Doing Business 2011
Business Reforms

Doing Business 2011 : Making a Difference for Entrepreneurs is the eighth in a series of annual reports investigating regulations that enhance business activity and those that constrain it. *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 183 economies, from Afghanistan to Zimbabwe, over time.

A set of regulations affecting 9 stages of a business's life are measured: starting a business, dealing with construction permits, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts and closing a business. Data in *Doing Business 2011* are current as of June 1, 2010*. The indicators are used to analyze economic outcomes and identify what reforms have worked, where, and why.

The Doing Business methodology has limitations. Other areas important to business such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions, are not studied directly by Doing Business. To make the data comparable across economies, the indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policymakers in designing reform.

The data set covers 183 economies: 46 in Sub-Saharan Africa, 32 in Latin America and the Caribbean, 25 in Eastern Europe and Central Asia, 24 in East Asia and Pacific, 18 in the Middle East and North Africa and 8 in South Asia, as well as 30 OECD high-income economies.

The following pages present the summary Doing Business indicators for Taiwan, China. The data used for this economy profile come from the Doing Business database and are summarized in graphs. These graphs allow a comparison of the economies in each region not only with one another but also with the "good practice" economy for each indicator.

The good-practice economies are identified by their position in each indicator as well as their overall ranking and by their capacity to provide good examples of business regulation to other countries. These good-practice economies do not necessarily rank number 1 in the topic or indicator, but they are in the top 10.

More information is available in the full report. *Doing Business 2011 : Making a Difference for Entrepreneurs* presents the indicators, analyzes their relationship with economic outcomes and recommends reforms. The data, along with information on ordering the report, are available on the Doing Business website (www.doingbusiness.org).

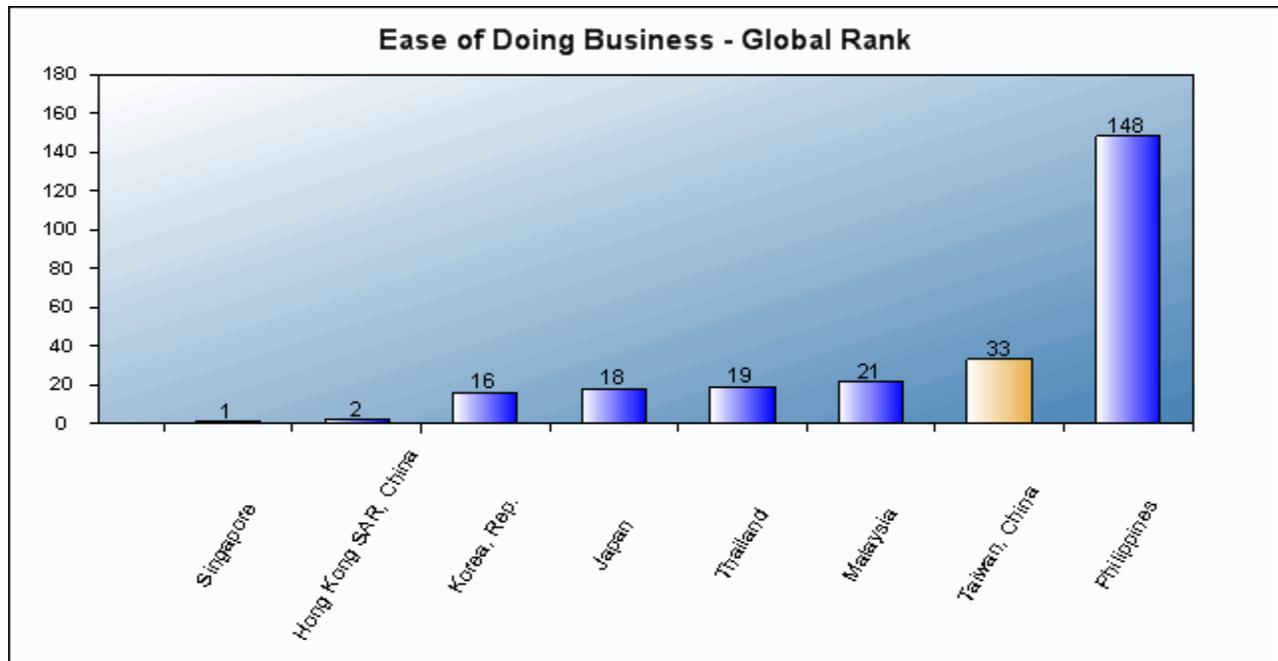

* Except for the Paying Taxes indicator that refers to the period January to December of 2009.

Note: 2008-2010 Doing Business data and rankings have been recalculated to reflect changes to the methodology and the addition of new economies (in the case of the rankings).

Economy Rankings - Ease of Doing Business

Taiwan, China is ranked 33 out of 183 economies. Singapore is the top ranked economy in the Ease of Doing Business.

Taiwan, China - Compared to global good practice economy as well as selected economies:

Taiwan, China's ranking in Doing Business 2011

Rank	Doing Business 2011
Ease of Doing Business	33
Starting a Business	24
Dealing with Construction Permits	95
Registering Property	32
Getting Credit	72
Protecting Investors	74
Paying Taxes	87
Trading Across Borders	17
Enforcing Contracts	90
Closing a Business	10

Summary of Indicators - Taiwan, China

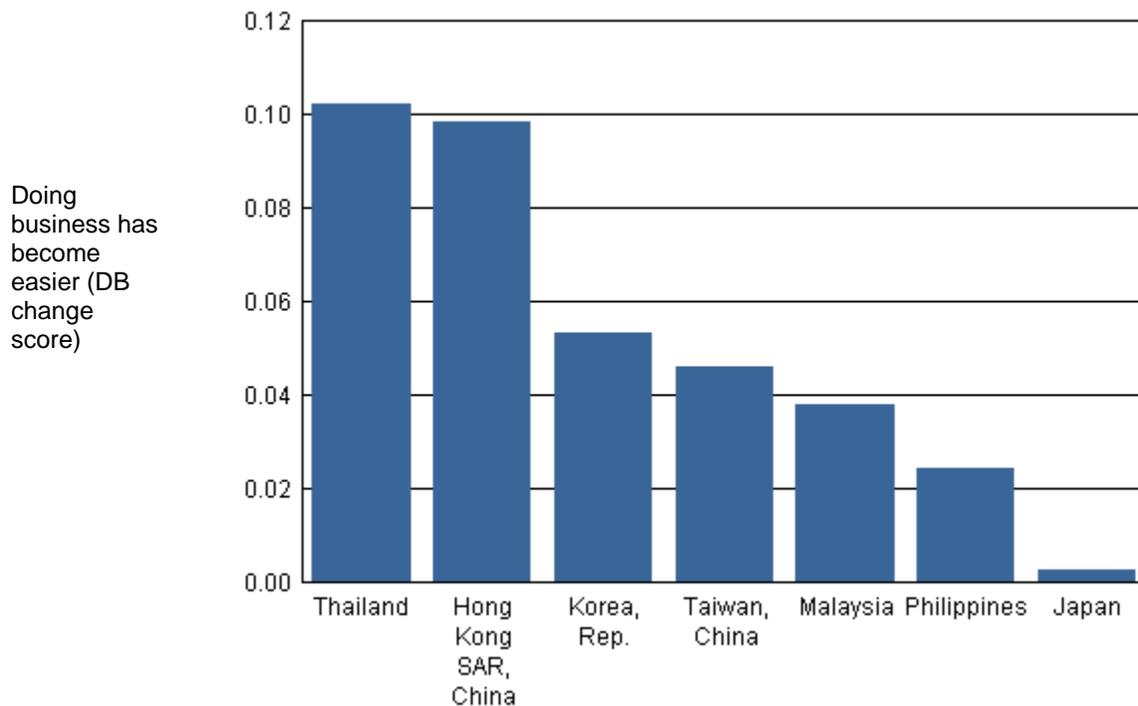

Starting a Business	Procedures (number)	6
	Time (days)	15
	Cost (% of income per capita)	4.1
	Min. capital (% of income per capita)	0.0
Dealing with Construction Permits	Procedures (number)	28
	Time (days)	142
	Cost (% of income per capita)	100.9
Registering Property	Procedures (number)	3
	Time (days)	5
	Cost (% of property value)	6.2
Getting Credit	Strength of legal rights index (0-10)	4
	Depth of credit information index (0-6)	5
	Public registry coverage (% of adults)	0.0
	Private bureau coverage (% of adults)	90.4
Protecting Investors	Extent of disclosure index (0-10)	7
	Extent of director liability index (0-10)	4
	Ease of shareholder suits index (0-10)	5
	Strength of investor protection index (0-10)	5.3
Paying Taxes	Payments (number per year)	17
	Time (hours per year)	269
	Profit tax (%)	20.9
	Labor tax and contributions (%)	16.7
	Other taxes (%)	4.2
	Total tax rate (% profit)	41.9
Trading Across Borders	Documents to export (number)	5
	Time to export (days)	12
	Cost to export (US\$ per container)	645
	Documents to import (number)	6
	Time to import (days)	12
	Cost to import (US\$ per container)	700

Enforcing Contracts	Procedures (number)	47
	Time (days)	510
	Cost (% of claim)	17.7
Closing a Business	Recovery rate (cents on the dollar)	82.2
	Time (years)	1.9
	Cost (% of estate)	4

The 5 year measure of cumulative change illustrates how the business regulatory environment has changed in 174 economies from *Doing Business 2006* to *Doing Business 2011*. Instead of highlighting which countries currently have the most business friendly environment, this new approach shows the extent to which an economy's regulatory environment for business has changed compared with 5 years ago.

