## INTRODUCTION

*Doing Business* sheds light on how easy or difficult it is for a local entrepreneur to open and run a small to medium-size business when complying with relevant regulations. It measures and tracks changes in regulations affecting 10 areas in the life cycle of a business: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency.

In a series of annual reports *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 185 economies, from Afghanistan to Zimbabwe, over time. The data set covers 46 economies in Sub-Saharan Africa, 33 in Latin America and the Caribbean, 24 in East Asia and the Pacific, 24 in Eastern Europe and Central Asia, 19 in the Middle East and North Africa and 8 in South Asia, as well as 31 OECD high-income economies. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why.

This regional profile presents the *Doing Business* indicators for economies in the Southern African Development Community (SADC). It also shows the regional average, the best performance globally for each indicator and data for the following comparator regions: East Asia and the Pacific (EAP), Economic Community of West African States (ECOWAS), European Union (EU), Middle East and North Africa

(MENA) and Organization for the Harmonization of Business Law in Africa (OHADA). The data in this report are current as of June 1, 2012 (except for the paying taxes indicators, which cover the period January–December 2011).

The *Doing Business* methodology has limitations. Other areas important to business—such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders and getting electricity), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions—are not directly studied by *Doing Business*. The indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policy makers in designing regulatory reform.

More information is available in the full report. *Doing Business 2013* presents the indicators, analyzes their relationship with economic outcomes and recommends regulatory reforms. The data, along with information on ordering the *Doing Business 2013* report, are available on the *Doing Business* website at <http://www.doingbusiness.org>.

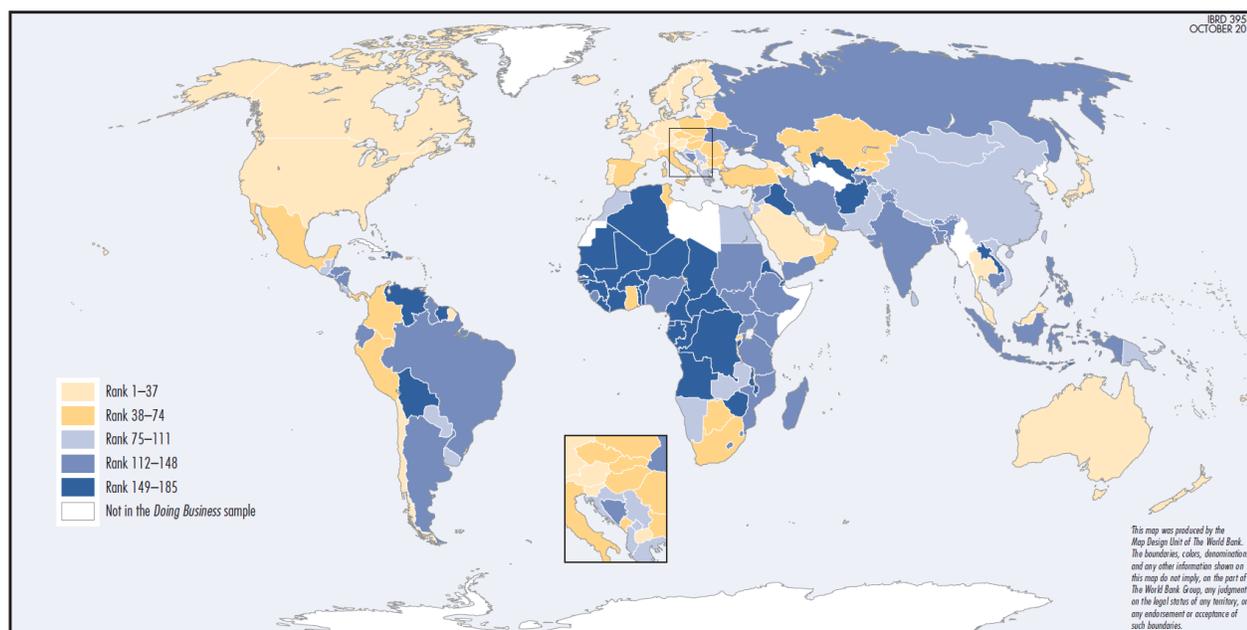

## THE BUSINESS ENVIRONMENT

For policy makers trying to improve their economy's regulatory environment for business, a good place to start is to find out how it compares with the regulatory environment in other economies. *Doing Business* provides an aggregate ranking on the ease of doing business based on indicator sets that measure and benchmark regulations applying to domestic small to medium-size businesses through their life cycle. Economies are ranked from 1 to 185 by the ease of doing business index. For each economy the index is calculated as the ranking on the simple average of its percentile rankings on each of the 10 topics included in the index in *Doing Business 2013*: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency.

The ranking on each topic is the simple average of the percentile rankings on its component indicators (see the data notes for more details).

The aggregate ranking on the ease of doing business benchmarks each economy's performance on the indicators against that of all other economies in the *Doing Business* sample (figure 1.1). While this ranking tells much about the business environment in an economy, it does not tell the whole story. The ranking on the ease of doing business, and the underlying indicators, do not measure all aspects of the business environment that matter to firms and investors or that affect the competitiveness of the economy. Still, a high ranking does mean that the government has created a regulatory environment conducive to operating a business.

Figure 1.1 Where economies stand in the global ranking on the ease of doing business

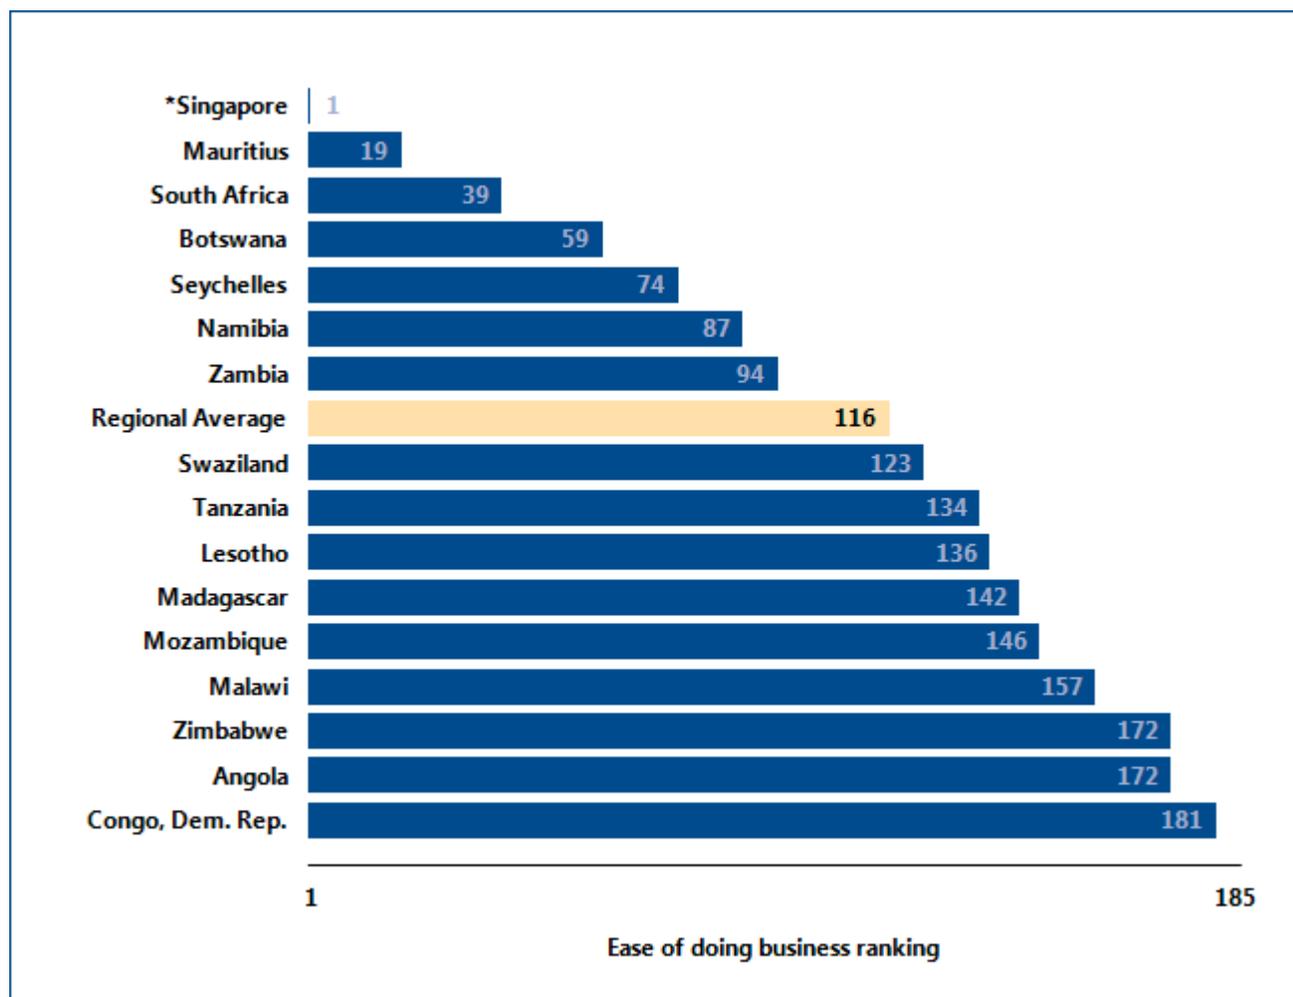

Source: *Doing Business* database.

## THE BUSINESS ENVIRONMENT

For policy makers, knowing where their economy stands in the aggregate ranking on the ease of doing business is useful. Also useful is to know how it ranks compared with other economies in the region and compared with the regional average (figure 1.2). Another perspective is provided by the regional average rankings on the topics included in the ease of doing business index (figure 1.3).

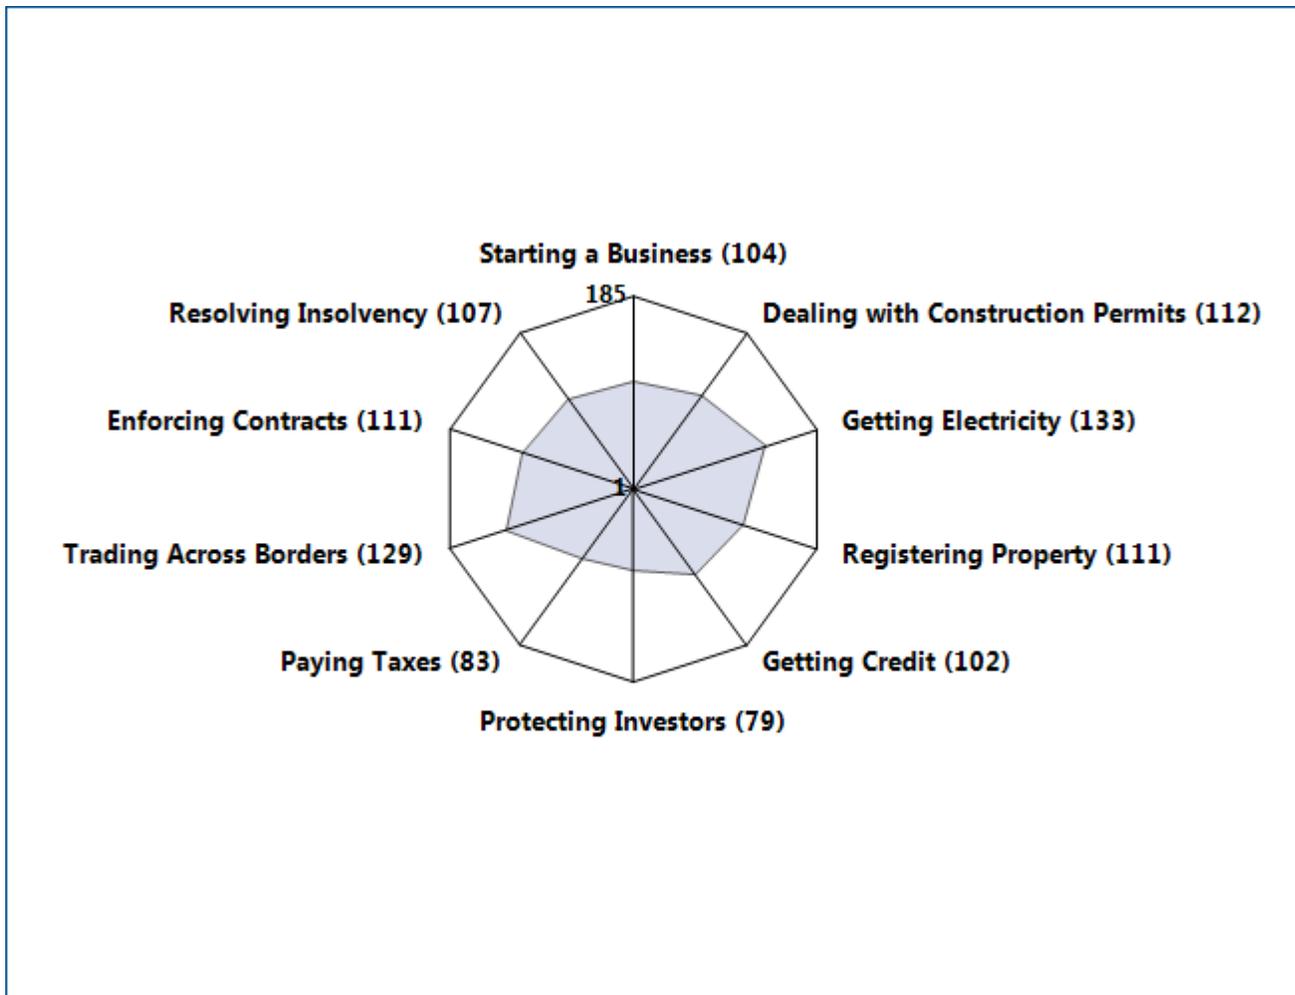

Figure 1.2 How economies in the Southern African Development Community (SADC) rank on the ease of doing business

## THE BUSINESS ENVIRONMENT

Just as the overall ranking on the ease of doing business tells only part of the story, so do changes in that ranking. Yearly movements in rankings can provide some indication of changes in an economy's regulatory environment for firms, but they are always relative. An economy's ranking might change because of developments in other economies. An economy that implemented business regulation reforms may fail to rise in the rankings (or may even drop) if it is passed by others whose business regulation reforms had a

more significant impact as measured by *Doing Business*.

The absolute values of the indicators tell another part of the story (table 1.1). Policy makers can learn much by comparing the indicators for their economy with those for the lowest- and highest-scoring economies in the region as well as those for the best performers globally. These comparisons may reveal unexpected strengths in an area of business regulation—such as a regulatory process that can be completed with a small number of procedures in a few days and at a low cost.

Table 1.1 Summary of *Doing Business* indicators for the Southern African Development Community (SADC)

Indicator	Lowest regional performance	Best regional performance	Regional average	Best global performance
<b>Starting a Business (rank)</b>	171 (Angola)	14 (Mauritius)	104	1 (New Zealand)
Procedures (number)	12 (Swaziland)	2 (Madagascar)	8	1 (New Zealand)*
Time (days)	90 (Zimbabwe)	6 (Mauritius)	39	1 (New Zealand)
Cost (% of income per capita)	284.7 (Congo, Dem. Rep.)	0.3 (South Africa)	49.4	0.0 (Slovenia)
Paid-in Min. Capital (% of income per capita)	24.6 (Angola)	0.0 (12 Economies*)	1.7	0.0 (91 Economies*)
<b>Dealing with Construction Permits (rank)</b>	175 (Malawi)	39 (South Africa)	112	1 (Hong Kong SAR, China)
Procedures (number)	22 (Botswana)	11 (Congo, Dem. Rep.)*	15	6 (Hong Kong SAR, China)*
Time (days)	614 (Zimbabwe)	95 (Swaziland)	222	26 (Singapore)
Cost (% of income per capita)	4,423.4 (Zimbabwe)	25.3 (Seychelles)	816.5	1.1 (Qatar)
<b>Getting Electricity (rank)</b>	183 (Madagascar)	44 (Mauritius)	133	1 (Iceland)
Procedures (number)	9 (Mozambique)	4 (Mauritius)*	6	3 (Germany)*
Time (days)	450 (Madagascar)	38 (Namibia)	141	17 (Germany)
Cost (% of income per capita)	27,211.6 (Congo, Dem. Rep.)	295.1 (Mauritius)	4,110.5	0.0 (Japan)

Indicator	Lowest regional performance	Best regional performance	Regional average	Best global performance
<b>Registering Property (rank)</b>	169 (Namibia)	51 (Botswana)	111	1 (Georgia)
Procedures (number)	9 (Swaziland)	4 (Mauritius)*	6	1 (Georgia)*
Time (days)	184 (Angola)	15 (Mauritius)	54	1 (Portugal)
Cost (% of property value)	13.8 (Namibia)	3.1 (Angola)	7.3	0.0 (Belarus)*
<b>Getting Credit (rank)</b>	180 (Madagascar)	1 (South Africa)	102	1 (United Kingdom)*
Strength of legal rights index (0-10)	2 (Madagascar)	10 (South Africa)	6	10 (Malaysia)*
Depth of credit information index (0-6)	4 (Angola)*	6 (South Africa)	5	6 (United Kingdom)*
Public registry coverage (% of adults)	0.1 (Madagascar)	56.3 (Mauritius)	15.7	90.7 (Portugal)
Private bureau coverage (% of adults)	5.4 (Zambia)	63.9 (Namibia)	46.0	100.0 (United Kingdom)*
<b>Protecting Investors (rank)</b>	158 (Congo, Dem. Rep.)	10 (South Africa)	79	1 (New Zealand)
Extent of disclosure index (0-10)	2 (Swaziland)	8 (South Africa)*	5	10 (Hong Kong SAR, China)*
Extent of director liability index (0-10)	1 (Zimbabwe)	8 (South Africa)*	6	9 (Singapore)*
Ease of shareholder suits index (0-10)	3 (Botswana)	9 (Mauritius)*	6	10 (New Zealand)*
Strength of investor protection index (0-10)	3.3 (Congo, Dem. Rep.)	8.0 (South Africa)	5.5	9.7 (New Zealand)
<b>Paying Taxes (rank)</b>	171 (Congo, Dem. Rep.)	12 (Mauritius)	83	1 (United Arab Emirates)
Payments (number per year)	49 (Zimbabwe)	7 (Mauritius)	31	3 (Hong Kong SAR, China)*
Time (hours per year)	350 (Namibia)	76 (Seychelles)	209	12 (United Arab Emirates)
<b>Trading Across Borders (rank)</b>	170 (Congo, Dem. Rep.)	15 (Mauritius)	129	1 (Singapore)
Documents to export (number)	11 (Angola)	4 (Madagascar)	7	2 (France)
Time to export (days)	53 (Zimbabwe)	10 (Mauritius)	29	5 (Singapore)*
Cost to export (US\$ per	3,280 (Zimbabwe)	660 (Mauritius)	1,869	435 (Malaysia)

Indicator	Lowest regional performance	Best regional performance	Regional average	Best global performance
container)				
Documents to import (number)	10 (Mozambique)*	5 (Seychelles)	8	2 (France)
Time to import (days)	73 (Zimbabwe)	10 (Mauritius)	35	4 (Singapore)
Cost to import (US\$ per container)	5,200 (Zimbabwe)	695 (Mauritius)	2,354	420 (Malaysia)
<b>Enforcing Contracts (rank)</b>	183 (Angola)	36 (Tanzania)	111	1 (Luxembourg)
Time (days)	1,011 (Angola)	270 (Namibia)	642	150 (Singapore)
Cost (% of claim)	147.6 (Congo, Dem. Rep.)	14.3 (Tanzania)	56.9	0.1 (Bhutan)
Procedures (number)	46 (Angola)	28 (Botswana)	37	21 (Ireland)*
<b>Resolving Insolvency (rank)</b>	169 (Zimbabwe)	29 (Botswana)	107	1 (Japan)
Time (years)	6.2 (Angola)	1.5 (Namibia)	2.9	0.4 (Ireland)
Cost (% of estate)	30 (Madagascar)	8 (Lesotho)	18	1 (Singapore)*
Recovery rate (cents on the dollar)	0.1 (Zimbabwe)	64.8 (Botswana)	27.1	92.8 (Japan)

Note: The ranking methodology for the paying taxes indicators changed in *Doing Business 2013*; see the data notes for details.

\* Two or more economies share the top ranking on this indicator. A number shown in place of an economy's name indicates the number of economies that share the top ranking on the indicator. For a list of these economies, see the *Doing Business* website (<http://www.doingbusiness.org>).

## STARTING A BUSINESS

Formal registration of companies has many immediate benefits for the companies and for business owners and employees. Legal entities outlive their founders. Resources are pooled as several shareholders join forces to start a company. Formally registered companies have access to services and institutions from courts to banks as well as to new markets. And their employees can benefit from protections provided by the law. An additional benefit comes with limited liability companies. These limit the financial liability of company owners to their investments, so personal assets of the owners are not put at risk.

Where governments make this process easy, more entrepreneurs start businesses in the formal sector, creating more good jobs and generating more revenue for the government.

### What do the indicators cover?

*Doing Business* measures the ease of starting a business in an economy by recording all procedures officially required or commonly done in practice by an entrepreneur to start up and formally operate an industrial or commercial business—as well as the time and cost required to complete these procedures. It also records the paid-in minimum capital that companies must deposit before registration. The ranking on the ease of starting a business is the simple average of the percentile rankings on the 4 component indicators: procedures, time, cost and paid-in minimum capital requirement.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the procedures. It assumes that all information is readily available to the entrepreneur and that there has been no prior contact with officials. It also assumes that the entrepreneur will pay no bribes. And it assumes that the business:

- Is a limited liability company, located in the largest business city.
- Has between 10 and 50 employees.

### WHAT THE STARTING A BUSINESS

#### INDICATORS MEASURE

#### Procedures to legally start and operate a company (number)

- Preregistration (for example, name verification or reservation, notarization)
- Registration in the economy's largest business city
- Postregistration (for example, social security registration, company seal)

#### Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

#### Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law

#### Paid-in minimum capital (% of income per capita)

- Deposited in a bank or with a notary before registration (or within 3 months)
- Conducts general commercial or industrial activities.
- Has a start-up capital of 10 times income per capita.
- Has a turnover of at least 100 times income per capita.
- Does not qualify for any special benefits.
- Does not own real estate.
- Is 100% domestically owned.

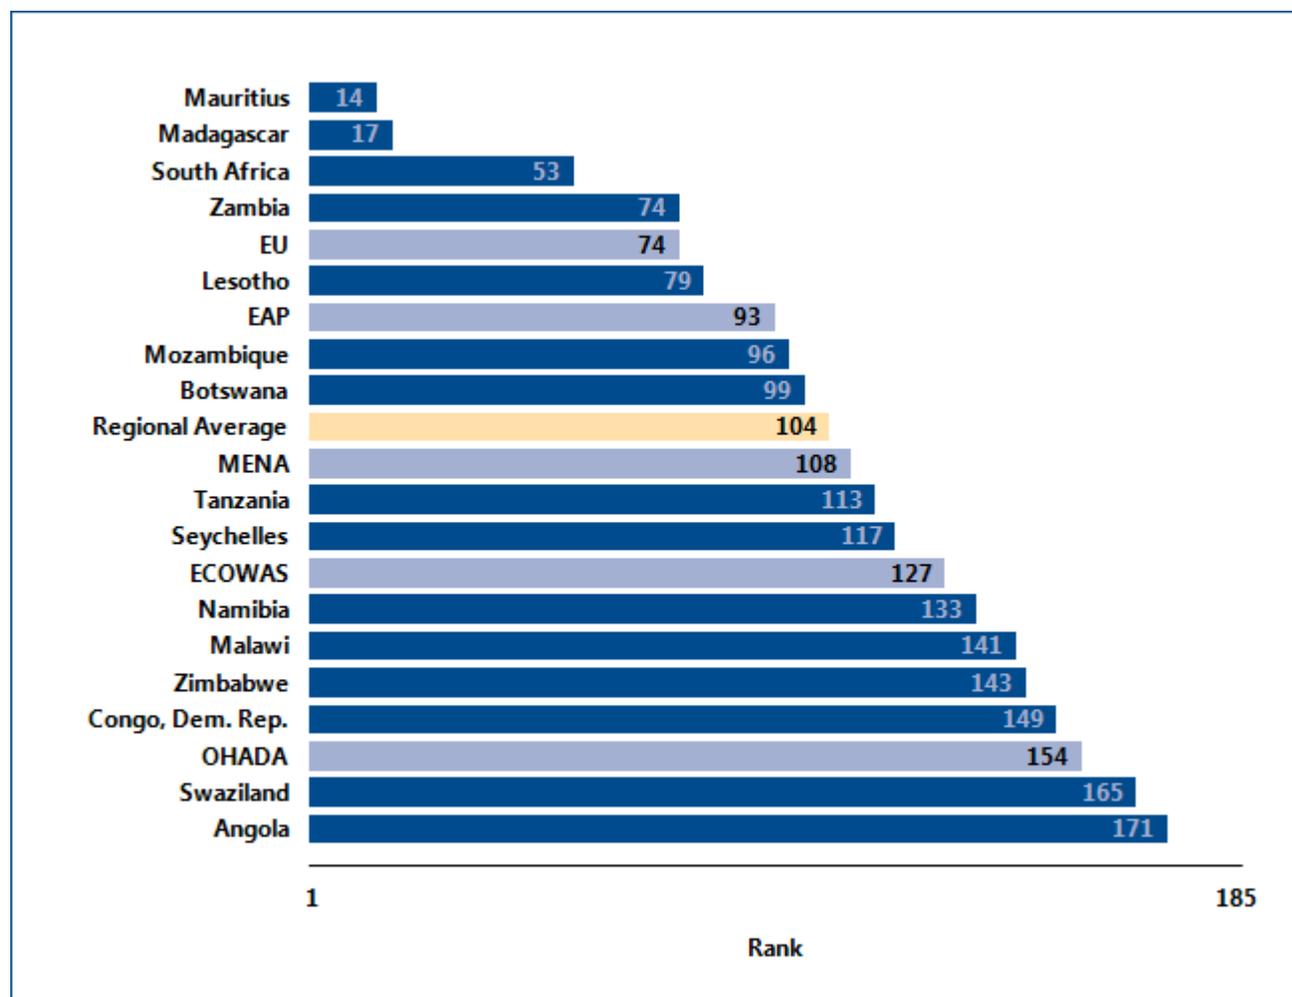

## STARTING A BUSINESS

### Where do the region's economies stand today?

How easy is it for entrepreneurs in economies in the Southern African Development Community (SADC) to start a business? The global rankings of these economies on the ease of starting a business suggest

an answer (figure 2.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 2.1 How economies in the Southern African Development Community (SADC) rank on the ease of starting a business

Source: Doing Business database.

