Doing Business 2011
Business Reforms

Doing Business 2011: Making a Difference for Entrepreneurs is the eighth in a series of annual reports investigating regulations that enhance business activity and those that constrain it. *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 183 economies, from Afghanistan to Zimbabwe, over time.

A set of regulations affecting 9 stages of a business's life are measured: starting a business, dealing with construction permits, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts and closing a business. Data in *Doing Business 2011* are current as of June 1, 2010*. The indicators are used to analyze economic outcomes and identify what reforms have worked, where, and why.

The Doing Business methodology has limitations. Other areas important to business such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions, are not studied directly by Doing Business. To make the data comparable across economies, the indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policymakers in designing reform.

The data set covers 183 economies: 46 in Sub-Saharan Africa, 32 in Latin America and the Caribbean, 25 in Eastern Europe and Central Asia, 24 in East Asia and Pacific, 18 in the Middle East and North Africa and 8 in South Asia, as well as 30 OECD high-income economies.

The following pages present the summary Doing Business indicators for Samoa. The data used for this economy profile come from the Doing Business database and are summarized in graphs. These graphs allow a comparison of the economies in each region not only with one another but also with the "good practice" economy for each indicator.

The good-practice economies are identified by their position in each indicator as well as their overall ranking and by their capacity to provide good examples of business regulation to other countries. These good-practice economies do not necessarily rank number 1 in the topic or indicator, but they are in the top 10.

More information is available in the full report. *Doing Business 2011: Making a Difference for Entrepreneurs* presents the indicators, analyzes their relationship with economic outcomes and recommends reforms. The data, along with information on ordering the report, are available on the Doing Business website (www.doingbusiness.org).

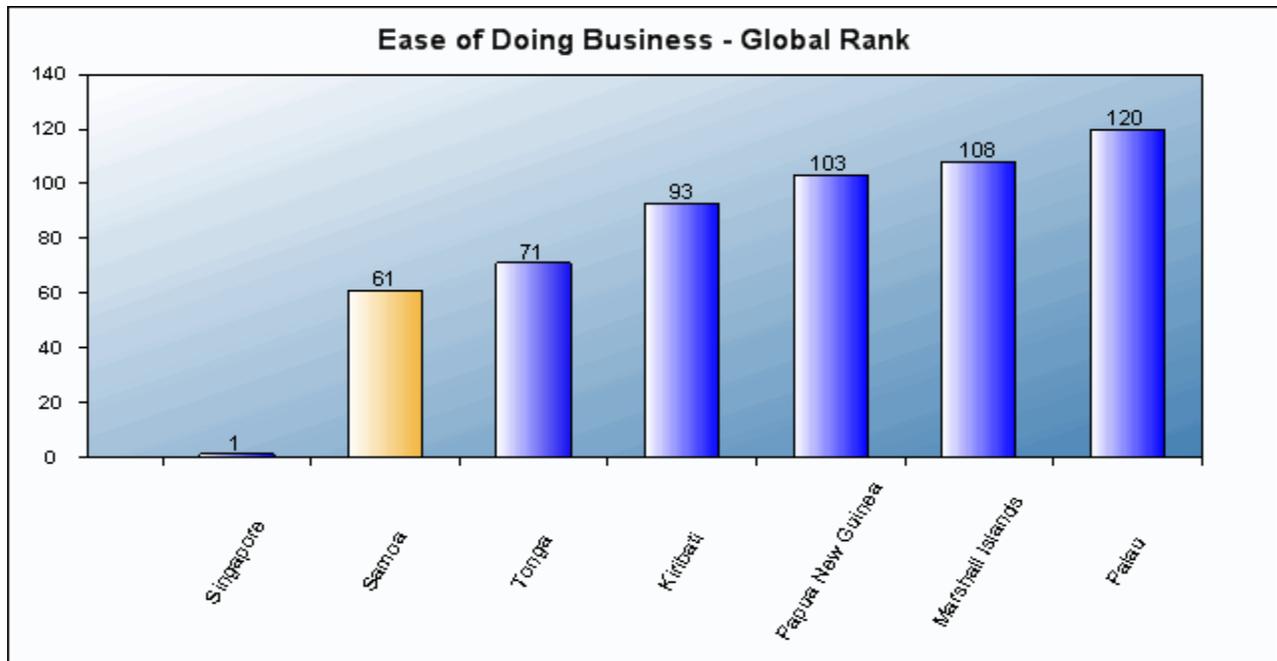

* Except for the Paying Taxes indicator that refers to the period January to December of 2009.

Note: 2008-2010 Doing Business data and rankings have been recalculated to reflect changes to the methodology and the addition of new economies (in the case of the rankings).

Economy Rankings - Ease of Doing Business

Samoa is ranked 61 out of 183 economies. Singapore is the top ranked economy in the Ease of Doing Business.

Samoa - Compared to global good practice economy as well as selected economies:

Samoa's ranking in Doing Business 2011

Rank	Doing Business 2011
Ease of Doing Business	61
Starting a Business	20
Dealing with Construction Permits	47
Registering Property	34
Getting Credit	128
Protecting Investors	28
Paying Taxes	68
Trading Across Borders	94
Enforcing Contracts	82
Closing a Business	140

Summary of Indicators - Samoa

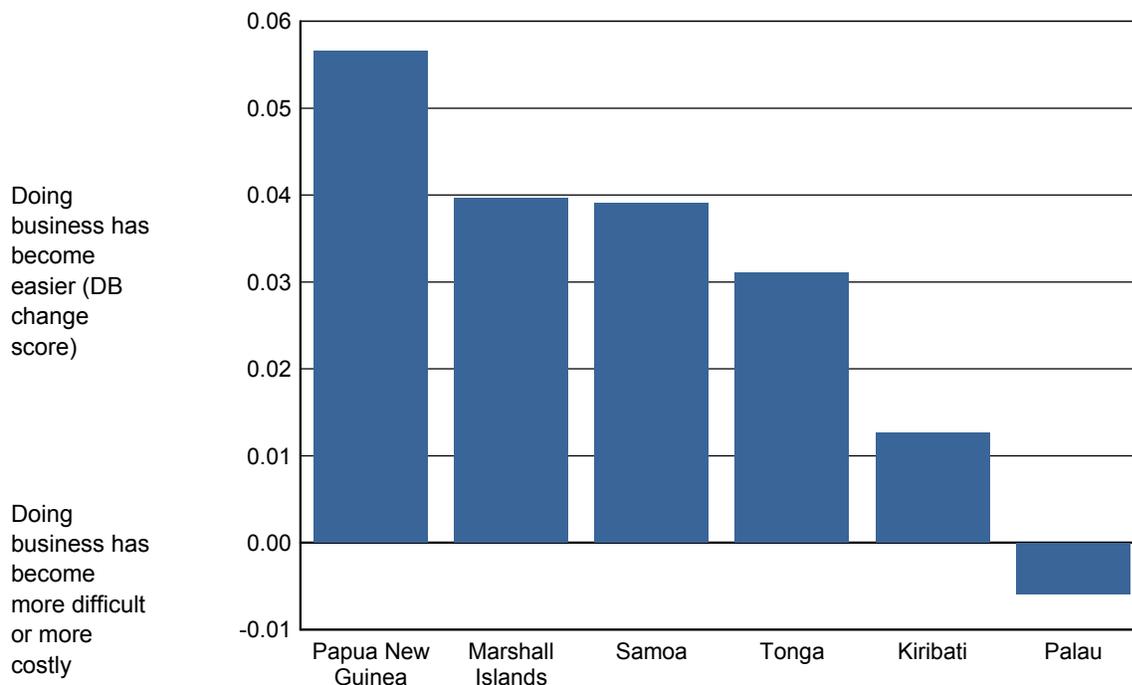

Starting a Business	Procedures (number)	5
	Time (days)	9
	Cost (% of income per capita)	9.8
	Min. capital (% of income per capita)	0.0
Dealing with Construction Permits	Procedures (number)	18
	Time (days)	88
	Cost (% of income per capita)	78.7
Registering Property	Procedures (number)	5
	Time (days)	27
	Cost (% of property value)	1.6
Getting Credit	Strength of legal rights index (0-10)	6
	Depth of credit information index (0-6)	0
	Public registry coverage (% of adults)	0.0
	Private bureau coverage (% of adults)	0.0
Protecting Investors	Extent of disclosure index (0-10)	5
	Extent of director liability index (0-10)	6
	Ease of shareholder suits index (0-10)	8
	Strength of investor protection index (0-10)	6.3
Paying Taxes	Payments (number per year)	37
	Time (hours per year)	224
	Profit tax (%)	11.9
	Labor tax and contributions (%)	7.0
	Other taxes (%)	0.0
	Total tax rate (% profit)	18.9
Trading Across Borders	Documents to export (number)	7
	Time to export (days)	27
	Cost to export (US\$ per container)	820
	Documents to import (number)	7
	Time to import (days)	31
	Cost to import (US\$ per container)	848

Enforcing Contracts	Procedures (number)	44
	Time (days)	455
	Cost (% of claim)	19.7
Closing a Business	Recovery rate (cents on the dollar)	14.6
	Time (years)	2.5
	Cost (% of estate)	38

The 5 year measure of cumulative change illustrates how the business regulatory environment has changed in 174 economies from *Doing Business 2006* to *Doing Business 2011*. Instead of highlighting which countries currently have the most business friendly environment, this new approach shows the extent to which an economy's regulatory environment for business has changed compared with 5 years ago.

This snapshot reflects all cumulative changes in an economy's business regulation as measured by the Doing Business indicators-such as a reduction in the time to start a business thanks to a one-stop shop or an increase in the strength of investor protection index thanks to new stock exchange rules that tighten disclosure requirements for related-party transactions.

This figure shows the distribution of cumulative change across the 9 indicators and time between *Doing Business 2006* and *Doing Business 2011*

Many economies have undertaken reforms to smooth the starting a business process in stages—and often as part of a larger regulatory reform program. A number of studies have shown that among the benefits of streamlining the process to start a business have been greater firm satisfaction and savings and more registered businesses, financial resources and job opportunities. Economies with higher entry costs are associated with a larger informal sector and a smaller number of legally registered firms.

Some reform outcomes

In Egypt reductions of the minimum capital requirement in 2007 and 2008 led to an increase of more than 30% in the number of limited liability companies.

In Portugal creation of One-Stop Shop in 2006 and 2007 resulted in a reduction of time to start a business from 54 days to 5. In 2007 and 2008 new business registrations were up by 60% compared with 2006.

In Malaysia reduction of registration fees in 2008 led to an increase in registrations by 16% in 2009.

What does Starting a Business measure?

Procedures to legally start and operate a company (number)

- Preregistration (for example, name verification or reservation, notarization)
- Registration
- Post registration (for example, social security registration, company seal)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

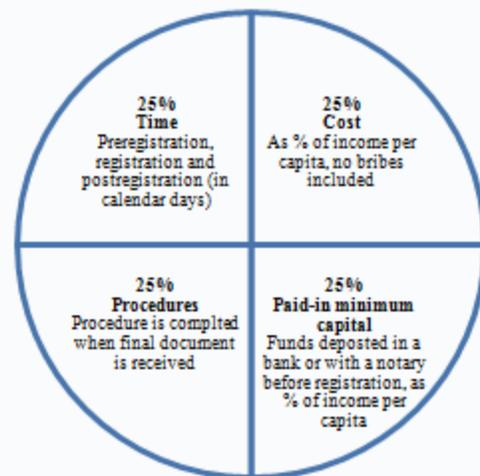

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law

Paid-in minimum capital (% of income per capita)

- Deposited in a bank or with a notary prior to registration begins

Starting a Business: getting a local limited liability company up and running
Rankings are based on 4 subindicators

Case Study Assumptions

- Doing Business records all procedures that are officially required for an entrepreneur to start up and formally operate an industrial or commercial business.
- Any required information is readily available and that all agencies involved in the start-up process function without corruption.

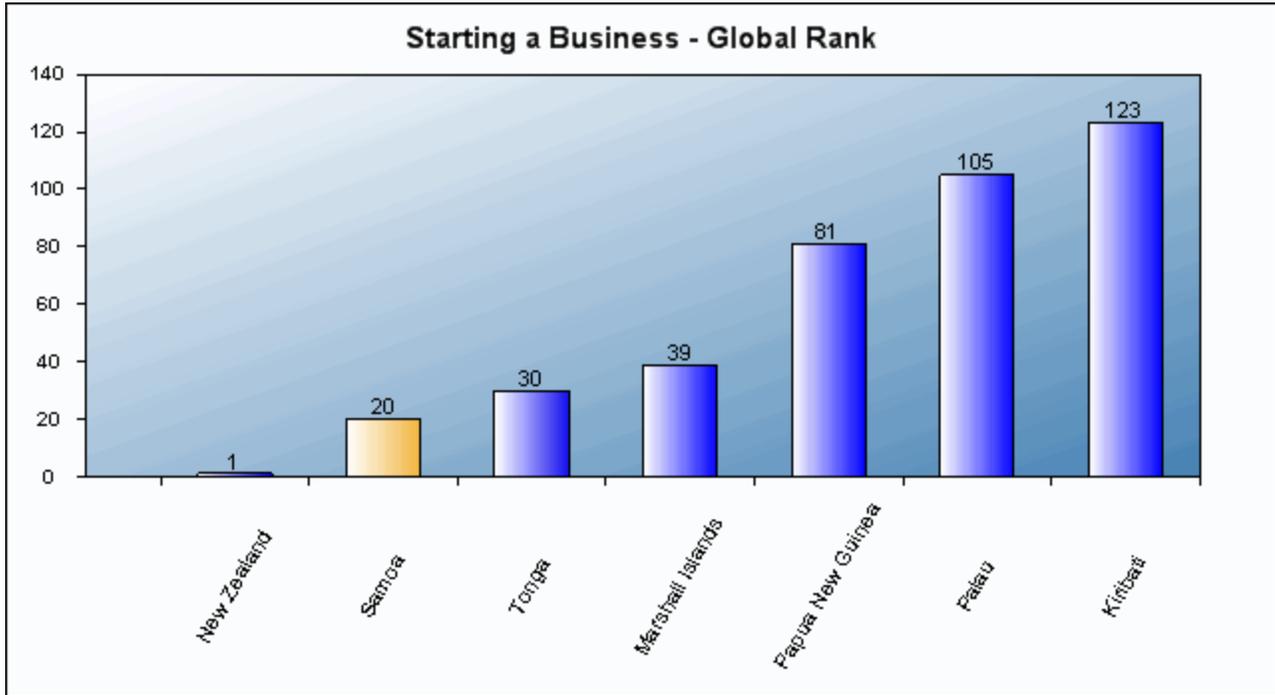

The business:

- is a limited liability company, located in the largest business city
- conducts general commercial activities
- is 100% domestically owned
- has a start-up capital of 10 times income per capita
- has a turnover of at least 100 times income per capita
- has at least 10 and up to 50 employees
- does not qualify for investment incentives or any special benefits
- leases the commercial plant and offices and is not a proprietor of real estate

1. Benchmarking Starting a Business Regulations:

Samoa is ranked 20 overall for Starting a Business.