This snapshot reflects all cumulative changes in an economy's business regulation as measured by the Doing Business indicators—such as a reduction in the time to start a business thanks to a one-stop shop or an increase in the strength of investor protection index thanks to new stock exchange rules that tighten disclosure requirements for related-party transactions.

This figure shows the distribution of cumulative change across the 9 indicators and time between *Doing Business 2006* and *Doing Business 2011*

Many economies have undertaken reforms to smooth the starting a business process in stages—and often as part of a larger regulatory reform program. A number of studies have shown that among the benefits of streamlining the process to start a business have been greater firm satisfaction and savings and more registered businesses, financial resources and job opportunities. Economies with higher entry costs are associated with a larger informal sector and a smaller number of legally registered firms.

Some reform outcomes

In Egypt reductions of the minimum capital requirement in 2007 and 2008 led to an increase of more than 30% in the number of limited liability companies.

In Portugal creation of One-Stop Shop in 2006 and 2007 resulted in a reduction of time to start a business from 54 days to 5. In 2007 and 2008 new business registrations were up by 60% compared with 2006.

In Malaysia reduction of registration fees in 2008 led to an increase in registrations by 16% in 2009.

What does Starting a Business measure?

Procedures to legally start and operate a company (number)

- Preregistration (for example, name verification or reservation, notarization)
- Registration
- Post registration (for example, social security registration, company seal)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law

Paid-in minimum capital (% of income per capita)

- Deposited in a bank or with a notary prior to registration begins

Starting a Business: getting a local limited liability company up and running
Rankings are based on 4 subindicators

Case Study Assumptions

- Doing Business records all procedures that are officially required for an entrepreneur to start up and formally operate an industrial or commercial business.
- Any required information is readily available and that all agencies involved in the start-up process function without corruption.

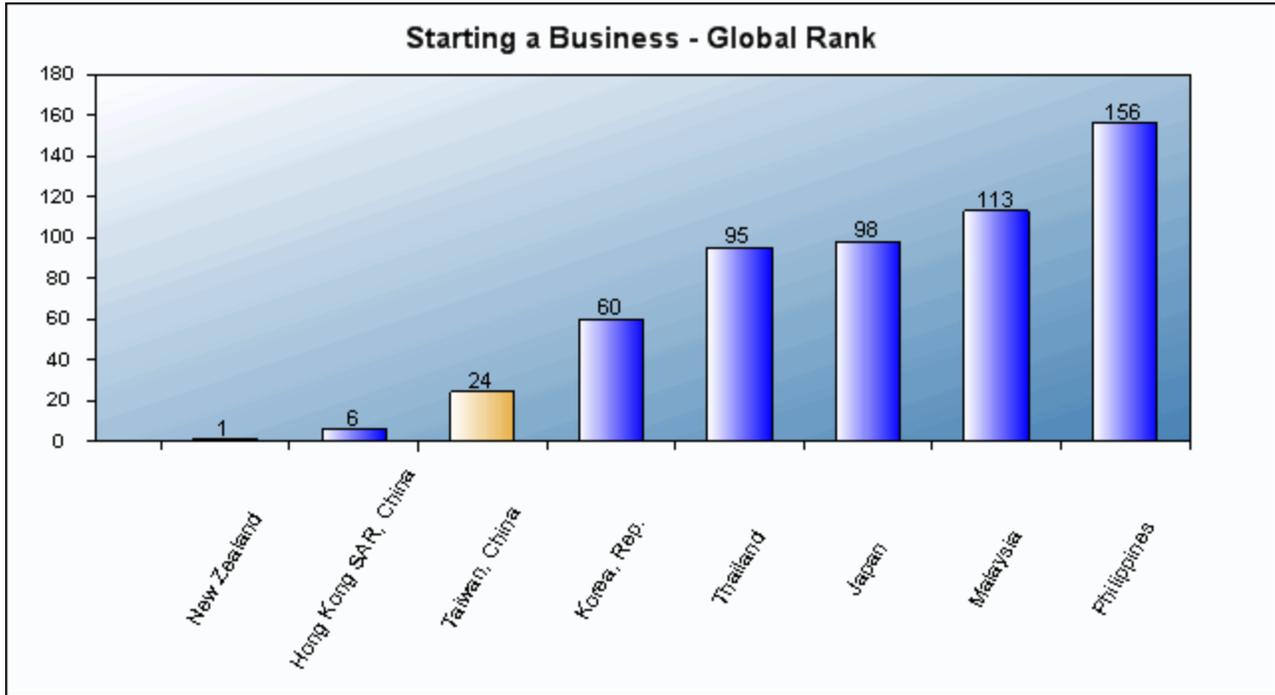

The business:

- is a limited liability company, located in the largest business city
- conducts general commercial activities
- is 100% domestically owned
- has a start-up capital of 10 times income per capita
- has a turnover of at least 100 times income per capita
- has at least 10 and up to 50 employees
- does not qualify for investment incentives or any special benefits
- leases the commercial plant and offices and is not a proprietor of real estate

1. Benchmarking Starting a Business Regulations:

Taiwan, China is ranked 24 overall for Starting a Business.

Ranking of Taiwan, China in Starting a Business - Compared to good practice and selected economies:

The following table shows Starting a Business data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of income per capita)	Min. capital (% of income per capita)
Denmark*			0.0	
New Zealand*	1	1		0.0

<i>Selected Economy</i>				
Taiwan, China	6	15	4.1	0.0

<i>Comparator Economies</i>				
Hong Kong SAR, China	3	6	2.0	0.0
Japan	8	23	7.5	0.0
Korea, Rep.	8	14	14.7	0.0
Malaysia	9	17	17.5	0.0
Philippines	15	38	29.7	6.0
Thailand	7	32	5.6	0.0

* The following economies are also good practice economies for :

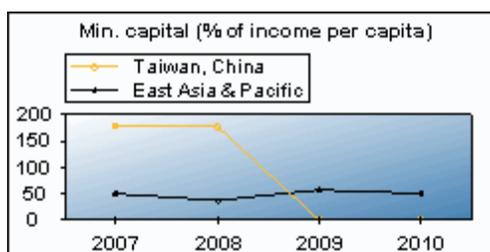

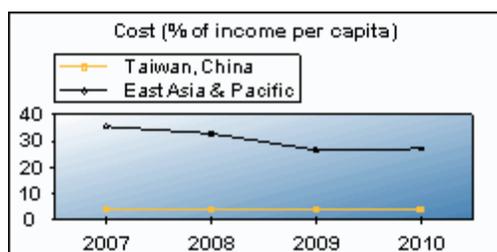

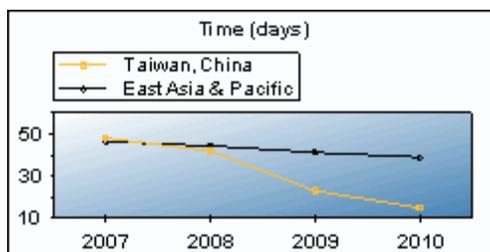

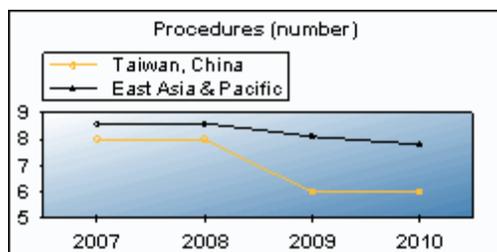

Procedures (number): Canada

Cost (% of income per capita): Slovenia

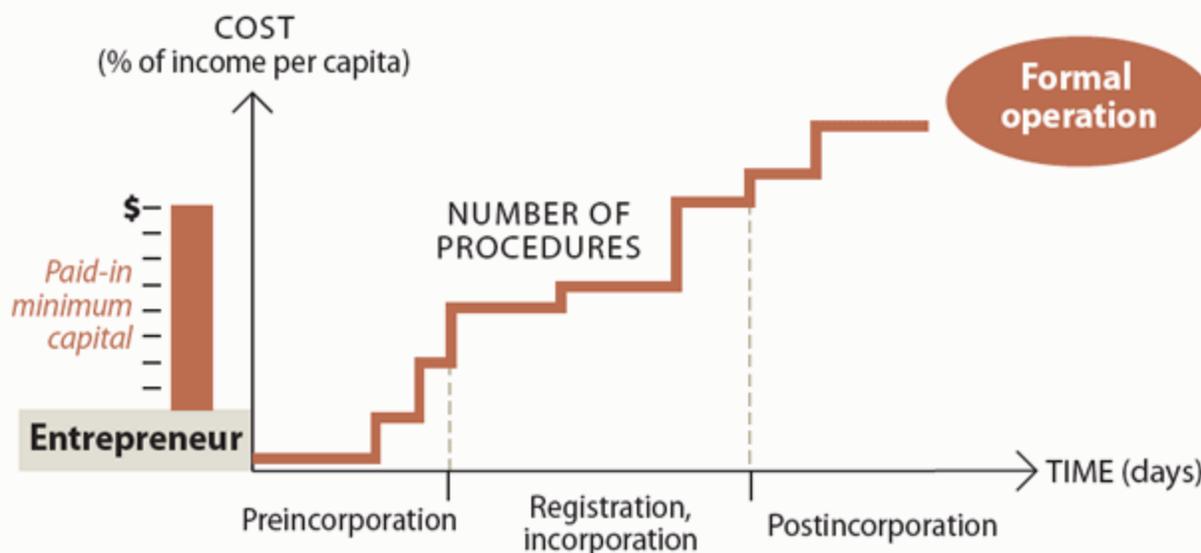

2. Historical data: Starting a Business in Taiwan, China

Starting a Business data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	28	24
Procedures (number)	8	8	6	6
Time (days)	48	42	23	15
Cost (% of income per capita)	4.1	4.1	3.9	4.1
Min. capital (% of income per capita)	178.4	177.4	0.0	0.0

3. The following graphs illustrate the Starting a Business sub indicators in Taiwan, China over the past 4 years:

What are the time, cost, paid-in minimum capital and number of procedures to get a local, limited liability company up and running?

