of claim)	3.3

Court information: Bagdad First Instance Court ("محكمة البداءة في بغداد")

* Claim assumed to be equivalent to 200% of income per capita.

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in businesses' speedy return to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses, and thereby improve growth and sustainability in the economy overall.

Some reform outcomes

A study of the 2005 bankruptcy reform in Brazil found that it had led to an average reduction of 22% in the cost of credit for Brazilian companies, a 39% increase in overall credit and a 79% increase in long-term credit in the economy. The purpose of the reform was to improve creditor protection in insolvency proceedings.

Following the introduction of debtor-in-possession reorganizations in Korea in 2006, the number of reorganization filings increased from 76 in 2006 to 670 in 2009.

What does the Closing a Business indicator measure?

Closing a Business: insolvency proceedings against local company

Time required to recover debt (years)

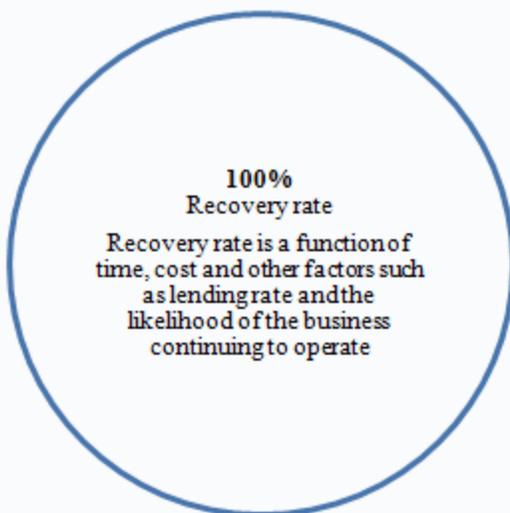

- Measured in calendar years
- Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate value)

- Measured as percentage of estate value
- Court fees
- Fees of insolvency administrators
- Lawyers' fees
- Assessors' and auctioneers' fees
- All other fees and costs

Recovery rate for creditors (cents on the dollar)

- Measures the cents on the dollar recovered by creditors
- Present value of debt recovered
- Costs of the insolvency proceedings are deducted
- Depreciation of furniture is taken into account
- Outcome for the business (survival or not) affects the maximum value that can be recovered

Case Study Assumptions

The Company

- is domestically owned
- is a limited liability company operating a hotel
- operates in the economy's largest business city
- has 201 employees, 1 secured creditor and 50 unsecured creditors
- has a higher value as a going concern and a lower value in a piecemeal sale of assets

1. Benchmarking Closing Business Regulations:

Iraq is ranked 183 overall for Closing a Business.

Ranking of Iraq in Closing Business - Compared to good practice and selected economies:

The following table shows Closing Business data for Iraq compared to good practice and comparator economies:

Good Practice Economies	Recovery rate (cents on the dollar)	Time (years)	Cost (% of estate)
Ireland		0.4	
Japan	92.7		
Singapore*			1

<i>Selected Economy</i>			
Iraq	0.0	no practice	no practice

<i>Comparator Economies</i>			
Iran, Islamic Rep.	23.1	4.5	9
Jordan	26.9	4.3	9
Oman	34.9	4.0	4
Saudi Arabia	36.8	1.5	22
United Arab Emirates	11.2	5.1	30

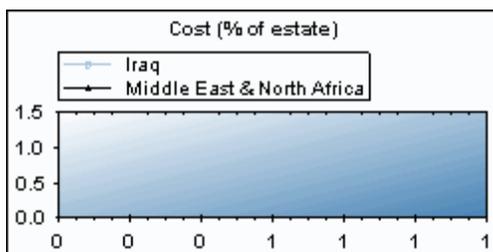

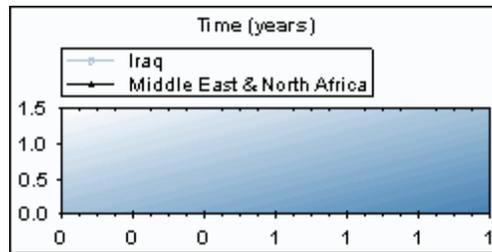

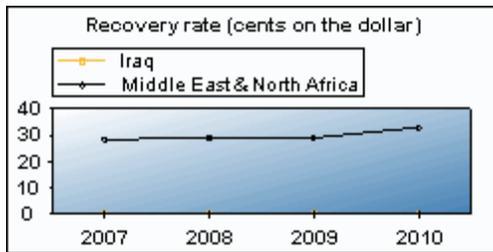

* The following economies are also good practice economies for :

Cost (% of estate): Colombia, Kuwait, Norway

2. Historical data: Closing Business in Iraq

Closing a Business data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	183	183
Time (years)	no practice	no practice	no practice	no practice
Cost (% of estate)	no practice	no practice	no practice	no practice
Recovery rate (cents on the dollar)	0.0	0.0	0.0	0.0

3. The following graphs illustrate the Closing Business sub indicators in Iraq over the past 4 years:

Since 2004 Doing Business has been tracking reforms aimed at simplifying business regulations, strengthening property rights, opening access to credit and enforcing contracts by measuring their impact on 10 indicator sets . * Nearly 1,000 reforms have had an impact on these indicators. *Doing Business 2011*, covering June 2009 to June 2010, reports that 117 economies implemented 216 reforms to make it easier to start a business. 64% of economies measured by Doing Business have reformed this year, focusing on easing business start-up, lightening the tax burden, simplifying import and export regulations and improving credit information systems.