Ranking of Samoa in Starting a Business - Compared to good practice and selected economies:

The following table shows Starting a Business data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of income per capita)	Min. capital (% of income per capita)
Denmark*			0.0	
New Zealand*	1	1		0.0

<i>Selected Economy</i>				
Samoa	5	9	9.8	0.0

<i>Comparator Economies</i>				
Kiribati	6	21	40.2	21.7
Marshall Islands	5	17	17.3	0.0
Palau	8	28	4.2	11.2
Papua New Guinea	6	51	17.7	0.0
Tonga	4	25	7.0	0.0

* The following economies are also good practice economies for :

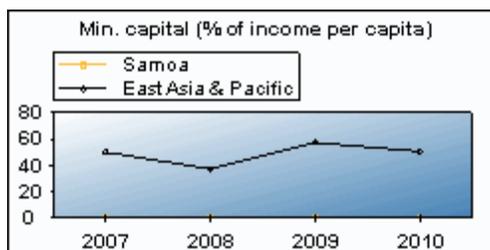

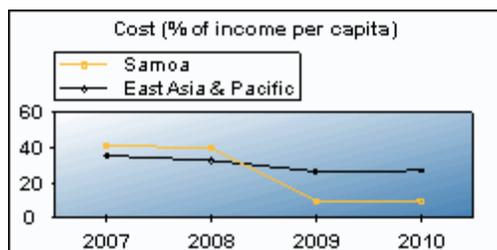

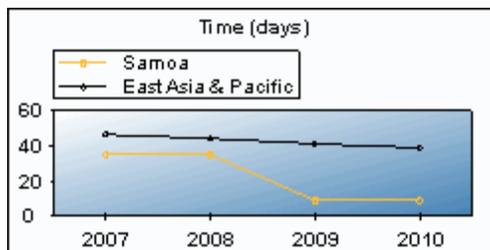

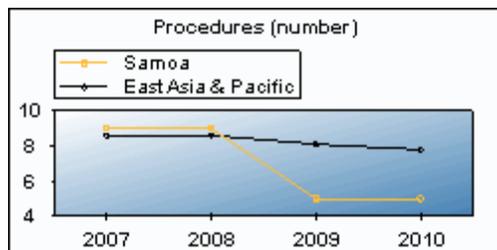

Procedures (number): **Canada**

Cost (% of income per capita): **Slovenia**

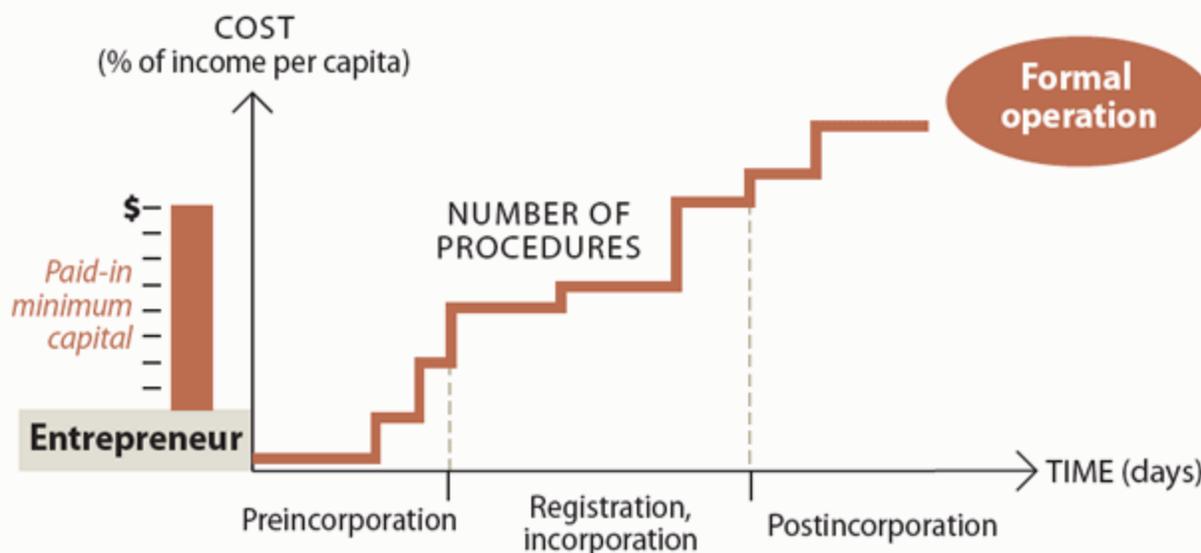

2. Historical data: Starting a Business in Samoa

Starting a Business data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	19	20
Procedures (number)	9	9	5	5
Time (days)	35	35	9	9
Cost (% of income per capita)	41.3	39.8	9.9	9.8
Min. capital (% of income per capita)	0.0	0.0	0.0	0.0

3. The following graphs illustrate the Starting a Business sub indicators in Samoa over the past 4 years:

What are the time, cost, paid-in minimum capital and number of procedures to get a local, limited liability company up and running?

This table summarizes the procedures and costs associated with setting up a business in Samoa.

STANDARDIZED COMPANY

Legal Form: Limited Liability Company

City: Apia

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Register the company with the Commercial Registry; obtain a certificate of incorporation	1	WST 250
2	Apply for a business license from the tax authority; obtain tax payer identification	4	WST 500
3 *	Register for PAYE and VAGST tax	3	no charge
4	Register with the National Provident Fund (superannuation)	2	no charge
5	Register with the Accident Compensation Board	2	no charge

* Takes place simultaneously with another procedure.

Starting a Business Details - Samoa

Procedure 1 Register the company with the Commercial Registry; obtain a certificate of incorporation

Time to complete: 1

Cost to complete: WST 250

Comment: Under the new Companies Act, which came into force July 2008, the applicant submits Form 1 (application for incorporation) and Form 2 (consent of director and directors). For an application to register a company under Section 6 of the Act, the fee is WST 250.

Procedure 2 Apply for a business license from the tax authority; obtain tax payer identification

Time to complete: 4

Cost to complete: WST 500

Comment: Companies

1. Application Letter
 - Address to the Chief Executive Officer (Ministry for Revenue)
 - Request for Business License
 - Source of Fund
 - Amount of Fund (Capital)
 - Location
2. Provide (copy) of passport of all shareholders
3. Submit documented name(s) of shareholder(s) with respective number of shares, name(s) of director(s), and name(s) of secretary(s) for the company.
4. Certificate of Incorporation (Ministry of Commerce, Industry and Labour)
5. Complete and sign the IR24 Form (fill in by Business License Officer)
6. Site map (location)
7. Fee (SAT500.00 per activity) if approved by CEO

Procedure 3 Register for PAYE and VAGST tax

Time to complete: 3

Cost to complete: no charge

Comment: There are separate PAYE and VAGST (value-added-goods-and-services tax) registration forms for the taxpayer to complete and sign. The applicant or taxpayer is required to be registered for VAGST purposes if he/she knows the business can earn an annual gross sale greater than or equal to WST 78,000 . Registration for PAYE is required if the company will have employees. Forms to be submitted are:

1. Application for VAGST Registration Form (Section 47 VAGST Act 1993/94)
2. Application for PAYE Registration Form

Procedure 4 Register with the National Provident Fund (superannuation)

Time to complete: 2

Cost to complete: no charge

Comment: The company must contribute 10% of employees' gross salaries to the National Provident Fund. The company can recover 5% of the contribution from the employee's wage provided he deducts it in a timely manner. The company cannot recover contributions that are more than six months old.

Procedure 5 Register with the Accident Compensation Board

Time to complete: 2

Cost to complete: no charge

Comment: The company and employees each must contribute 1% of employees' gross salaries to the fund.

In many economies, especially developing ones, complying with building regulations is so costly in time and money that many builders opt out. Builders may pay bribes to pass inspections or simply build illegally, leading to hazardous construction. Where the regulatory burden is large, entrepreneurs may tend to move their activity into the informal economy. There they operate with less concern for safety, leaving everyone worse off. In other economies compliance is simple, straightforward and inexpensive, yielding better results.

Some reform outcomes

In Burkina Faso, a one-stop shop for construction permits, "Centre de Facilitation des Actes de Construire", was opened in May 2008. The new regulation merged 32 procedures into 15, reduced the time required from 226 days to 122 and cut the cost by 40%. From May 2009 to May 2010 611 building permits were granted in Ouagadougou, up from an average of about 150 a year in 2002-06.

Toronto, Canada revamped its construction permitting process in 2005 by introducing time limits for different stages of the process and presenting a unique basic list of requirements for each project. Later it provided for electronic information and risk-based approvals with fast-track procedures. Between 2005 and 2008 the number of commercial building permits increased by 17%, the construction value of new commercial buildings by 84%.

What does the Dealing with Construction Permits indicator measure?

Procedures to legally build a warehouse (number)

- Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates
- Completing all required notifications and receiving all necessary inspections
- Obtaining utility connections for electricity, water, sewerage and a land telephone line
- Registering the warehouse after its completion (if required for use as collateral or for transfer of warehouse)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes

Case Study Assumptions

The business:

- is a small to medium-size limited liability company in the construction industry, located in the economy's largest business city
- is 100% domestically and privately owned and operated
- has 60 builders and other employees
- has at least one employee who is a licensed architect and registered with the local association of architects

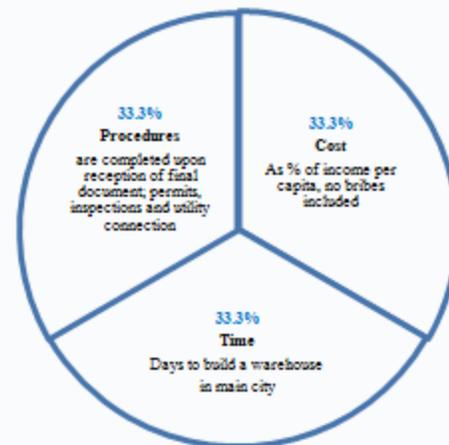

The warehouse:

- is a new construction (there was no previous construction on the land)
- has 2 stories, both above ground, with a total surface of approximately 1,300.6 sq. meters (14,000 sq. feet)
- has complete architectural and technical plans prepared by a licensed architect
- will be connected to electricity, water, sewerage (sewage system, septic tank or their equivalent) and a land telephone line
- will be used for general storage of non-hazardous goods, such as books
- will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements)

Dealing with Construction Permits:

Building a warehouse

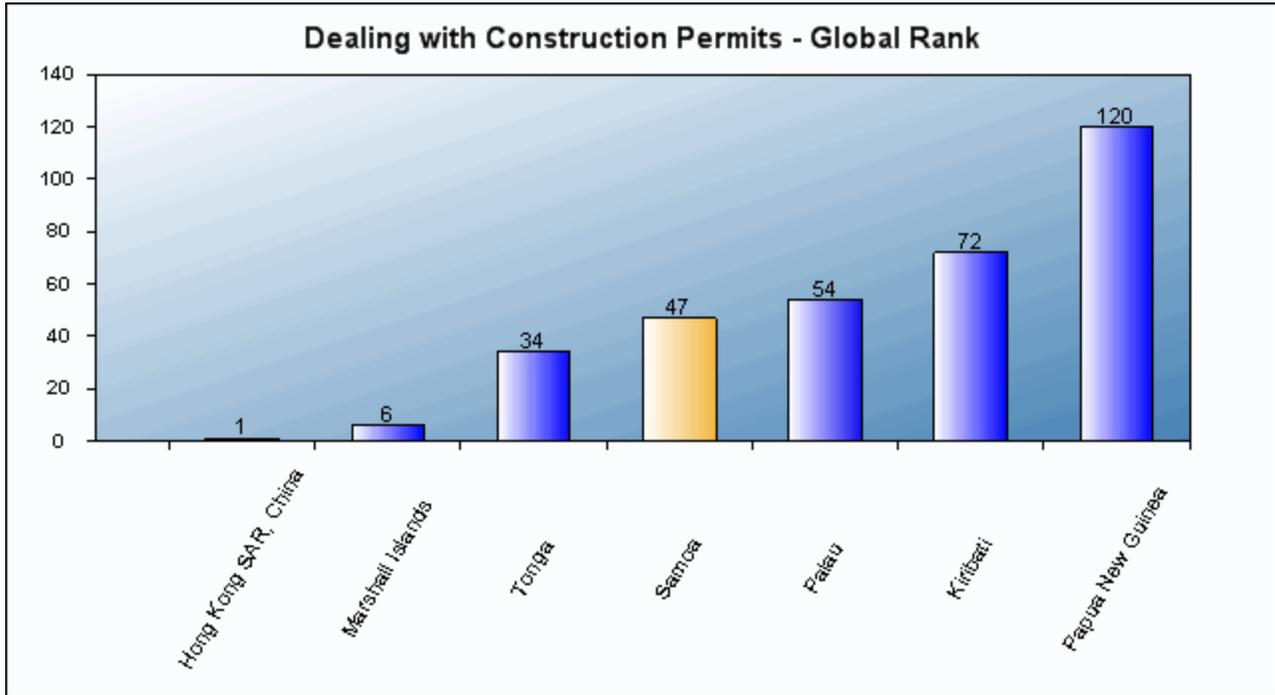

Rankings are based on 3 subindicators

1. Benchmarking Dealing with Construction Permits Regulations:

Samoa is ranked 47 overall for Dealing with Construction Permits.