This table summarizes the procedures and costs associated with setting up a business in Taiwan (China).

STANDARDIZED COMPANY

Legal Form: Private Company Limited By Shares

City: Taipei

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Search the uniqueness of company name online; reserve company name and apply for MOEA approval	1	TWD 300
2	Make a company seal	1	TWD 450
3	submit a CPA audit report showing that the amount of capital invested is sufficient to cover company establishment cost	2	TWD 20,000
4	Apply for incorporation and tax registration at the Ministry of Economic Affairs (MOEA)	3	TWD 1,355
5	Apply for Labor Insurance, National Health Insurance and Pension Plan Report with the Bureau of Labor Insurance	1	no charge
6	Register for retirement plan and work rules with the Council of Labor Affairs	7	no charge

Starting a Business Details - Taiwan, China

Procedure 1 Search the uniqueness of company name online; reserve company name and apply for MOEA approval

Time to complete: 1

Cost to complete: TWD 300

Comment: according to the schedule governing the review period for the application announced on March 3, 2008, the review period has been shortened to 2 days. therefore the procedure now takes one day for search, reservation and application. Then the government officials are required to review the application on the second day. At the end of the second day, (if approved) the approval is ready, and the applicant can pick it up from the Ministry of Economic Affairs (MOEA). Otherwise, it is mailed to the applicant, in which case it takes up to four days to receive the confirmation. The company can search the availability of the company name and check the legality of planned business through the online Company Registration Search System on MOEA web site (<http://w2kdmz1.moea.gov.tw/english/index.asp>).

Procedure 2 Make a company seal

Time to complete: 1

Cost to complete: TWD 450

Comment: Company registration documents and deeds must be sealed (chopped). A set of company seals should be prepared for registration, including the name of the company, and name of the chairperson of the board of directors. These seals are required to be used for future company updates.

Procedure 3 submit a CPA audit report showing that the amount of capital invested is sufficient to cover company establishment cost

Time to complete: 2

Cost to complete: TWD 20,000

Comment: Although the minimum capital requirement was removed, according to the Ministry of Economic Affairs, in place of the minimum capital requirement, now there is a requirement to submit a CPA audit report showing the invested capital will cover the costs of establishing a company to the Ministry of Economic Affairs.

Procedure 4 Apply for incorporation and tax registration at the Ministry of Economic Affairs (MOEA)

Time to complete: 3

Cost to complete: TWD 1,355

Comment: The articles of incorporation for a private limited company must include the company name, business purpose, shareholders' contributions, profit-allocation ratio, location of offices, number and names of directors, manner of issuing public announcements, and the date the articles of incorporation were adopted.
The application for a taxpayer's identification number is done at the same time.

Procedure 5 Apply for Labor Insurance, National Health Insurance and Pension Plan Report with the Bureau of Labor Insurance

Time to complete: 1

Cost to complete: no charge

Comment: The Labor Insurance Bureau now adopts a three-in-one consolidation application (i.e., the labour insurance application, national health insurance application and the pension plan appropriation application), so the Labor Insurance Bureau and National Health Insurance Bureau can now review and process the application at the same time, if all in order, the Bureau can grant the application in 5 - 7 business days. All firms may apply for national health insurance (NHI) regardless of the number of employees, but only companies with five or more employees may apply for labor insurance (LI). National health insurance, labor insurance, and the pension plan report can be filed with one consolidated form. Forms can be downloaded from the Bureau of Labor Insurance Web site.

Procedure 6 Register for retirement plan and work rules with the Council of Labor Affairs

Time to complete: 7

Cost to complete: no charge

Comment: For a company with 30 employees or more, promoters must register its work rules and retirement plan. The Council of Labor Affairs has announced in December 2008 that the review of work rules shall be completed within 14 business days, therefore, the reviewing process is now averagely completed in about 14-15 business days.

In many economies, especially developing ones, complying with building regulations is so costly in time and money that many builders opt out. Builders may pay bribes to pass inspections or simply build illegally, leading to hazardous construction. Where the regulatory burden is large, entrepreneurs may tend to move their activity into the informal economy. There they operate with less concern for safety, leaving everyone worse off. In other economies compliance is simple, straightforward and inexpensive, yielding better results.

Some reform outcomes

In Burkina Faso, a one-stop shop for construction permits, "Centre de Facilitation des Actes de Construire", was opened in May 2008. The new regulation merged 32 procedures into 15, reduced the time required from 226 days to 122 and cut the cost by 40%. From May 2009 to May 2010 611 building permits were granted in Ouagadougou, up from an average of about 150 a year in 2002-06.

Toronto, Canada revamped its construction permitting process in 2005 by introducing time limits for different stages of the process and presenting a unique basic list of requirements for each project. Later it provided for electronic information and risk-based approvals with fast-track procedures. Between 2005 and 2008 the number of commercial building permits increased by 17%, the construction value of new commercial buildings by 84%.

What does the Dealing with Construction Permits indicator measure?

Procedures to legally build a warehouse (number)

- Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates
- Completing all required notifications and receiving all necessary inspections
- Obtaining utility connections for electricity, water, sewerage and a land telephone line
- Registering the warehouse after its completion (if required for use as collateral or for transfer of warehouse)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes

Case Study Assumptions

The business:

- is a small to medium-size limited liability company in the construction industry, located in the economy's largest business city
- is 100% domestically and privately owned and operated
- has 60 builders and other employees
- has at least one employee who is a licensed architect and registered with the local association of architects

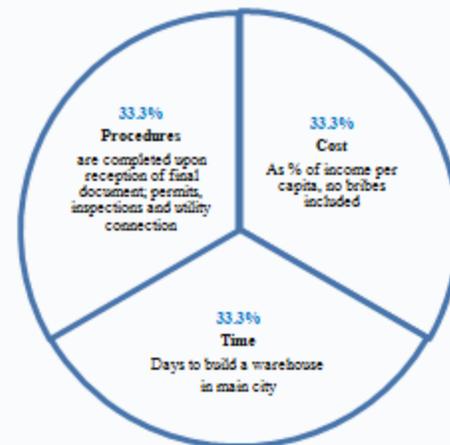

The warehouse:

- is a new construction (there was no previous construction on the land)
- has 2 stories, both above ground, with a total surface of approximately 1,300.6 sq. meters (14,000 sq. feet)
- has complete architectural and technical plans prepared by a licensed architect
- will be connected to electricity, water, sewerage (sewage system, septic tank or their equivalent) and a land telephone line
- will be used for general storage of non-hazardous goods, such as books
- will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements)

Dealing with Construction Permits:

Building a warehouse

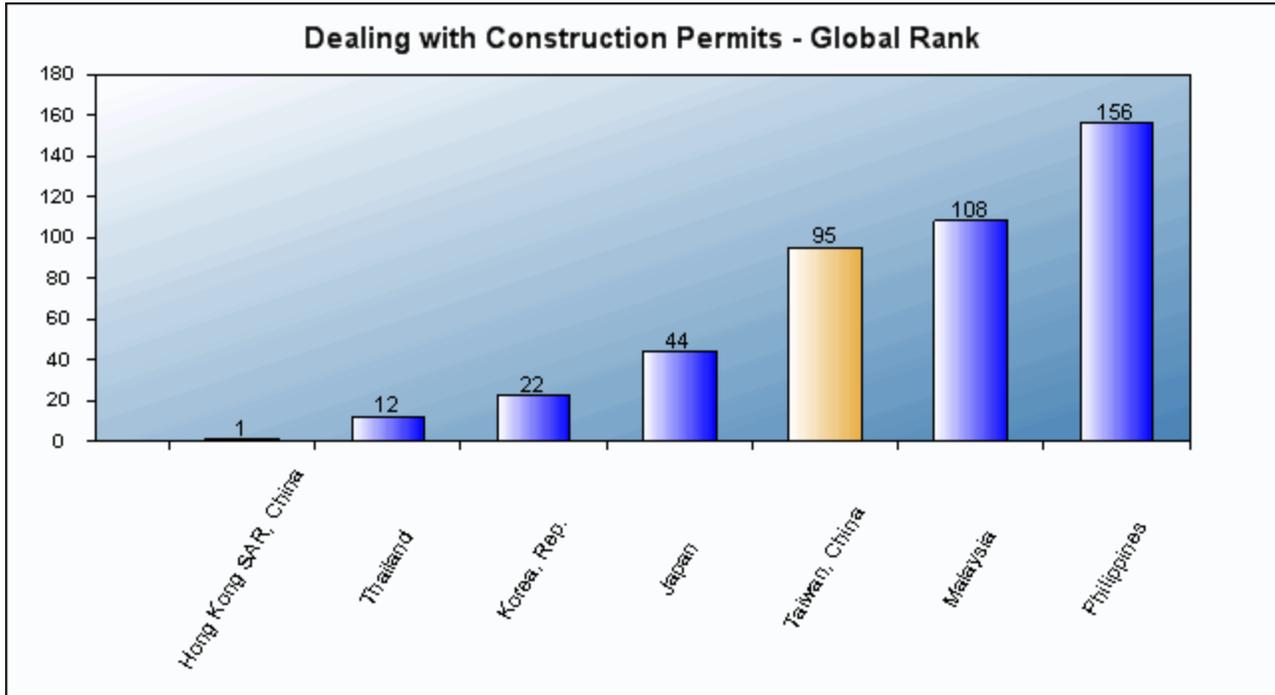

Rankings are based on 3 subindicators

1. Benchmarking Dealing with Construction Permits Regulations:

Taiwan, China is ranked 95 overall for Dealing with Construction Permits.