The top 10 most-improved in Doing Business 2011

Hungary		✓	✓				✓			✓
Grenada	✓		✓				✓			
Brunei Darussalam	✓						✓	✓		

 Positive Change
 Negative Change

* For *Doing Business 2011* the Employing Workers indicator is not included in the aggregate ease of doing business ranking.

Summary of changes to business regulation in top 10 most improved economies in *Doing Business 2011* and selected comparator economies.

Brunei Darussalam	Brunei Darussalam made starting a business easier by improving efficiency at the company registrar and implementing an electronic system for name searches. Brunei Darussalam reduced the corporate income tax rate from 23.5% to 22% while also introducing a lower tax rate for small businesses, ranging from 5.5% to 11%. The introduction of an electronic customs system in Brunei Darussalam made trading easier.
Cape Verde	Cape Verde made start-up easier by eliminating the need for a municipal inspection before a business begins operations and computerizing the system for delivering the municipal license. Cape Verde eased property registration by switching from fees based on a percentage of the property value to lower fixed rates. Cape Verde abolished the stamp duties on sales and checks.
Grenada	Grenada eased business start-up by transferring responsibility for the commercial registry from the courts to the civil administration. The appointment of a registrar focusing only on property cut the time needed to transfer property in Grenada by almost half. Grenada's customs administration made trading faster by simplifying procedures, reducing inspections, improving staff training and enhancing communication with users.
Hungary	Hungary implemented a time limit for the issuance of building permits. Hungary reduced the property registration fee by 6% of the property value. Hungary simplified taxes and tax bases. Amendments to Hungary's bankruptcy law encourage insolvent companies to consider reaching agreements with creditors out of court so as to avoid bankruptcy.
Iran, Islamic Rep.	The Islamic Republic of Iran eased business start-up by installing a web portal allowing entrepreneurs to search for and reserve a unique company name. The establishment of a new private credit bureau improved access to credit information. The Islamic Republic of Iran made enforcing contracts easier and faster by introducing electronic filing of some documents, text message notification and an electronic case management system.
Jordan	Jordan improved its credit information system by setting up a regulatory framework for establishing a private credit bureau as well as lowering the threshold for loans to be reported to the public credit registry. Jordan abolished certain taxes and made it possible to file income and sales tax returns electronically.
Kazakhstan	Kazakhstan eased business start-up by reducing the minimum capital requirement to 100 tenge (\$0.70) and eliminating the need to have the memorandum of association and company charter notarized. Kazakhstan made dealing with construction permits easier by implementing a one-stop shop related to technical conditions for utilities. Kazakhstan strengthened investor protections by requiring greater corporate disclosure in company annual reports. Kazakhstan speeded up trade through efforts to modernize customs, including implementation of a risk management system and improvements in customs automation.
Peru	Peru eased business start-up by simplifying the requirements for operating licenses and creating an online one-stop shop for business registration. Peru streamlined construction permitting by implementing administrative reforms. Peru introduced fast-track procedures at the land registry, cutting by half the time needed to register property. Peru made trading easier by implementing a new web-based electronic data interchange system, risk-based inspections and payment deferrals.
Rwanda	Rwanda made dealing with construction permits easier by passing new building regulations at the end of April 2010 and implementing new time limits for the issuance of various permits. Rwanda enhanced access to credit by allowing borrowers the right to inspect their own credit report and mandating that loans of all sizes be reported to the central bank's public credit registry. Rwanda reduced the number of trade documents required and enhanced its joint border management procedures with Uganda and other neighbors, leading to an improvement in the trade logistics environment.
Saudi Arabia	Saudi Arabia made dealing with construction permits easier for the second year in a row by introducing a new, streamlined process. An amendment to Saudi Arabia's commercial lien law enhanced access to credit by making secured lending more flexible and allowing out-of-court enforcement in case of default. Saudi Arabia reduced the time to import by launching a new container terminal at the Jeddah Islamic Port. Saudi Arabia speeded up the insolvency process by providing earlier access to amicable settlements and putting time limits on the settlements to encourage creditors to participate.

Tajikistan	Tajikistan made starting a business easier by creating a one-stop shop that consolidates registration with the state and the tax authority. Tajikistan strengthened investor protections by requiring greater corporate disclosure in the annual report and greater access to corporate information for minority investors. Tajikistan lowered its corporate income tax rate.
United Arab Emirates	The United Arab Emirates enhanced access to credit by setting up a legal framework for the operation of the private credit bureau and requiring that financial institutions share credit information. The United Arab Emirates streamlined document preparation and reduced the time to trade with the launch of Dubai Customs' comprehensive new customs system, Mirsal 2.
Vietnam	Vietnam eased company start-up by creating a one-stop shop that combines the processes for obtaining a business license and tax license and by eliminating the need for a seal for company licensing. Vietnam made dealing with construction permits easier by reducing the cost to register newly completed buildings by 50% and transferring the authority to register buildings from local authorities to the Department of National Resources and Environment. Vietnam improved its credit information system by allowing borrowers to examine their own credit report and correct errors.
Zambia	Zambia eased business start-up by eliminating the minimum capital requirement. Zambia eased trade by implementing a one-stop border post with Zimbabwe, launching web-based submission of customs declarations and introducing scanning machines at border posts. Zambia improved contract enforcement by introducing an electronic case management system in the courts that provides electronic referencing of cases, a database of laws, real-time court reporting and public access to court records.