Ranking of Samoa in Dealing with Construction Permits - Compared to good practice and selected economies:

The following table shows Dealing with Construction Permits data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of income per capita)
Denmark	6		
Qatar			0.8
Singapore		25	

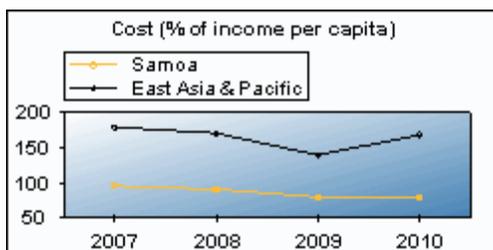

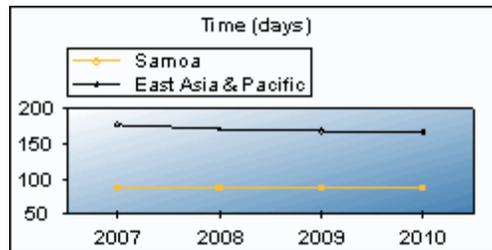

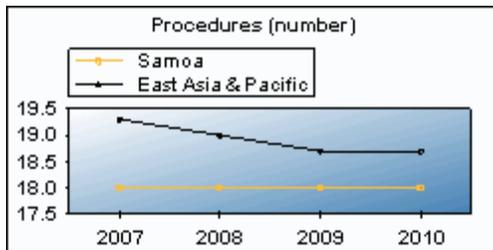

<i>Selected Economy</i>			
Samoa	18	88	78.7

<i>Comparator Economies</i>			
Kiribati	14	160	446.5
Marshall Islands	10	55	36.0
Palau	25	118	5.1
Papua New Guinea	24	217	77.5
Tonga	11	76	269.6

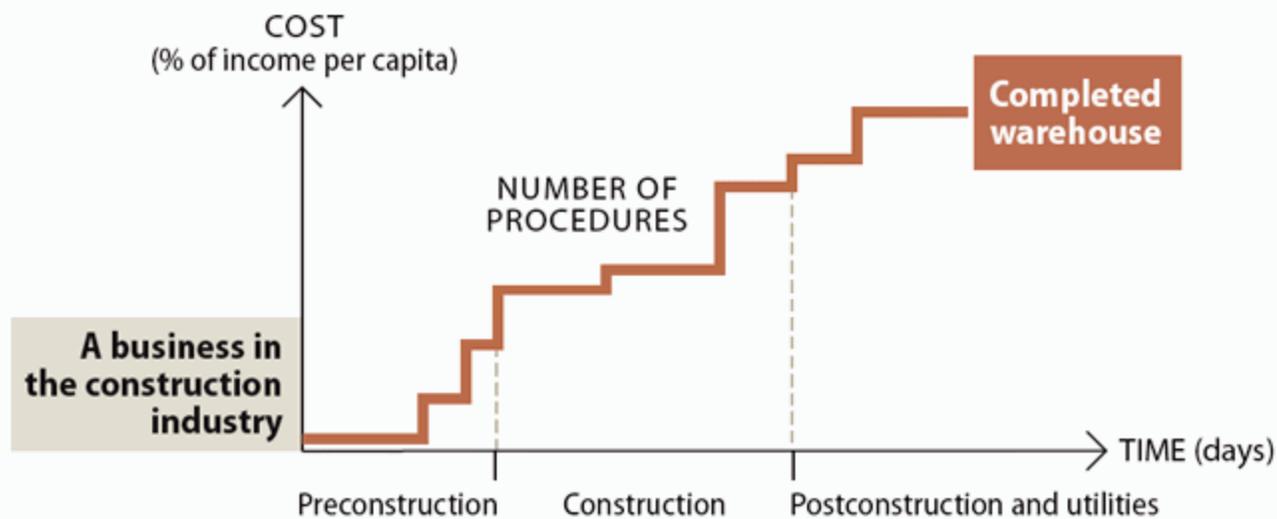

2. Historical data: Dealing with Construction Permits in Samoa

Dealing with Construction Permits data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	45	47
Procedures (number)	18	18	18	18
Time (days)	88	88	88	88
Cost (% of income per capita)	95.4	90.9	79.8	78.7

3. The following graphs illustrate the Dealing with Construction Permits sub indicators in Samoa over the past 4 years:

What are the time, cost and number of procedures to comply with formalities to build a warehouse?

The table below summarizes the procedures, time, and costs to build a warehouse in Samoa.

BUILDING A WAREHOUSE

City: Apia

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Obtain lot plan and ownership title from the Land Registry	2 days	WST 20
2	Request and obtain development consent	15 days	no charge
3	Request and obtain a building permit	25 days	WST 3,500
4	Receive foundation work inspection	1 day	no charge
5	Receive steel work for slabs inspection	1 day	no charge
6	Receive frame inspection	1 day	no charge
7	Receive drainage inspection	1 day	no charge
8	Receive sanitary inspection	1 day	no charge

9	Request and obtain an inspection certificate from the Ministry of Works upon completion of construction	5 days	no charge
10	Receive final inspection	1 day	no charge
11	Request and obtain inspection certificate from the Fire Department	5 days	no charge
12 *	Receive fire inspection by the Fire Department	1 day	no charge
13 *	Request telephone services (SamoaTel)	1 day	WST 500
14 *	Receive inspection by SamoaTel and connect to telephone services	30 days	no charge
15 *	Request power connection (Electric Power Corporation)	1 day	WST 1,500
16 *	Receive installation of meter	1 day	no charge
17 *	Receive electric inspection by Power Corporation and connection to its network	14 days	no charge
18	Obtain water connection	14 days	WST 500

* Takes place simultaneously with another procedure.

Dealing with Construction Permits Details - Samoa

Procedure 1 Obtain lot plan and ownership title from the Land Registry

Time to complete: 2 days

Cost to complete: WST 20

Agency: Land Registry

Comment:

Procedure 2 Request and obtain development consent

Time to complete: 15 days

Cost to complete: no charge

Agency: Ministry of Natural Resources and Environment

Comment: This document is issued by the Ministry of Natural Resources and Environment (Planning and Urban Management Agency, PUMA).

Procedure 3 Request and obtain a building permit

Time to complete: 25 days

Cost to complete: WST 3,500

Agency: Ministry of Works, Transport, and Infrastructure

Comment: After obtaining development consent, BuildCo must apply for a building permit with the Ministry of Works, Transport, and Infrastructure, which forwards the application to all the other concerned government departments: the Land and Survey, Health, and Fire departments.

BuildCo notifies the authority prior to the commencement of the construction work.

Procedure 4 Receive foundation work inspection

Time to complete: 1 day

Cost to complete: no charge

Agency: Ministry of Works, Transport, and Infrastructure

Comment: BuildCo should request inspections from the local authority. In practice, though, this may not always be the case.

For larger projects, for example, most clients would employ a "clerk of works" to act on their behalf, carry out inspections, and make sure all necessary testing is done.

Procedure 5 Receive steel work for slabs inspection

Time to complete: 1 day

Cost to complete: no charge
Agency: Ministry of Works, Transport, and Infrastructure
Comment:

Procedure 6 Receive frame inspection

Time to complete: 1 day
Cost to complete: no charge
Agency: Ministry of Works, Transport, and Infrastructure
Comment:

Procedure 7 Receive drainage inspection

Time to complete: 1 day
Cost to complete: no charge
Agency: Ministry of Works, Transport, and Infrastructure
Comment:

Procedure 8 Receive sanitary inspection

Time to complete: 1 day
Cost to complete: no charge
Agency: Ministry of Works, Transport, and Infrastructure
Comment:

Procedure 9 Request and obtain an inspection certificate from the Ministry of Works upon completion of construction

Time to complete: 5 days
Cost to complete: no charge
Agency: Ministry of Works, Transport, and Infrastructure
Comment:

Procedure 10 Receive final inspection

Time to complete: 1 day

Cost to complete: no charge
Agency: Ministry of Works, Transport, and Infrastructure
Comment:

Procedure 11 Request and obtain inspection certificate from the Fire Department

Time to complete: 5 days
Cost to complete: no charge
Agency: Fire Department
Comment:

Procedure 12 Receive fire inspection by the Fire Department

Time to complete: 1 day
Cost to complete: no charge
Agency: Fire Department
Comment:

Procedure 13 Request telephone services (SamoaTel)

Time to complete: 1 day
Cost to complete: WST 500
Agency: SamoaTel
Comment:

Procedure 14 Receive inspection by SamoaTel and connect to telephone services

Time to complete: 30 days
Cost to complete: no charge
Agency: SamoaTel
Comment:

Procedure 15 Request power connection (Electric Power Corporation)

Time to complete: 1 day

Cost to complete: WST 1,500
Agency: Electric Power Corporation (EPC)
Comment:

Procedure 16 Receive installation of meter

Time to complete: 1 day
Cost to complete: no charge
Agency: Electric Power Corporation (EPC)
Comment: The cost may vary in different areas.

Procedure 17 Receive electric inspection by Power Corporation and connection to its network

Time to complete: 14 days
Cost to complete: no charge
Agency: Electric Power Corporation (EPC)
Comment:

Procedure 18 Obtain water connection

Time to complete: 14 days
Cost to complete: WST 500
Agency: Water Authority
Comment:

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. *Doing Business* records the full sequence of procedures necessary for a business to purchase a property from another business and transfer the property title to the buyer's name. In the past 6 years 105 economies undertook 146 reforms making it easier to transfer property. Globally, the time to transfer property fell by 38% and the cost by 10% over this time. The most popular feature of property registration reform in these 6 years, implemented in 52 economies, was lowering transfer taxes and government fees.

Some reform outcomes

Georgia now allows property transfers to be completed through 500 authorized users, notably banks. This saves time for entrepreneurs. A third of people transferring property in 2009 chose authorized users, up from 7% in 2007. Also, Georgia's new electronic registry managed 68,000 sales in 2007, twice as many as in 2003.

Belarus's unified and computerized registry was able to cope with the addition of 1.2 million new units over 3 years. The registry issued 1 million electronic property certificates in 2009.

What does the Registering Property indicator measure?

Registering Property: transfer of property between 2 local companies

Rankings are based on 3 subindicators

Procedures to legally transfer title on immovable property (number)

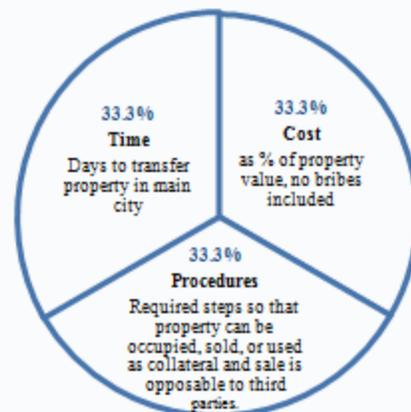

- Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)
- Registration in the economy's largest business city
- Post registration (for example, transactions with the local authority, tax authority or cadastre)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior personal contact with officials

Cost required to complete each procedure (% of property value)

- Official costs only, no bribes
- No value added or capital gains taxes included

Case Study Assumptions

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned.
- Are located in the periurban area of the economy's largest business city.
- Have 50 employees each, all of whom are nationals.
- Perform general commercial activities.

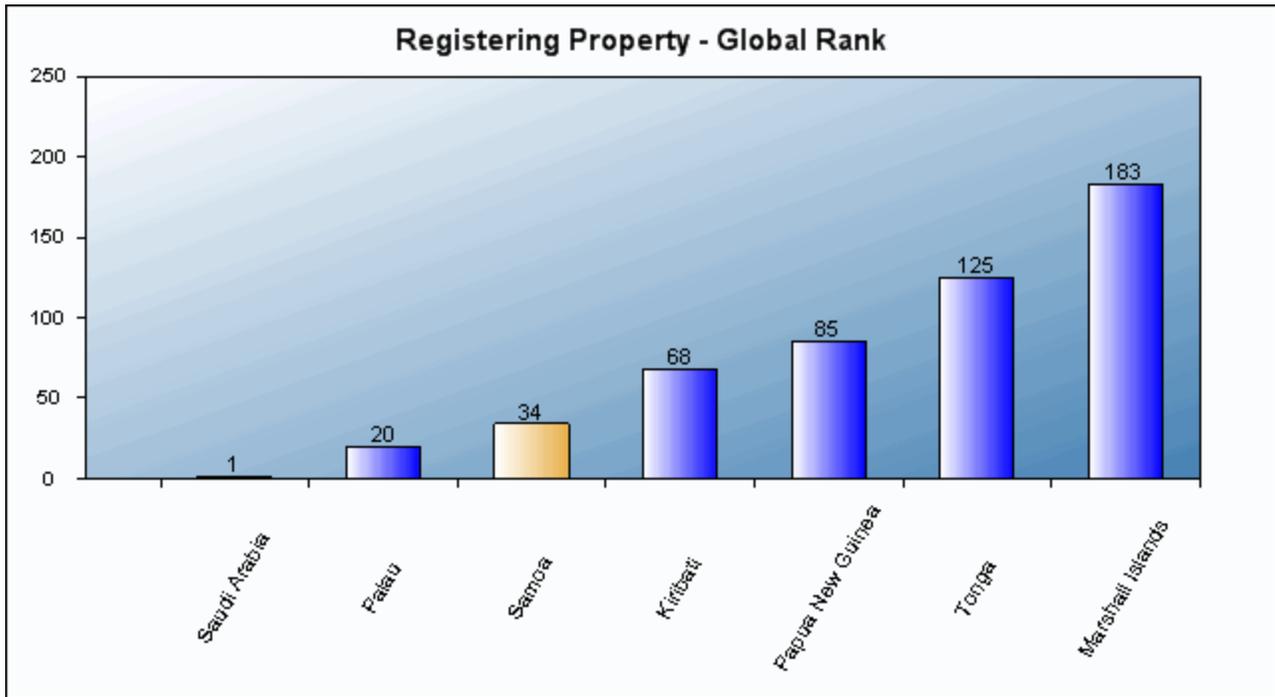

The property (fully owned by the seller):

- Has a value of 50 times income per capita. The sale price equals the value.
- Has no mortgages attached and has been under the same ownership for the past 10 years.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Is located in a periurban commercial zone, and no rezoning is required.
- Consists of a 557.4 square meters (6,000 square feet) land and 10 years old 2-story warehouse of 929 square meters (10,000 square feet) located on the land. The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. The property will be transferred in its entirety.