Ranking of Taiwan, China in Dealing with Construction Permits - Compared to good practice and selected economies:

The following table shows Dealing with Construction Permits data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of income per capita)
Denmark	6		
Qatar			0.8
Singapore		25	

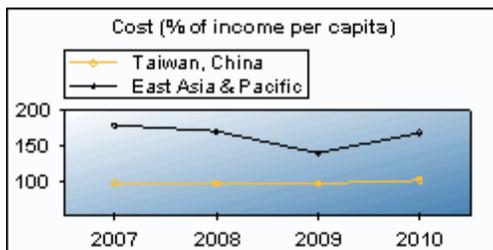

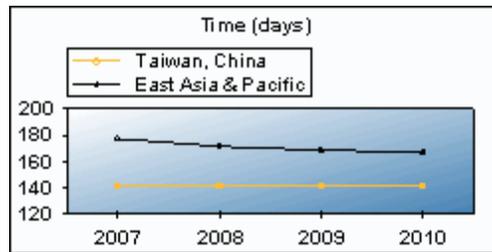

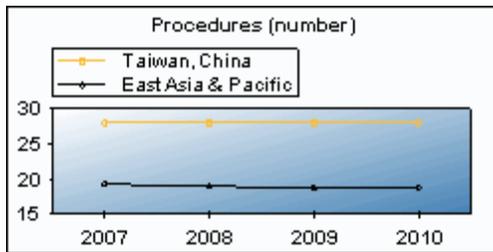

<i>Selected Economy</i>			
Taiwan, China	28	142	100.9

<i>Comparator Economies</i>			
Hong Kong SAR, China	7	67	19.4
Japan	15	187	20.8
Korea, Rep.	13	34	131.2
Malaysia	25	261	7.9
Philippines	26	169	778.5
Thailand	11	156	9.5

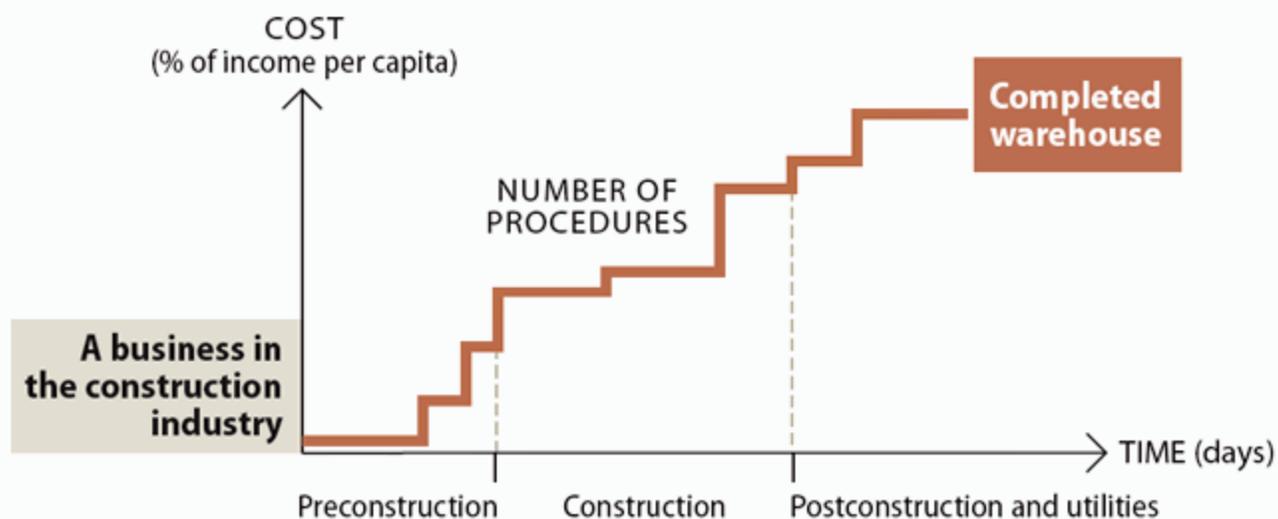

2. Historical data: Dealing with Construction Permits in Taiwan, China

Dealing with Construction Permits data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	94	95
Procedures (number)	28	28	28	28
Time (days)	142	142	142	142
Cost (% of income per capita)	97.6	97.0	96.2	100.9

3. The following graphs illustrate the Dealing with Construction Permits sub indicators in Taiwan, China over the past 4 years:

What are the time, cost and number of procedures to comply with formalities to build a warehouse?

The table below summarizes the procedures, time, and costs to build a warehouse in Taiwan (China).

BUILDING A WAREHOUSE
City: Taipei

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1 *	Obtain proof of land title ownership from the city government	1 day	TWD 50
2	Apply to the city government to define the building lines and check the boundary of land	16 days	TWD 4,000
3	Obtain information about infrastructure from the water company	14 days	no charge
4 *	Obtain information about electricity infrastructure from electricity provider	14 days	no charge
5 *	Obtain information about telecommunications infrastructure from telecom company	14 days	no charge
6	Obtain firefighting design approval from the fire protection authority	21 days	no charge
7 *	Obtain waster water discharge permit from the industry park authority/ city government	7 days	TWD 3,200
8	Apply for building permit from the city government	21 days	TWD 19,769

9	Report the start date and present construction plan to the city government and pay the city government the air pollution protection fee before starting construction	1 day	TWD 151,217
10	City government inspects layout of the building plan on the land site	1 day	no charge
11	City government inspects at foundation stage	1 day	no charge
12	City government inspects at second-floor stage	1 day	no charge
13	City government inspects at roof construction stage	1 day	no charge
14	Receive environmental inspection from the department of environmental protection (city government) at any time during construction	1 day	no charge
15	Receive labor inspection from the department of labor (city government) at any time during construction	1 day	no charge
16	Obtain firefighting inspection certificate from the fire protection authority	4 days	no charge
17*	Obtain address (house number) certification from the city government	3 days	TWD 84
18*	Obtain waste water connection certification from the environment protection bureau/ city government	10 days	no charge
19	Obtain building usage (occupancy) permit from the city government	6 days	TWD 100
20	Obtain building/ land ownership certificate from the city government.	18 days	TWD 39,618
21	Apply for water supply from a local water company	1 day	no charge
22	Receive inspection from water company	1 day	no charge
23	Obtain connection to water	19 days	TWD 25,000
24*	Apply for electric power supply from Taiwan power company	1 day	no charge
25*	Receive inspection from power company	1 day	no charge
26*	Obtain power connection	19 days	TWD 300,000
27*	Request telephone line	1 day	no charge

28* Obtain telephone line

3 days

TWD 3,500

* Takes place simultaneously with another procedure.

Dealing with Construction Permits Details - Taiwan, China

Procedure 1 Obtain proof of land title ownership from the city government

Time to complete: 1 day

Cost to complete: TWD 50

Agency: City Government

Comment:

Procedure 2 Apply to the city government to define the building lines and check the boundary of land

Time to complete: 16 days

Cost to complete: TWD 4,000

Agency: City Government

Comment:

Procedure 3 Obtain information about infrastructure from the water company

Time to complete: 14 days

Cost to complete: no charge

Agency: Taiwan Water Corporation

Comment:

Procedure 4 Obtain information about electricity infrastructure from electricity provider

Time to complete: 14 days

Cost to complete: no charge

Agency: Taiwan Power Company (Taipower)

Comment:

Procedure 5 Obtain information about telecommunications infrastructure from telecom company

Time to complete: 14 days

Cost to complete: no charge

Agency: Chunghwa Telecom Company Limited

Comment:

Procedure 6 Obtain firefighting design approval from the fire protection authority

Time to complete: 21 days

Cost to complete: no charge

Agency: Fire Protection Authority

Comment:

Procedure 7 Obtain waster water discharge permit from the industry park authority/ city government

Time to complete: 7 days

Cost to complete: TWD 3,200

Agency: City Government (Industry Park Authority)

Comment:

Procedure 8 Apply for building permit from the city government

Time to complete: 21 days

Cost to complete: TWD 19,769

Agency: City Government

Comment: The building cost is assumed here to be TWD 15,200 per square meter for steel structures. Hence the building cost of the warehouse in this case is TWD 19,769,120. The cost of obtaining a building permit is 0.1% of the building cost estimated by the city government.