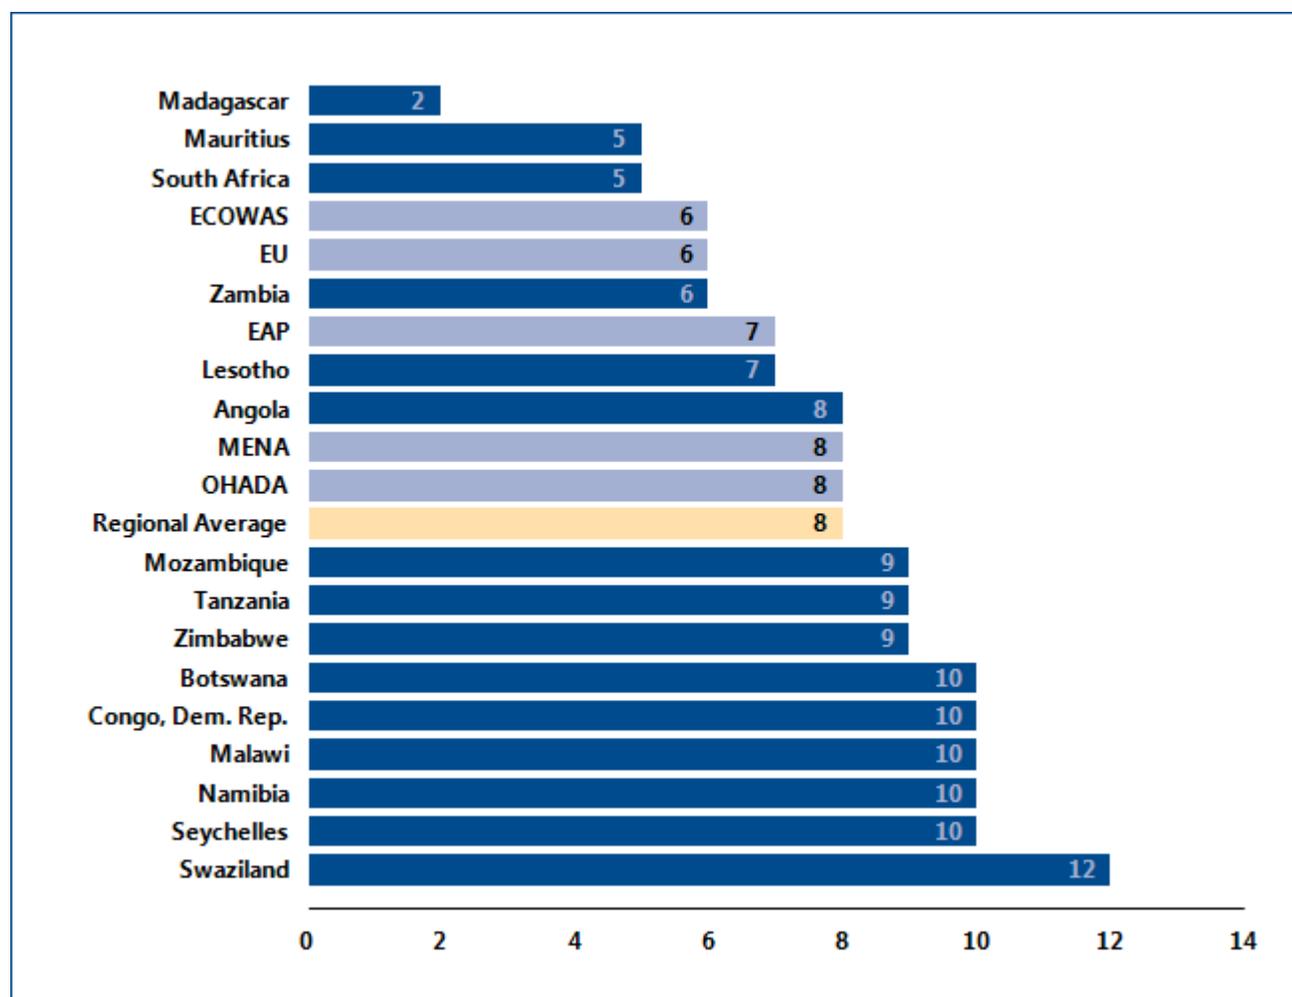

## STARTING A BUSINESS

The indicators underlying the rankings may be more revealing. Data collected by *Doing Business* show what it takes to start a business in each economy in the region: the number of procedures, the time, the

cost and the paid-in minimum capital requirement (figure 2.2). Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

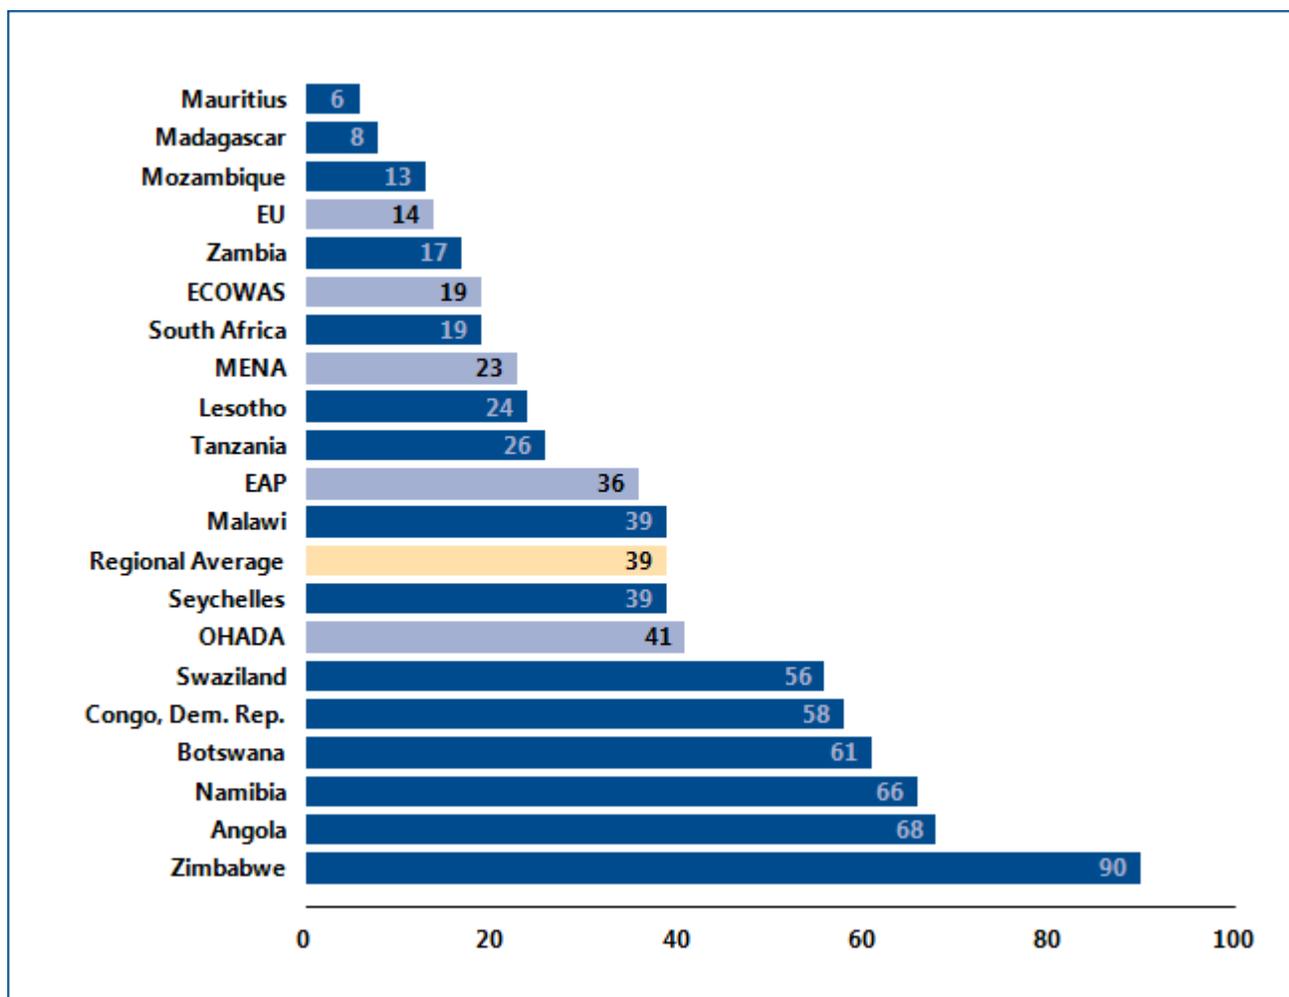

Figure 2.2 What it takes to start a business in economies in the Southern African Development Community (SADC)

## STARTING A BUSINESS

### What are the changes over time?

Economies around the world have taken steps making it easier to start a business—streamlining procedures by setting up a one-stop shop, making procedures simpler or faster by introducing technology, and reducing or eliminating minimum capital requirements. Many have undertaken business registration reforms in stages—and often as part of a larger regulatory reform program. Among the benefits have been greater firm

satisfaction and savings and more registered businesses, financial resources and job opportunities.

What business registration reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 2.1)?

Table 2.1 How have economies in the Southern African Development Community (SADC) made starting a business easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Madagascar</i>	Business registration was reduced to just eight days, streamlining operations at the one stop shop (GUIDE).
DB2008	<i>Mauritius</i>	Mauritius made starting a business faster by implementing a centralized database linking the company registry with tax, social security, and local authorities.
DB2008	<i>Mozambique</i>	Mozambique made starting a business faster by implementing electronic publication of the company start-up and eliminating the provisional registration. In addition, Mozambique made the use of notaries optional and computerized its registry and introduced flat registration fees.
DB2008	<i>Tanzania</i>	Tanzania made starting a business easier by decentralizing business registration by creating a business activities registration system and business registration centers in all the local authorities. The company seal became optional.
DB2009	<i>Angola</i>	All registration formalities can be completed at once at the Guichet Unico considerably reducing the number of procedures as well as time.
DB2009	<i>Botswana</i>	Computerization of the registry resulted in more efficiency and substantial time reduction.
DB2009	<i>Lesotho</i>	One stop shop reforms consolidated and simplified business registration processes and improved efficiency at the registry, substantially reducing the number of days to obtain a business license.
DB2009	<i>Madagascar</i>	Professional tax was abolished reducing the cost and online publication cut time.
DB2009	<i>Mauritius</i>	On-line reforms further simplified registration process and formalities were streamlined, reducing the number of

DB year	Economy	Reform
		procedures.
DB2009	<i>Namibia</i>	The computerization of the registry reduced the registration time tremendously.
DB2009	<i>South Africa</i>	Amendments to the corporate law have simplified the start-up process including abolishing the need to have a lawyer, reducing cost and time.
DB2009	<i>Zambia</i>	The revamping of the company registry and the creation of a one-stop shop resulted in tremendous time reduction.
DB2010	<i>Botswana</i>	Botswana eased business start-up with more efficient tax registration and obtaining of business license.
DB2010	<i>Madagascar</i>	Madagascar simplified business start-up through the streamlining of procedures at the one stop shop, elimination of stamp duty and elimination of the minimum capital requirement.
DB2010	<i>Mozambique</i>	Mozambique simplified business start up by eliminating the requirements of the minimum capital and bank deposit requirements.
DB2011	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo eased business start-up by eliminating procedures, including the company seal.
DB2011	<i>Mozambique</i>	Mozambique eased business start-up by introducing a simplified licensing process.
DB2011	<i>Zambia</i>	Zambia eased business start-up by eliminating the minimum capital requirement.
DB2011	<i>Zimbabwe</i>	Zimbabwe eased business start-up by reducing registration fees and speeding up the name search process and company and tax registration.
DB2012	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo made business start-up faster by reducing the time required to complete company registration and obtain a national identification number.
DB2012	<i>Madagascar</i>	Madagascar eased the process of starting a business by eliminating the minimum capital requirement, but also made it more difficult by introducing the requirement of obtaining a tax identification number.
DB2012	<i>South Africa</i>	South Africa made starting a business easier by implementing its new company law, which eliminated the requirement to reserve a company name and simplified the incorporation documents.
DB2013	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo made starting a business easier by appointing additional public notaries.
DB2013	<i>Lesotho</i>	Lesotho made starting a business easier by creating a one-stop shop for company incorporation and by eliminating the requirements for paid-in minimum capital and for

DB year	Economy	Reform
		notarization of the articles of association.
<b>DB2013</b>	<i>Madagascar</i>	Madagascar made starting a business easier by allowing the one-stop shop to deal with the publication of the notice of incorporation.
<b>DB2013</b>	<i>Tanzania</i>	Tanzania made starting a business easier by eliminating the requirement for inspections by health, town and land officers as a prerequisite for a business license.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

*Source:* *Doing Business* database.

## DEALING WITH CONSTRUCTION PERMITS

Regulation of construction is critical to protect the public. But it needs to be efficient, to avoid excessive constraints on a sector that plays an important part in every economy. Where complying with building regulations is excessively costly in time and money, many builders opt out. They may pay bribes to pass inspections or simply build illegally, leading to hazardous construction that puts public safety at risk. Where compliance is simple, straightforward and inexpensive, everyone is better off.

### What do the indicators cover?

*Doing Business* records the procedures, time and cost for a business to obtain all the necessary approvals to build a simple commercial warehouse in the economy's main city, connect it to basic utilities and register the property so that it can be used as collateral or transferred to another entity.

The ranking on the ease of dealing with construction permits is the simple average of the percentile rankings on its component indicators: procedures, time and cost.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the warehouse, including the utility connections.

The business:

- Is a limited liability company operating in the construction business and located in the largest business city.
- Is domestically owned and operated.
- Has 60 builders and other employees.

The warehouse:

- Is a new construction (there was no previous construction on the land).
- Has complete architectural and technical plans prepared by a licensed architect.

### WHAT THE DEALING WITH CONSTRUCTION PERMITS INDICATORS MEASURE

#### Procedures to legally build a warehouse (number)

Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates

Completing all required notifications and receiving all necessary inspections

Obtaining utility connections for water, sewerage and a fixed telephone line

Registering the warehouse after its completion (if required for use as collateral or for transfer of warehouse)

#### Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day

Procedure completed once final document is received

No prior contact with officials

#### Cost required to complete each procedure (% of income per capita)

Official costs only, no bribes

- Will be connected to water, sewerage (sewage system, septic tank or their equivalent) and a fixed telephone line.
- The connection to each utility network will be 10 meters (32 feet, 10 inches) long.
- Will be used for general storage, such as of books or stationery (not for goods requiring special conditions).
- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

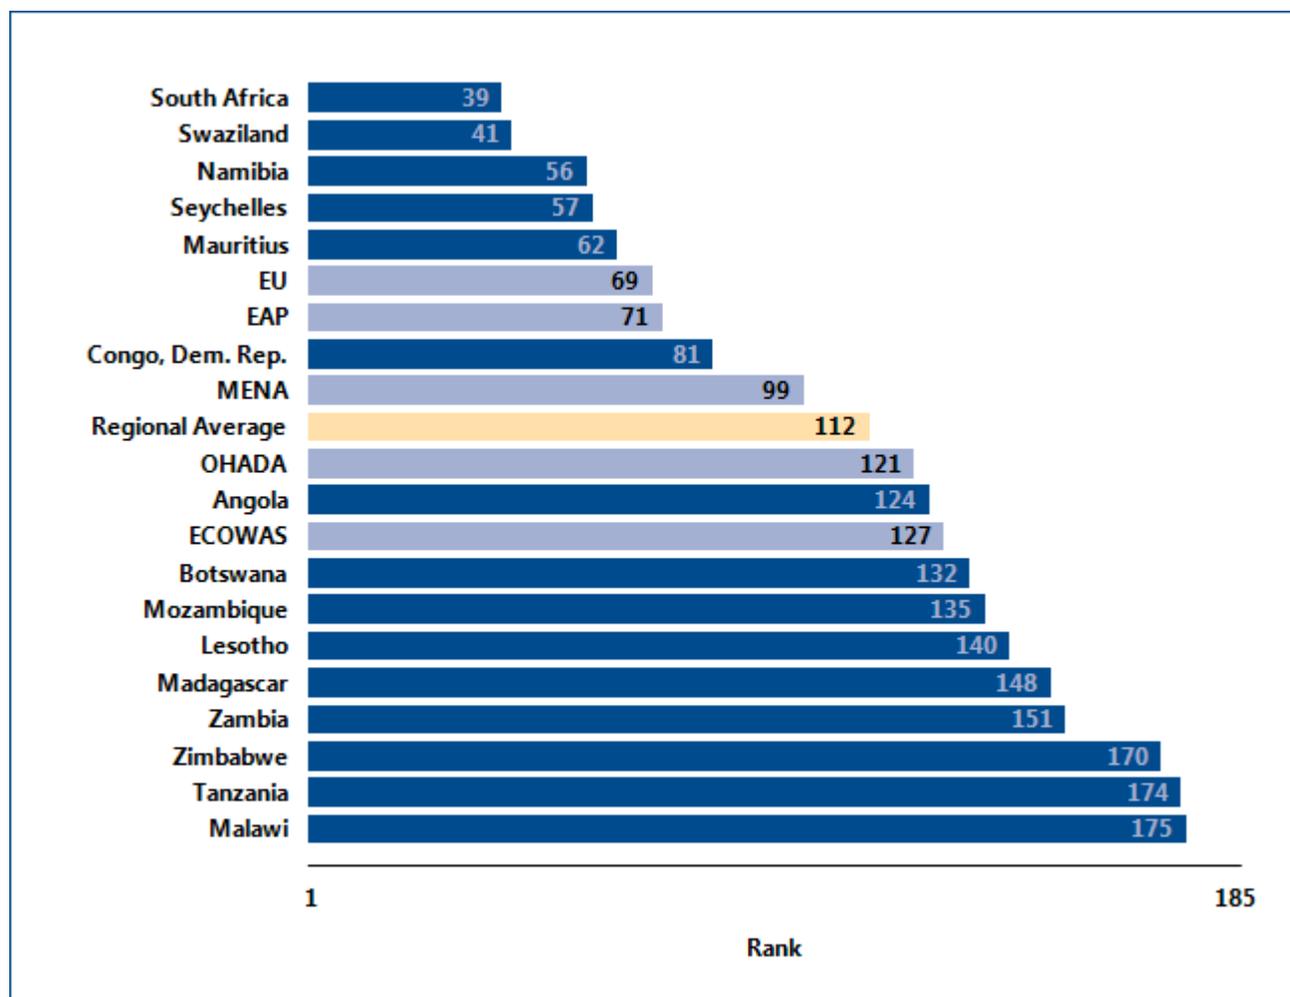

## DEALING WITH CONSTRUCTION PERMITS

### Where do the region's economies stand today?

How easy it is for entrepreneurs in economies in the Southern African Development Community (SADC) to legally build a warehouse? The global rankings of these economies on the ease of dealing with

construction permits suggest an answer (figure 3.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 3.1 How economies in the Southern African Development Community (SADC) rank on the ease of dealing with construction permits

Source: Doing Business database.

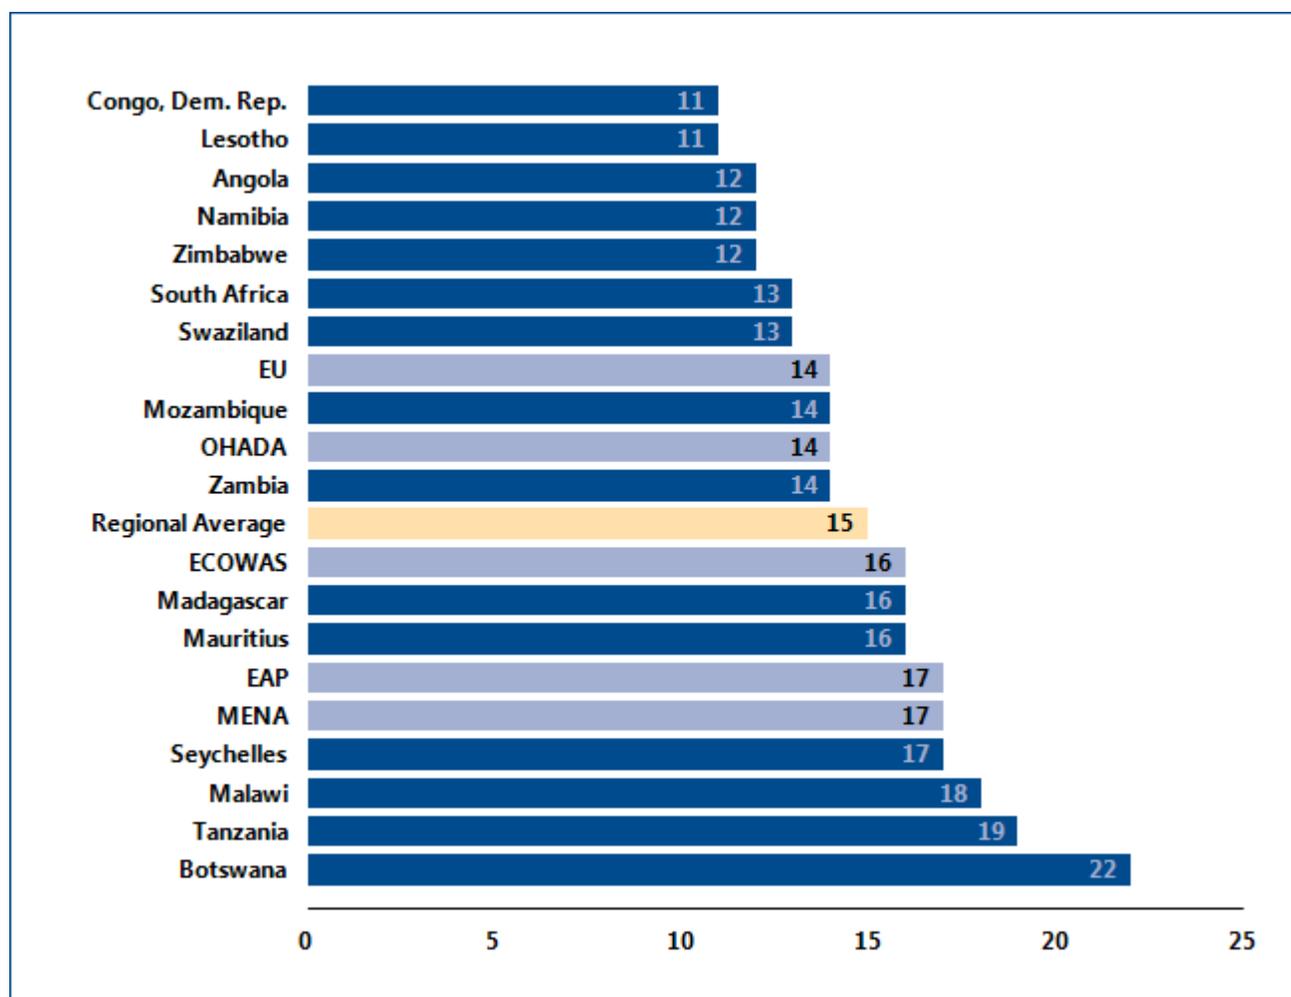

## DEALING WITH CONSTRUCTION PERMITS

The indicators underlying the rankings may be more revealing. Data collected by *Doing Business* show what it takes to comply with formalities to build a warehouse in each economy in the region: the number

of procedures, the time and the cost (figure 3.2). Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

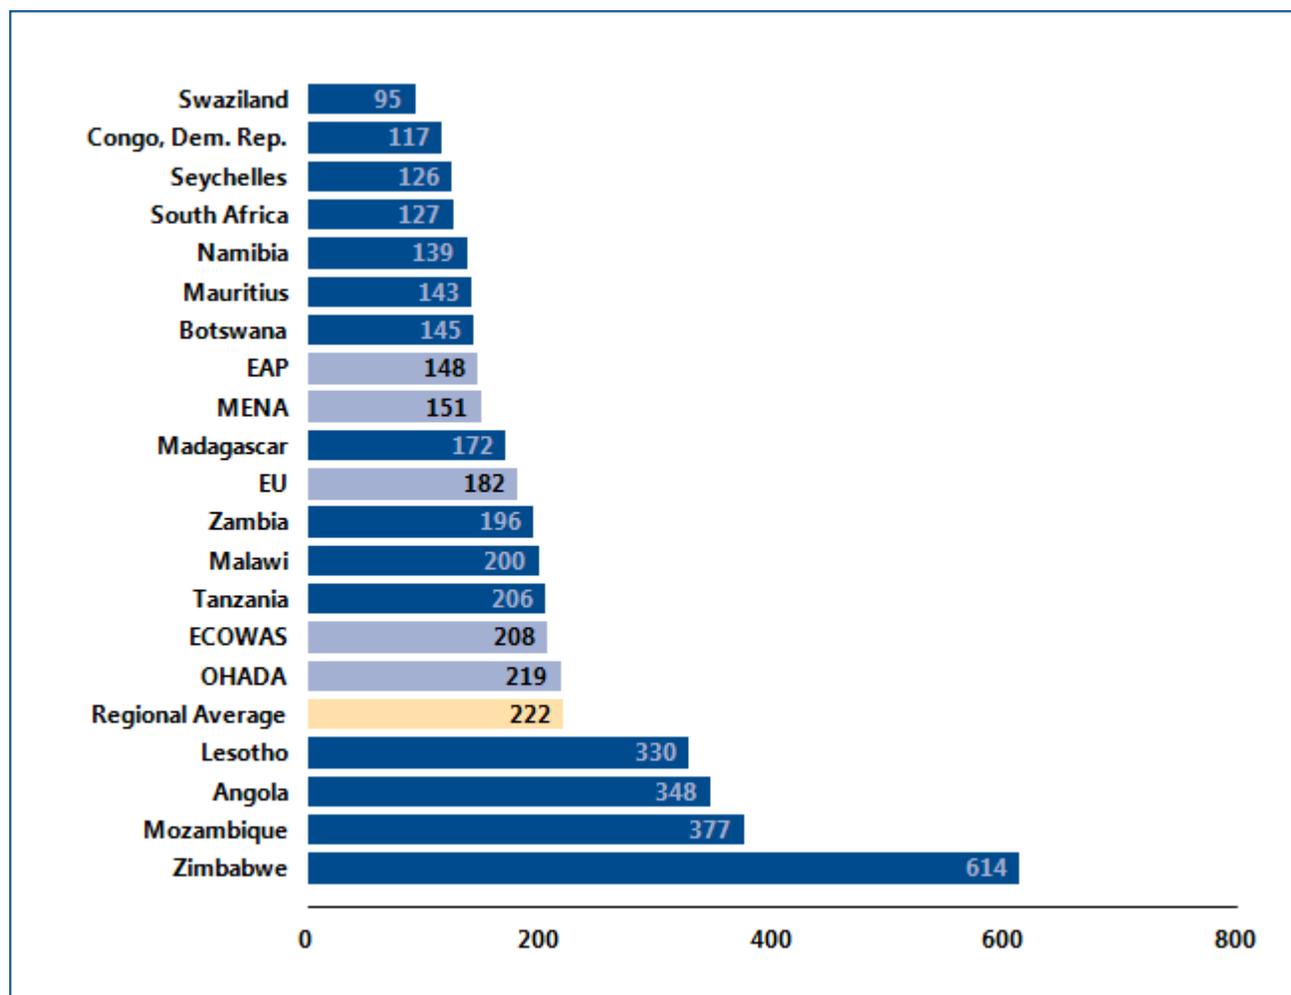

Figure 3.2 What it takes to comply with formalities to build a warehouse in economies in the Southern African Development Community (SADC)

## DEALING WITH CONSTRUCTION PERMITS

### What are the changes over time?

Smart regulation ensures that standards are met while making compliance easy and accessible to all. Coherent and transparent rules, efficient processes and adequate allocation of resources are especially important in sectors where safety is at stake. Construction is one of them. In an effort to ensure building safety while keeping compliance costs reasonable, governments around the world have

worked on consolidating permitting requirements. What construction permitting reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 3.1)?