1. Benchmarking Registering Property Regulations:

Samoa is ranked 34 overall for Registering Property.

Ranking of Samoa in Registering Property - Compared to good practice and selected economies:

The following table shows Registering Property data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of property value)
New Zealand*		2	
Norway*	1		
Saudi Arabia			0.0

<i>Selected Economy</i>			
Samoa	5	27	1.6

<i>Comparator Economies</i>

Marshall Islands	no practice	no practice	no practice
Palau	5	14	0.3
Papua New Guinea	4	72	5.1
Tonga	4	108	10.2

* The following economies are also good practice economies for :

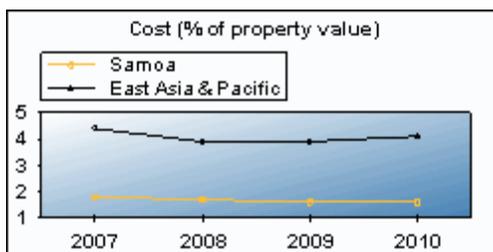

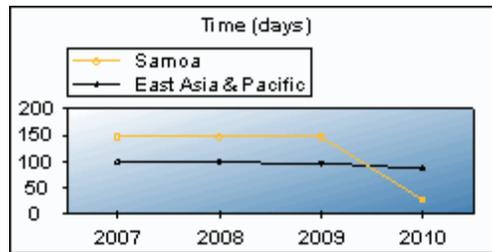

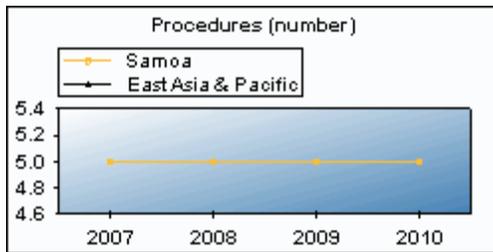

Procedures (number): United Arab Emirates

Time (days): Saudi Arabia, Thailand, United Arab Emirates

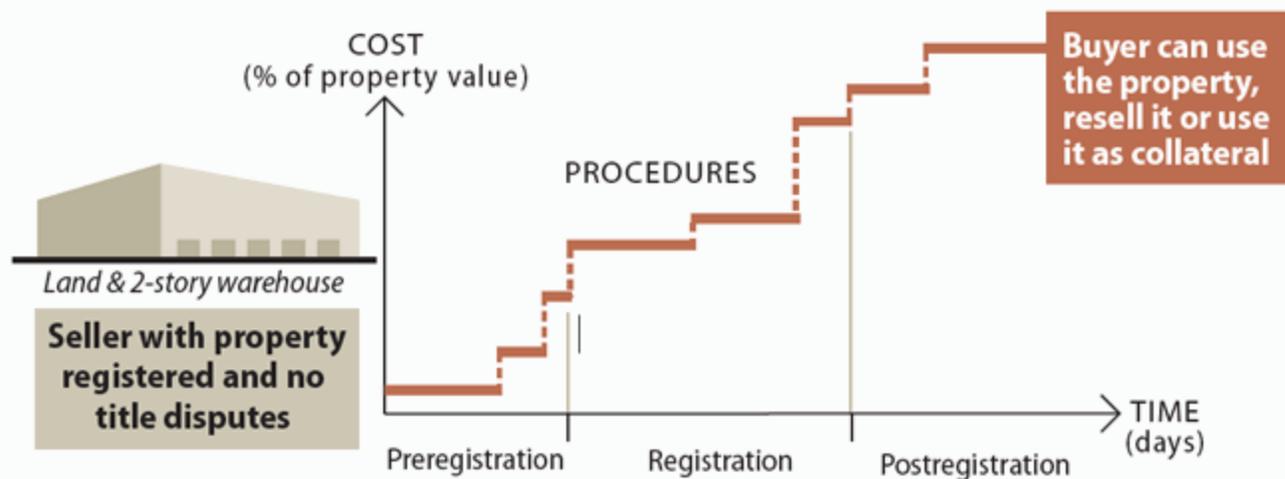

2. Historical data: Registering Property in Samoa

Registering Property data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	79	34
Procedures (number)	5	5	5	5
Time (days)	147	147	147	27
Cost (% of property value)	1.8	1.7	1.6	1.6

3. The following graphs illustrate the Registering Property sub indicators in Samoa over the past 4 years:

What are the time, cost and number of procedures required to transfer a property between 2 local companies?

This topic examines the steps, time, and cost involved in registering property in Samoa.

STANDARDIZED PROPERTY

Property Value: 382,503.82

City: Apia

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Conduct a search of title at the Ministry of Natural Resources, Environment and Meteorology	1 day	Included in procedure 2 if done by a lawyer
2	A lawyer prepares the sale and purchase agreement and notarizes the deed of conveyance	1-5 days	About WST 2,300
3	An abstract for the stamp duty is prepared at the Finance and Treasury Department	About 7 days	no cost
4	Payment of stamp duty at the Finance and Treasury Department	1 day	1% of property value (stamp duty) + WST 5 (for a copy)
5	Registration at the Land, Survey, and Environment Department	15 days	WST 100 (registration fee)

Registering Property Details - Samoa

Procedure	1	Conduct a search of title at the Ministry of Natural Resources, Environment and Meteorology
Time to complete:		1 day
Cost to complete:		Included in procedure 2 if done by a lawyer
Agency:		Land, Survey and Environment Department
Comment:		<p>A search of title is conducted at the Ministry of Natural Resources, Environment and Meteorology in order to establish the vendor's title to ownership and to check for encumbrances on the property. It is common practice that the buyer's solicitor conducts a search at the land registry. The title search is done by volume and folio reference as well as parcel number (but registered chronologically).</p> <p>With the new computerized system, a property title search now provides all information regarding the rightful owner of the property, and shows if any charges against that property.</p>
Procedure	2	A lawyer prepares the sale and purchase agreement and notarizes the deed of conveyance
Time to complete:		1-5 days
Cost to complete:		About WST 2,300
Comment:		<p>A sale purchase agreement is prepared by a lawyer. The participation of a lawyer is mandatory. The same lawyer/notary will notarize the deed of conveyance. The private practitioners in Samoa are entitled to notarize deeds of conveyance. The deed of conveyance is the transfer of ownership from the owner to the buyer.</p>
Procedure	3	An abstract for the stamp duty is prepared at the Finance and Treasury Department
Time to complete:		About 7 days
Cost to complete:		no cost
Agency:		Finance and Treasury Department
Comment:		<p>An abstract for payment of stamp duty is prepared at the Finance and Treasury Department, determining the valuation of the property.</p>
Procedure	4	Payment of stamp duty at the Finance and Treasury Department
Time to complete:		1 day
Cost to complete:		1% of property value (stamp duty) + WST 5 (for a copy)
Agency:		Finance and Treasury Department
Comment:		<p>The stamp duty amounts to 1% of the property value and is paid at the Ministry of Finance. If there is a mortgage (in this case there is not) this has to be discharged first, taking about 5 days. The fee can be above WST 450 depending on the fee structure of the law firm. The discharged is signed by the mortgagee, usually a bank. It is then stamped. The stamp duty is</p>

WST 2 for the original and WST 5 for the copy payable to the Ministry of Finance. It can take 5 days or more. The discharge is then registered with the Lands Registry at the Ministry of Natural Resources. The registration fee (paid in step 5) is WST 75 and can take 4 weeks or more.

Procedure 5 Registration at the Land, Survey, and Environment Department

Time to complete: 15 days

Cost to complete: WST 100 (registration fee)

Agency: Land, Survey and Environment Department

Comment: Registration of new title.
The land registry in Samoa has been fully computerized, and the property transfer process has been sped up significantly. The Land Titles Registration Act 2008 implemented on March 3rd, 2009 has changed the registration system in Samoa from a Deed to a Title system (Torrens system).

The project started in June 2005 with the conversion of all deeds, simple, complex and subdivision, into folios. The conversion was completed in February 2009.

At the same time, the land registry was being fully computerized and free-form deed documents were replaced by Form A4, thus facilitating registration.

The Land registry has also issued a flat fee of WST 100 for conducting a search of the property title and for lodging the deed of conveyance for registration.

Article 22 stipulates that a corporation may affix its seal in lieu of signing the instrument of transfer and it will be considered as signed by the Registrar.

Through two sets of indicators, *Doing Business* assesses the legal rights of borrowers and lenders with respect to secured transactions and the sharing of credit information. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through either a public credit registry or a private credit bureau. Credit information systems mitigate the ‘information asymmetry’ in lending and enable lenders to view a borrower’s financial history (positive or negative), providing them with valuable information to consider when assessing risk. Credit information systems benefit borrowers as well, allowing good borrowers to establish a reputable credit history which will enable them to access credit more easily. The Legal Rights Index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. Sound collateral laws will enable businesses to use their assets, especially movable property, as security to generate capital while having strong creditor’s rights has been associated with higher ratios of private sector credit to GDP.

Some reform outcomes

After Vietnam’s new Civil Code was enacted in 2005, a decree further clarified the provisions governing secured transactions. Since the inclusion of the new provisions, the number of registrations increased from 43,000 (2005) to 120,000 (end of 2008).

In 2008, when Zambia established a private credit bureau, its database initially covered about 25,000 borrowers. Thanks to a strong communication campaign and a central bank directive, coverage has grown 10-fold in the past 2 years, exceeding 200,000 by the beginning of 2010.

What do the Getting Credit indicators measure?

Strength of legal rights index (0–10)

- Protection of rights of borrowers and lenders through collateral laws
- Protection of secured creditors’ rights through bankruptcy laws

Depth of credit information index (0–6)

- Scope and accessibility of credit information distributed by public credit registries and private credit bureaus

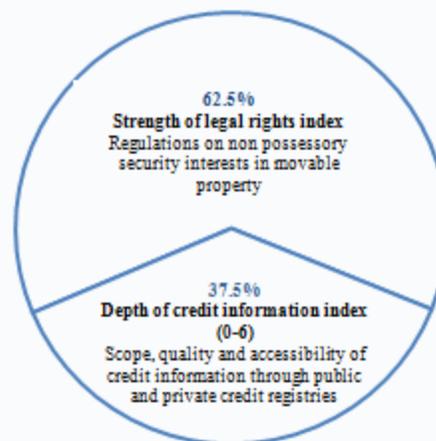

Public credit registry coverage (% of adults)

- Number of individuals and firms listed in public credit registry as percentage of a adult population

Private credit bureau coverage (% of adults)

- Number of individuals and firms listed in largest private credit bureau as percentage of a adult population

Getting Credit: collateral rules and credit information

Note: Private bureau coverage and public credit registry coverage are measured but do not count for the rankings.

Case Study Assumptions (applying to the Legal Rights Index only)

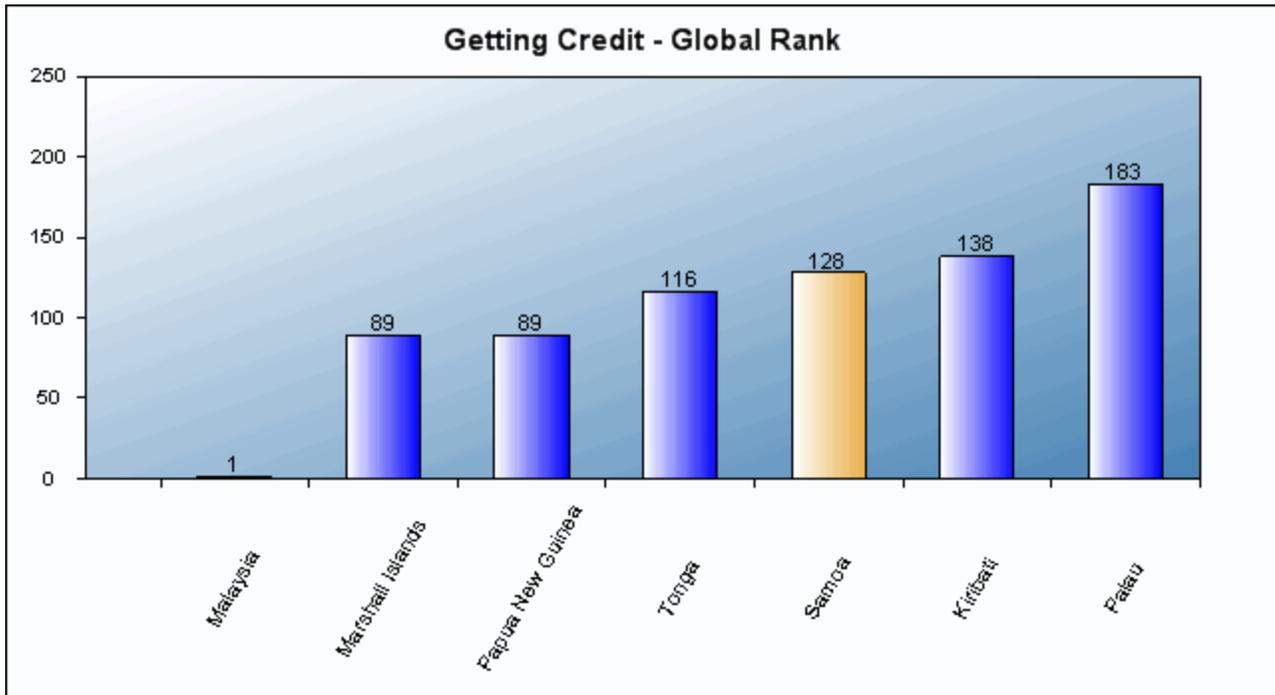

The Debtor

- is a Private Limited Liability Company
- has its Headquarters and only base of operations in the largest business city
- obtains a loan from a local bank (the Creditor) for an amount up to 10 times income (GNI) per capita
- Both creditor and debtor are 100% domestically owned.

1. Benchmarking Getting Credit Regulations:

Samoa is ranked 128 overall for Getting Credit.