Procedure 9 Report the start date and present construction plan to the city government and pay the city government the air pollution protection fee before starting construction

Time to complete: 1 day

Cost to complete: TWD 151,217

Agency: City Government

Comment:

Procedure 10 City government inspects layout of the building plan on the land site

Time to complete: 1 day

Cost to complete: no charge

Agency: City Government

Comment:

Procedure 11 City government inspects at foundation stage

Time to complete: 1 day

Cost to complete: no charge

Agency: City Government

Comment:

Procedure 12 City government inspects at second-floor stage

Time to complete: 1 day

Cost to complete: no charge

Agency: City Government

Comment:

Procedure 13 City government inspects at roof construction stage

Time to complete: 1 day

Cost to complete: no charge

Agency: City Government

Comment:

Procedure 14 Receive environmental inspection from the department of environmental protection (city government) at any time during construction

Time to complete: 1 day

Cost to complete: no charge

Agency: Department of Environmental Protection (City Government)

Comment:

Procedure 15 Receive labor inspection from the department of labor (city government) at any time during construction

Time to complete: 1 day

Cost to complete: no charge

Agency: Department of Labor (City Government)

Comment: According to the Enforcement Rules of the Labor Safety and Health Law, BuildCo must assign at least one qualified staff member who holds a certificate of labor safety and hygiene training to the construction site for managing and supervising daily labor safety.

Procedure 16 Obtain firefighting inspection certificate from the fire protection authority

Time to complete: 4 days

Cost to complete: no charge

Agency: Fire Protection Authority

Comment:

Procedure 17 Obtain address (house number) certification from the city government

Time to complete: 3 days

Cost to complete: TWD 84

Agency: City Government

Comment:

Procedure 18 Obtain waste water connection certification from the environment protection bureau/ city government

Time to complete: 10 days

Cost to complete: no charge

Agency: City Government (Environment Protection Bureau)

Comment:

Procedure 19 Obtain building usage (occupancy) permit from the city government

Time to complete: 6 days

Cost to complete: TWD 100

Agency: City Government

Comment: To obtain an occupancy permit, BuildCo requests that the city government approve the as-built drawings of the warehouse.

Procedure 20 Obtain building/ land ownership certificate from the city government.

Time to complete: 18 days

Cost to complete: TWD 39,618

Agency: City Government (Department of Land)

Comment: The Department of Land in City Government issues a building/land ownership certificate on the basis of the building surface area calculation prepared by the architect and approved by the Department of Building Administration.

Procedure 21 Apply for water supply from a local water company

Time to complete: 1 day

Cost to complete: no charge

Agency: Taiwan Water Corporation

Comment:

Procedure 22 Receive inspection from water company

Time to complete: 1 day

Cost to complete: no charge

Agency: Taiwan Water Corporation

Comment:

Procedure 23 Obtain connection to water

Time to complete: 19 days

Cost to complete: TWD 25,000

Agency: Taiwan Water Corporation

Comment: The whole process (from application to connection) may take 14–28 days.

Procedure 24 Apply for electric power supply from Taiwan power company

Time to complete: 1 day

Cost to complete: no charge

Agency: Taiwan Power Company (Taipower)

Comment:

Procedure 25 Receive inspection from power company

Time to complete: 1 day

Cost to complete: no charge

Agency: Taiwan Power Company (Taipower)

Comment:

Procedure 26 Obtain power connection

Time to complete: 19 days

Cost to complete: TWD 300,000

Procedure 28 Obtain telephone line

Time to complete: 3 days

Cost to complete: TWD 3,500

Agency: Chunghwa Telecom Company Limited

Comment:

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. *Doing Business* records the full sequence of procedures necessary for a business to purchase a property from another business and transfer the property title to the buyer's name. In the past 6 years 105 economies undertook 146 reforms making it easier to transfer property. Globally, the time to transfer property fell by 38% and the cost by 10% over this time. The most popular feature of property registration reform in these 6 years, implemented in 52 economies, was lowering transfer taxes and government fees.

Some reform outcomes

Georgia now allows property transfers to be completed through 500 authorized users, notably banks. This saves time for entrepreneurs. A third of people transferring property in 2009 chose authorized users, up from 7% in 2007. Also, Georgia's new electronic registry managed 68,000 sales in 2007, twice as many as in 2003.

Belarus's unified and computerized registry was able to cope with the addition of 1.2 million new units over 3 years. The registry issued 1 million electronic property certificates in 2009.

What does the Registering Property indicator measure?

Registering Property: transfer of property between 2 local companies

Rankings are based on 3 subindicators

Procedures to legally transfer title on immovable property (number)

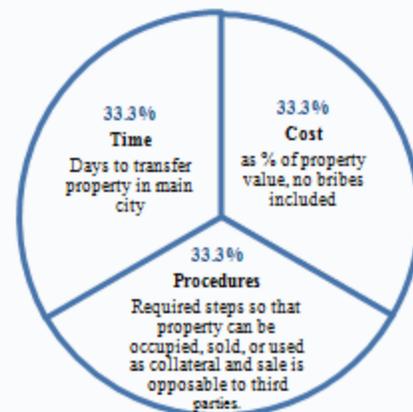

- Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)
- Registration in the economy's largest business city
- Post registration (for example, transactions with the local authority, tax authority or cadastre)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day
- Procedure completed once final document is received
- No prior personal contact with officials

Cost required to complete each procedure (% of property value)

- Official costs only, no bribes
- No value added or capital gains taxes included

Case Study Assumptions

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned.
- Are located in the periurban area of the economy's largest business city.
- Have 50 employees each, all of whom are nationals.
- Perform general commercial activities.

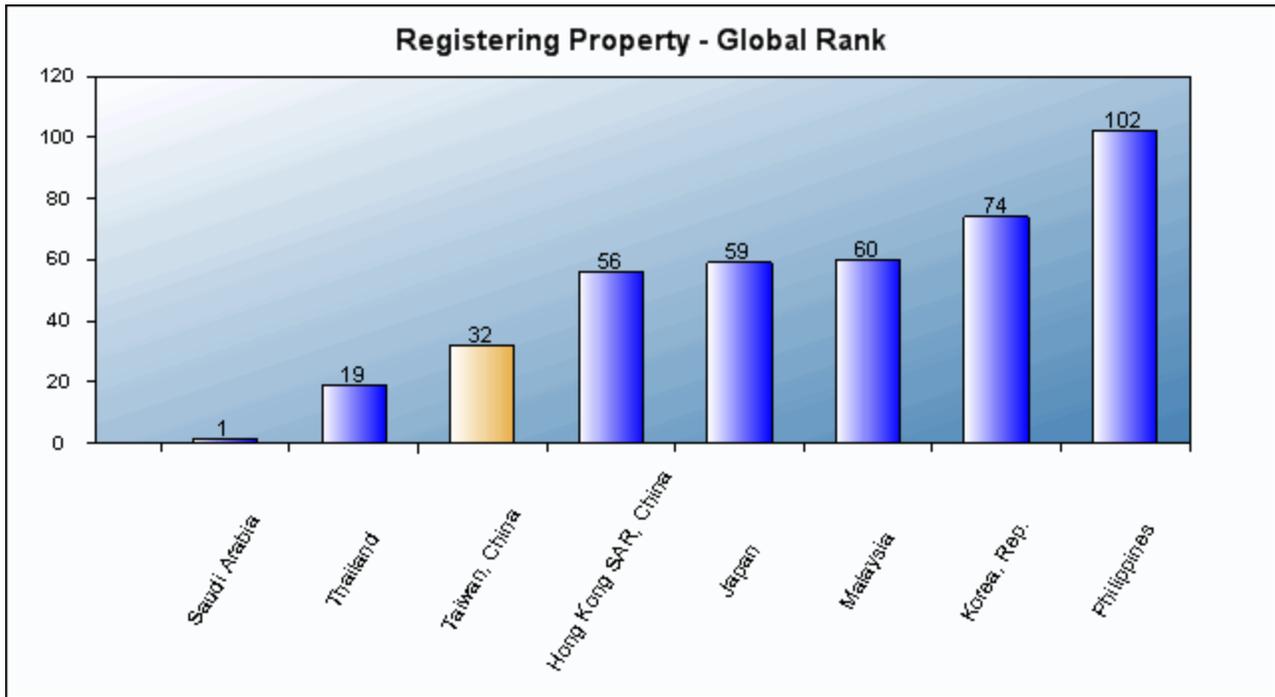

The property (fully owned by the seller):

- Has a value of 50 times income per capita. The sale price equals the value.
- Has no mortgages attached and has been under the same ownership for the past 10 years.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Is located in a periurban commercial zone, and no rezoning is required.
- Consists of a 557.4 square meters (6,000 square feet) land and 10 years old 2-story warehouse of 929 square meters (10,000 square feet) located on the land. The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. The property will be transferred in its entirety.

1. Benchmarking Registering Property Regulations:

Taiwan, China is ranked 32 overall for Registering Property.