Table 3.1 How have economies in the Southern African Development Community (SADC) made dealing with construction permits easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Mauritius</i>	Mauritius made obtaining construction permits easier by combining procedures of getting development permit and building permit, and it also set up an official time frame to process the permit application.
DB2008	<i>Zambia</i>	Zambia made dealing with construction permits easier by reducing the time to obtain utility connections.
DB2008	<i>Zimbabwe</i>	Zimbabwe made obtaining construction permits more difficult by imposing inspections by Chief Building Inspector or Deputy Chief Inspector, which would take longer time. It also increased the fees due to inflation. Meanwhile, it is more time consuming to obtain water connections from local authorities.
DB2009	<i>Angola</i>	Angola made obtaining construction permits easier by reducing 2 procedures of getting approval from water and electricity companies, and reducing the time to deal with construction related approvals by 9 days.
DB2009	<i>Zimbabwe</i>	Instability and severe administrative backlog led to an increase of costs for all construction permit related procedures by USD 14,851.7 and delays in approvals by 474 days.
DB2010	<i>Tanzania</i>	Tanzania introduced changes that resulted in a more difficult construction permitting process with additional procedures and cost.

DB year	Economy	Reform
<b>DB2011</b>	<i>Congo, Dem. Rep.</i>	Dealing with construction permits became easier in the Democratic Republic of Congo thanks to a reduction in the cost of a building permit from 1% of the estimated construction cost to 0.6% and a time limit for issuing building permits.
<b>DB2012</b>	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo reduced the administrative costs of obtaining a construction permit.
<b>DB2013</b>	<i>Malawi</i>	Malawi made dealing with construction permits more expensive by increasing the cost to obtain the plan approval and to register the property.
<b>DB2013</b>	<i>Tanzania</i>	Tanzania made dealing with construction permits more expensive by increasing the cost to obtain a building permit.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

*Source:* *Doing Business* database.

## GETTING ELECTRICITY

Access to reliable and affordable electricity is vital for businesses. To counter weak electricity supply, many firms in developing economies have to rely on self-supply, often at a prohibitively high cost. Whether electricity is reliably available or not, the first step for a customer is always to gain access by obtaining a connection.

### What do the indicators cover?

*Doing Business* records all procedures required for a local business to obtain a permanent electricity connection and supply for a standardized warehouse, as well as the time and cost to complete them. These procedures include applications and contracts with electricity utilities, clearances from other agencies and the external and final connection works. The ranking on the ease of getting electricity is the simple average of the percentile rankings on its component indicators: procedures, time and cost. To make the data comparable across economies, several assumptions are used.

The warehouse:

- Is located in the economy's largest business city, in an area where other warehouses are located.
- Is not in a special economic zone where the connection would be eligible for subsidization or faster service.
- Has road access. The connection works involve the crossing of a road or roads but are carried out on public land.
- Is a new construction being connected to electricity for the first time.
- Has 2 stories, both above ground, with a total surface of about 1,300.6 square meters (14,000 square feet), and is built on a plot of 929 square meters (10,000 square feet).

The electricity connection:

- Is a 3-phase, 4-wire Y, 140-kilovolt-ampere (kVA) (subscribed capacity) connection.

### WHAT THE GETTING ELECTRICITY

#### INDICATORS MEASURE

#### Procedures to obtain an electricity connection (number)

Submitting all relevant documents and obtaining all necessary clearances and permits

Completing all required notifications and receiving all necessary inspections

Obtaining external installation works and possibly purchasing material for these works

Concluding any necessary supply contract and obtaining final supply

#### Time required to complete each procedure (calendar days)

Is at least 1 calendar day

Each procedure starts on a separate day

Does not include time spent gathering information

Reflects the time spent in practice, with little follow-up and no prior contact with officials

#### Cost required to complete each procedure (% of income per capita)

Official costs only, no bribes

Excludes value added tax

- Is 150 meters long.
- Is to either the low-voltage or the medium-voltage distribution network and either overhead or underground, whichever is more common in the economy and in the area where the warehouse is located. The length of any connection in the customer's private domain is negligible.
- Involves installing one electricity meter. The monthly electricity consumption will be 0.07 gigawatt-hour (GWh). The internal electrical wiring has been completed.

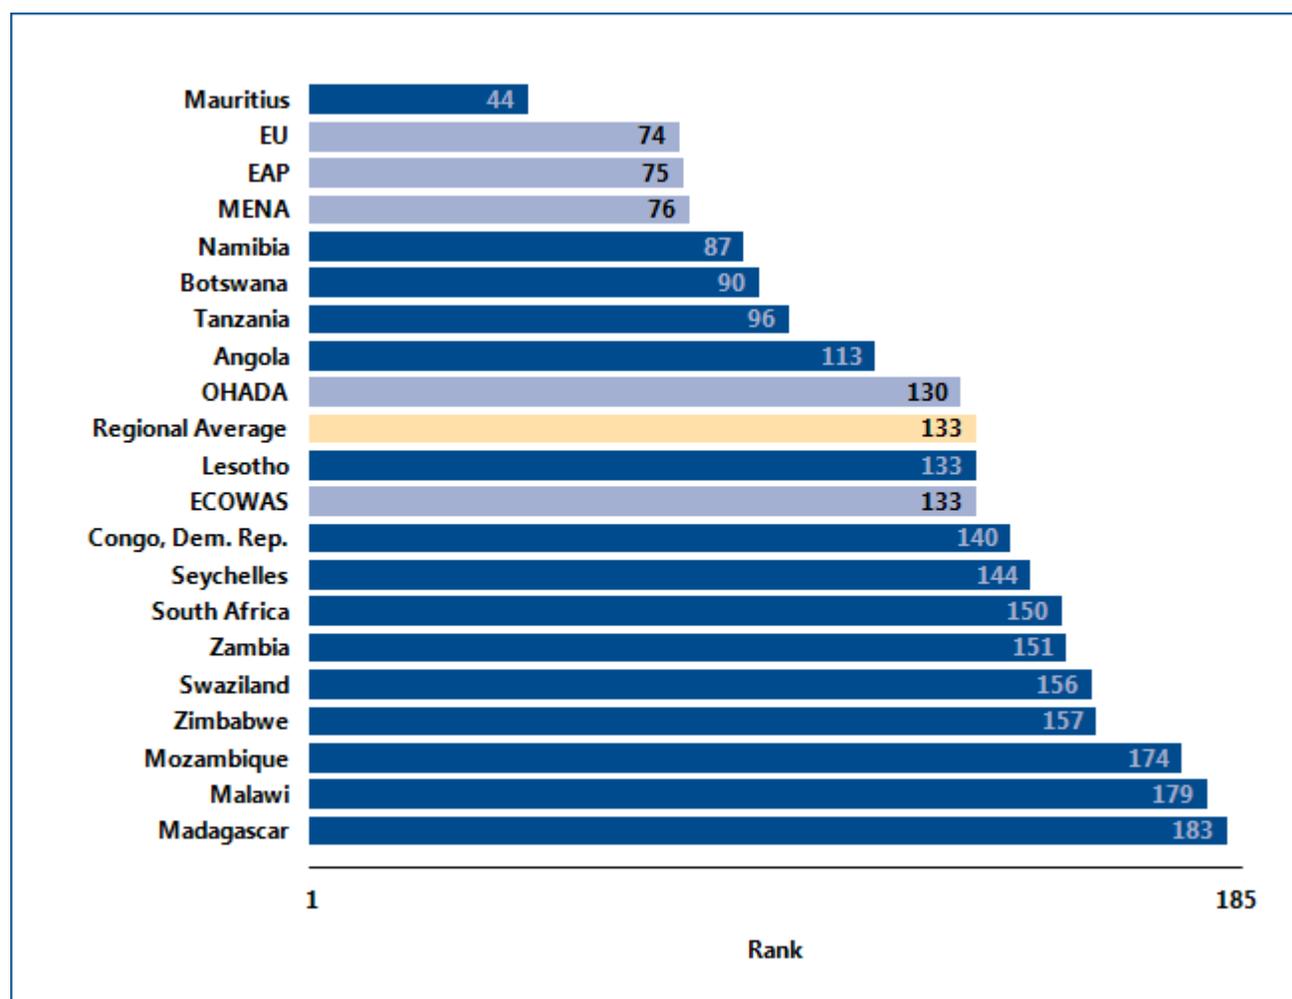

## GETTING ELECTRICITY

### Where do the region's economies stand today?

How easy is it for entrepreneurs in economies in the Southern African Development Community (SADC) to connect a warehouse to electricity? The global rankings of these economies on the ease of getting

electricity suggest an answer (figure 4.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 4.1 How economies in the Southern African Development Community (SADC) rank on the ease of getting electricity

Source: Doing Business database.

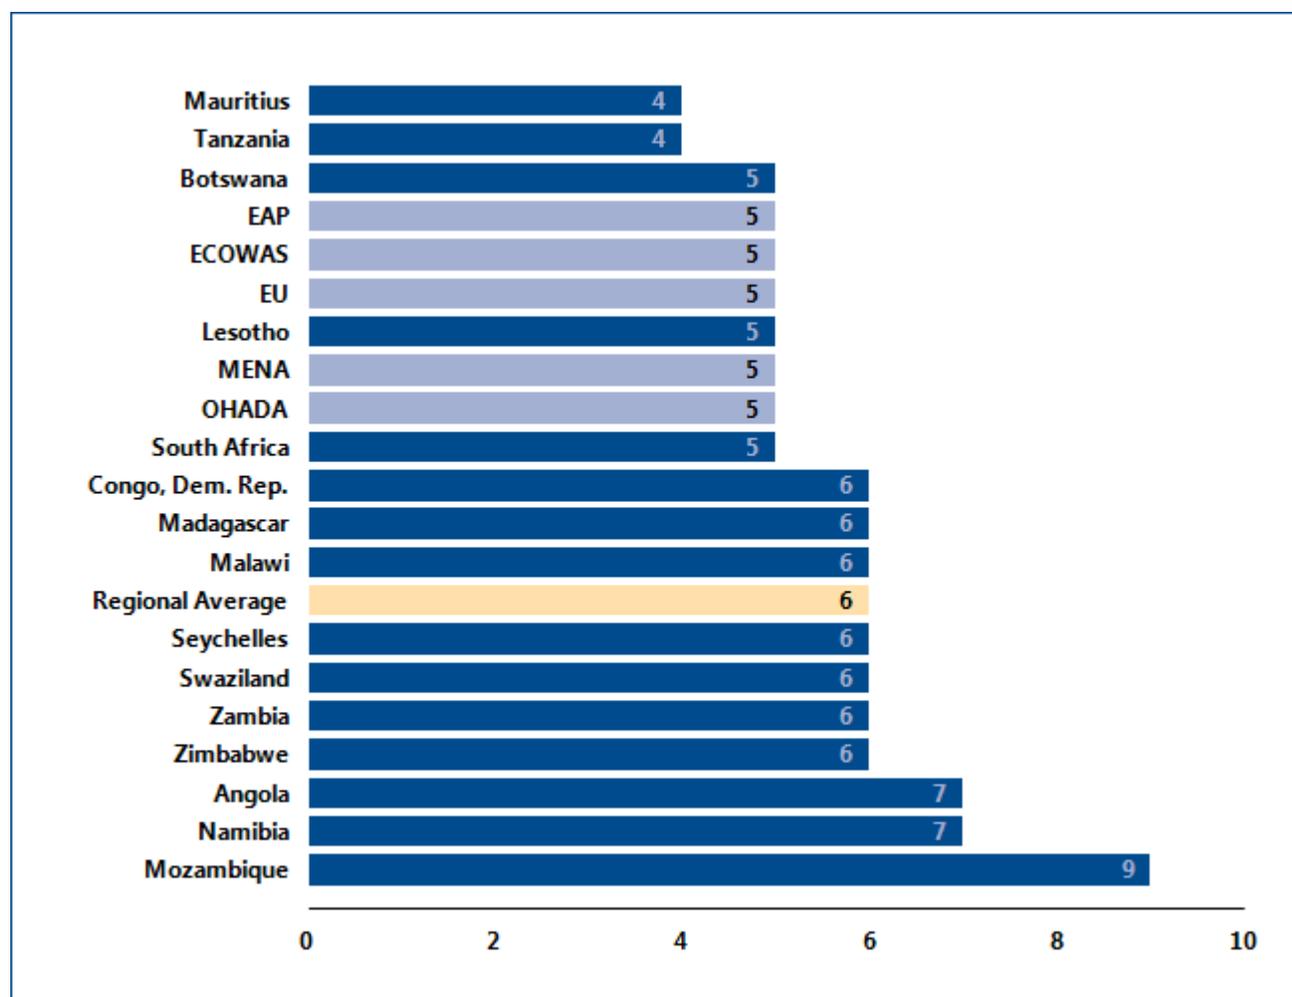

## GETTING ELECTRICITY

The indicators underlying the rankings may be more revealing. Data collected by *Doing Business* show what it takes to get a new electricity connection in each economy in the region: the number of procedures, the

time and the cost (figure 4.2). Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

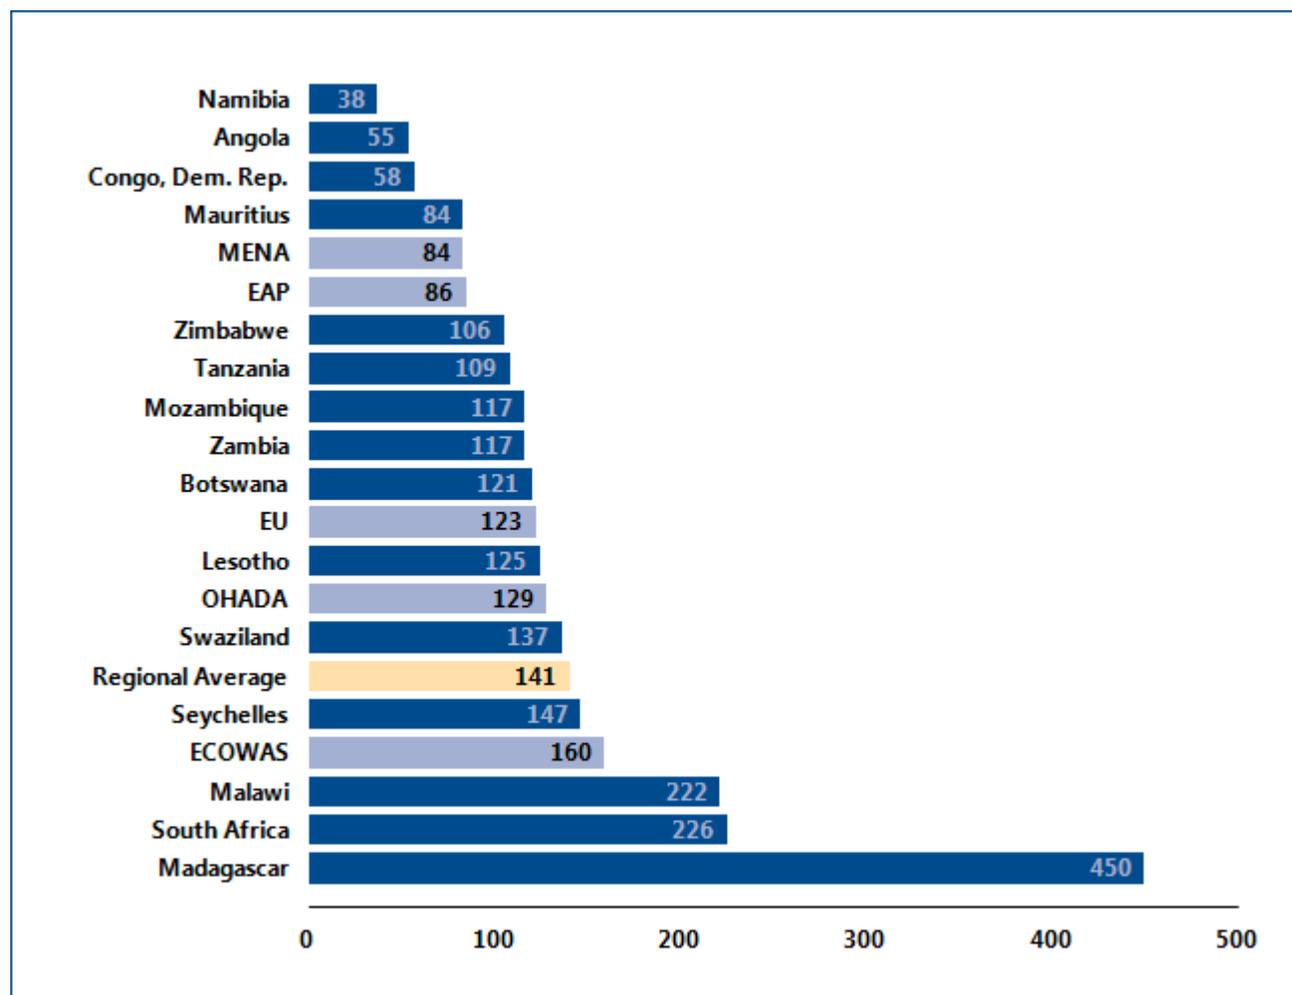

Figure 4.2 What it takes to get an electricity connection in economies in the Southern African Development Community (SADC)

### Procedures (number)

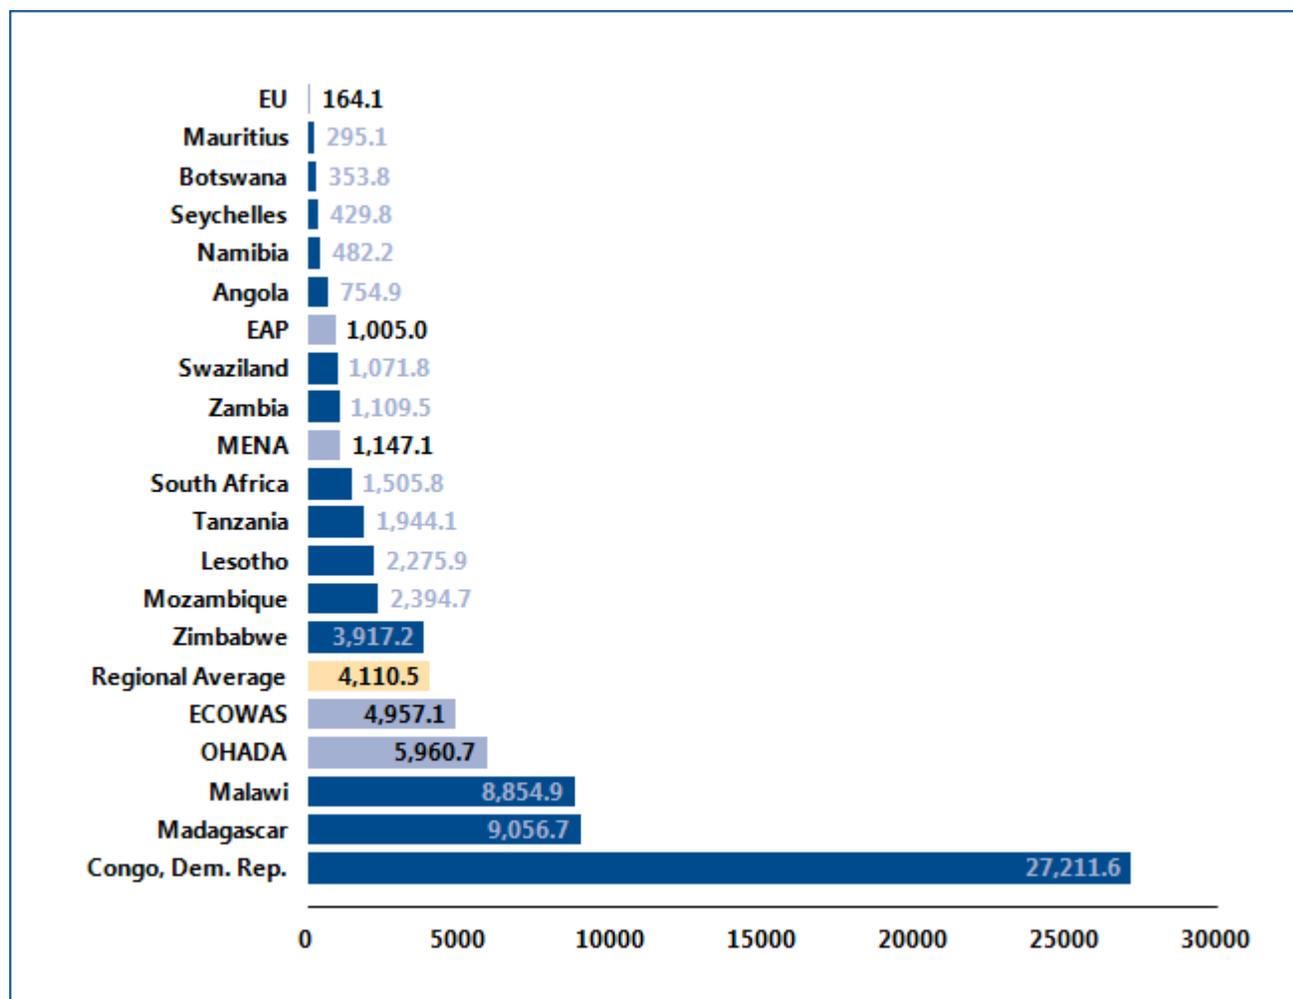

## GETTING ELECTRICITY

### What are the changes over time?

Obtaining an electricity connection is essential to enable a business to conduct its most basic operations. In many economies the connection process is complicated by the multiple laws and regulations involved—covering service quality, general safety, technical standards, procurement practices and internal wiring installations. In an effort to ensure

safety in the connection process while keeping connection costs reasonable, governments around the world have worked to consolidate requirements for obtaining an electricity connection. What reforms in getting electricity has *Doing Business* recorded in the Southern African Development Community (SADC) (table 4.1)?