Ranking of Samoa in Getting Credit - Compared to good practice and selected economies:

The following table shows Getting Credit data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Strength of legal rights index (0-10)	Depth of credit information index (0-6)	Public registry coverage (% of adults)	Private bureau coverage (% of adults)
New Zealand*				100.0
Portugal			67.1	
Singapore*	10			
United Kingdom		6		

<i>Selected Economy</i>				
Samoa	6	0	0.0	0.0

<i>Comparator Economies</i>

Palau	0	0	0.0	0.0
Papua New Guinea	5	3	0.0	0.6
Tonga	7	0	0.0	0.0

* The following economies are also good practice economies for :

Strength of legal rights index (0-10): Hong Kong, China, Kenya, Kyrgyz Republic, Malaysia

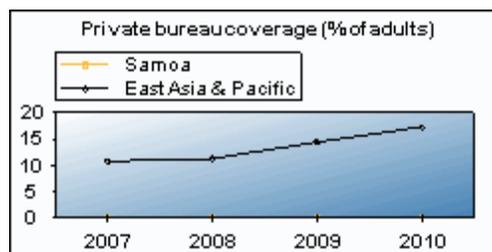

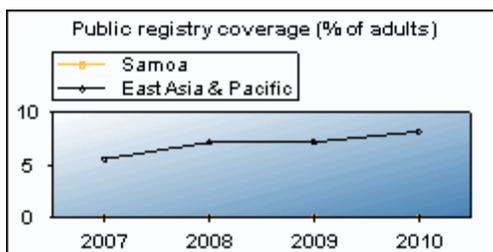

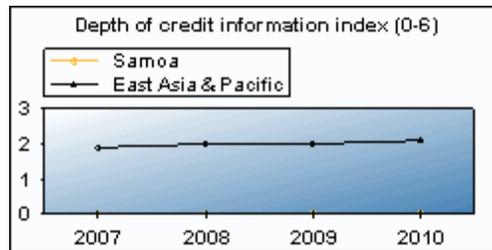

Private bureau coverage (% of adults): Argentina, Australia, Canada, Iceland, Ireland, Norway, Sweden, United Kingdom, United States

27 countries have the highest credit information index.

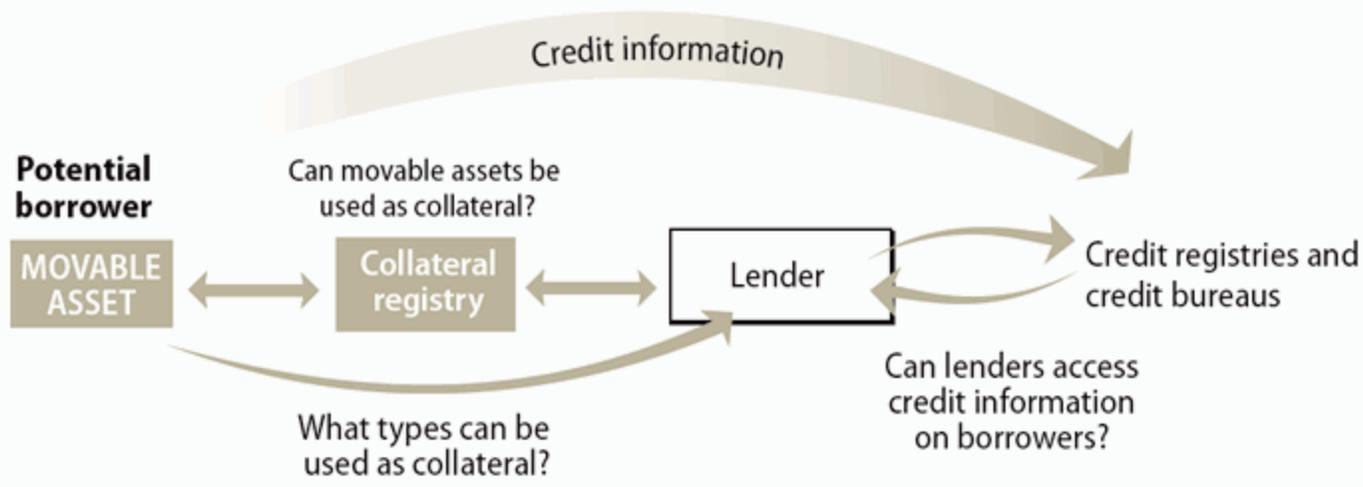

2. Historical data: Getting Credit in Samoa

Getting Credit data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	125	128
Strength of legal rights index (0-10)	6	6	6	6
Depth of credit information index (0-6)	0	0	0	0
Private bureau coverage (% of adults)	0.0	0.0	0.0	0.0
Public registry coverage (% of adults)	0.0	0.0	0.0	0.0

3. The following graphs illustrate the Getting Credit sub indicators in Samoa over the past 4 years:

**Do lenders have credit information on entrepreneurs seeking credit?
Is the law favorable to borrowers and lenders using movable assets as collateral?**

The following table summarize legal rights of borrowers and lenders, and the availability and legal framework of credit registries in Samoa.

Getting Credit Indicators (2010)			Indicator
Private bureau coverage (% of adults)	Private credit bureau	Public credit registry	0
Are data on both firms and individuals distributed?	No	No	0
Are both positive and negative data distributed?	No	No	0
Does the registry distribute credit information from retailers, trade creditors or utility companies as well as financial institutions?	No	No	0
Are more than 2 years of historical credit information distributed?	No	No	0
Is data on all loans below 1% of income per capita distributed?	No	No	0
Is it guaranteed by law that borrowers can inspect their data in the largest credit registry?	No	No	0
Coverage	0.0	0.0	
Number of individuals		0	0
Number of firms		0	0

Can any business use movable assets as collateral while keeping possession of the assets; and any financial institution accept such assets as collateral ?	Yes
Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral?	Yes
Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral?	Yes
May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets ?	No
Is a general description of debts and obligations permitted in collateral agreements, so that all types of obligations and debts can be secured by stating a maximum amount rather than a specific amount between the parties ?	Yes
Is a collateral registry in operation, that is unified geographically and by asset type, as well as indexed by the grantor's name of a security right ?	No
Do secured creditors have absolute priority to their collateral outside bankruptcy procedures?	No
Do secured creditors have absolute priority to their collateral in bankruptcy procedures?	No
During reorganization, are secured creditors' claims exempt from an automatic stay on enforcement?	Yes
Does the law authorize parties to agree on out of court enforcement?	Yes

Stronger investor protections matter for the ability of companies to raise the capital needed to grow, innovate, diversify and compete. This is all the more crucial in times of financial crisis when entrepreneurs must navigate through defiant environments to finance their activities. Using 3 indices of investor protection, *Doing Business* measures how economies regulate a standard case of self-dealing, use of corporate assets for personal gains. Since 2005, 51 economies have strengthened investor protections as measured by *Doing Business*.

Some reform outcomes

In Indonesia, an economy that consistently improved its laws regulating investor protections, the number of firms listed on the Indonesia Stock Exchange increased from 331 to 396 between 2004 and 2009. Meanwhile, market capitalization grew from 680 trillion rupiah (\$75 billion) to 1,077 trillion rupiah (\$119 billion).

After Thailand amended its laws in 2006 and 2008, more than 85 transactions that failed to comply with the disclosure standards were suspended. Thirteen were deemed prejudicial and were therefore canceled, thus preventing damage to the companies involved and preserving their value. Companies were not deterred either, as more than 30 new companies joined the stock exchange since 2005 bringing the number of listed companies to 523.

What do the Protecting Investors indicators measure?

Extent of disclosure index (0–10)

- Who can approve related-party transactions
- Requirements for external and internal disclosure in case of related-party transactions

Extent of director liability index (0–10)

- Ability of shareholders to hold the interested party and the approving body liable in case of a prejudicial related-party transaction
- Available legal remedies (damages, repayment of profits, fines, imprisonment and rescission of the transaction)
- Ability of shareholders to sue directly or derivatively

Ease of shareholder suits index (0–10)

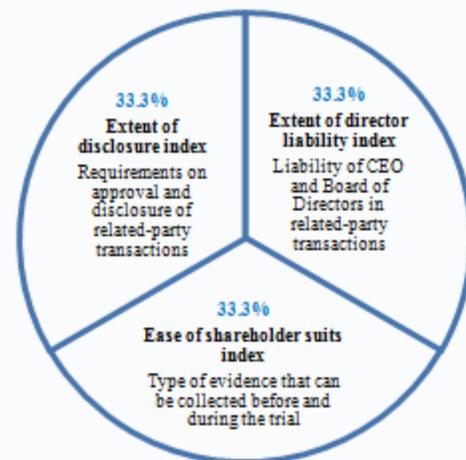

- Documents and information available during trial
- Access to internal corporate documents (directly or through a government inspector)

Strength of investor protection index (0–10)

- Simple average of the extent of disclosure, extent of director liability and ease of shareholder suits indices

Protecting Investors: minority shareholder rights in related-party transactions

Rankings are based on 3 subindicators

Case Study Assumptions

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders),
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

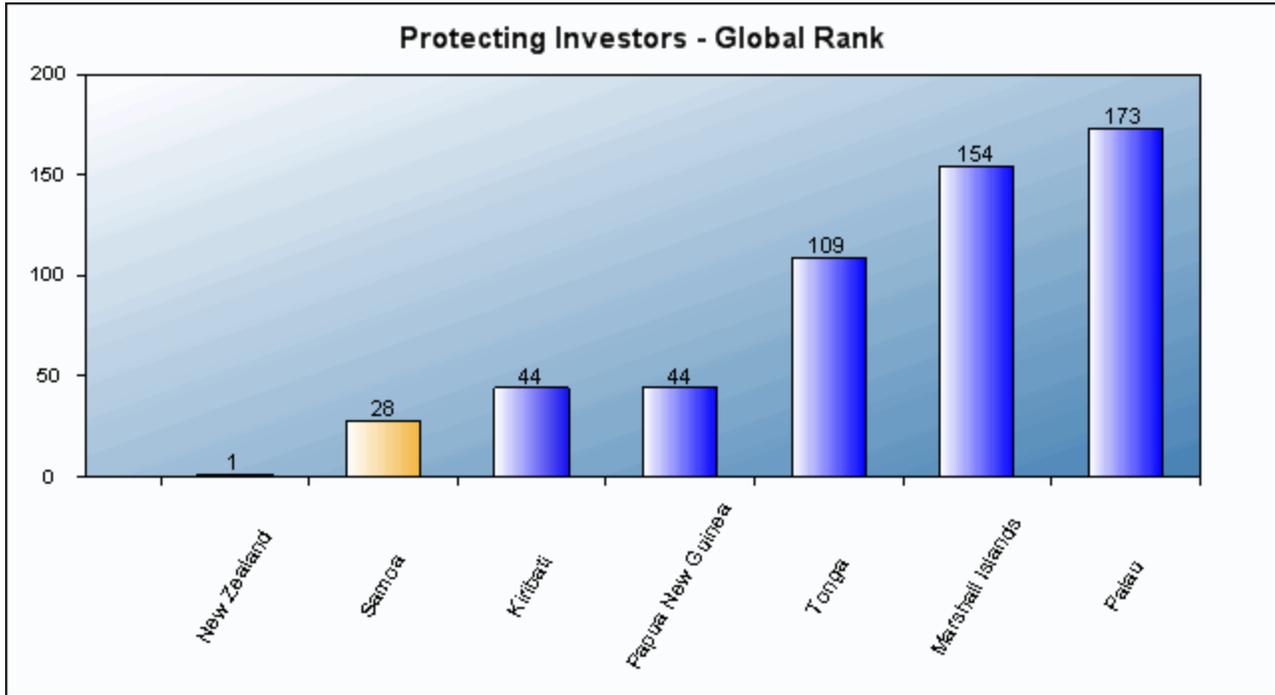

The transaction

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.
- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to the purchasing company.
- Shareholders sue the interested parties and the members of the board of directors.

1. Benchmarking Protecting Investors Regulations:

Samoa is ranked 28 overall for Protecting Investors.

Ranking of Samoa in Protecting Investors - Compared to good practice and selected economies:

The following table shows Protecting Investors data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Strength of investor protection index (0-10)
New Zealand	9.7

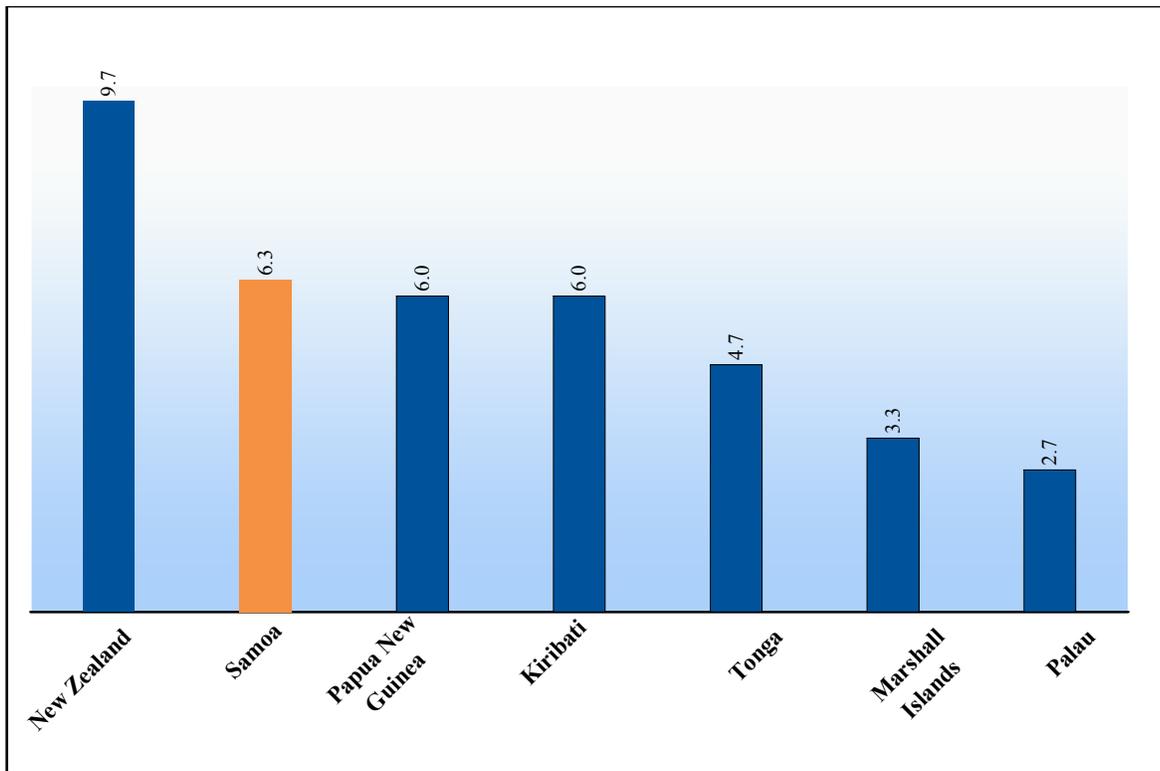

<i>Selected Economy</i>	
Samoa	6.3

<i>Comparator Economies</i>	
Kiribati	6.0
Marshall Islands	3.3
Palau	2.7
Papua New Guinea	6.0
Tonga	4.7