Ranking of Taiwan, China in Registering Property - Compared to good practice and selected economies:

The following table shows Registering Property data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of property value)
New Zealand*		2	
Norway*	1		
Saudi Arabia			0.0

<i>Selected Economy</i>			
Taiwan, China	3	5	6.2

<i>Comparator Economies</i>			
Hong Kong SAR, China	5	36	4.2

Korea, Rep.	7	11	5.1
Malaysia	5	56	2.5
Philippines	8	33	4.3
Thailand	2	2	4.3

* The following economies are also good practice economies for :

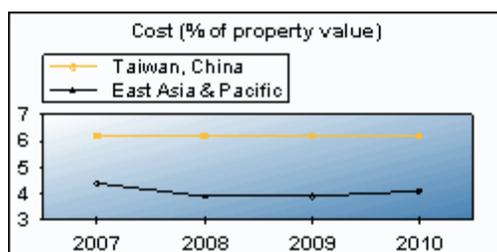

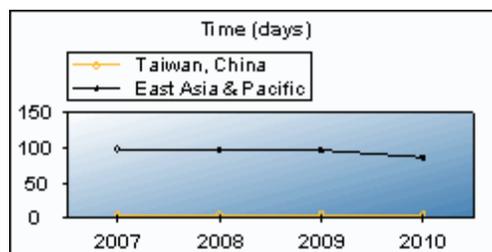

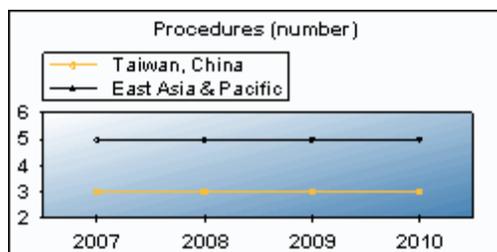

Procedures (number): United Arab Emirates

Time (days): Saudi Arabia, Thailand, United Arab Emirates

2. Historical data: Registering Property in Taiwan, China

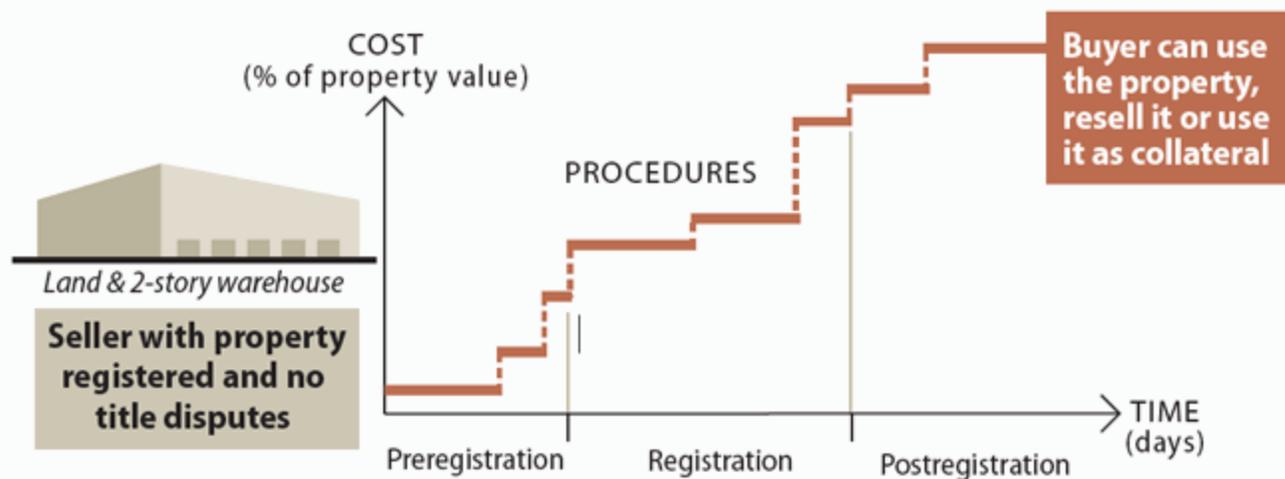

Registering Property data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	30	32
Procedures (number)	3	3	3	3
Time (days)	5	5	5	5
Cost (% of property value)	6.2	6.2	6.2	6.2

3. The following graphs illustrate the Registering Property sub indicators in Taiwan, China over the past 4 years:

Registering Property in Taiwan, China

What are the time, cost and number of procedures required to transfer a property between 2 local companies?

This topic examines the steps, time, and cost involved in registering property in Taiwan (China).

STANDARDIZED PROPERTY

Property Value: 27,095,255.29

City: Taipei

Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Buyer researches the property rights and encumbrances registered against the property at the registry of titles	1 day (a few hours in person at the registry or 3 days by mail)	TWD 20 per page
2	Buyer pays the Deed tax at the Municipality	1 day	6% of standard property value (Deed Tax) + 0.1% Stamp Duty
3	Registration of transfer of title at the Land Registry	3 days	0.1% of property value (registration fee) + TWD 80 for new ownership certificate

Registering Property Details - Taiwan, China

Procedure 1 Buyer researches the property rights and encumbrances registered against the property at the registry of titles

Time to complete: 1 day (a few hours in person at the registry or 3 days by mail)

Cost to complete: TWD 20 per page

Agency: Land Registry

Comment: The buyer obtains copies of the land and building's registration from the electronic registration database. Each page costs TWD 20.

Procedure 2 Buyer pays the Deed tax at the Municipality

Time to complete: 1 day

Cost to complete: 6% of standard property value (Deed Tax) + 0.1% Stamp Duty

Agency: Municipality

Comment: The Deed tax is 6% of the standard property value, and buyer pays it at the Municipality. Seller pays the Land value increase tax. As a result, Taiwan government (Real-estate Valuation Committee) issues so-called "standard" valuation information of property every year for tax authorities' and tax payers' reference. After years, such government announcement of valuation become the reported tax base by taxpayers and acceptable by tax authorities. The real "contract price" might be ignored when filing deed tax in practice now. The standard value is always lower than market price.

As of January 30 2005, the Land value increase tax (capital gains tax) is levied according to the following rates:

- (1) Where the net increase of the value of any land is no more than 100 per cent of the original value of such land, the rate shall be 20 per cent of the net increase.
- (2) Where the net increase of the value of any land is no more than 200 per cent of the original value of such land, the rate shall be 30 per cent of that part of the net increase which exceeds the original value by more than 100 per cent in addition to the rate prescribed in the preceding section.
- (3) Where the net increase of the value of any land is no more than 300 per cent of the original value of such land, the rate shall be 40 per cent of that part of the net increase which exceeds the original value by more than 200 per cent in addition to the rates prescribed in the preceding section.

As of October 2009, the Ministry of Finance completed the development of the Local Tax Online Filing Portal, provided for use by the public nationwide.

Taiwan government spent two years planning this system, which enables the public to carry out the filing for these local taxes online at home, and speeds up the procedure for property registration.

(The Local Tax Online Filing Portal website can be visited at:

<https://www.etax.nat.gov.tw/wSite/indexLocal.htm>)

Procedure 3 Registration of transfer of title at the Land Registry

Time to complete: 3 days

Cost to complete: 0.1% of property value (registration fee) + TWD 80 for new ownership certificate

Agency: Land Registry

Comment: The transfer of title is registered at the Land Registry. The original ownership certificate must be returned and a new one is issued.

Through two sets of indicators, *Doing Business* assesses the legal rights of borrowers and lenders with respect to secured transactions and the sharing of credit information. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through either a public credit registry or a private credit bureau. Credit information systems mitigate the 'information asymmetry' in lending and enable lenders to view a borrower's financial history (positive or negative), providing them with valuable information to consider when assessing risk. Credit information systems benefit borrowers as well, allowing good borrowers to establish a reputable credit history which will enable them to access credit more easily. The Legal Rights Index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. Sound collateral laws will enable businesses to use their assets, especially movable property, as security to generate capital while having strong creditor's rights has been associated with higher ratios of private sector credit to GDP.

Some reform outcomes

After Vietnam's new Civil Code was enacted in 2005, a decree further clarified the provisions governing secured transactions. Since the inclusion of the new provisions, the number of registrations increased from 43,000 (2005) to 120,000 (end of 2008).

In 2008, when Zambia established a private credit bureau, its database initially covered about 25,000 borrowers. Thanks to a strong communication campaign and a central bank directive, coverage has grown 10-fold in the past 2 years, exceeding 200,000 by the beginning of 2010.

What do the Getting Credit indicators measure?

Strength of legal rights index (0–10)

- Protection of rights of borrowers and lenders through collateral laws
- Protection of secured creditors' rights through bankruptcy laws

Depth of credit information index (0–6)

- Scope and accessibility of credit information distributed by public credit registries and private credit bureaus

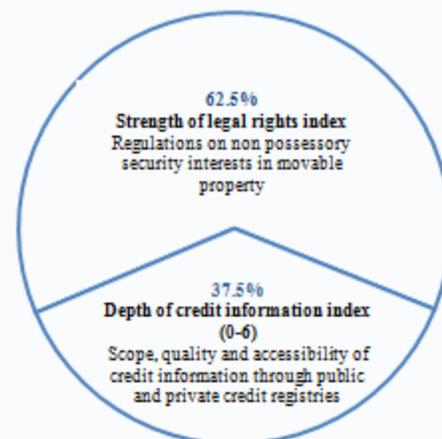

Public credit registry coverage (% of adults)

- Number of individuals and firms listed in public credit registry as percentage of a adult population

Private credit bureau coverage (% of adults)

- Number of individuals and firms listed in largest private credit bureau as percentage of a adult population

Getting Credit: collateral rules and credit information

Note: Private bureau coverage and public credit registry coverage are measured but do not count for the rankings.