Table 4.1 How have economies in the Southern African Development Community (SADC) made getting electricity easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2012	<i>Mozambique</i>	Mozambique made getting electricity more difficult by requiring authorization of a connection project by the Ministry of Energy and by adding an inspection of the completed external works.
DB2013	<i>Angola</i>	Angola made getting electricity easier by eliminating the requirement for customers applying for an electricity connection to obtain authorizations from the 2 utility companies.
DB2013	<i>Namibia</i>	Namibia made getting electricity easier by reducing the time required to provide estimates and external connection works and by lowering the connection costs.

Source: *Doing Business* database.

## REGISTERING PROPERTY

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. And where property is informal or poorly administered, it has little chance of being accepted as collateral for loans—limiting access to finance.

### What do the indicators cover?

*Doing Business* records the full sequence of procedures necessary for a business to purchase property from another business and transfer the property title to the buyer's name. The transaction is considered complete when it is opposable to third parties and when the buyer can use the property, use it as collateral for a bank loan or resell it. The ranking on the ease of registering property is the simple average of the percentile rankings on its component indicators: procedures, time and cost.

To make the data comparable across economies, several assumptions about the parties to the transaction, the property and the procedures are used.

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned.
- Are located in the periurban area of the economy's largest business city.
- Have 50 employees each, all of whom are nationals.
- Perform general commercial activities.

The property (fully owned by the seller):

- Has a value of 50 times income per capita. The sale price equals the value.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Is located in a periurban commercial zone, and no rezoning is required.

### WHAT THE REGISTERING PROPERTY INDICATORS MEASURE

#### Procedures to legally transfer title on immovable property (number)

Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)

Registration in the economy's largest business city

Postregistration (for example, filing title with the municipality)

#### Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day

Procedure completed once final document is received

No prior contact with officials

#### Cost required to complete each procedure (% of property value)

Official costs only, no bribes

No value added or capital gains taxes included

- Has no mortgages attached and has been under the same ownership for the past 10 years.
- Consists of 557.4 square meters (6,000 square feet) of land and a 10-year-old, 2-story warehouse of 929 square meters (10,000 square feet). The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. The property will be transferred in its entirety.

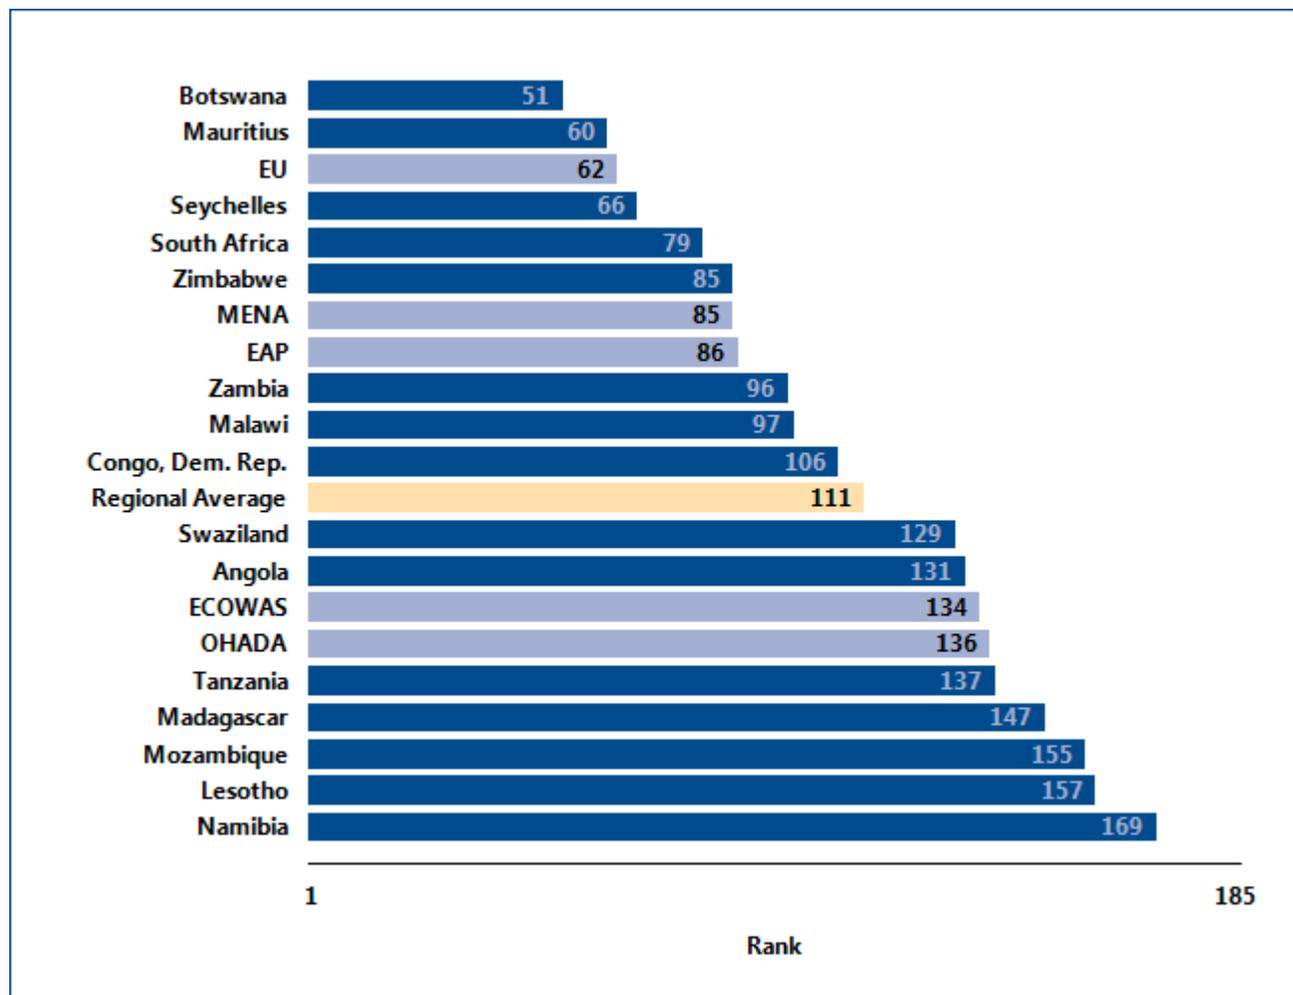

## REGISTERING PROPERTY

### Where do the region’s economies stand today?

How easy is it for entrepreneurs in economies in the Southern African Development Community (SADC) to transfer property? The global rankings of these economies on the ease of registering property suggest

an answer (figure 5.1). The average ranking of the region and comparator regions provide a useful benchmark.

## REGISTERING PROPERTY

### What are the changes over time?

Economies worldwide have been making it easier for entrepreneurs to register and transfer property—such as by computerizing land registries, introducing time limits for procedures and setting low fixed fees. Many have cut the time required substantially—enabling

buyers to use or mortgage their property earlier. What property registration reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 5.1)?

Table 5.1 How have economies in the Southern African Development Community (SADC) made registering property easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Lesotho</i>	Property registration was made easier for women by allowing married women to transfer land without their husband's signature.
DB2008	<i>Mauritius</i>	Mauritius made registering property cheaper by reducing the property registration fee.
DB2008	<i>Zimbabwe</i>	Zimbabwe made registering property more expensive by increasing the conveyancers fees.
DB2009	<i>Madagascar</i>	Madagascar reformed its Land Registry, more staff was hired, more computers were added and the number of offices increased. In addition, Madagascar abolished two taxes and removed the mandatory stamps duty on documents. As a result, the number of procedures, the time and the cost to register property all decreased.
DB2009	<i>Mauritius</i>	Mauritius abolished two procedures, the requirement to obtain clearance certificate from the Waste Water Authority and to obtain a tax clearance certificate for municipal taxes.
DB2009	<i>Zambia</i>	Zambia computerized its land registry and set up a customer service center to eliminate the backlog of registration requests. As a result, the time required to register a property in Zambia decreased.
DB2010	<i>Angola</i>	The land registry in Angola was digitized and split into two units covering half of the land, accelerating procedures necessary to transfer property in Luanda.

DB year	Economy	Reform
DB2010	<i>Botswana</i>	Botswana made it more difficult to register property with the addition of a procedure where the tax agency must be notified of the VAT payment.
DB2010	<i>Madagascar</i>	Madagascar made it more costly to transfer a property by introducing the mandatory use of notary for property transactions.
DB2010	<i>Mauritius</i>	Mauritius has made it easier to register property by setting a statutory time limit of 15 days to obtain the final property title from the Land Registry.
DB2010	<i>Zimbabwe</i>	Zimbabwe has reduced the cost to transfer a property by 15% of the value of the property.
DB2011	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo reduced by half the property transfer tax to 3% of the property value.
DB2011	<i>Malawi</i>	Malawi eased property transfers by cutting the wait for consents and registration of legal instruments by half.
DB2012	<i>Angola</i>	Angola made transferring property less costly by reducing transfer taxes.
DB2012	<i>Malawi</i>	Malawi made property registration slower by no longer sustaining last year's time improvement in Compliance Certificate processing times at the Ministry of Lands.
DB2012	<i>Namibia</i>	Namibia made transferring property more expensive for companies.
DB2012	<i>South Africa</i>	South Africa made transferring property less costly and more efficient by reducing the transfer duty and introducing electronic filing.
DB2012	<i>Swaziland</i>	Swaziland made transferring property quicker by streamlining the process at the land registry.
DB2012	<i>Zambia</i>	Zambia made registering property more costly by increasing the property transfer tax rate.
DB2013	<i>Mauritius</i>	Mauritius made property transfers faster by implementing an

DB year	Economy	Reform
		electronic information management system at the Registrar-General's Department.
<b>DB2013</b>	<i>Namibia</i>	Namibia made transferring property more difficult by requiring conveyancers to obtain a building compliance certificate beforehand.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

*Source:* *Doing Business* database.

## GETTING CREDIT

Two types of frameworks can facilitate access to credit and improve its allocation: credit information systems and the legal rights of borrowers and lenders in collateral and bankruptcy laws. Credit information systems enable lenders to view a potential borrower's financial history (positive or negative)—valuable information to consider when assessing risk. And they permit borrowers to establish a good credit history that will allow easier access to credit. Sound collateral laws enable businesses to use their assets, especially movable property, as security to generate capital—while strong creditors' rights have been associated with higher ratios of private sector credit to GDP.

### What do the indicators cover?

*Doing Business* assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a public credit registry or a private credit bureau. The strength of legal rights index measures whether certain features that facilitate lending exist within the applicable collateral and bankruptcy laws. *Doing Business* uses case scenarios to determine the scope of the secured transactions system, involving a secured borrower and a secured lender and examining legal restrictions on the use of movable collateral. These scenarios assume that the borrower:

- Is a private, limited liability company.
- Has its headquarters and only base of operations in the largest business city.

### WHAT THE GETTING CREDIT INDICATORS MEASURE

#### Strength of legal rights index (0–10)

- Protection of rights of borrowers and lenders through collateral laws
- Protection of secured creditors' rights through bankruptcy laws

#### Depth of credit information index (0–6)

- Scope and accessibility of credit information distributed by public credit registries and private credit bureaus

#### Public credit registry coverage (% of adults)

- Number of individuals and firms listed in public credit registry as percentage of adult population

#### Private credit bureau coverage (% of adults)

- Number of individuals and firms listed in largest private credit bureau as percentage of adult population

- Has 100 employees.
- Is 100% domestically owned, as is the lender.

The ranking on the ease of getting credit is based on the percentile rankings on the sum of its component indicators: the depth of credit information index and the strength of legal rights index.

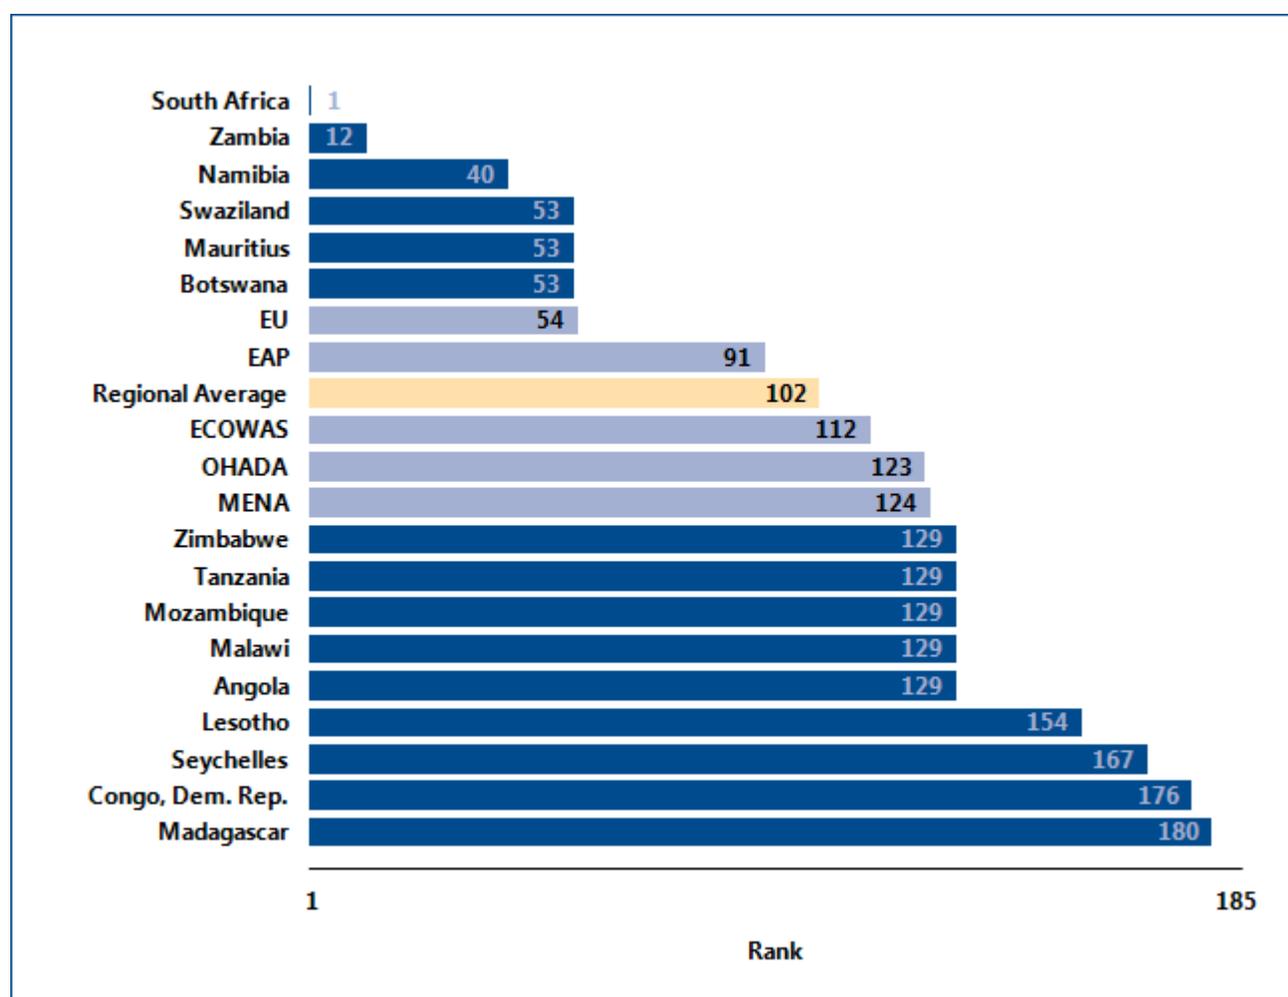

## GETTING CREDIT

### Where do the region's economies stand today?

How well do the credit information systems and collateral and bankruptcy laws in economies in the Southern African Development Community (SADC) facilitate access to credit? The global rankings of these

economies on the ease of getting credit suggest an answer (figure 6.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 6.1 How economies in the Southern African Development Community (SADC) rank on the ease of getting credit

Source: Doing Business database.

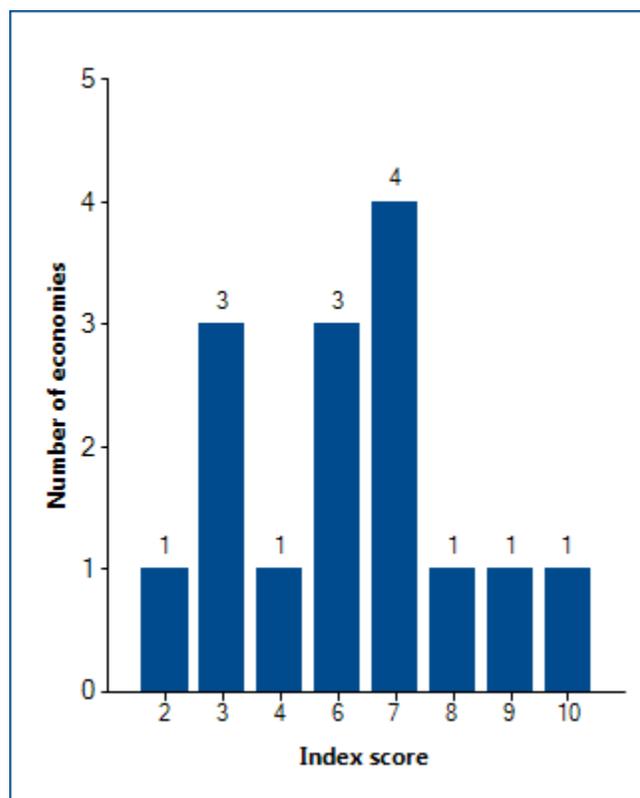

## GETTING CREDIT

Another way to assess how well regulations and institutions support lending and borrowing in the region is to look at the distribution of its economies by their scores on the getting credit indicators. Figure 6.2 shows how many economies in the region received a

particular score on the strength of legal rights index. Figure 6.3 shows the same thing for the depth of credit information index. Higher scores indicate stronger legal rights for borrowers and lenders and more credit information.

Figure 6.2 How strong are legal rights for borrowers and lenders in economies in the Southern African Development Community (SADC)?

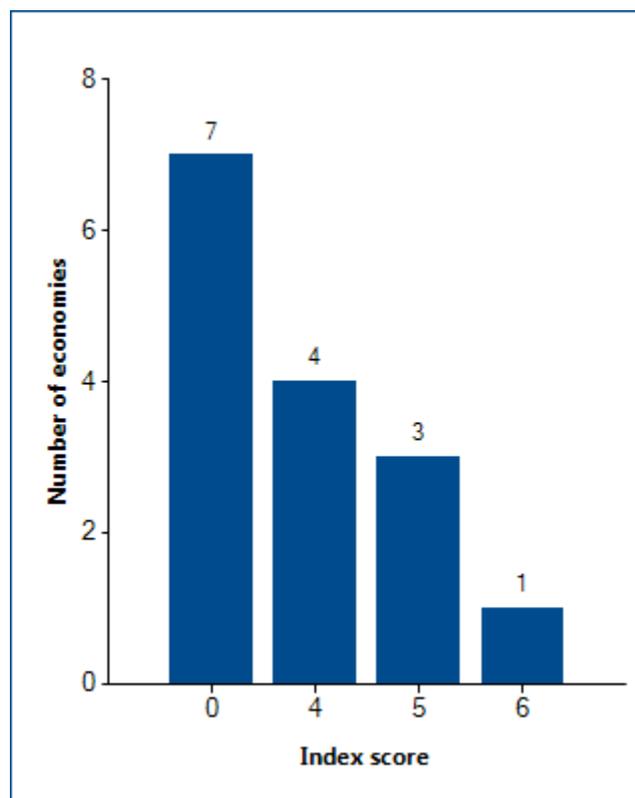

Number of economies in region with each score on strength of legal rights index (0–10)

Note: Higher scores indicate that collateral and bankruptcy laws are better designed to facilitate access to credit.  
Source: *Doing Business* database.

Figure 6.3 How extensive—and how accessible—is credit information in economies in the Southern African Development Community (SADC)?

Number of economies in region with each score on depth of credit information index (0–6)

Note: Higher scores indicate the availability of more credit information, from either a public credit registry or a private credit bureau, to facilitate lending decisions.  
Source: *Doing Business* database.

## GETTING CREDIT

### What are the changes over time?

When economies strengthen the legal rights of lenders and borrowers under collateral and bankruptcy laws, and increase the scope, coverage and accessibility of credit information, they can increase entrepreneurs'

access to credit. What credit reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 6.1)?

Table 6.1 How have economies in the Southern African Development Community (SADC) made getting credit easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>South Africa</i>	Lenders are now required to check their overall debt levels before granting loans and guarantees borrowers the right to access and challenge their credit records.
DB2009	<i>Mauritius</i>	The public credit registry in Mauritius eliminated the minimum loan requirement threshold to report credits in March 2007. The credit registry now captures information on all credits extended by the financial system.
DB2010	<i>Mauritius</i>	Mauritius has strengthened access to credit information by allowing the licensing of private credit information bureaus, and by expanding the coverage of the bureau to all credit facilities.
DB2010	<i>Zambia</i>	Zambia strengthened access to credit information by making it mandatory for banks and non-bank financial institutions registered with Bank of Zambia to use credit reference reports and provide data to the Bureau.
DB2012	<i>Angola</i>	Angola strengthened its credit information system by adopting new rules for credit bureaus and guaranteeing the right of borrowers to inspect their data.
DB2012	<i>Madagascar</i>	Madagascar improved its credit information system by eliminating the minimum threshold for loans included in the database and making it mandatory for banks to share credit information with the credit bureau.
DB2012	<i>Malawi</i>	Malawi improved its credit information system by passing a new law allowing the creation of a private credit bureau.
DB2013	<i>Mauritius</i>	Mauritius improved access to credit information by starting to collect payment information from retailers and beginning to

DB year	Economy	Reform
		distribute both positive and negative information.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

*Source:* *Doing Business* database.

## PROTECTING INVESTORS

Investor protections matter for the ability of companies to raise the capital they need to grow, innovate, diversify and compete. If the laws do not provide such protections, investors may be reluctant to invest unless they become the controlling shareholders. Strong regulations clearly define related-party transactions, promote clear and efficient disclosure requirements, require shareholder participation in major decisions of the company and set clear standards of accountability for company insiders.

### What do the indicators cover?

*Doing Business* measures the strength of minority shareholder protections against directors' use of corporate assets for personal gain—or self-dealing. The indicators distinguish 3 dimensions of investor protections: transparency of related-party transactions (extent of disclosure index), liability for self-dealing (extent of director liability index) and shareholders' ability to sue officers and directors for misconduct (ease of shareholder suits index). The ranking on the strength of investor protection index is the simple average of the percentile rankings on these 3 indices. To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders).
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

The transaction involves the following details:

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.

### WHAT THE PROTECTING INVESTORS INDICATORS MEASURE

#### Extent of disclosure index (0–10)

Who can approve related-party transactions

Requirements for external and internal disclosure in case of related-party transactions

#### Extent of director liability index (0–10)

Ability of shareholders to hold interested parties and members of the approving body liable in case of related-party transactions

Available legal remedies (damages, repayment of profits, fines, imprisonment and rescission of the transaction)

Ability of shareholders to sue directly or derivatively

#### Ease of shareholder suits index (0–10)

Documents and information available during trial

Access to internal corporate documents (directly or through a government inspector)

#### Strength of investor protection index (0–10)

Simple average of the extent of disclosure, extent of director liability and ease of shareholder suits indices

- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to Buyer.
- Shareholders sue the interested parties and the members of the board of directors.