2. Historical data: Protecting Investors in Samoa

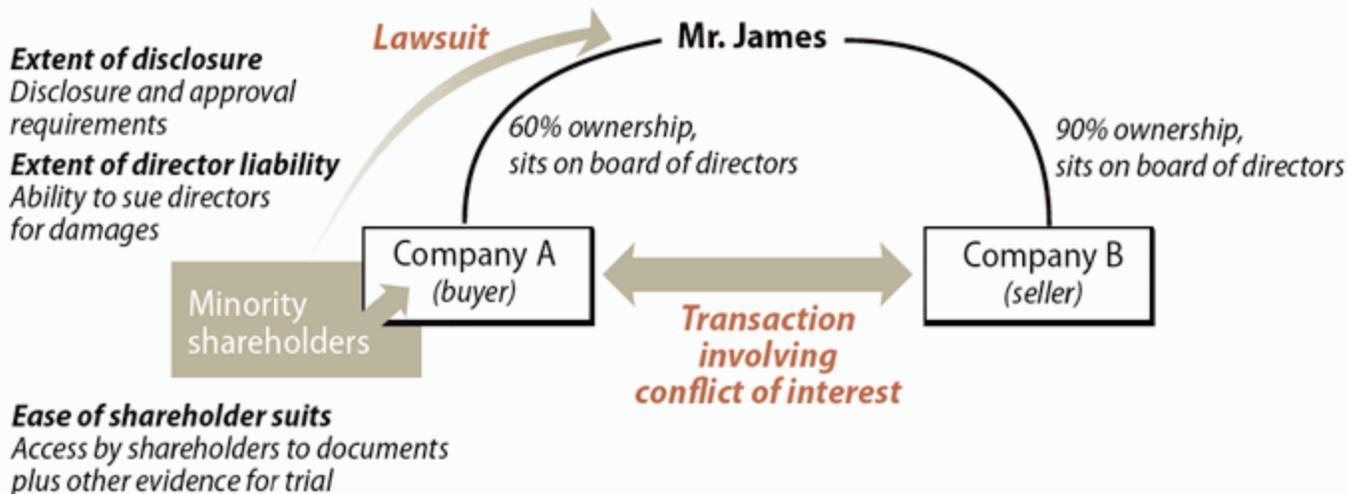

Protecting Investors data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	27	28
Strength of investor protection index (0-10)	6.3	6.3	6.3	6.3

3. The following graph illustrates the Protecting Investors index in Samoa compared to best practice and selected Economies:

Note: The higher the score, the greater the investor protection.

How well are minority shareholders protected against self-dealing in related-party transactions?

The table below provides a full breakdown of how the disclosure, director liability, and shareholder suits indexes are calculated in Samoa.

Protecting Investors Data (2010)	Indicator
Extent of disclosure index (0-10)	5
What corporate body provides legally sufficient approval for the transaction?	1
Whether immediate disclosure of the transaction to the public and/or shareholders is required?	0
Whether disclosure of the transaction in published periodic filings (annual reports) is required?	2
Whether disclosure of the conflict of interest by Mr. James to the board of directors is required?	2
Whether an external body must review the terms of the transaction before it takes place?	0
Extent of director liability index (0-10)	6
Whether shareholders can hold Mr. James liable for the damage that the Buyer-Seller transaction causes to the company?	2
Whether shareholders can hold the approving body (the CEO or board of directors) liable for the damage that the Buyer-Seller transaction causes to the company?	1
Whether a court can void the transaction upon a successful claim by a shareholder plaintiff?	0
Whether Mr. James pays damages for the harm caused to the company upon a successful claim by the shareholder plaintiff?	1

Whether Mr. James repays profits made from the transaction upon a successful claim by the shareholder plaintiff?	1
Whether fines and imprisonment can be applied against Mr. James?	0
Whether shareholders can sue directly or derivatively for the damage that the Buyer-Seller transaction causes to the company?	1
Ease of shareholder suits index (0-10)	8
Whether the plaintiff can obtain any documents from the defendant and witnesses during trial?	3
Whether the plaintiff can directly question the defendant and witnesses during trial?	2
Whether the plaintiff can request categories of documents from the defendant without identifying specific ones?	1
Whether shareholders owning 10% or less of Buyer's shares can request an inspector to investigate the transaction?	1
Whether the level of proof required for civil suits is lower than that of criminal cases?	1
Whether shareholders owning 10% or less of Buyer's shares can inspect transaction documents before filing suit?	0
Strength of investor protection index (0-10)	6.3

Taxes are essential to provide public amenities, infrastructure and services which are crucial for a properly functioning economy. *Doing Business* data show that economies where it is more difficult and costly to pay taxes have larger shares of informal sector activity. More than 60% of economies have reformed in the last 6 years and are starting to see concrete results.

Some reform outcomes

Colombia introduced a new electronic system for social security and labor taxes in 2006 and by 2008 the social security contributions collected from small and medium-size companies rose by 42%, to 550 billion pesos.

Mauritius reduced the corporate income tax rate from 25% to 15% and removed exemptions and industry-specific allowances in 2006 and saw their corporate income tax revenue grow by 27% in the following year, and in 2008/09 it increased by 65%.

What do the Paying taxes indicators measure?

Tax payments for a manufacturing company in 2009
(number per year adjusted for electronic or joint filing and payment)

- Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)
- Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

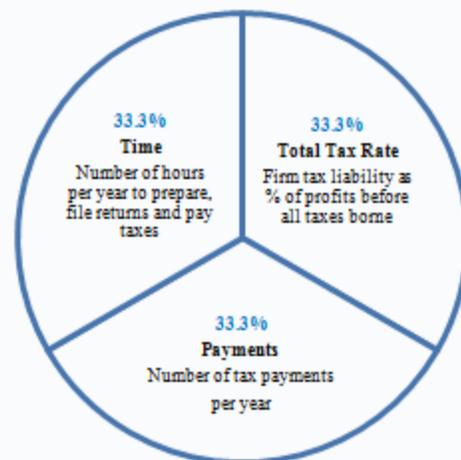

- Collecting information and computing the tax payable
- Completing tax return forms, filing with proper agencies
- Arranging payment or withholding
- Preparing separate tax accounting books, if required

Total tax rate (% of profit)

- Profit or corporate income tax
- Mandatory social contributions and labor taxes paid by the employer
- Property and property transfer taxes
- Dividend, capital gains and financial transactions taxes
- Waste collection, vehicle, road and other taxes

Paying Taxes: tax compliance for a local manufacturing company

Rankings are based on 3 subindicators

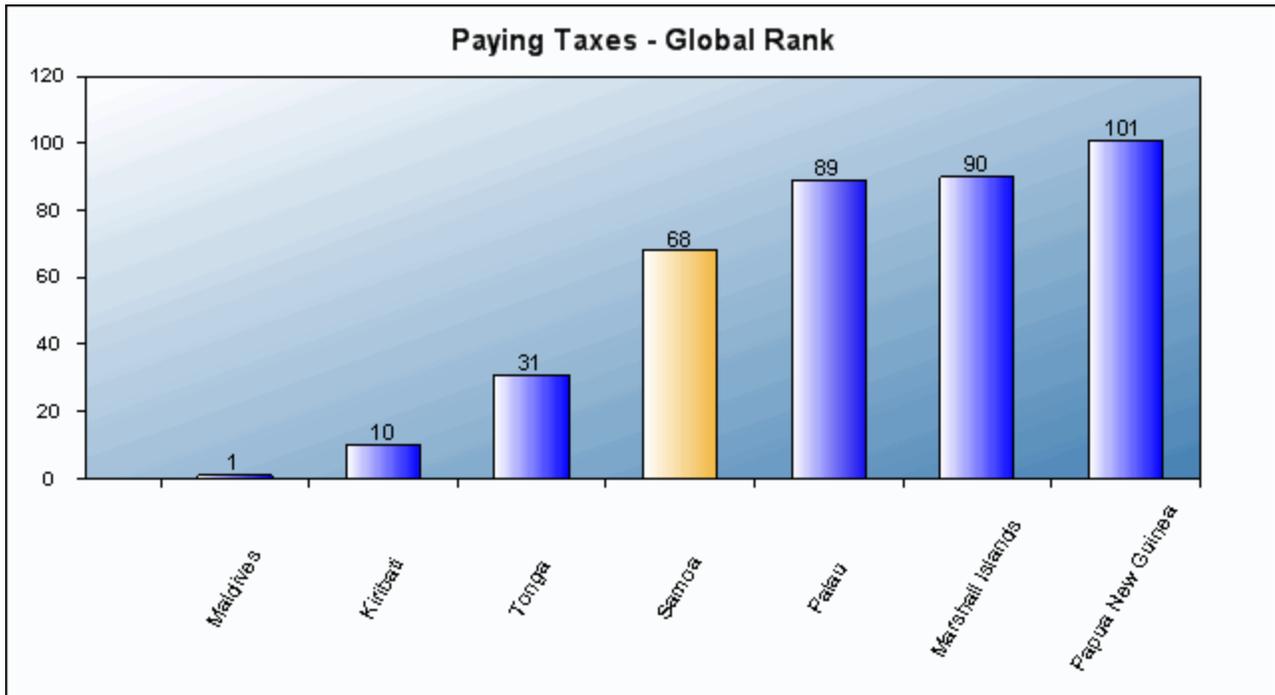

Case Study Assumptions

- TaxpayerCo is a medium-size business that started operations 2 years ago.
- Tax practitioners are asked to review its financial statements, as well as a standard list of transactions that the company completed during the year.
- Respondents are asked how much in taxes and mandatory contributions the business must pay and what the process is for doing so.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions paid during the second year of operation are recorded.
- Taxes and mandatory contributions are measured at all levels of government
- Taxes and mandatory contributions include corporate income tax, turnover tax, all labor taxes and contributions paid by the company.
- A range of standard deductions and exemptions are also recorded.

1. Benchmarking Paying Taxes Regulations:

Samoa is ranked 68 overall for Paying Taxes.

Ranking of Samoa in Paying Taxes - Compared to good practice and selected economies:

The following table shows Paying Taxes data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Payments (number per year)	Time (hours per year)	Total tax rate (% profit)
Maldives*	3	0	
Timor-Leste			0.2

<i>Selected Economy</i>			
Samoa	37	224	18.9

<i>Comparator Economies</i>			
Kiribati	7	120	31.8
Marshall Islands	21	128	64.9
Palau	19	128	73.0
Papua New Guinea	33	194	42.3
Tonga	20	164	25.5

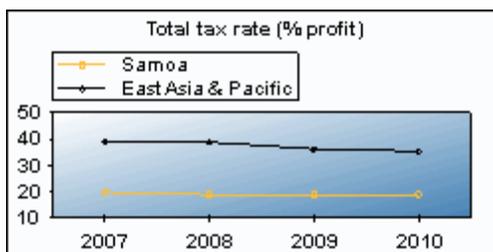

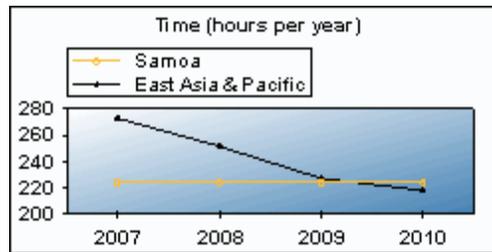

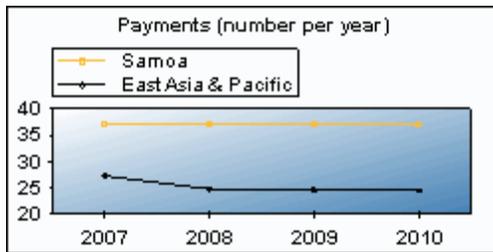

* The following economies are also good practice economies for :

Payments (number per year): Qatar

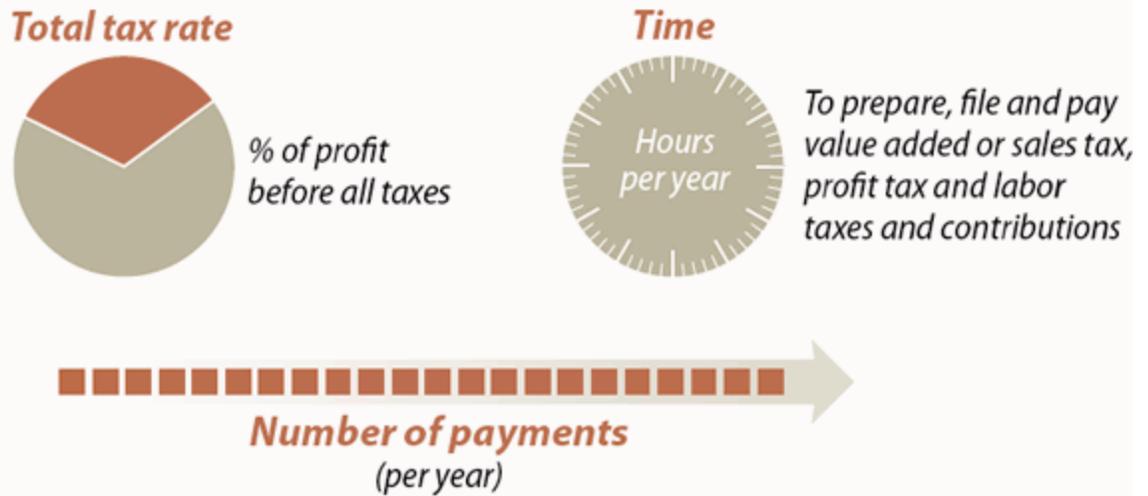

2. Historical data: Paying Taxes in Samoa

Paying Taxes data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	65	68
Total tax rate (% profit)	19.8	18.9	18.9	18.9
Payments (number per year)	37	37	37	37
Time (hours per year)	224	224	224	224

3. The following graphs illustrate the Paying Taxes sub indicators in Samoa over the past 4 years:

What are the time, total tax rate and number of payments necessary for a local medium-sized company to pay all taxes?