Case Study Assumptions (applying to the Legal Rights Index only)

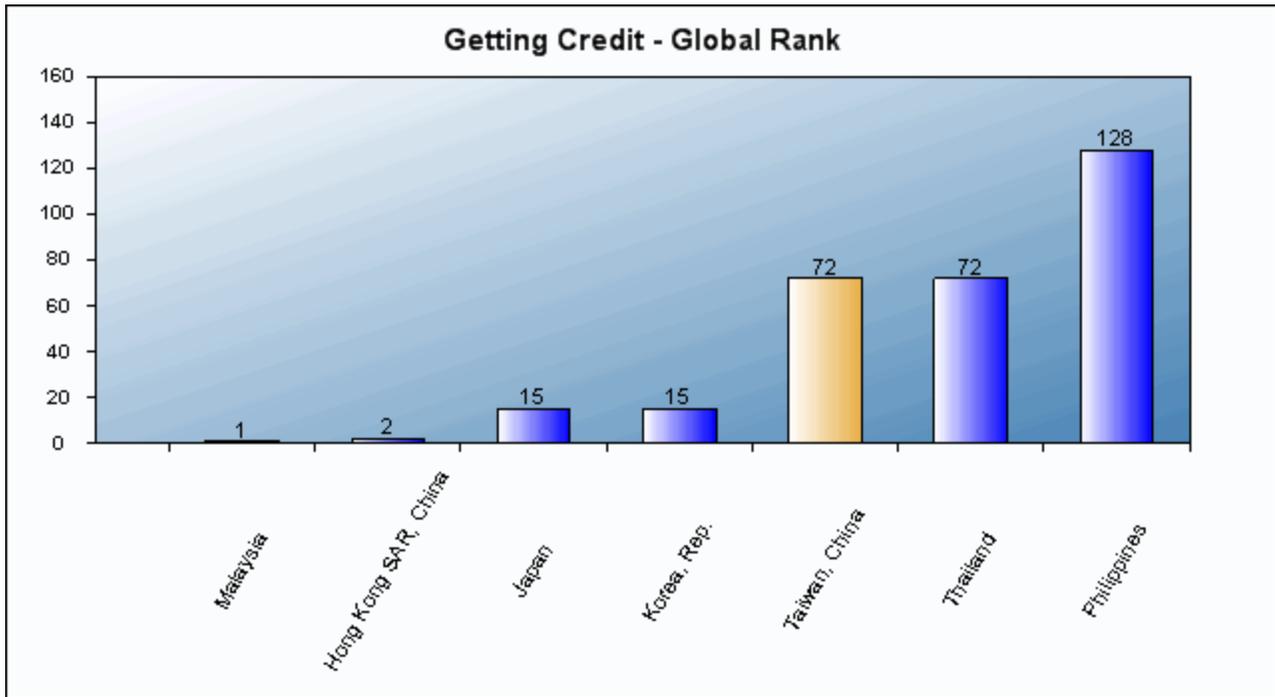

The Debtor

- is a Private Limited Liability Company
- has its Headquarters and only base of operations in the largest business city
- obtains a loan from a local bank (the Creditor) for an amount up to 10 times income (GNI) per capita
- Both creditor and debtor are 100% domestically owned.

1. Benchmarking Getting Credit Regulations:

Taiwan, China is ranked 72 overall for Getting Credit.

Ranking of Taiwan, China in Getting Credit - Compared to good practice and selected economies:

The following table shows Getting Credit data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Strength of legal rights index (0-10)	Depth of credit information index (0-6)	Public registry coverage (% of adults)	Private bureau coverage (% of adults)
New Zealand*				100.0
Portugal			67.1	
Singapore*	10			
United Kingdom		6		

<i>Selected Economy</i>				
Taiwan, China	4	5	0.0	90.4

Korea, Rep.	7	6	0.0	93.3
Malaysia	10	6	62.0	100.0
Philippines	3	3	0.0	7.4
Thailand	4	5	0.0	35.7

* The following economies are also good practice economies for :

Strength of legal rights index (0-10): Hong Kong, China, Kenya, Kyrgyz Republic, Malaysia

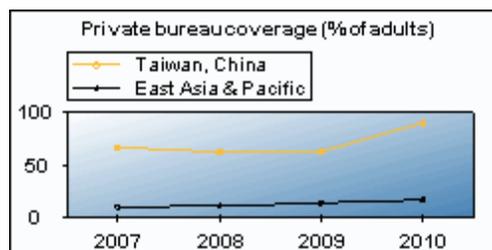

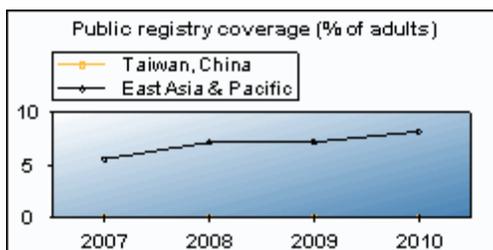

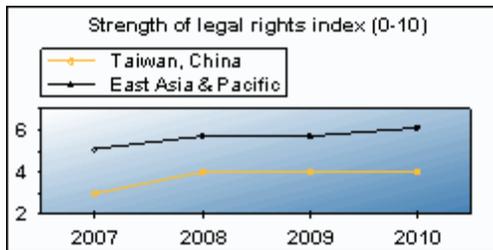

Private bureau coverage (% of adults): Argentina, Australia, Canada, Iceland, Ireland, Norway, Sweden, United Kingdom, United States

27 countries have the highest credit information index.

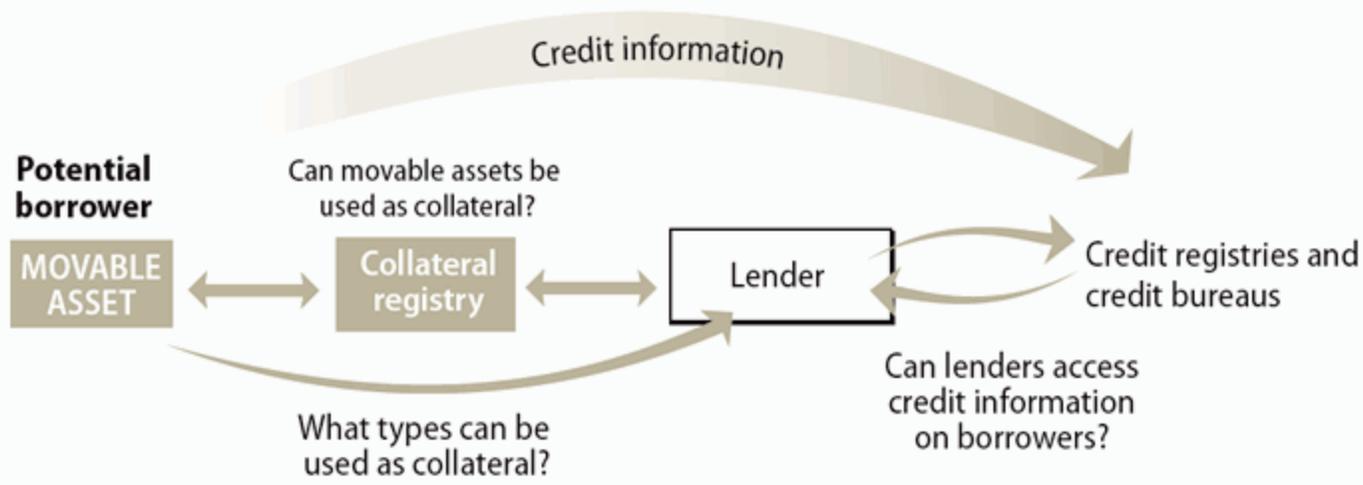

2. Historical data: Getting Credit in Taiwan, China

Getting Credit data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	69	72
Strength of legal rights index (0-10)	3	4	4	4
Depth of credit information index (0-6)	5	5	5	5
Private bureau coverage (% of adults)	67.1	62.7	63.2	90.4
Public registry coverage (% of adults)	0.0	0.0	0.0	0.0

3. The following graphs illustrate the Getting Credit sub indicators in Taiwan, China over the past 4 years:

**Do lenders have credit information on entrepreneurs seeking credit?
Is the law favorable to borrowers and lenders using movable assets as collateral?**

The following table summarize legal rights of borrowers and lenders, and the availability and legal framework of credit registries in Taiwan (China).

Getting Credit Indicators (2010)			Indicator
Private bureau coverage (% of adults)	Private credit bureau	Public credit registry	5
Are data on both firms and individuals distributed?	Yes	No	1
Are both positive and negative data distributed?	Yes	No	1
Does the registry distribute credit information from retailers, trade creditors or utility companies as well as financial institutions?	No	No	0
Are more than 2 years of historical credit information distributed?	Yes	No	1
Is data on all loans below 1% of income per capita distributed?	Yes	No	1
Is it guaranteed by law that borrowers can inspect their data in the largest credit registry?	Yes	No	1
Coverage	90.4	0.0	
Number of individuals	13,280,000		0
Number of firms	210,000		0

Strength of legal rights index (0-10)**4**

Can any business use movable assets as collateral while keeping possession of the assets; and any financial institution accept such assets as collateral ? Yes

Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral? No

Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral? No

May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets ? No

Is a general description of debts and obligations permitted in collateral agreements, so that all types of obligations and debts can be secured by stating a maximum amount rather than a specific amount between the parties ? Yes

Is a collateral registry in operation, that is unified geographically and by asset type, as well as indexed by the grantor's name of a security right ? No

Do secured creditors have absolute priority to their collateral outside bankruptcy procedures? Yes

Do secured creditors have absolute priority to their collateral in bankruptcy procedures? Yes

During reorganization, are secured creditors' claims exempt from an automatic stay on enforcement? No

Does the law authorize parties to agree on out of court enforcement? No

Stronger investor protections matter for the ability of companies to raise the capital needed to grow, innovate, diversify and compete. This is all the more crucial in times of financial crisis when entrepreneurs must navigate through defiant environments to finance their activities. Using 3 indices of investor protection, *Doing Business* measures how economies regulate a standard case of self-dealing, use of corporate assets for personal gains. Since 2005, 51 economies have strengthened investor protections as measured by *Doing Business*.