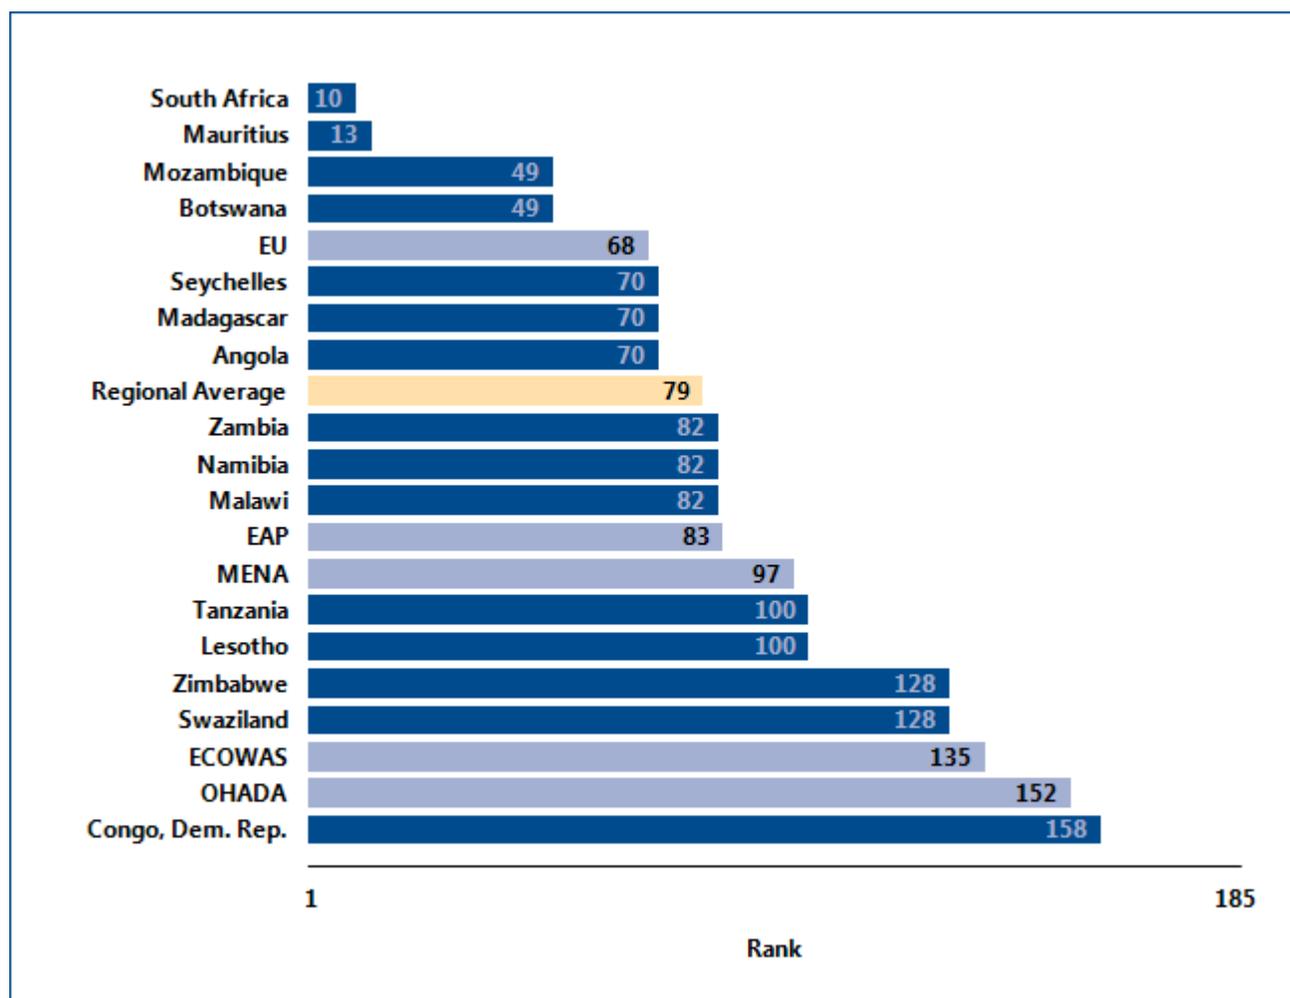

## PROTECTING INVESTORS

### Where do the region's economies stand today?

How strong are investor protections in economies in the Southern African Development Community (SADC)? The global rankings of these economies on the strength of investor protection index suggest an answer (figure 7.1). While the indicator does not

measure all aspects related to the protection of minority investors, a higher ranking does indicate that an economy's regulations offer stronger investor protections against self-dealing in the areas measured.

Figure 7.1 How economies in the Southern African Development Community (SADC) rank on the strength of investor protection index

Source: Doing Business database.

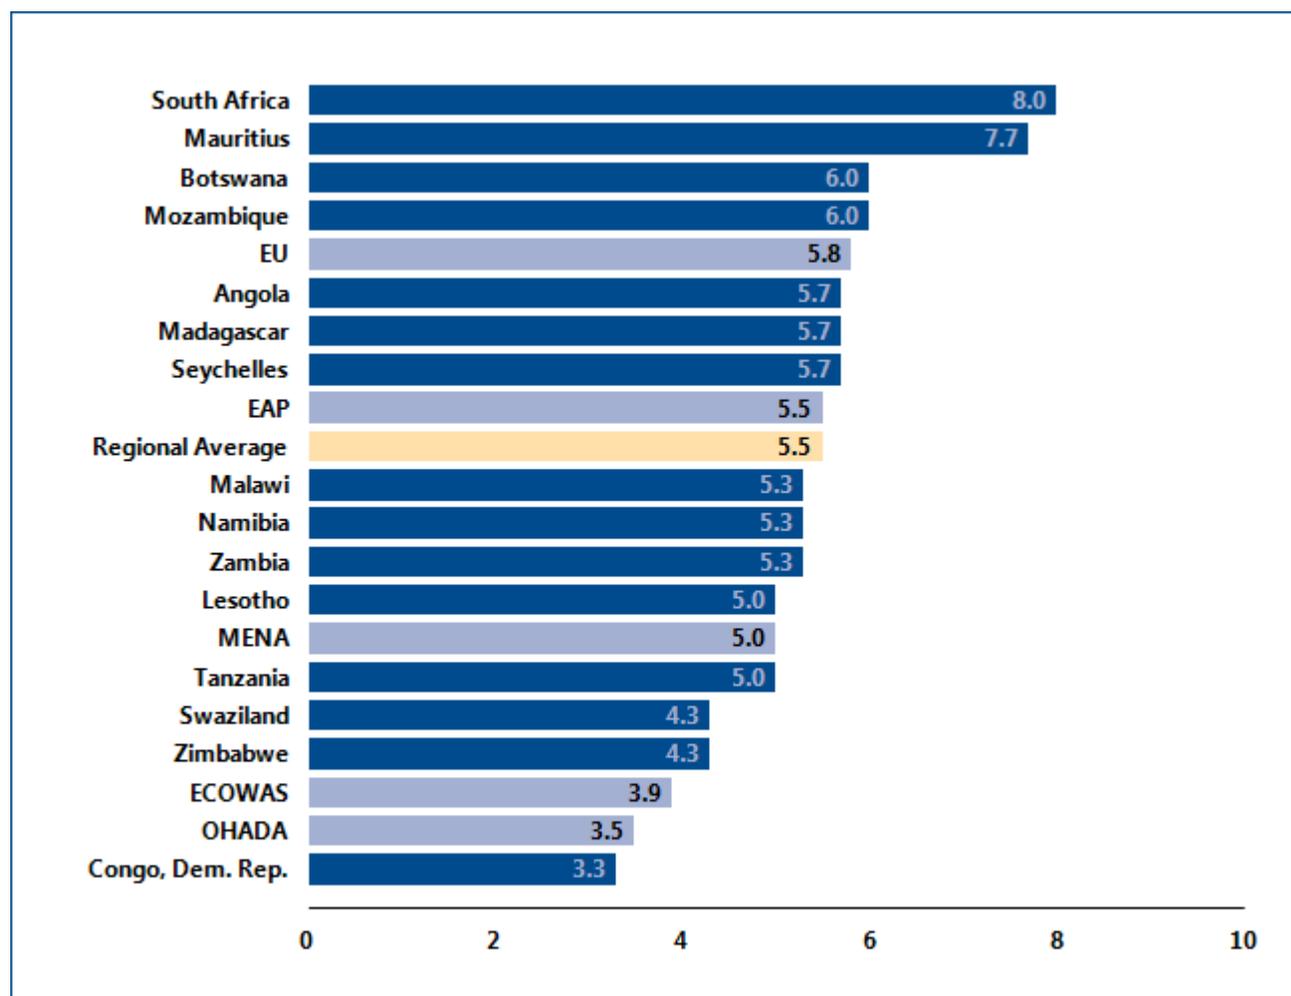

## PROTECTING INVESTORS

But the overall ranking on the strength of investor protection index tells only part of the story. Economies may offer strong protections in some areas but not others. So the number of economies in the Southern African Development Community (SADC) that have a certain score recorded on the extent of disclosure, extent of director liability and ease of shareholder suits

indices may also be revealing (figure 7.2). Higher scores indicate stronger investor protections. Comparing the scores across the region on the strength of investor protection index and with averages both for the region and for comparator regions can provide useful insights.

Figure 7.2 How strong are investor protections in economies in the Southern African Development Community (SADC)?

### Strength of investor protection index (0–10)

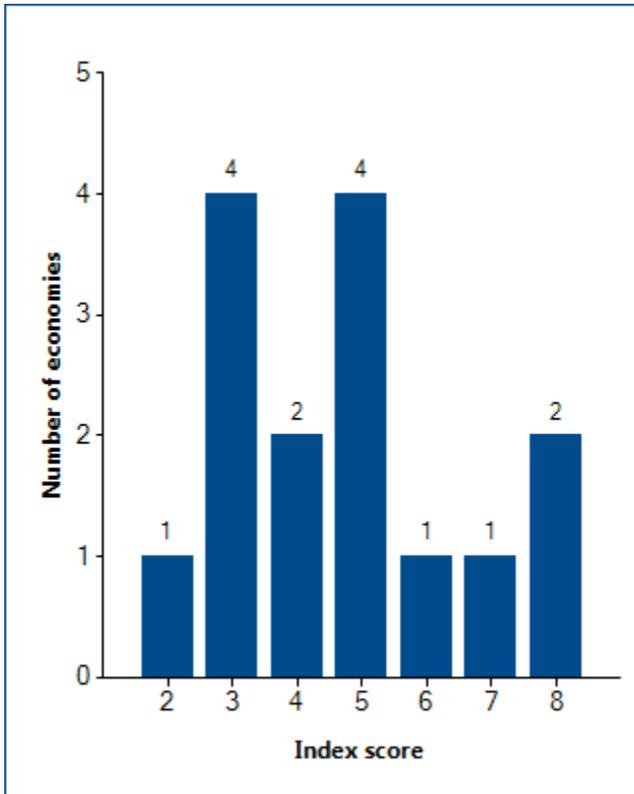

Source: Doing Business database.

## PROTECTING INVESTORS

### Extent of disclosure index (0–10)

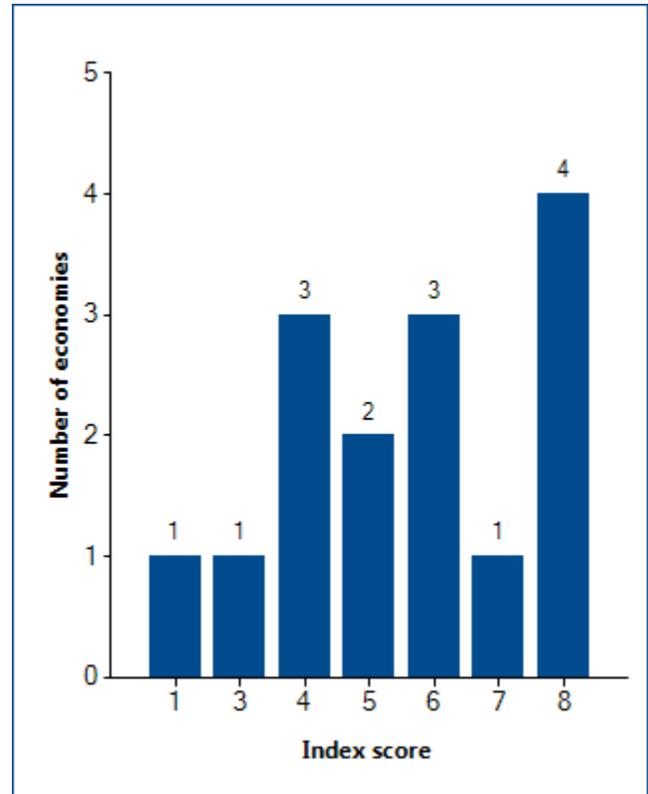

Number of economies in region with each score on extent of disclosure index (0–10)

Note: Higher scores indicate greater disclosure.  
Source: Doing Business database.

### Extent of director liability index (0–10)

Number of economies in region with each score on extent of director liability index (0–10)

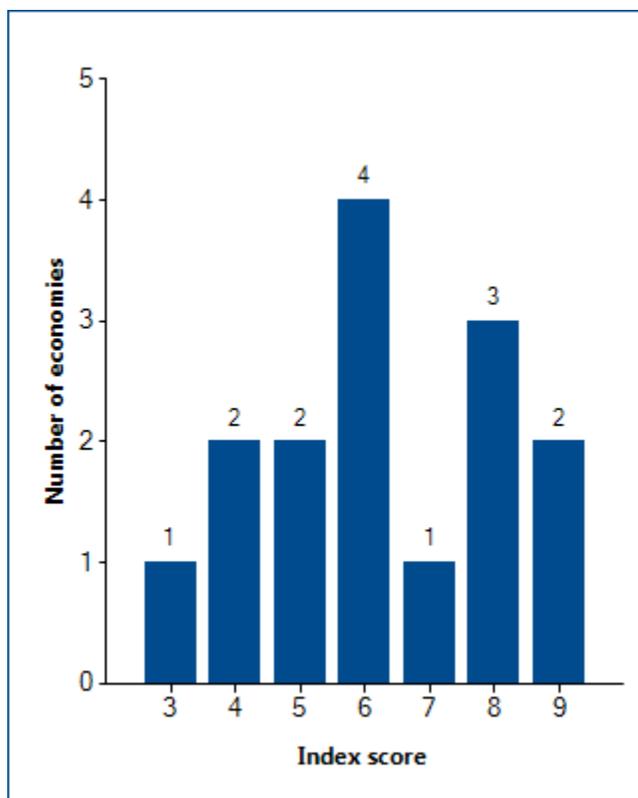

Note: Higher scores indicate greater liability of directors.  
No economy receives a score of 10 on the extent of director liability index.  
Source: Doing Business database.

## PROTECTING INVESTORS

### Ease of shareholder suits index (0–10)

Number of economies in region with each score on ease of shareholder suits index (0–10)

Note: Higher scores indicate greater powers of shareholders to challenge the transaction.

Source: *Doing Business* database.

## PROTECTING INVESTORS

### What are the changes over time?

Economies with the strongest protections of minority investors from self-dealing require more disclosure and define clear duties for directors. They also have well-functioning courts and up-to-date procedural rules that give minority investors the means to prove their case and obtain a judgment within a reasonable

time. So reforms to strengthen investor protections may move ahead on different fronts—such as through new or amended company laws or revisions to court procedures. What investor protection reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 7.1)?

Table 7.1 How have economies in the Southern African Development Community (SADC) strengthened investor protections—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Mozambique</i>	Mozambique strengthened investor protections by enacting a new Commercial Code, which allows shareholders to bring derivative suits against members of the board of directors, and which introduces detailed duties and liability for major shareholders and directors. It also expands the scope of accessible company information and the right to request the appointment of an expert to investigate the activities of the company.
DB2009	<i>Botswana</i>	Botswana strengthened investor protections by requiring that related-party transactions be approved by the shareholders meeting, and by allowing shareholders to sue directors and obtain the payment of damages if successful.
DB2011	<i>Swaziland</i>	Swaziland strengthened investor protections by requiring greater corporate disclosure, higher standards of accountability for company directors and greater access to corporate information for minority investors.
DB2013	<i>Lesotho</i>	Lesotho strengthened investor protections by increasing the disclosure requirements for related-party transactions and improving the liability regime for company directors in cases of abusive related-party transactions.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

## PAYING TAXES

Taxes are essential. They fund the public amenities, infrastructure and services that are crucial for a properly functioning economy. But the level of tax rates needs to be carefully chosen—and needless complexity in tax rules avoided. According to *Doing Business* data, in economies where it is more difficult and costly to pay taxes, larger shares of economic activity end up in the informal sector—where businesses pay no taxes at all.

### What do the indicators cover?

Using a case scenario, *Doing Business* measures the taxes and mandatory contributions that a medium-size company must pay in a given year as well as the administrative burden of paying taxes and contributions. This case scenario uses a set of financial statements and assumptions about transactions made over the year. Information is also compiled on the frequency of filing and payments as well as time taken to comply with tax laws. The ranking on the ease of paying taxes is the simple average of the percentile rankings on its component indicators: number of annual payments, time and total tax rate, with a threshold being applied to the total tax rate.<sup>1</sup> To make the data comparable across economies, several assumptions about the business and the taxes and contributions are used.

- TaxpayerCo is a medium-size business that started operations on January 1, 2010.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions paid during the second year of operation are recorded.
- Taxes and mandatory contributions are measured at all levels of government.

### WHAT THE PAYING TAXES INDICATORS

#### MEASURE

#### Tax payments for a manufacturing company in 2011 (number per year adjusted for electronic or joint filing and payment)

Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)

Method and frequency of filing and payment

#### Time required to comply with 3 major taxes (hours per year)

Collecting information and computing the tax payable

Completing tax return forms, filing with proper agencies

Arranging payment or withholding

Preparing separate tax accounting books, if required

#### Total tax rate (% of profit)

Profit or corporate income tax

Social contributions and labor taxes paid by the employer

Property and property transfer taxes

Dividend, capital gains and financial transactions taxes

Waste collection, vehicle, road and other taxes

- Taxes and mandatory contributions include corporate income tax, turnover tax and all labor taxes and contributions paid by the company.
- A range of standard deductions and exemptions are also recorded.

<sup>1</sup> The threshold is defined as the highest total tax rate among the top 15% of economies in the ranking on the total tax rate. It is calculated and adjusted on a yearly basis. The threshold is not based on any economic theory of an "optimal tax rate" that minimizes distortions or maximizes efficiency in the tax system of an economy overall. Instead, it is mainly empirical in nature, set at the lower end of the distribution of tax rates levied on medium-size enterprises in the manufacturing sector as observed through the paying taxes indicators. This reduces the bias in the indicators toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology). This year's threshold is 25.7%.

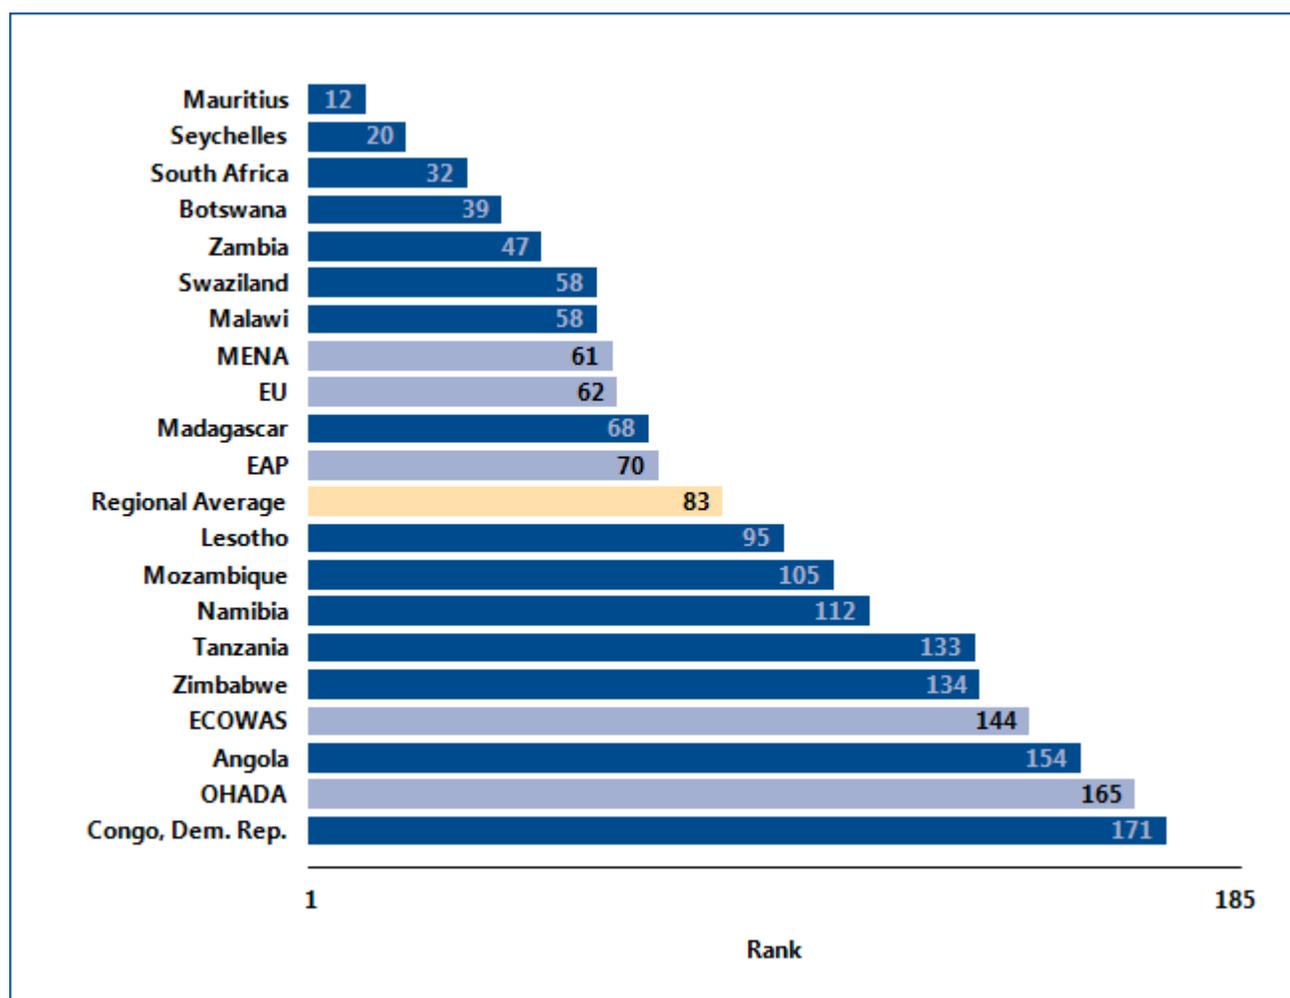

## PAYING TAXES

### Where do the region’s economies stand today?

What is the administrative burden of complying with taxes in economies in the Southern African Development Community (SADC)—and how much do firms pay in taxes? The global rankings of these economies on the ease of paying taxes offer useful

information for assessing the tax compliance burden for businesses (figure 8.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 8.1 How economies in the Southern African Development Community (SADC) rank on the ease of paying taxes

Note: DB2013 rankings reflect changes to the methodology. For all economies with a total tax rate below the threshold of 25.7% applied in DB2013, the total tax rate is set at 25.7% for the purpose of calculating the ranking on the ease of paying taxes.

Source: *Doing Business* database.

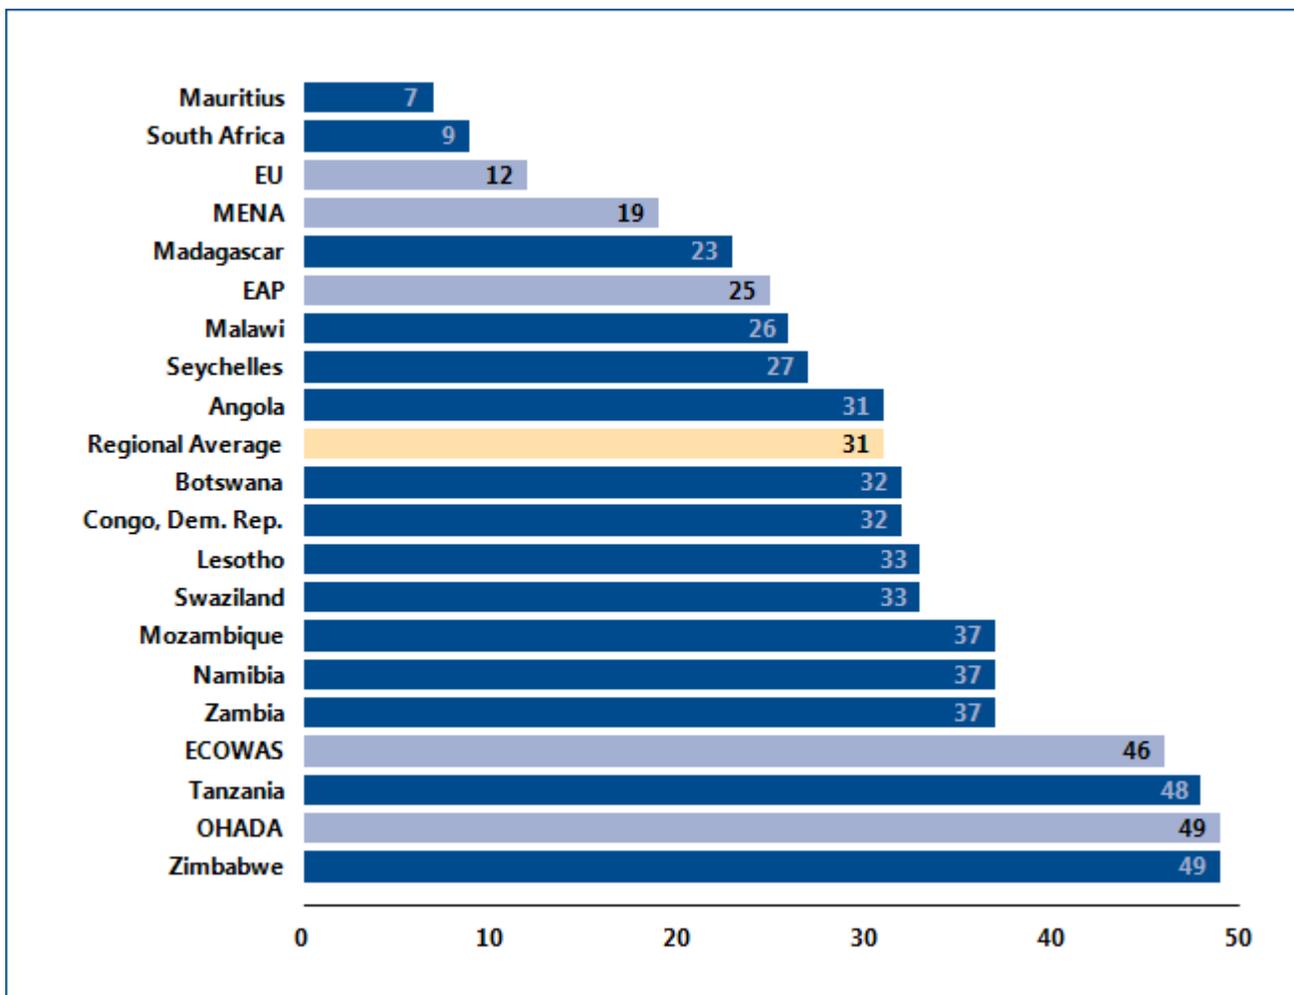

## PAYING TAXES

The indicators underlying the rankings may be more revealing. Data collected by *Doing Business* show what it takes to comply with tax regulations in each economy in the region—the number of payments per year and the time required to prepare and file taxes—

as well as the total tax rate (figure 8.2). Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