The table below addresses the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year in Samoa, as well as measures of administrative burden in paying taxes.

Tax or mandatory contribution	Payments (number)	Notes on Payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% profit)	Notes on TTR
Fuel tax	1						
Value added tax (VAGST)	6		80	12.5% and 15%	value added		
Tax on check transactions (stamp duty)	1			\$0.50 per check	number of checks	0.00	
Accident levy	12			1.0%	gross salaries	1.20	
Capital gains tax	1			27.0%	capital gains	1.40	
National provident fund	12		96	5.0%	gross salaries	5.80	
Corporate income tax	4		48	27.0%	taxable profit	10.50	
Totals	37		224			18.9	

Making trade between countries easier is increasingly important for business in today's globalized world. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Trade facilitation tools such as electronic data interchange systems, risk-based inspections, and single windows help improve an economy's trading environment and boost firms' international competitiveness. *Doing Business* trade indicators take into account documents, cost and time associated with every procedure for trading a standard shipment of goods by ocean transport. Research indicates that exporters in developing countries have much more to gain by a 10% drop in their trading costs than from a similar decrease of the tariffs applied to their products in global markets.

Some reform outcomes

In Georgia, reducing customs clearance time by a day has led to operational savings of an estimated \$288 per truck, or an annual \$133 million for the country's whole trading community given the growing amount of cross-border trade in recent years.

In Korea, predictable cargo processing times and rapid turnover by ports and warehouses provide a benefit to the Korean economy of some \$2 billion annually.

What do the Trading Across Borders indicators measure?

Trading Across Borders: exporting and importing by ocean transport

Rankings are based on 3 subindicators

Documents required to export and import (number)

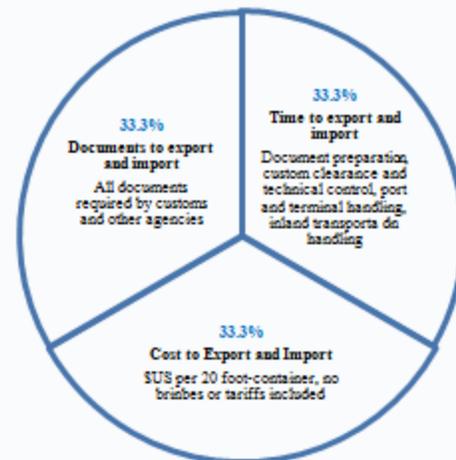

- Bank documents
- Customs clearance documents
- Port and terminal handling documents
- Transport documents

Time required to export and import (days)

- Obtaining all the documents
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Does not include ocean transport time

Cost required to export and import (US\$ per container)

- All documentation
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Official costs only, no bribes

Case Study Assumptions

The Business

- Has at least 60 employees and is located in the economy's largest business city
- Is a private, limited liability company, which exports more than 10% of its sales. It is fully domestically owned and does not operate in an export processing zone or an industrial estate with special export or import privileges

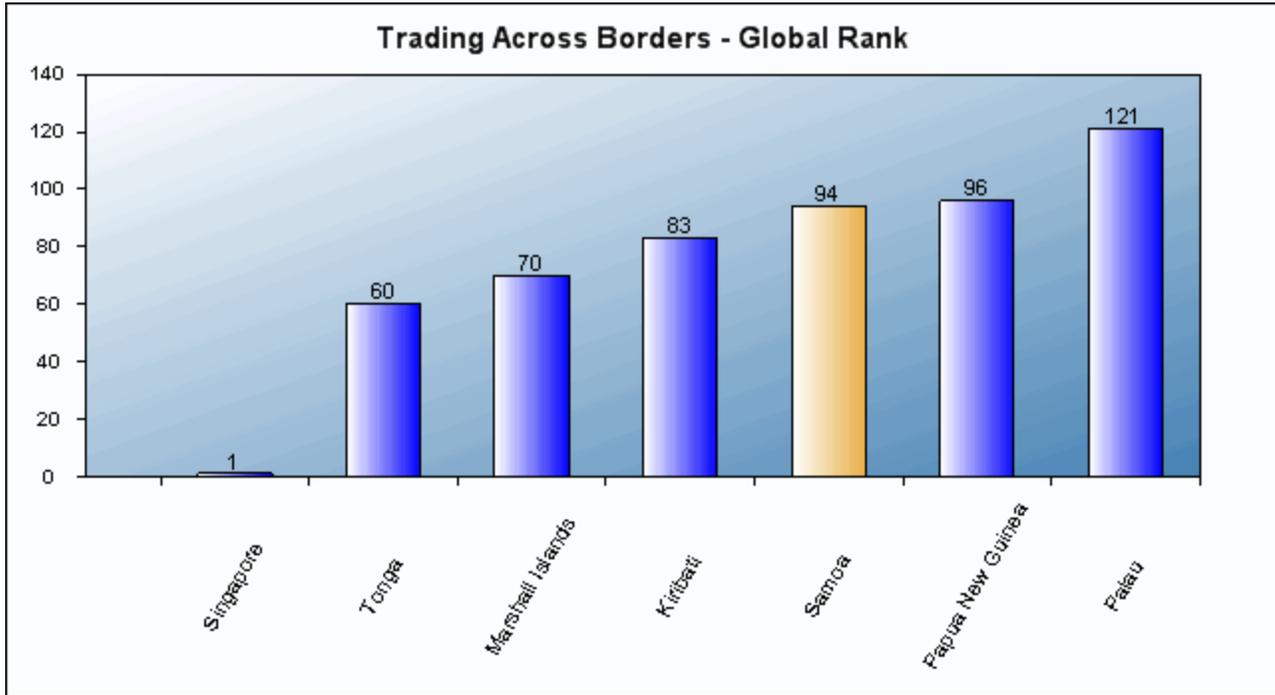

The traded product

- Is transported in a dry-cargo, 20-foot full container load; weighs 10 tons and is valued at \$20,000
- Is not hazardous or include military items; it does not require special phytosanitary or environmental safety standards, refrigeration or any other special environment
- Is one of the economy's leading export or import products

1. Benchmarking Trading Across Borders Regulations:

Samoa is ranked 94 overall for Trading Across Borders.

Ranking of Samoa in Trading Across Borders - Compared to good practice and selected economies:

The following table shows Trading Across Borders data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Documents to export (number)	Time to export (days)	Cost to export (US\$ per container)	Documents to import (number)	Time to import (days)	Cost to import (US\$ per container)
Denmark*		5

* The following economies are also good practice economies for :

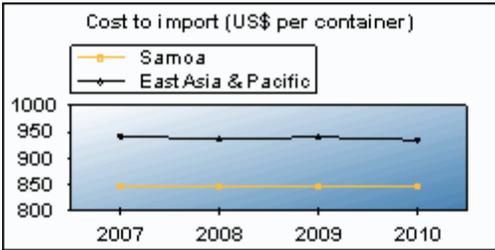

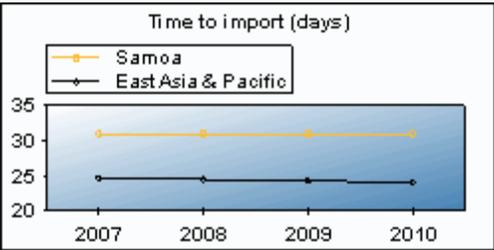

Time to export (days): Estonia

2. Historical data: Trading Across Borders in Samoa

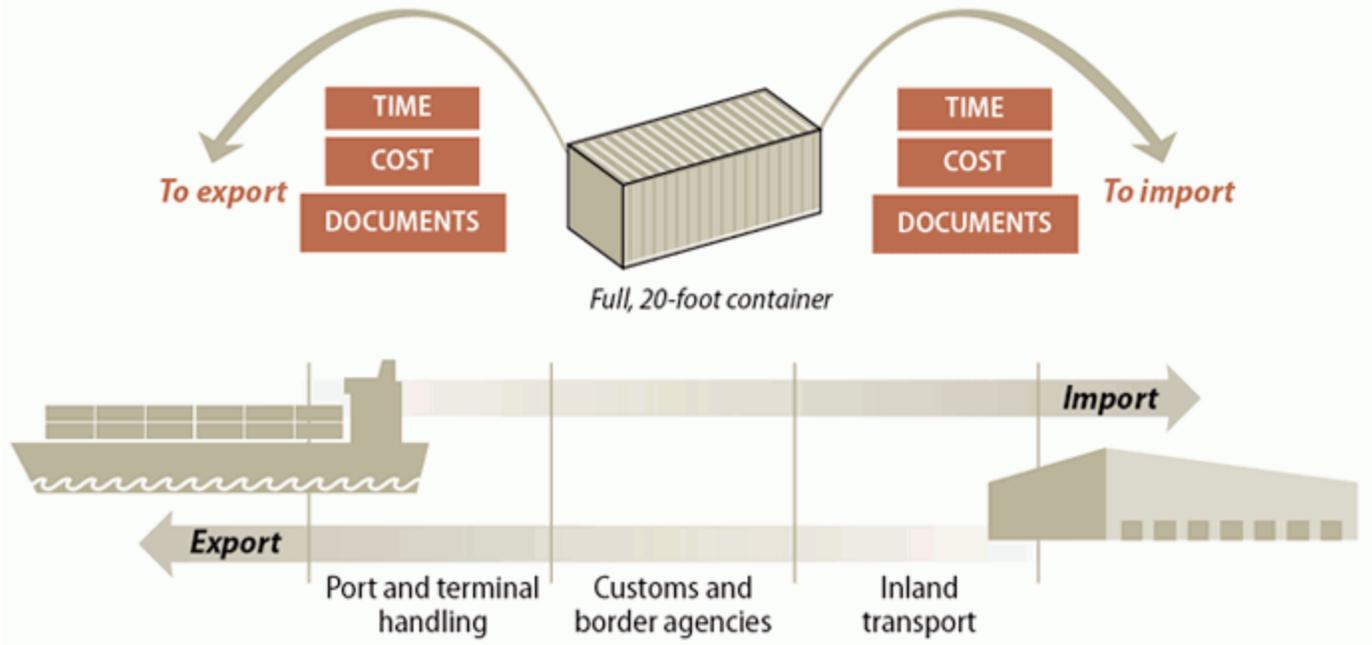

Trading Across Borders data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	90	94
Cost to export (US\$ per container)	930	820	820	820
Cost to import (US\$ per container)	848	848	848	848
Documents to export (number)	7	7	7	7
Documents to import (number)	7	7	7	7
Time to export (days)	27	27	27	27
Time to import (days)	31	31	31	31

3. The following graphs illustrate the Trading Across Borders sub indicators in Samoa over the past 4 years:

How much time, how many documents and what cost to export and import across borders by ocean transport?

These tables list the procedures necessary to import and export a standardized cargo of goods in Samoa. The documents required to export and import the goods are also shown.

Nature of Export Procedures (2010)	Duration (days)	US\$ Cost
Documents preparation	7	304
Customs clearance and technical control	5	60
Ports and terminal handling	12	103
Inland transportation and handling	3	353
Totals	27	820

Nature of Import Procedures (2010)	Duration (days)	US\$ Cost
Documents preparation	12	304
Customs clearance and technical control	6	60
Ports and terminal handling	11	131
Inland transportation and handling	2	353
Totals	31	848

Documents for Export and Import

Export

Bill of lading
Cargo release order
Commercial invoice
Customs export declaration
Pre-shipment inspection clean report of findings
Technical standard/health certificate
Terminal handling receipts

Import

Bill of lading
Cargo release order
Commercial invoice
Customs import declaration
Pre-shipment inspection clean report of findings
Technical standard/health certificate
Terminal handling receipts

Well functioning courts help businesses expand their network and markets. Where contract enforcement is efficient, firms have greater access to credit and are more likely to engage with new borrowers or customers. *Doing Business* measures the efficiency of the judicial system in resolving a commercial sale dispute before local courts. Following the step-by-step evolution of a standardized case study, data relating to the time, cost and procedural complexity of resolving a commercial lawsuit are collected through study of the codes of civil procedure and other court regulations, as well as through surveys completed by local litigation lawyers (and, in a quarter of the countries, by judges as well).

Some reform outcomes

In Rwanda the implementation of specialized commercial courts in May 2008 resulted in a significant decrease of the case backlog, and contributed to reduce the time to resolve a commercial dispute by nearly 3 months.

In Austria a "data highway" for the courts that allows attachments to be sent electronically has produced savings of €4.4 million in postage alone.

What do the Enforcing Contracts indicators measure?

Enforcing Contracts: resolving a commercial dispute through the courts

Rankings are based on 3 subindicators

Procedures to enforce a contract (number)

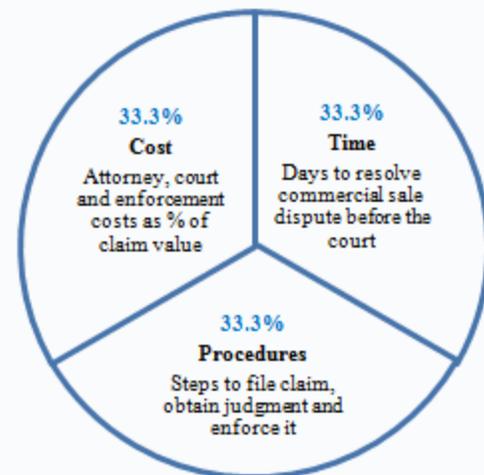

- Any interaction between the parties in a commercial dispute, or between them and the judge or court officer
- Steps to file the case
- Steps for trial and judgment
- Steps to enforce the judgment

Time required to complete procedures (calendar days)

- Time to file and serve the case
- Time for trial and obtaining judgment
- Time to enforce the judgment

Cost required to complete procedures (% of claim)

- No bribes
- Average attorney fees
- Court costs, including expert fees
- Enforcement costs

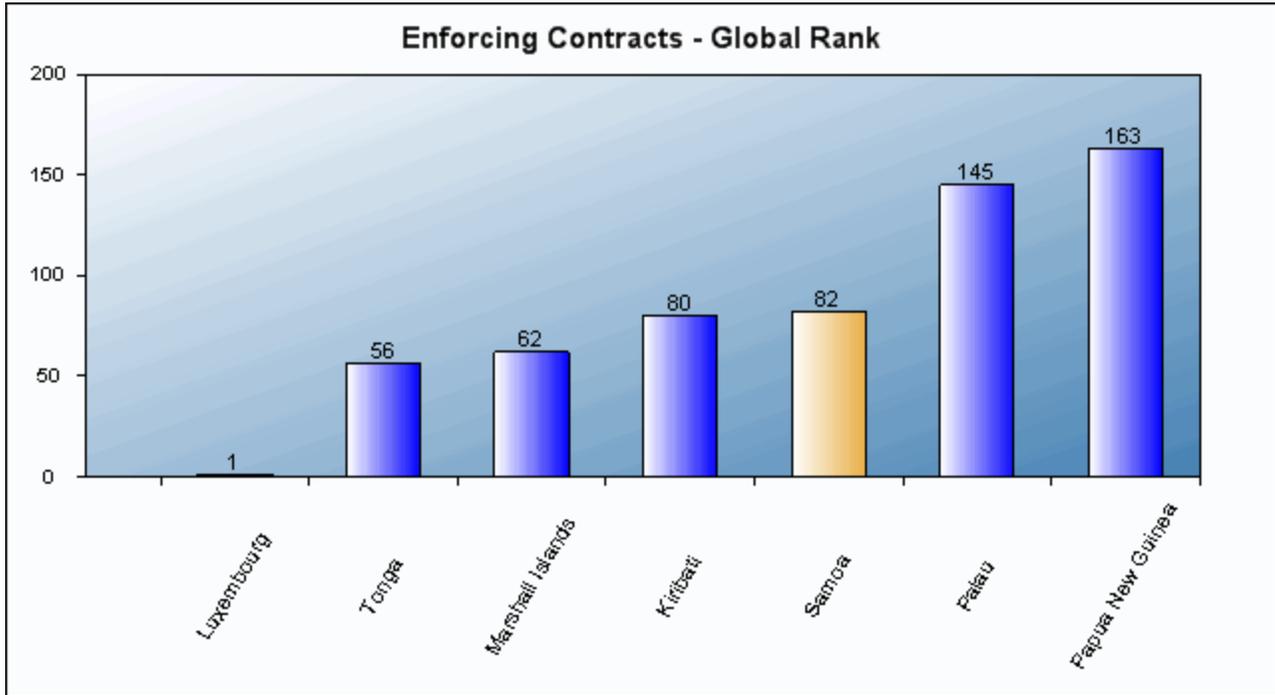

Case Study Assumptions

- Seller and Buyer are domestic companies
- Buyer orders custom-made goods, then does not pay
- Seller sues Buyer before competent court
- Value of claim is 200% of GNI per capita
- Seller requests pre-trial attachment to secure claim
- Dispute on quality of the goods requires expert opinion
- Judge decides in favor of Seller, no appeal
- Seller enforces judgment through a public sale of Buyer's movable assets.

1. Benchmarking Enforcing Contracts Regulations:

Samoa is ranked 82 overall for Enforcing Contracts.

Ranking of Samoa in Enforcing Contracts - Compared to good practice and selected economies:

The following table shows Enforcing Contracts data for Samoa compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of claim)
Bhutan			0.1
Ireland	20		
Singapore		150	

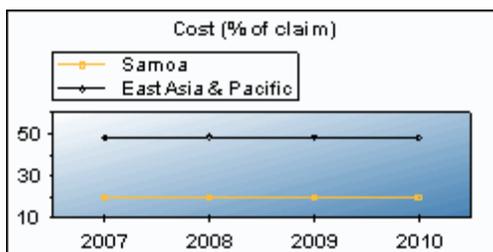

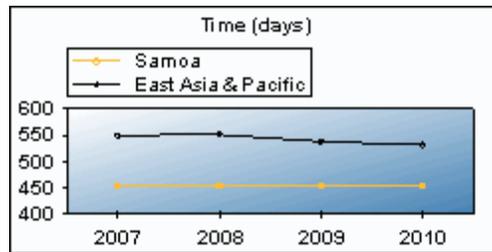

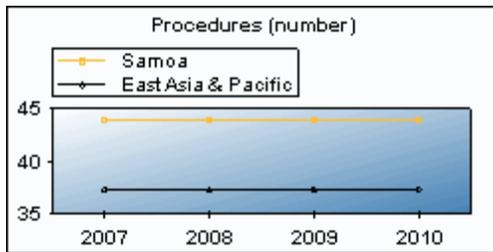

<i>Selected Economy</i>			
Samoa	44	455	19.7

<i>Comparator Economies</i>			
Kiribati	32	660	25.8

Papua New Guinea	42	591	110.3
Tonga	37	350	30.5

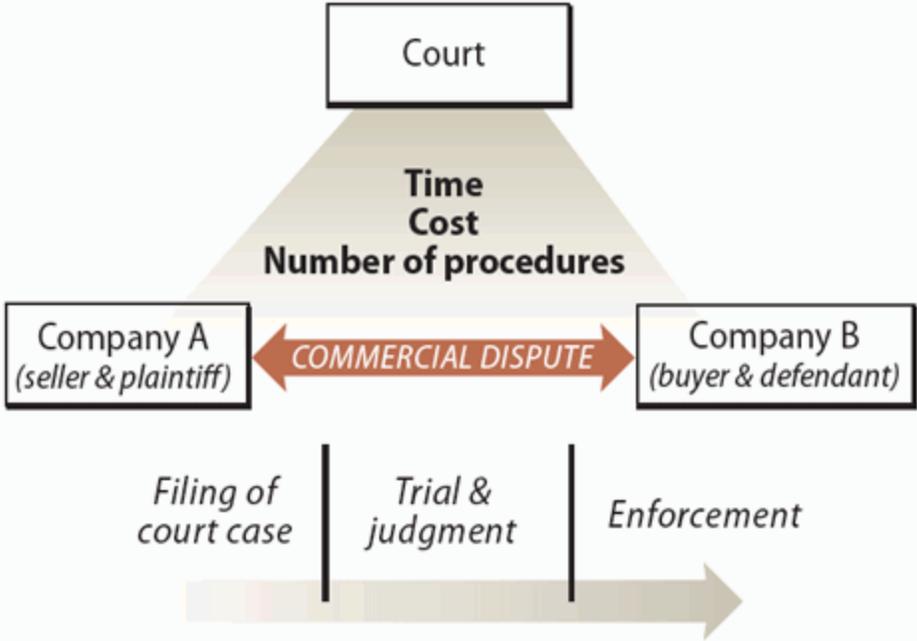

2. Historical data: Enforcing Contracts in Samoa

Enforcing Contracts data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	84	82
Procedures (number)	44	44	44	44
Time (days)	455	455	455	455
Cost (% of claim)	19.7	19.7	19.7	19.7

3. The following graphs illustrate the Enforcing Contracts sub indicators in Samoa over the past 4 years:

What are the time, cost and number of procedures to resolve a commercial dispute through the courts?

This topic looks at the efficiency of contract enforcement in Samoa.

Nature of Procedure (2010)	Indicator
Procedures (number)	44
Time (days)	455
Filing and service	35.0
Trial and judgment	240.0
Enforcement of judgment	180.0
Cost (% of claim)*	19.70
Attorney cost (% of claim)	15.0
Court cost (% of claim)	0.3
Enforcement Cost (% of claim)	4.4

Court information: Apia Supreme Court

* Claim assumed to be equivalent to 200% of income per capita.

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in businesses' speedy return to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses, and thereby improve growth and sustainability in the economy overall.

Some reform outcomes

A study of the 2005 bankruptcy reform in Brazil found that it had led to an average reduction of 22% in the cost of credit for Brazilian companies, a 39% increase in overall credit and a 79% increase in long-term credit in the economy. The purpose of the reform was to improve creditor protection in insolvency proceedings.

Following the introduction of debtor-in-possession reorganizations in Korea in 2006, the number of reorganization filings increased from 76 in 2006 to 670 in 2009.

What does the Closing a Business indicator measure?

Closing a Business: insolvency proceedings against local company

Time required to recover debt (years)

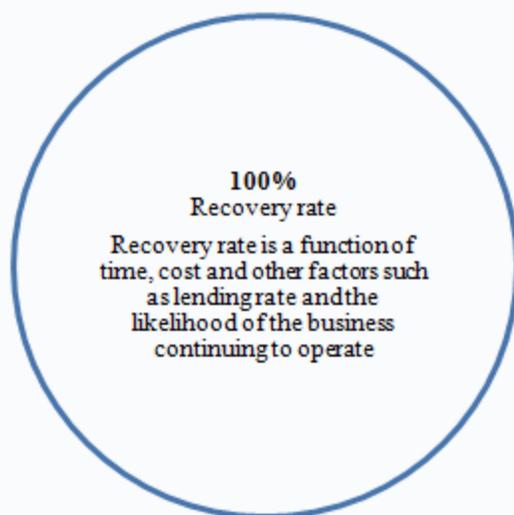

- Measured in calendar years
- Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate value)

- Measured as percentage of estate value
- Court fees
- Fees of insolvency administrators
- Lawyers' fees
- Assessors' and auctioneers' fees
- All other fees and costs

Recovery rate for creditors (cents on the dollar)

- Measures the cents on the dollar recovered by creditors
- Present value of debt recovered
- Costs of the insolvency proceedings are deducted
- Depreciation of furniture is taken into account
- Outcome for the business (survival or not) affects the maximum value that can be recovered

Case Study Assumptions

The Company

- is domestically owned
- is a limited liability company operating a hotel
- operates in the economy's largest business city
- has 201 employees, 1 secured creditor and 50 unsecured creditors
- has a higher value as a going concern and a lower value in a piecemeal sale of assets

* For *Doing Business 2011* the Employing Workers indicator is not included in the aggregate ease of doing business ranking.

Summary of changes to business regulation in top 10 most improved economies in *Doing Business 2011* and selected comparator economies.

Brunei Darussalam	Brunei Darussalam made starting a business easier by improving efficiency at the company registrar and implementing an electronic system for name searches. Brunei Darussalam reduced the corporate income tax rate from 23.5% to 22% while also introducing a lower tax rate for small businesses, ranging from 5.5% to 11%. The introduction of an electronic customs system in Brunei Darussalam made trading easier.
Cape Verde	Cape Verde made start-up easier by eliminating the need for a municipal inspection before a business begins operations and computerizing the system for delivering the municipal license. Cape Verde eased property registration by switching from fees based on a percentage of the property value to lower fixed rates. Cape Verde abolished the stamp duties on sales and checks.
Grenada	Grenada eased business start-up by transferring responsibility for the commercial registry from the courts to the civil administration. The appointment of a registrar focusing only on property cut the time needed to transfer property in Grenada by almost half. Grenada's customs administration made trading faster by simplifying procedures, reducing inspections, improving staff training and enhancing communication with users.
Hungary	Hungary implemented a time limit for the issuance of building permits. Hungary reduced the property registration fee by 6% of the property value. Hungary simplified taxes and tax bases. Amendments to Hungary's bankruptcy law encourage insolvent companies to consider reaching agreements with creditors out of court so as to avoid bankruptcy.
Kazakhstan	Kazakhstan eased business start-up by reducing the minimum capital requirement to 100 tenge (\$0.70) and eliminating the need to have the memorandum of association and company charter notarized. Kazakhstan made dealing with construction permits easier by implementing a one-stop shop related to technical conditions for utilities. Kazakhstan strengthened investor protections by requiring greater corporate disclosure in company annual reports. Kazakhstan speeded up trade through efforts to modernize customs, including implementation of a risk management system and improvements in customs automation.
Marshall Islands	The Marshall Islands improved access to credit through a new law on secured transactions that establishes a central collateral registry, broadens the range of assets that can be used as collateral, allows a general description of debts and obligations and assets granted as collateral and establishes clear priority rules outside bankruptcy for secured creditors.
Papua New Guinea	Operation of a new private credit bureau improved the credit information system in Papua New Guinea.
Peru	Peru eased business start-up by simplifying the requirements for operating licenses and creating an online one-stop shop for business registration. Peru streamlined construction permitting by implementing administrative reforms. Peru introduced fast-track procedures at the land registry, cutting by half the time needed to register property. Peru made trading easier by implementing a new web-based electronic data interchange system, risk-based inspections and payment deferrals.
Rwanda	Rwanda made dealing with construction permits easier by passing new building regulations at the end of April 2010 and implementing new time limits for the issuance of various permits. Rwanda enhanced access to credit by allowing borrowers the right to inspect their own credit report and mandating that loans of all sizes be reported to the central bank's public credit registry. Rwanda reduced the number of trade documents required and enhanced its joint border management procedures with Uganda and other neighbors, leading to an improvement in the trade logistics environment.
Samoa	Samoa shifted from a deed system to a title system and fully computerized its land registry, which reduced the time required to register property by 4 months.
Tajikistan	Tajikistan made starting a business easier by creating a one-stop shop that consolidates registration with the state and the tax authority. Tajikistan strengthened investor protections by requiring greater corporate disclosure in the annual report and greater access to corporate information for minority investors. Tajikistan lowered its corporate income tax rate.

Tonga	Tonga simplified the payment of taxes by replacing a 2-tier system with a 25% corporate income tax rate for both domestic and foreign companies and introducing tax incentives with a broad-based capital allowance system to replace tax holidays and other tax concessions.
Vietnam	Vietnam eased company start-up by creating a one-stop shop that combines the processes for obtaining a business license and tax license and by eliminating the need for a seal for company licensing. Vietnam made dealing with construction permits easier by reducing the cost to register newly completed buildings by 50% and transferring the authority to register buildings from local authorities to the Department of National Resources and Environment. Vietnam improved its credit information system by allowing borrowers to examine their own credit report and correct errors.
Zambia	Zambia eased business start-up by eliminating the minimum capital requirement. Zambia eased trade by implementing a one-stop border post with Zimbabwe, launching web-based submission of customs declarations and introducing scanning machines at border posts. Zambia improved contract enforcement by introducing an electronic case management system in the courts that provides electronic referencing of cases, a database of laws, real-time court reporting and public access to court records.