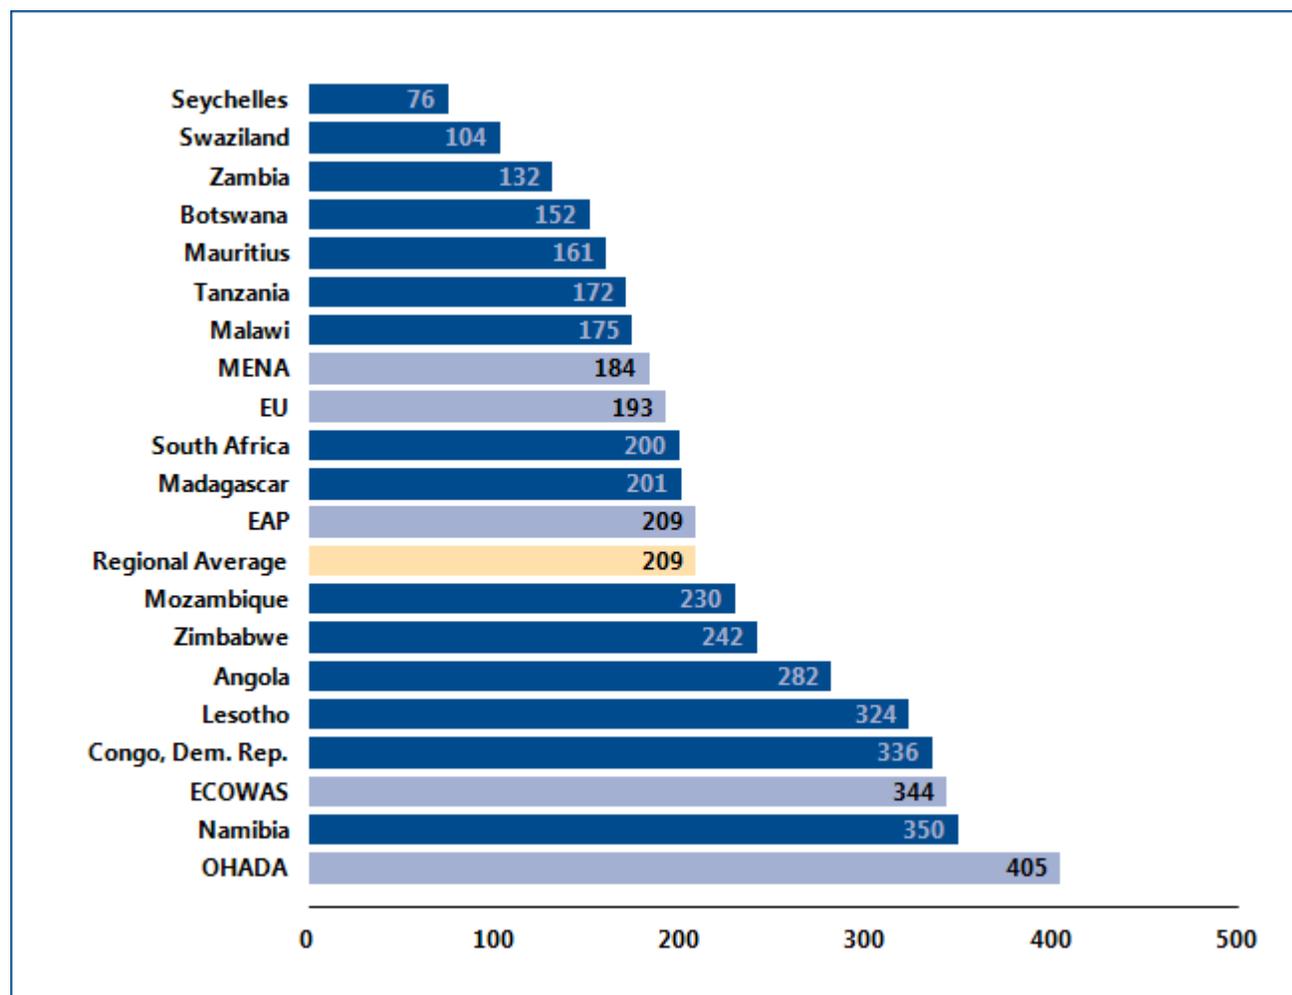

Figure 8.2 How easy is it to pay taxes in economies in the Southern African Development Community (SADC)—and what are the total tax rates?

### Payments (number per year)

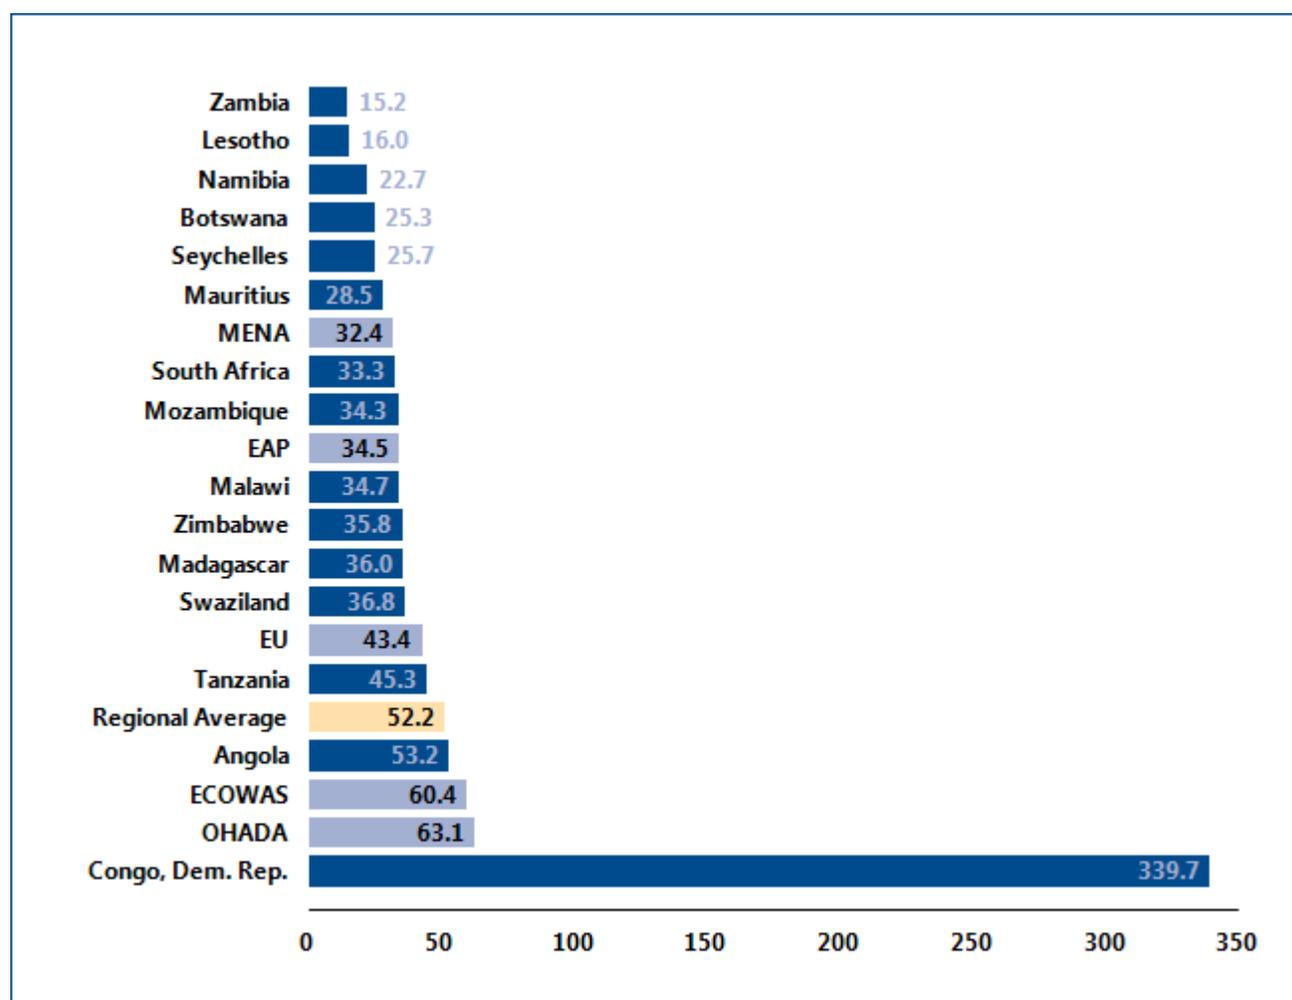

## PAYING TAXES

Time (hours per year)

## PAYING TAXES

## Total tax rate (% of profit)

## PAYING TAXES

### What are the changes over time?

Economies around the world have made paying taxes faster and easier for businesses—such as by consolidating filings, reducing the frequency of payments or offering electronic filing and payment. Many have lowered tax rates. Changes have brought

concrete results. Some economies simplifying tax payment and reducing rates have seen tax revenue rise. What tax reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 8.1)?

Table 8.1 How have economies in the Southern African Development Community (SADC) made paying taxes easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Lesotho</i>	Lesotho reduced the tax burden for companies by reducing CIT and made it easier to pay taxes for companies by spreading the use of e-filing and e-payment.
DB2008	<i>Madagascar</i>	Madagascar made paying taxes easier through use of computerized systems at the Tax Office and simplified filing requirements.
DB2008	<i>Mauritius</i>	Mauritius reduced the tax burden for companies by reducing CIT.
DB2008	<i>Seychelles</i>	The Seychelles made paying taxes less costly for companies by reducing labor taxes.
DB2008	<i>South Africa</i>	South Africa eased the tax burden on business by abolishing the stamp duty.
DB2008	<i>Tanzania</i>	Tanzania introduced a new Income Tax Law.
DB2008	<i>Zimbabwe</i>	Zimbabwe increased the tax on check transaction and introduced a new, more burdensome form for the payment of CIT.
DB2009	<i>Botswana</i>	Training levy of 0.2% introduced effective January 1, 2008.
DB2009	<i>Madagascar</i>	Capital gains tax was abolished effective January 1, 2008. Effective January 1, 2008, corporate income tax is reduced from 30% to 25%, and several taxes, for example professional tax and stamp duty, have been abolished. VAT rate has been

DB year	Economy	Reform
		increased from 18% to 20%.
<b>DB2009</b>	<i>Mozambique</i>	A new Corporate Income Tax Code was introduced, which has a simplified scheme for companies with annual revenues of up to MZM 2.5 million in the previous year (previously MZM 1.5 million). A new VAT Act became effective January 2008. Its new simplified regime for smaller companies applies to taxable persons with revenues between MZM 750,000 (previously MZM 100,000) and MZM 2,500,000 (no change). Electronic tax forms were introduced for social security taxes.
<b>DB2009</b>	<i>South Africa</i>	Regional Establishment Levy and Regional Services Levy were abolished.
<b>DB2009</b>	<i>Zambia</i>	Effective 2008, amendments will be made to the Income Tax Act in order to update, strengthen, and remove ambiguities in these laws and to enhance the effectiveness of tax administration. The depreciation allowance for capital equipment will be reduced from 100% to 25% per annum. Ring-fencing introduced for capital expenditure on new projects, and only deductible after production starts. The VAT Act will be substantively amended and the rate of VAT will be reduced to between 16.5% and 15%.
<b>DB2010</b>	<i>Angola</i>	Angola made it easier to pay taxes by introducing mandatory electronic filing of social security for businesses with more than 20 employees.
<b>DB2010</b>	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo has sought to increase its tax revenue by raising sales tax from 13% to 15%.
<b>DB2010</b>	<i>Malawi</i>	Malawi decreased the time for tax compliance by encouraging the use of electronic systems.
<b>DB2010</b>	<i>South Africa</i>	South Africa eased the tax burden on business by abolishing the stamp duty.
<b>DB2011</b>	<i>Madagascar</i>	Madagascar continued to reduce corporate tax rates.
<b>DB2011</b>	<i>Mauritius</i>	Mauritius introduced a new corporate social responsibility tax.

DB year	Economy	Reform
DB2011	<i>Seychelles</i>	The Seychelles removed the tax-free threshold limit and lowered corporate income tax rates.
DB2011	<i>Zimbabwe</i>	Zimbabwe reduced the corporate income tax rate from 30% to 25%, lowered the capital gains tax from 20% to 5% and simplified the payment of corporate income tax by allowing quarterly payment through commercial banks.
DB2012	<i>Congo, Dem. Rep.</i>	The Democratic Republic of Congo made paying taxes easier for firms by replacing the sales tax with a value added tax.
DB2012	<i>Seychelles</i>	The Seychelles made paying taxes less costly for firms by eliminating the social security tax.
DB2013	<i>Botswana</i>	Botswana made paying taxes more costly for companies by increasing the profit tax rate.
DB2013	<i>Malawi</i>	Malawi introduced a mandatory pension contribution for companies.
DB2013	<i>Swaziland</i>	Swaziland introduced value added tax.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

## TRADING ACROSS BORDERS

In today's globalized world, making trade between economies easier is increasingly important for business. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Research shows that exporters in developing countries gain more from a 10% drop in their trading costs than from a similar reduction in the tariffs applied to their products in global markets.

### What do the indicators cover?

*Doing Business* measures the time and cost (excluding tariffs and the time and cost for sea transport) associated with exporting and importing a standard shipment of goods by sea transport, and the number of documents necessary to complete the transaction. The indicators cover procedural requirements such as documentation requirements and procedures at customs and other regulatory agencies as well as at the port. They also cover trade logistics, including the time and cost of inland transport to the largest business city. The ranking on the ease of trading across borders is the simple average of the percentile rankings on its component indicators: documents, time and cost to export and import.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the traded goods.

The business:

- Is of medium size and employs 60 people.
- Is located in the periurban area of the economy's largest business city.
- Is a private, limited liability company, domestically owned, formally registered and operating under commercial laws and regulations of the economy.

The traded goods:

- Are not hazardous nor do they include military items.

### WHAT THE TRADING ACROSS BORDERS INDICATORS MEASURE

#### Documents required to export and import (number)

- Bank documents
- Customs clearance documents
- Port and terminal handling documents
- Transport documents

#### Time required to export and import (days)

- Obtaining, filling out and submitting all the documents
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Does not include sea transport time

#### Cost required to export and import (US\$ per container)

- All documentation
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Official costs only, no bribes

- Do not require refrigeration or any other special environment.
- Do not require any special phytosanitary or environmental safety standards other than accepted international standards.
- Are one of the economy's leading export or import products.
- Are transported in a dry-cargo, 20-foot full container load.

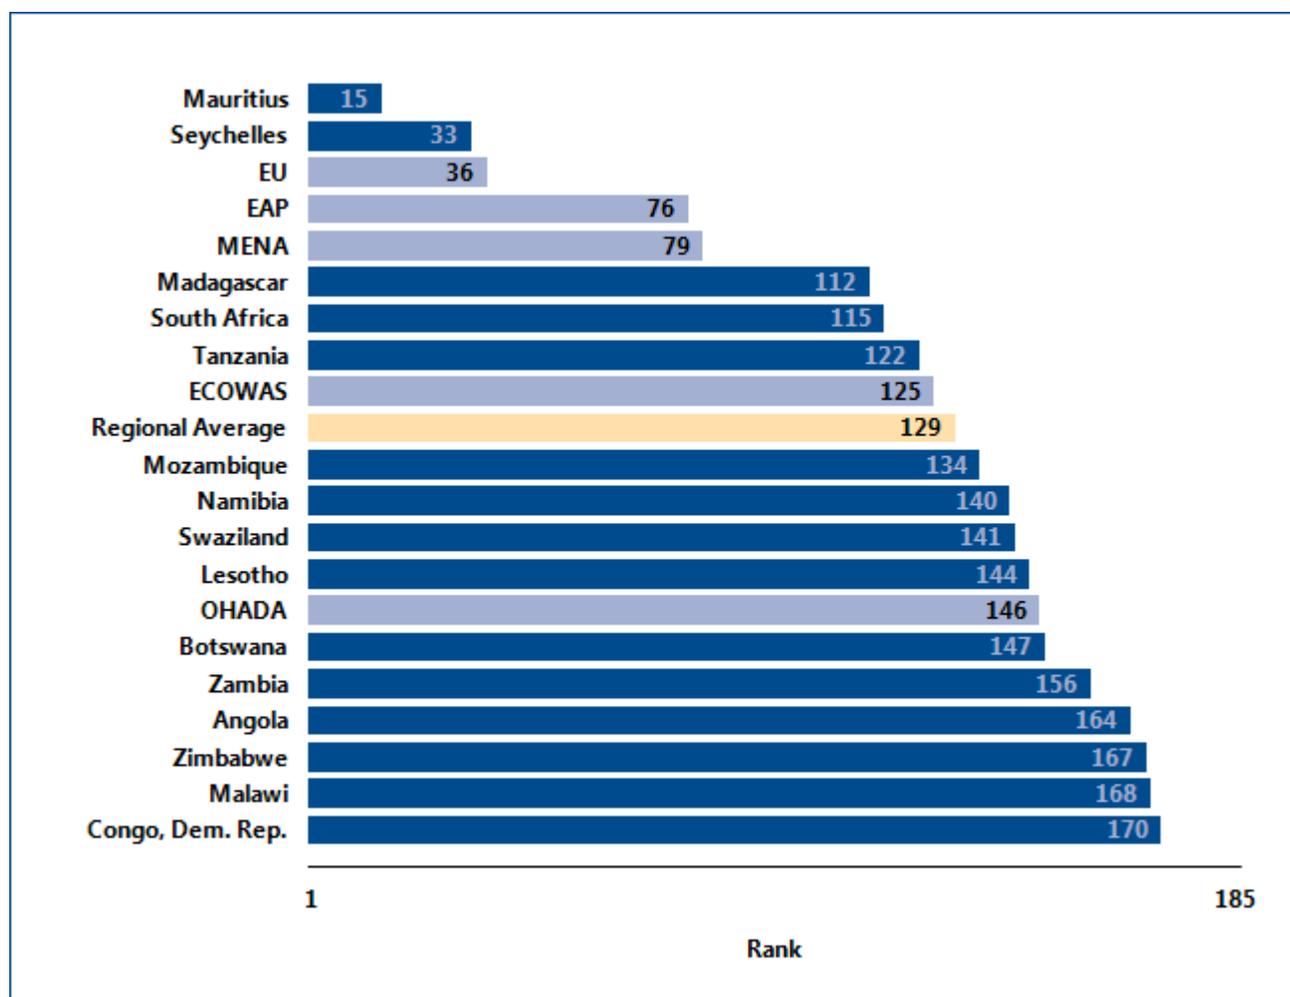

## TRADING ACROSS BORDERS

### Where do the region's economies stand today?

How easy it is for businesses in economies in the Southern African Development Community (SADC) to export and import goods? The global rankings of these economies on the ease of trading across borders

suggest an answer (figure 9.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 9.1 How economies in the Southern African Development Community (SADC) rank on the ease of trading across borders

Source: Doing Business database.

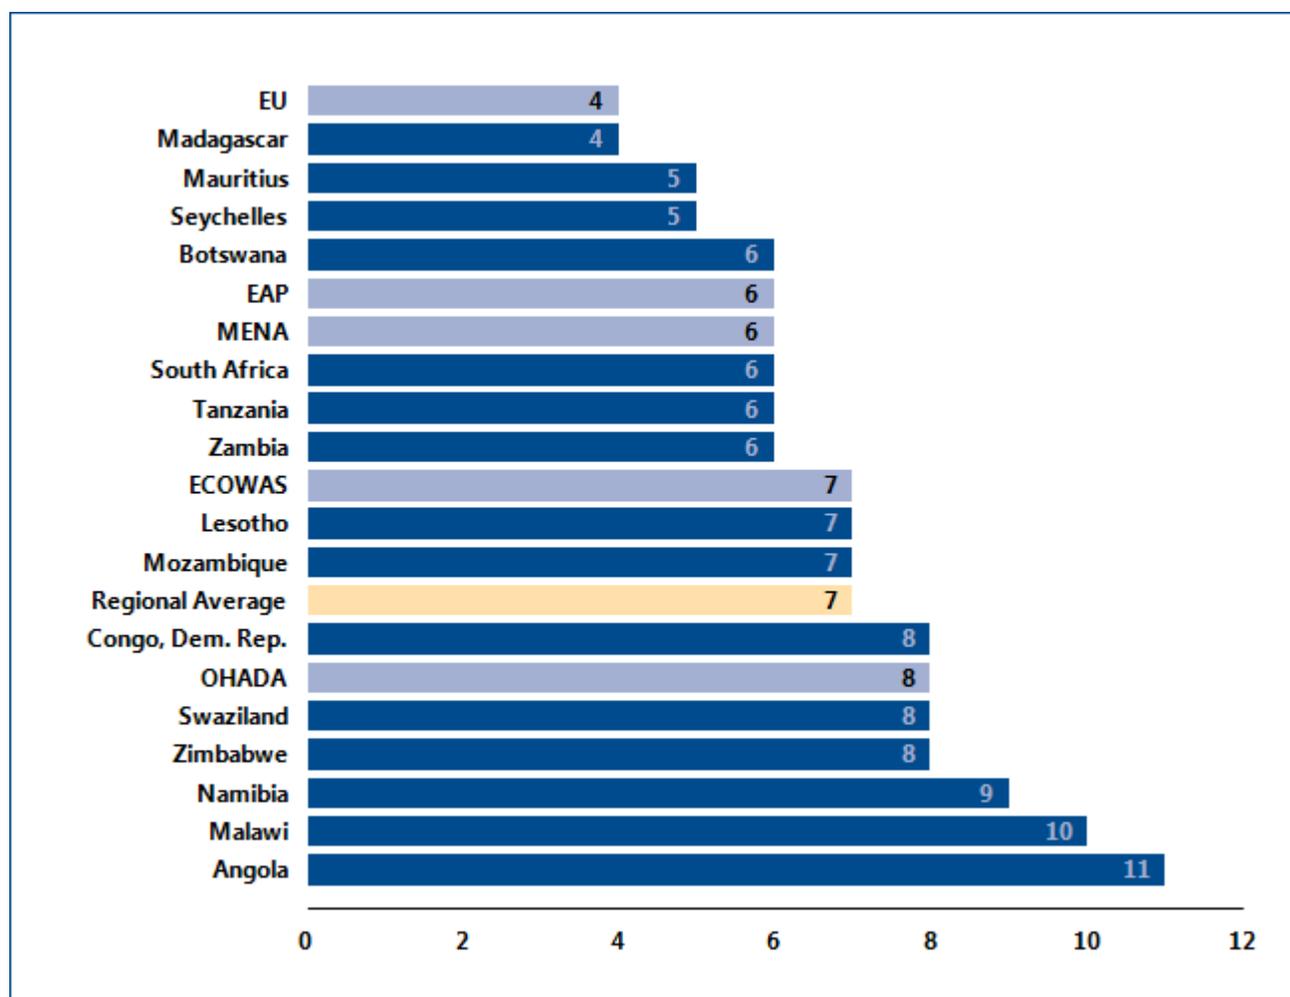

## TRADING ACROSS BORDERS

The indicators underlying the rankings may be more revealing. Data collected by *Doing Business* show what it takes to export or import a standard container of goods in each economy in the region: the number of

documents, the time and the cost (figure 9.2). Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

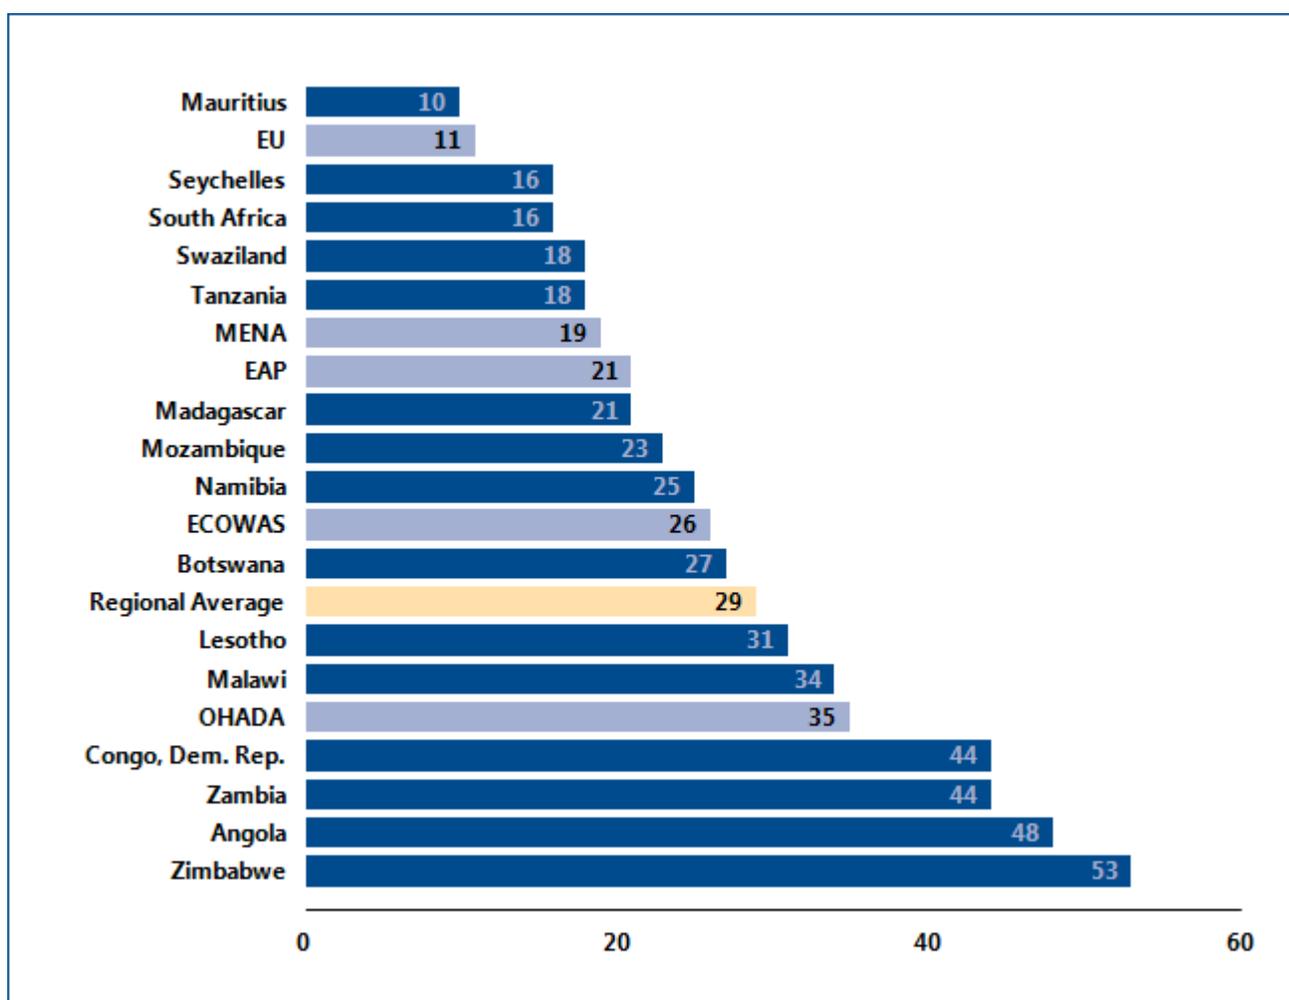

Figure 9.2 What it takes to trade across borders in economies in the Southern African Development Community (SADC)

## TRADING ACROSS BORDERS

### What are the changes over time?

In economies around the world, trading across borders as measured by Doing Business has become faster and easier over the years. Governments have introduced tools to facilitate trade—including single windows, risk-based inspections and electronic data interchange

systems. These changes help improve their trading environment and boost firms' international competitiveness. What trade reforms has Doing Business recorded in the Southern African Development Community (SADC) (table 9.1)?

Table 9.1 How have economies in the Southern African Development Community (SADC) made trading across borders easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Madagascar</i>	Madagascar made trading across borders easier by implementing an EDI system, improving port infrastructure, and streamlining document requirements.
DB2008	<i>Mauritius</i>	Mauritius eased trading across borders by implementing a new computerized risk management system for inspections.
DB2009	<i>Botswana</i>	Botswana sped up customs clearance on its border with South Africa and trained its customs officers in the use of the EDI system, resulting in quicker processing of trade documents.
DB2009	<i>Madagascar</i>	Implementation of EDI, a single window, risk-based inspections, and improvement of port infrastructure led to a decrease in export and import time.
DB2010	<i>Angola</i>	Angola sped the process of trading across borders with a customs improvement program that streamlined procedures and decreased the time and cost of trade.
DB2010	<i>Congo, Dem. Rep.</i>	In the Democratic Republic of Congo, the participation of private companies in the terminal handling process at the port of Matadi has improved the quality of service reducing the needed time to handle cargos.
DB2010	<i>Malawi</i>	The implementation of a risk-based inspection regime and a post-destination clearance program for pre-approved traders has reduced the delays for clearing goods in Malawi.

DB year	Economy	Reform
DB2010	<i>Mauritius</i>	Mauritius introduced the electronic submission of the customs declaration and bill of lading without requirement of physical copies, thus speeding up trade process.
DB2010	<i>Mozambique</i>	Administrative improvements at customs has helped reduced the time required to clear goods traded in Mozambique.
DB2011	<i>Angola</i>	Angola reduced the time for trading across borders by making investments in port infrastructure and administration.
DB2011	<i>Madagascar</i>	Madagascar improved communication and coordination between customs and the terminal port operators through its single-window system (GASYNET), reducing both the time and the cost to export and import.
DB2011	<i>Swaziland</i>	Swaziland reduced the import time of trading across borders by implementing an electronic data interchange system for customs at its border posts.
DB2011	<i>Zambia</i>	Zambia eased trade by implementing a one-stop border post with Zimbabwe, launching web-based submission of customs declarations and introducing scanning machines at border posts.
DB2012	<i>Seychelles</i>	The Seychelles made trading across borders faster by introducing electronic submission of customs documents.
DB2012	<i>Tanzania</i>	Tanzania made trading across borders faster by implementing the Pre-Arrival Declaration (PAD) system and electronic submission of customs declaration.
DB2013	<i>Botswana</i>	In Botswana exporting and importing became faster thanks to the introduction of a scanner by the country's customs authority and an upgrade of South Africa's customs declaration system, both at the Kopfontein–Tlokweng border post.
DB2013	<i>Malawi</i>	Trading across borders in Malawi became easier thanks to improvements in customs clearance procedures and transport links between the port of Beira in Mozambique and Blantyre.
DB2013	<i>South Africa</i>	South Africa reduced the time and documents required to

DB year	Economy	Reform
		export and import through its ongoing customs modernization program.
<b>DB2013</b>	<i>Tanzania</i>	Tanzania made importing more difficult by introducing a requirement to obtain a certificate of conformity with technical regulations before the imported goods are shipped.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

*Source:* *Doing Business* database.

## ENFORCING CONTRACTS

Well-functioning courts help businesses expand their network and markets. Without effective contract enforcement, people might well do business only with family, friends and others with whom they have established relationships. Where contract enforcement is efficient, firms are more likely to engage with new borrowers or customers, and they have greater access to credit.

### What do the indicators cover?

*Doing Business* measures the efficiency of the judicial system in resolving a commercial dispute before local courts. Following the step-by-step evolution of a standardized case study, it collects data relating to the time, cost and procedural complexity of resolving a commercial lawsuit. The ranking on the ease of enforcing contracts is the simple average of the percentile rankings on its component indicators: procedures, time and cost.

The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement. To make the data comparable across economies, *Doing Business* uses several assumptions about the case:

- The seller and buyer are located in the economy's largest business city.
- The buyer orders custom-made goods, then fails to pay.
- The seller sues the buyer before a competent court.
- The value of the claim is 200% of income per capita.
- The seller requests a pretrial attachment to secure the claim.

### WHAT THE ENFORCING CONTRACTS

#### INDICATORS MEASURE

#### Procedures to enforce a contract through the courts (number)

Any interaction between the parties in a commercial dispute, or between them and the judge or court officer

Steps to file and serve the case

Steps for trial and judgment

Steps to enforce the judgment

#### Time required to complete procedures (calendar days)

Time to file and serve the case

Time for trial and obtaining judgment

Time to enforce the judgment

#### Cost required to complete procedures (% of claim)

No bribes

Average attorney fees

Court costs

Enforcement costs

- The dispute on the quality of the goods requires an expert opinion.
- The judge decides in favor of the seller; there is no appeal.
- The seller enforces the judgment through a public sale of the buyer's movable assets.

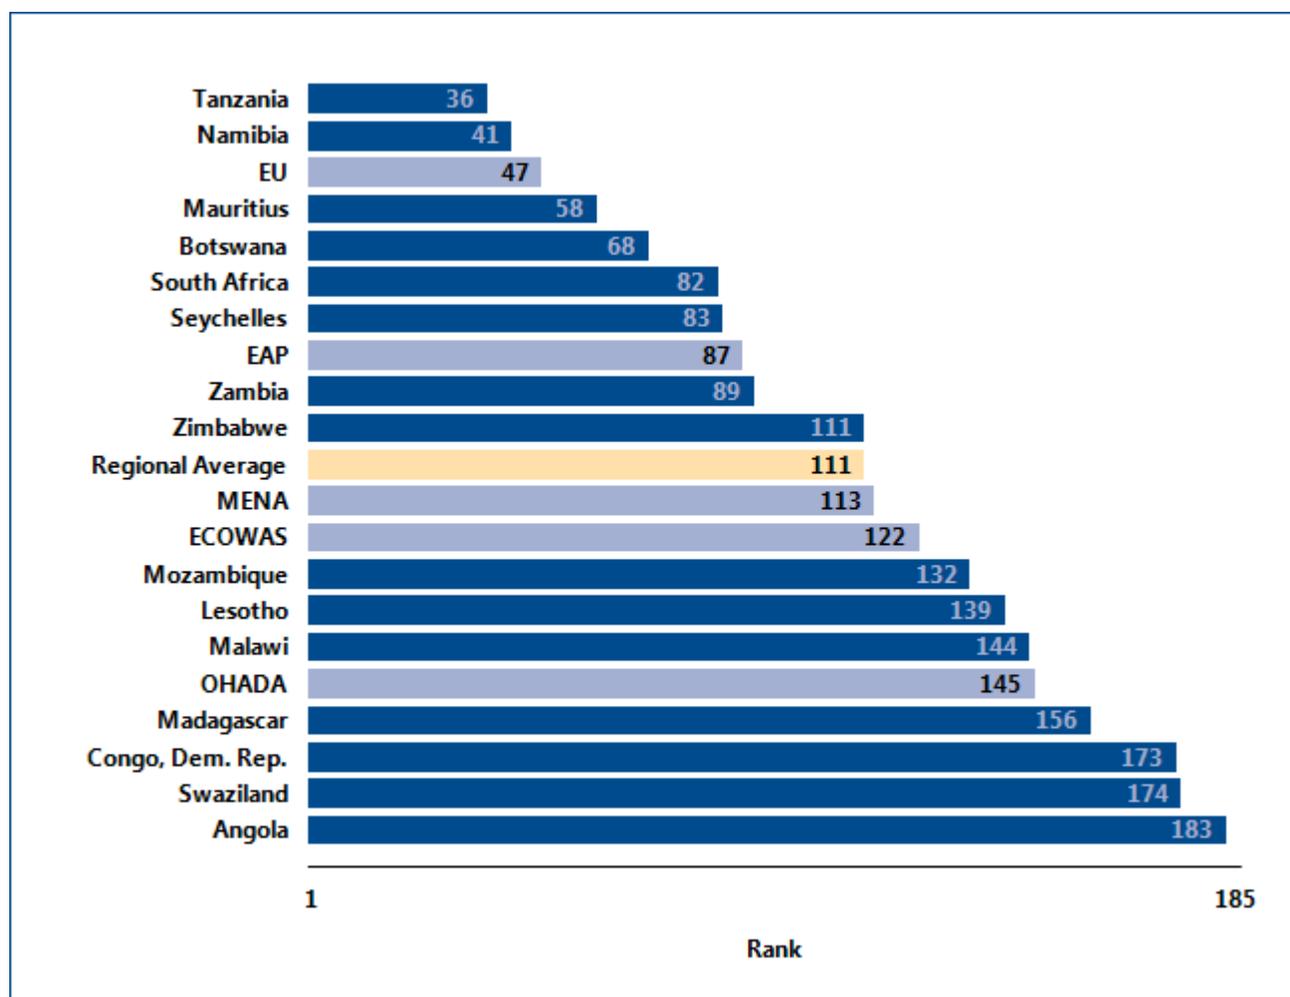

## ENFORCING CONTRACTS

### Where do the region’s economies stand today?

How efficient is the process of resolving a commercial dispute through the courts in economies in the Southern African Development Community (SADC)? The global rankings of these economies on the ease of

enforcing contracts suggest an answer (figure 10.1). The average ranking of the region and comparator regions provide a useful benchmark.

Figure 10.1 How economies in the Southern African Development Community (SADC) rank on the ease of enforcing contracts

Source: Doing Business database.

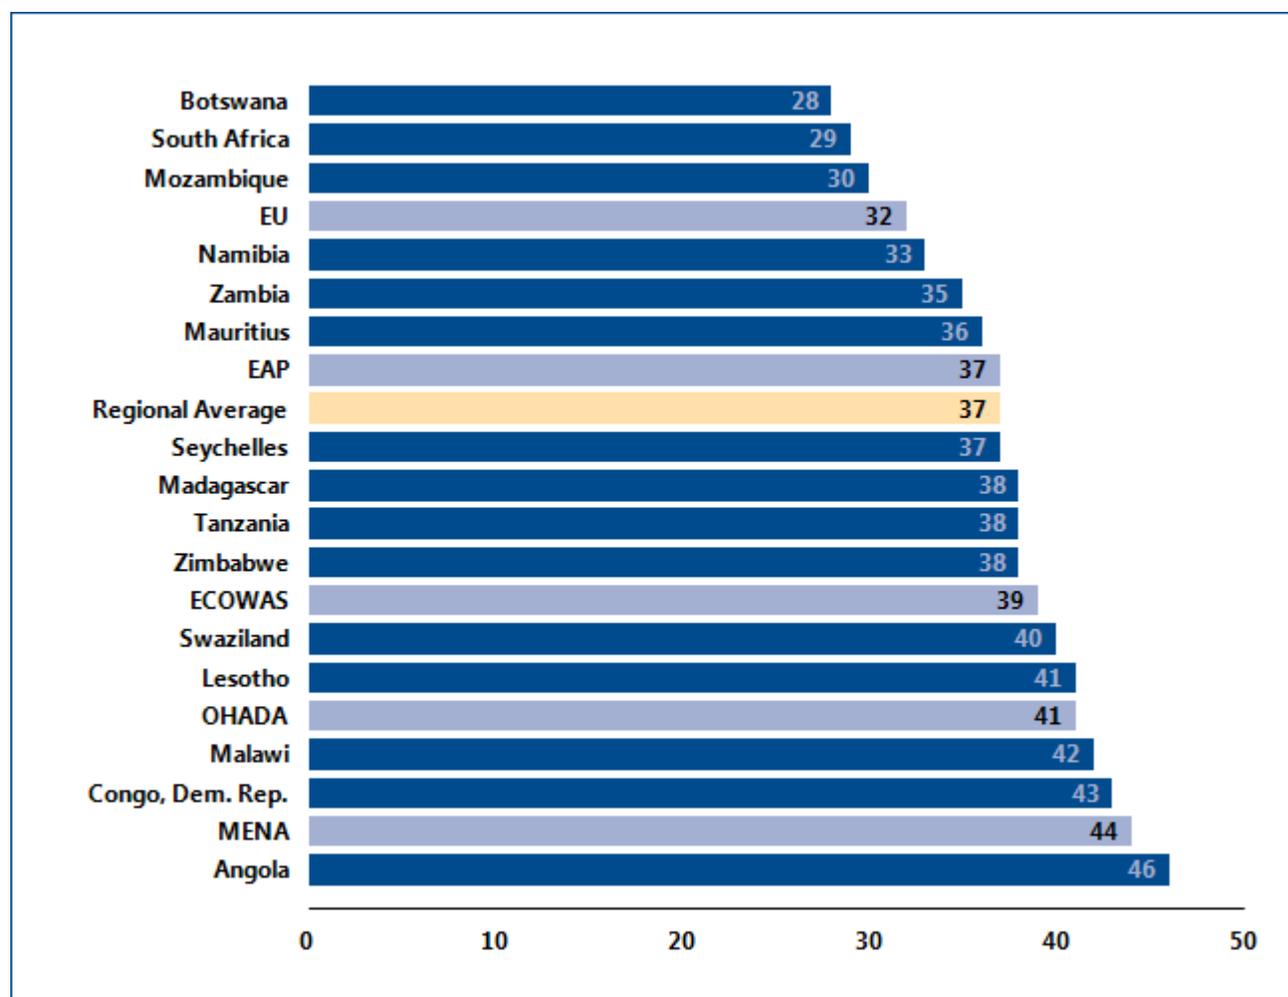

## ENFORCING CONTRACTS

The indicators underlying the rankings may also be revealing. Data collected by *Doing Business* show what it takes to enforce a contract through the courts in each economy in the region: the number of

procedures, the time and the cost (figure 10.2). Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

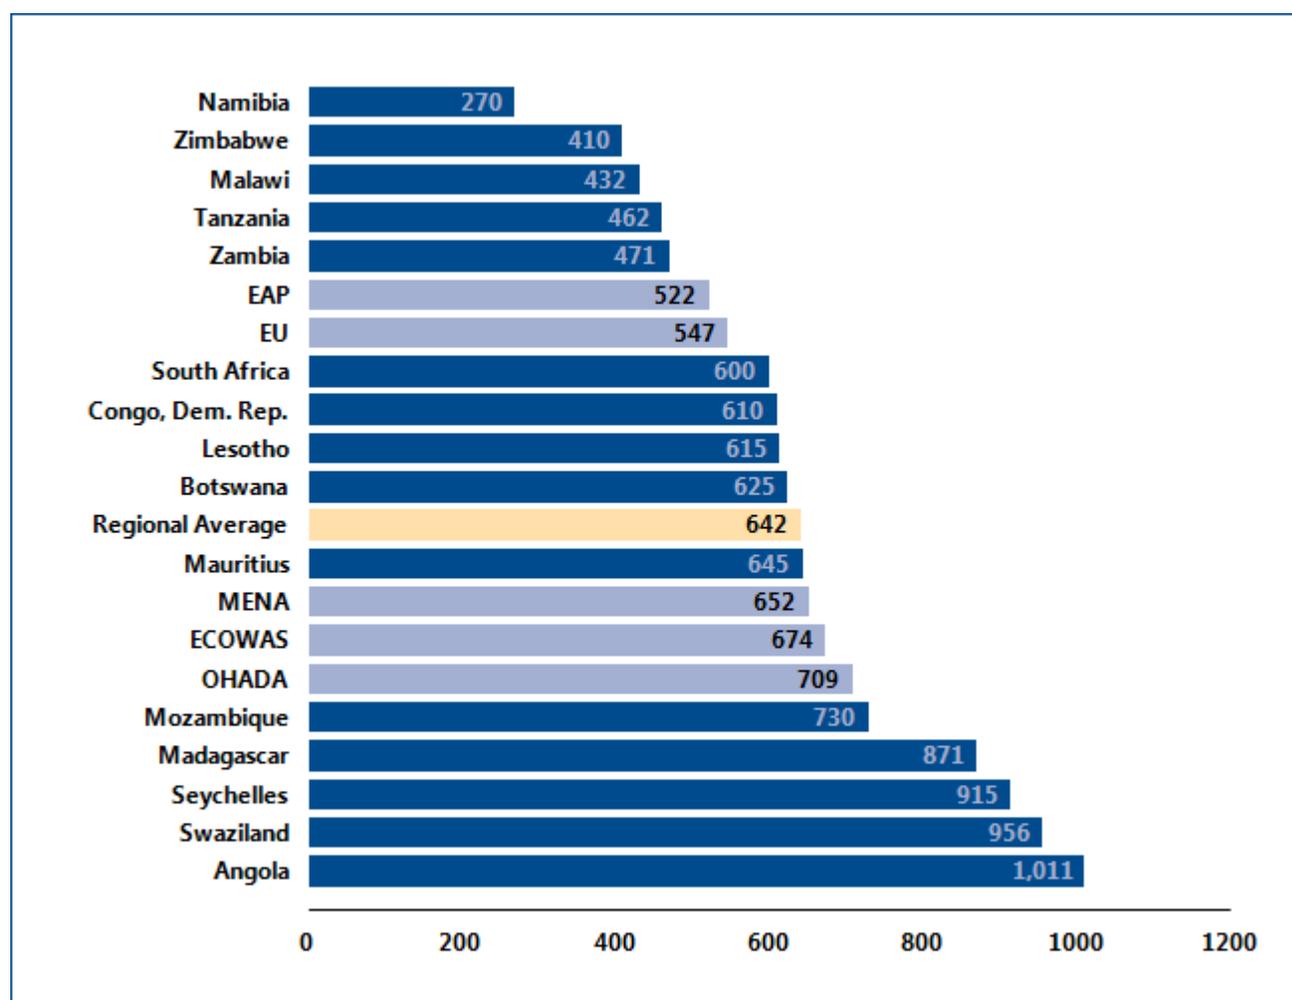

Figure 10.2 What it takes to enforce a contract through the courts in economies in the Southern African Development Community (SADC)

## ENFORCING CONTRACTS

### What are the changes over time?

Economies in all regions have improved contract enforcement in recent years. A judiciary can be improved in different ways. Higher-income economies tend to look for ways to enhance efficiency by introducing new technology. Lower-income economies often work on reducing backlogs by introducing

periodic reviews to clear inactive cases from the docket and by making procedures faster. What reforms making it easier (or more difficult) to enforce contracts has *Doing Business* recorded in the Southern African Development Community (SADC) (table 10.1)?

Table 10.1 How have economies in the Southern African Development Community (SADC) made enforcing contracts easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Congo, Dem. Rep.</i>	In the Democratic Republic of Congo, the operation of the commercial court made commercial dispute resolution more efficient.
DB2008	<i>Malawi</i>	Malawi has made enforcing contracts easier by opening a commercial court and hiring new judges.
DB2008	<i>Mozambique</i>	Mozambique improved commercial dispute resolution in Maputo by hiring more specialised judges and reducing the time limits in enforcement procedures.
DB2009	<i>Mozambique</i>	In Mozambique more than 20 judges were added to the judiciary, all of them receiving formal training. Court administrators were introduced, alleviating the administrative burdens on the judges. At the same time Mozambique introduced performance measurement for judges.
DB2010	<i>Botswana</i>	The introduction of case management and improved use of information technology has contributed to more efficient resolution of commercial disputes in Botswana.
DB2010	<i>Mauritius</i>	Mauritius set up a specialized commercial division of its Supreme Court, thus improving contract enforcement.
DB2011	<i>Malawi</i>	Malawi simplified the enforcement of contracts by raising the ceiling for commercial claims that can be brought to the magistrates court.
DB2011	<i>Mauritius</i>	Mauritius speeded up the resolution of commercial disputes by recruiting more judges and adding more courtrooms.
DB2011	<i>Zambia</i>	Zambia improved contract enforcement by introducing an electronic case management system in the courts that provides electronic referencing of cases, a database of laws,

DB year	Economy	Reform
		real-time court reporting and public access to court records.
<b>DB2012</b>	<i>Lesotho</i>	Lesotho made enforcing contracts easier by launching a specialized commercial court.
<b>DB2012</b>	<i>Seychelles</i>	The Seychelles expanded the jurisdiction of the lower court, increasing the time required to enforce contracts.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

## RESOLVING INSOLVENCY

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in the speedy return of businesses to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses and thereby improve growth and sustainability in the economy overall.

### What do the indicators cover?

*Doing Business* studies the time, cost and outcome of insolvency proceedings involving domestic entities. It does not measure insolvency proceedings of individuals and financial institutions. The data are derived from survey responses by local insolvency practitioners and verified through a study of laws and regulations as well as public information on bankruptcy systems.

The ranking on the ease of resolving insolvency is based on the recovery rate, which is recorded as cents on the dollar recouped by creditors through reorganization, liquidation or debt enforcement (foreclosure) proceedings. The recovery rate is a function of time, cost and other factors, such as lending rate and the likelihood of the company continuing to operate.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the case. It assumes that the company:

- Is a domestically owned, limited liability company operating a hotel.
- Operates in the economy's largest business city.

### WHAT THE RESOLVING INSOLVENCY INDICATORS MEASURE

#### Time required to recover debt (years)

Measured in calendar years

Appeals and requests for extension are included

#### Cost required to recover debt (% of debtor's estate)

Measured as percentage of estate value

Court fees

Fees of insolvency administrators

Lawyers' fees

Assessors' and auctioneers' fees

Other related fees

#### Recovery rate for creditors (cents on the dollar)

Measures the cents on the dollar recovered by creditors

Present value of debt recovered

Official costs of the insolvency proceedings are deducted

Depreciation of furniture is taken into account

Outcome for the business (survival or not) affects the maximum value that can be recovered

- Has 201 employees, 1 main secured creditor and 50 unsecured creditors.
- Has a higher value as a going concern—and that the efficient outcome is either reorganization or sale as a going concern, not piecemeal liquidation.

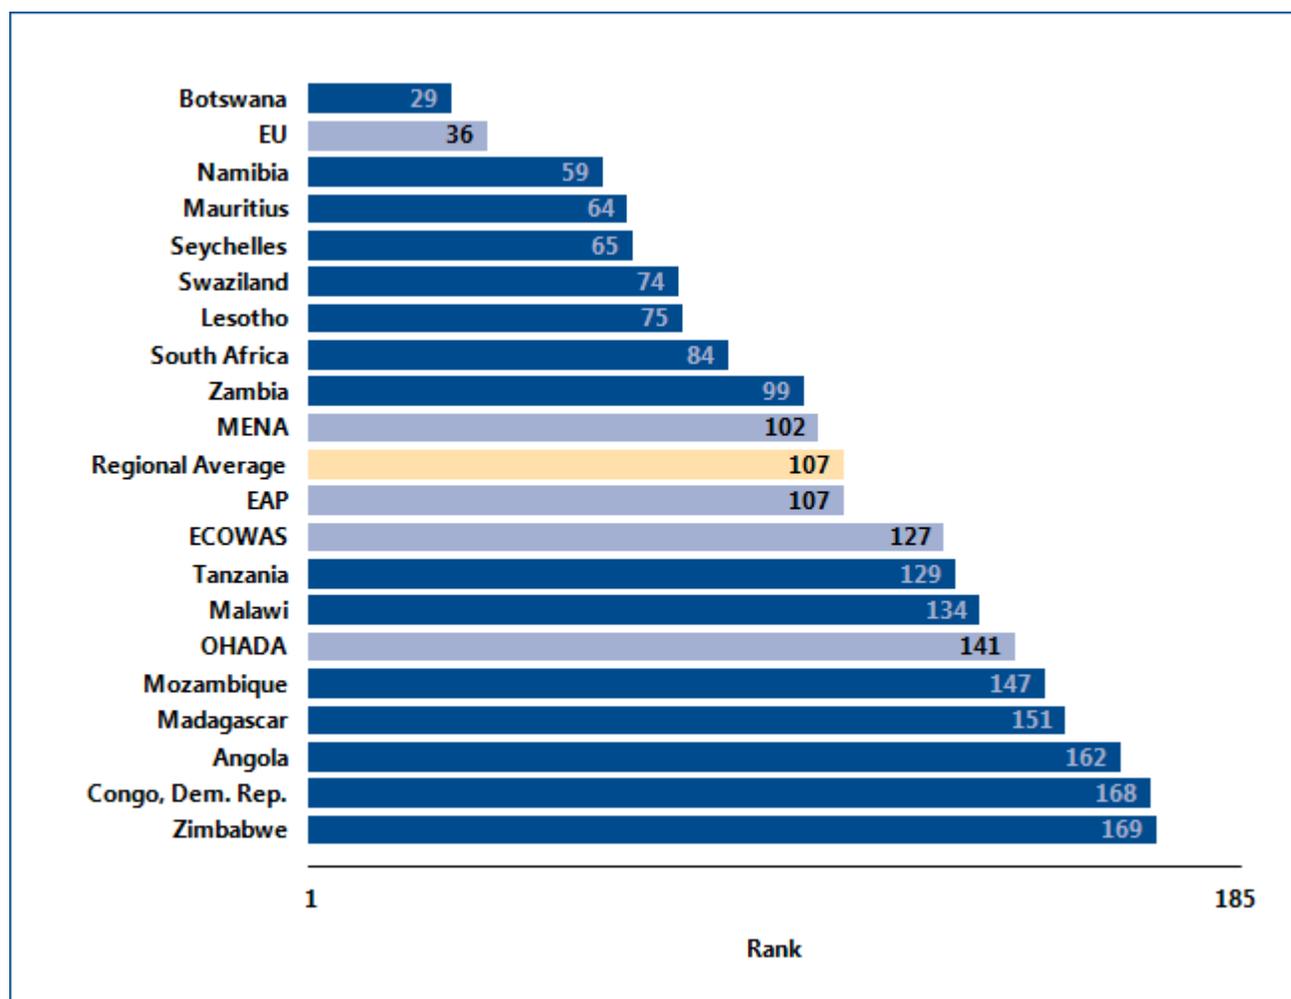

## RESOLVING INSOLVENCY

### Where do the region's economies stand today?

How efficient are insolvency proceedings in economies in the Southern African Development Community (SADC)? The global rankings of these economies on the ease of resolving insolvency suggest an answer (figure 11.1). The average ranking of the region and

comparator regions provide a useful benchmark for assessing the efficiency of insolvency proceedings. Speed, low costs and continuation of viable businesses characterize the top-performing economies.

Figure 11.1 How economies in the Southern African Development Community (SADC) rank on the ease of resolving insolvency

Source: Doing Business database.

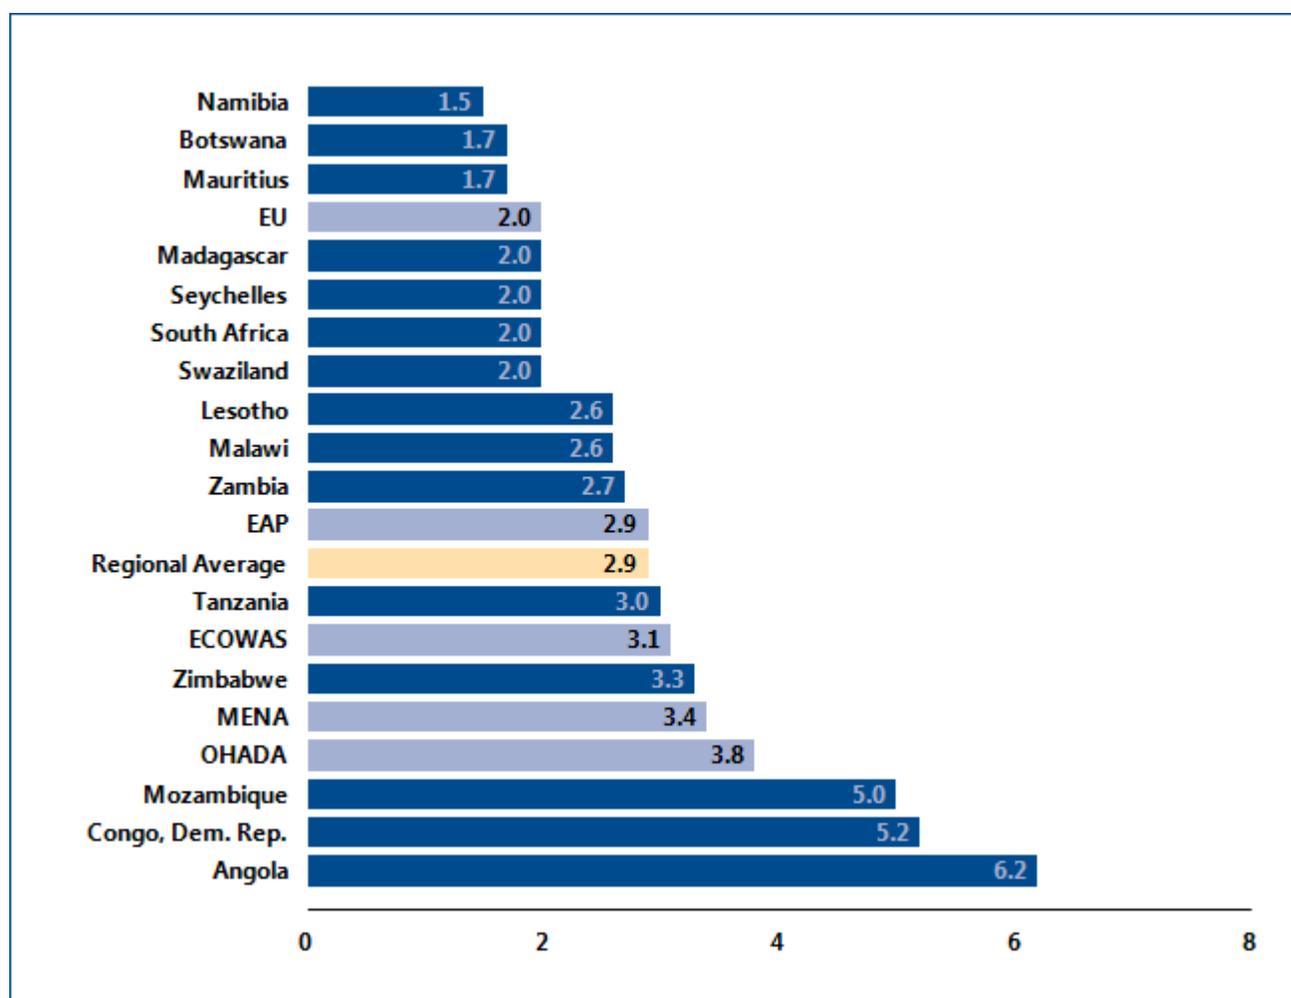

## RESOLVING INSOLVENCY

The indicators underlying the rankings may be more revealing. Data collected by *Doing Business* show the average time and cost required to resolve insolvency as well as the average recovery rate (figure 11.2).

Comparing these indicators across the region and with averages both for the region and for comparator regions can provide useful insights.

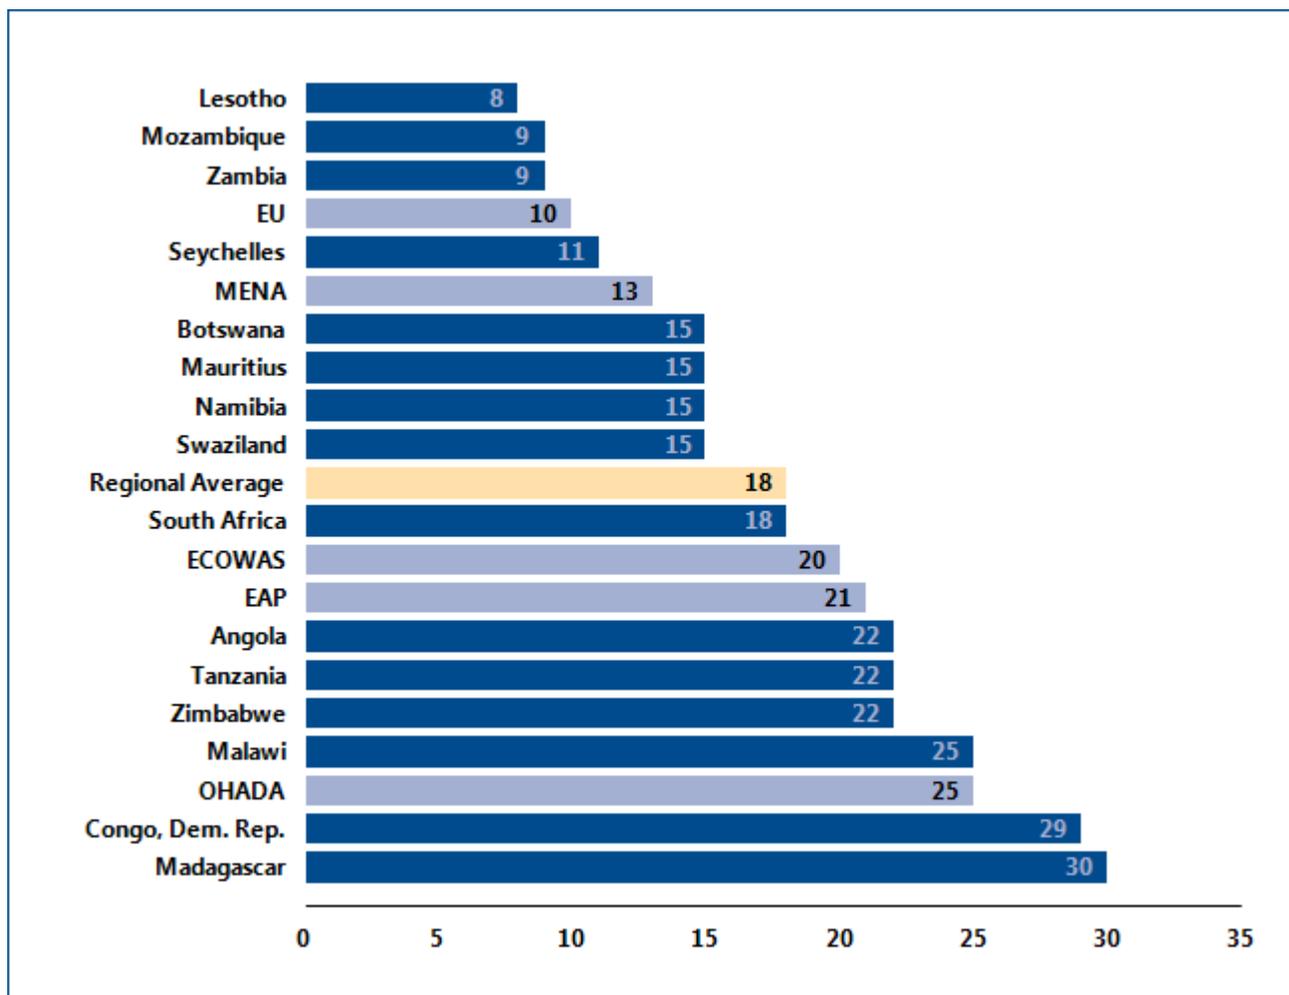

Figure 11.2 How efficient is the insolvency process in economies in the Southern African Development Community (SADC)

## RESOLVING INSOLVENCY

### What are the changes over time?

A well-balanced bankruptcy system distinguishes companies that are financially distressed but economically viable from inefficient companies that should be liquidated. But in some insolvency systems even viable businesses are liquidated. This is starting to

change. Many recent reforms of bankruptcy laws have been aimed at helping more of the viable businesses survive. What insolvency reforms has *Doing Business* recorded in the Southern African Development Community (SADC) (table 11.1)?

Table 11.1 How have economies in the Southern African Development Community (SADC) made resolving insolvency easier—or not?

By *Doing Business* report year

DB year	Economy	Reform
DB2008	<i>Botswana</i>	Botswana amended its Employment Act to increase the priority ranking of employee benefits to preferred status. Botswana also amended the Insolvency Act to criminalize false statements by the insolvent company which may affect a prospective buyer's decision whether or not to purchase the company as a going concern.
DB2008	<i>Mauritius</i>	Mauritius adopted legislation that made the process of sale of immovable property after default on a credit agreement more efficient and less susceptible to abuse by creditors.
DB2010	<i>Malawi</i>	Malawi introduced a new law limiting the liquidator's fees during insolvency procedures.
DB2010	<i>Mauritius</i>	A new insolvency law in Mauritius introduces a rehabilitation procedure for companies as an alternative to winding up, and defines the rights and obligations of creditors and debtors and sanctions for those who abuse the system.
DB2012	<i>Malawi</i>	Malawi adopted new rules providing clear procedural requirements and time frames for winding up a company.
DB2012	<i>Namibia</i>	Namibia adopted a new company law that established clear procedures for liquidation.
DB2012	<i>South Africa</i>	South Africa introduced a new reorganization process to facilitate the rehabilitation of financially distressed companies.
DB2013	<i>Zambia</i>	Zambia strengthened its insolvency process by introducing further qualification requirements for receivers and liquidators and by establishing specific duties and remuneration rules for them.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

## DATA NOTES

The indicators presented and analyzed in *Doing Business* measure business regulation and the protection of property rights—and their effect on businesses, especially small and medium-size domestic firms. First, the indicators document the complexity of regulation, such as the number of procedures to start a business or to register and transfer commercial property. Second, they gauge the time and cost of achieving a regulatory goal or complying with regulation, such as the time and cost to enforce a contract, go through bankruptcy or trade across borders. Third, they measure the extent of legal protections of property, for example, the protections of investors against looting by company directors or the range of assets that can be used as collateral according to secured transactions laws. Fourth, a set of indicators documents the tax burden on businesses. Finally, a set of data covers different aspects of employment regulation.

The data for all sets of indicators in *Doing Business 2013* are for June 2012.<sup>2</sup>

### Methodology

The *Doing Business* data are collected in a standardized way. To start, the *Doing Business* team, with academic advisers, designs a questionnaire. The questionnaire uses a simple business case to ensure comparability across economies and over time—with assumptions about the legal form of the business, its size, its location and the nature of its operations. Questionnaires are administered through more than 9,600 local experts, including lawyers, business consultants, accountants, freight forwarders, government officials and other professionals routinely administering or advising on legal and regulatory requirements. These experts have several rounds of interaction with the *Doing Business* team, involving conference calls, written correspondence and visits by the team. For *Doing Business 2013* team members visited 24 economies to verify data and recruit respondents. The data from questionnaires are subjected to numerous rounds of verification, leading to revisions or expansions of the information collected.

<sup>2</sup> The data for paying taxes refer to January – December 2011.

## ECONOMY CHARACTERISTICS

### Gross national income per capita

*Doing Business 2013* reports 2011 income per capita as published in the World Bank's *World Development Indicators 2012*. Income is calculated using the Atlas method (current US\$). For cost indicators expressed as a percentage of income per capita, 2011 gross national income (GNI) in U.S. dollars is used as the denominator. GNI data were not available from the World Bank for Afghanistan; Australia; The Bahamas; Bahrain; Barbados; Brunei Darussalam; Cyprus; Djibouti; Guyana; the Islamic Republic of Iran; Kuwait; Malta; New Zealand; Oman; Puerto Rico (territory of the United States); Sudan; Suriname; the Syrian Arab Republic; Timor-Leste; West Bank and Gaza; and the Republic of Yemen. In these cases GDP or GNP per capita data and growth rates from the International Monetary Fund's World Economic Outlook database and the Economist Intelligence Unit were used.

### Region and income group

*Doing Business* uses the World Bank regional and income group classifications, available at <http://data.worldbank.org/about/country-classifications>. The World Bank does not assign regional classifications to high-income economies. For the purpose of the *Doing Business* report, high-income OECD economies are assigned the "regional" classification *OECD high income*. Figures and tables presenting regional averages include economies from all income groups (low, lower middle, upper middle and high income).

### Population

*Doing Business 2013* reports midyear 2011 population statistics as published in *World Development Indicators 2012*.

The *Doing Business* methodology offers several advantages. It is transparent, using factual information about what laws and regulations say and allowing multiple interactions with local respondents to clarify potential misinterpretations of questions. Having

representative samples of respondents is not an issue; *Doing Business* is not a statistical survey, and the texts of the relevant laws and regulations are collected and answers checked for accuracy. The methodology is inexpensive and easily replicable, so data can be collected in a large sample of economies. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. Finally, the data not only highlight the extent of specific regulatory obstacles to business but also identify their source and point to what might be reformed.

Information on the methodology for each *Doing Business* topic can be found on the *Doing Business* website at <http://www.doingbusiness.org/methodology/>.

## Limits to what is measured

The *Doing Business* methodology has 5 limitations that should be considered when interpreting the data. First, the collected data refer to businesses in the economy's largest business city (which in some economies differs from the capital) and may not be representative of regulation in other parts of the economy. To address this limitation, subnational *Doing Business* indicators were created (see the section on subnational *Doing Business* indicators). Second, the data often focus on a specific business form—generally a limited liability company (or its legal equivalent) of a specified size—and may not be representative of the regulation on other businesses, for example, sole proprietorships. Third, transactions described in a standardized case scenario refer to a specific set of issues and may not represent the full set of issues a business encounters. Fourth, the measures of time involve an element of judgment by the expert respondents. When sources indicate different estimates, the time indicators reported in *Doing Business* represent the median values of several responses given under the assumptions of the standardized case.

Finally, the methodology assumes that a business has full information on what is required and does not waste time when completing procedures. In practice, completing a procedure may take longer if the business lacks information or is unable to follow up promptly. Alternatively, the business may choose to disregard some burdensome procedures. For both reasons the time delays reported in *Doing Business*

2013 would differ from the recollection of entrepreneurs reported in the World Bank Enterprise Surveys or other perception surveys.

## Subnational *Doing Business* indicators

This year *Doing Business* completed subnational studies for Indonesia, Kenya, Mexico, the Russian Federation and the United Arab Emirates. Each of these countries had already asked to have subnational data in the past, and this year *Doing Business* updated the indicators, measured improvements over time and expanded geographic coverage to additional cities or added additional indicators. *Doing Business* also published regional studies for the Arab world, the East African Community and member states of the Organization for the Harmonization of Business Law in Africa (OHADA).

The subnational studies point to differences in business regulation and its implementation—as well as in the pace of regulatory reform—across cities in the same economy. For several economies subnational studies are now periodically updated to measure change over time or to expand geographic coverage to additional cities. This year that is the case for all the subnational studies published.

## Changes in what is measured

The ranking methodology for paying taxes was updated this year. The threshold for the total tax rate introduced last year for the purpose of calculating the ranking on the ease of paying taxes was updated. All economies with a total tax rate below the threshold (which is calculated and adjusted on a yearly basis) receive the same ranking on the total tax rate indicator. The threshold is not based on any economic theory of an “optimal tax rate” that minimizes distortions or maximizes efficiency in the tax system of an economy overall. Instead, it is mainly empirical in nature, set at the lower end of the distribution of tax rates levied on medium-size enterprises in the manufacturing sector as observed through the paying taxes indicators. This reduces the bias in the indicators toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through

taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology).

Giving the same ranking to all economies whose total tax rate is below the threshold avoids awarding economies in the scoring for having an unusually low total tax rate, often for reasons unrelated to government policies toward enterprises. For example, economies that are very small or that are rich in natural resources do not need to levy broad-based taxes.

## Data challenges and revisions

Most laws and regulations underlying the *Doing Business* data are available on the *Doing Business* website at <http://www.doingbusiness.org>. All the sample questionnaires and the details underlying the indicators are also published on the website. Questions on the methodology and challenges to data can be submitted through the website's "Ask a Question" function at <http://www.doingbusiness.org>.

## Ease of doing business

The ease of doing business index ranks economies from 1 to 185. For each economy the ranking is calculated as the simple average of the percentile rankings on each of the 10 topics included in the index in *Doing Business 2013*: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts, and resolving insolvency. The employing workers indicators are not included in this year's aggregate ease of doing business ranking. In addition to this year's ranking, *Doing Business* presents a comparable ranking for the previous year, adjusted for any changes in methodology as well as additions of economies or topics.<sup>3</sup>

<sup>3</sup> In case of revisions to the methodology or corrections to the underlying data, the data are back-calculated to provide a comparable time series since the year the relevant economy or topic was first included in the data set. The time series is available on the *Doing Business* website (<http://www.doingbusiness.org>). Six topics and more than 50 economies have been added since the inception

### *Construction of the ease of doing business index*

Here is one example of how the ease of doing business index is constructed. In Finland it takes 3 procedures, 14 days and 4% of annual income per capita in fees to register a property. On these 3 indicators Finland ranks in the 6th, 16th and 39th percentiles. So on average Finland ranks in the 20th percentile on the ease of registering property. It ranks in the 30th percentile on starting a business, 28<sup>th</sup> percentile on getting credit, 24th percentile on paying taxes, 13th percentile on enforcing contracts, 5th percentile on trading across borders and so on. Higher rankings indicate simpler regulation and stronger protection of property rights. The simple average of Finland's percentile rankings on all topics is 21st. When all economies are ordered by their average percentile rankings, Finland stands at 11 in the aggregate ranking on the ease of doing business.

More complex aggregation methods—such as principal components and unobserved components—yield a ranking nearly identical to the simple average used by *Doing Business*.<sup>4</sup> Thus, *Doing Business* uses the simplest method: weighting all topics equally and, within each topic, giving equal weight to each of the topic components.<sup>5</sup>

If an economy has no laws or regulations covering a specific area—for example, insolvency—it receives a "no practice" mark. Similarly, an economy receives a "no practice" or "not possible" mark if regulation exists but is never used in practice or if a competing regulation prohibits such practice. Either way, a "no practice" mark puts the economy at the bottom of the ranking on the relevant indicator.

---

of the project. Earlier rankings on the ease of doing business are therefore not comparable.

<sup>4</sup> See Simeon Djankov, Darshini Manraj, Caralee McLiesh and Rita Ramalho, "*Doing Business* Indicators: Why Aggregate, and How to Do It" (World Bank, Washington, DC, 2005). Principal components and unobserved components methods yield a ranking nearly identical to that from the simple average method because both these methods assign roughly equal weights to the topics, since the pairwise correlations among indicators do not differ much. An alternative to the simple average method is to give different weights to the topics, depending on which are considered of more or less importance in the context of a specific economy.

<sup>5</sup> A technical note on the different aggregation and weighting methods is available on the *Doing Business* website (<http://www.doingbusiness.org>).

The ease of doing business index is limited in scope. It does not account for an economy's proximity to large markets, the quality of its infrastructure services (other than services related to trading across borders and getting electricity), the strength of its financial system, the security of property from theft and looting, macroeconomic conditions or the strength of underlying institutions.

#### *Variability of economies' rankings across topics*

Each indicator set measures a different aspect of the business regulatory environment. The rankings of an economy can vary, sometimes significantly, across indicator sets. The average correlation coefficient between the 10 indicator sets included in the aggregate ranking is 0.37, and the coefficients between any 2 sets of indicators range from 0.19 (between dealing with construction permits and getting credit) to 0.60 (between starting a business and protecting investors). These correlations suggest that economies rarely score universally well or universally badly on the indicators.

Consider the example of Canada. It stands at 17 in the aggregate ranking on the ease of doing business. Its ranking is 3 on starting a business, and 4 on both resolving insolvency and protecting investors. But its ranking is only 62 on enforcing contracts, 69 on dealing with construction permits and 152 on getting electricity.

Variation in performance across the indicator sets is not at all unusual. It reflects differences in the degree of priority that government authorities give to particular areas of business regulation reform and the ability of different government agencies to deliver tangible results in their area of responsibility.

#### *Economies that improved the most across 3 or more Doing Business topics in 2011/12*

*Doing Business 2013* uses a simple method to calculate which economies improved the most in the ease of doing business. First, it selects the economies that in 2011/12 implemented regulatory reforms making it easier to do business in 3 or more of the 10 topics included in this year's ease of doing business ranking.<sup>6</sup> Twenty-three economies meet this criterion: Benin, Burundi, Costa Rica, the Czech Republic, Georgia, Greece, Guinea, Kazakhstan, Korea, the Lao People's Democratic Republic, Liberia, Mongolia, the Netherlands, Panama, Poland, Portugal, Serbia, the Slovak Republic, Slovenia, Sri Lanka, Ukraine, the United Arab Emirates and Uzbekistan. Second, *Doing Business* ranks these economies on the increase in their ranking on the ease of doing business from the previous year using comparable rankings.

Selecting the economies that implemented regulatory reforms in at least 3 topics and improved the most in the aggregate ranking is intended to highlight economies with ongoing, broad-based reform programs.

---

<sup>6</sup> *Doing Business* reforms making it more difficult to do business are subtracted from the total number of those making it easier to do business.