Some reform outcomes

In Indonesia, an economy that consistently improved its laws regulating investor protections, the number of firms listed on the Indonesia Stock Exchange increased from 331 to 396 between 2004 and 2009. Meanwhile, market capitalization grew from 680 trillion rupiah (\$75 billion) to 1,077 trillion rupiah (\$119 billion).

After Thailand amended its laws in 2006 and 2008, more than 85 transactions that failed to comply with the disclosure standards were suspended. Thirteen were deemed prejudicial and were therefore canceled, thus preventing damage to the companies involved and preserving their value. Companies were not deterred either, as more than 30 new companies joined the stock exchange since 2005 bringing the number of listed companies to 523.

What do the Protecting Investors indicators measure?

Extent of disclosure index (0–10)

- Who can approve related-party transactions
- Requirements for external and internal disclosure in case of related-party transactions

Extent of director liability index (0–10)

- Ability of shareholders to hold the interested party and the approving body liable in case of a prejudicial related-party transaction
- Available legal remedies (damages, repayment of profits, fines, imprisonment and rescission of the transaction)
- Ability of shareholders to sue directly or derivatively

Ease of shareholder suits index (0–10)

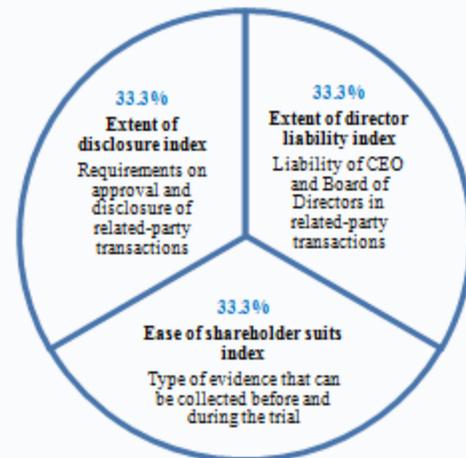

- Documents and information available during trial
- Access to internal corporate documents (directly or through a government inspector)

Strength of investor protection index (0–10)

- Simple average of the extent of disclosure, extent of director liability and ease of shareholder suits indices

Protecting Investors: minority shareholder rights in related-party transactions

Rankings are based on 3 subindicators

Case Study Assumptions

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders),
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

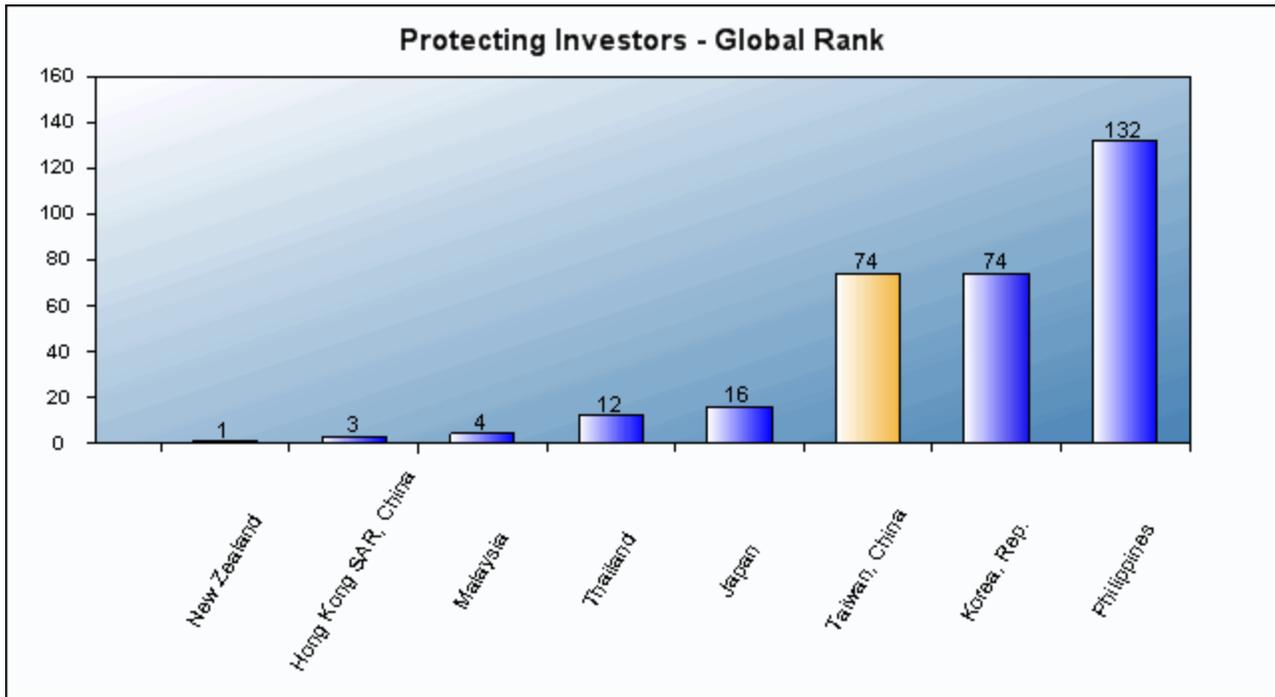

The transaction

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.
- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to the purchasing company.
- Shareholders sue the interested parties and the members of the board of directors.

1. Benchmarking Protecting Investors Regulations:

Taiwan, China is ranked 74 overall for Protecting Investors.

Ranking of Taiwan, China in Protecting Investors - Compared to good practice and selected economies:

The following table shows Protecting Investors data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Strength of investor protection index (0-10)
New Zealand	9.7

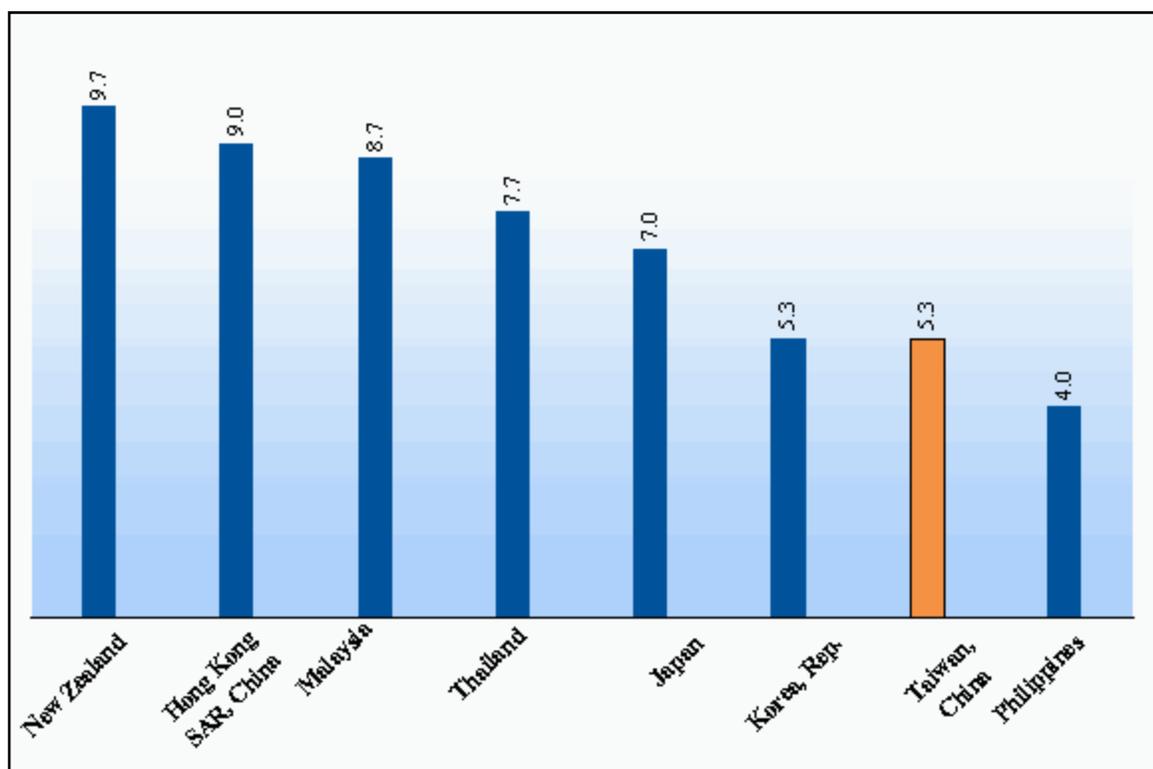

<i>Selected Economy</i>	
Taiwan, China	5.3

<i>Comparator Economies</i>	
Hong Kong SAR, China	9.0
Japan	7.0
Korea, Rep.	5.3
Malaysia	8.7
Philippines	4.0
Thailand	7.7

2. Historical data: Protecting Investors in Taiwan, China

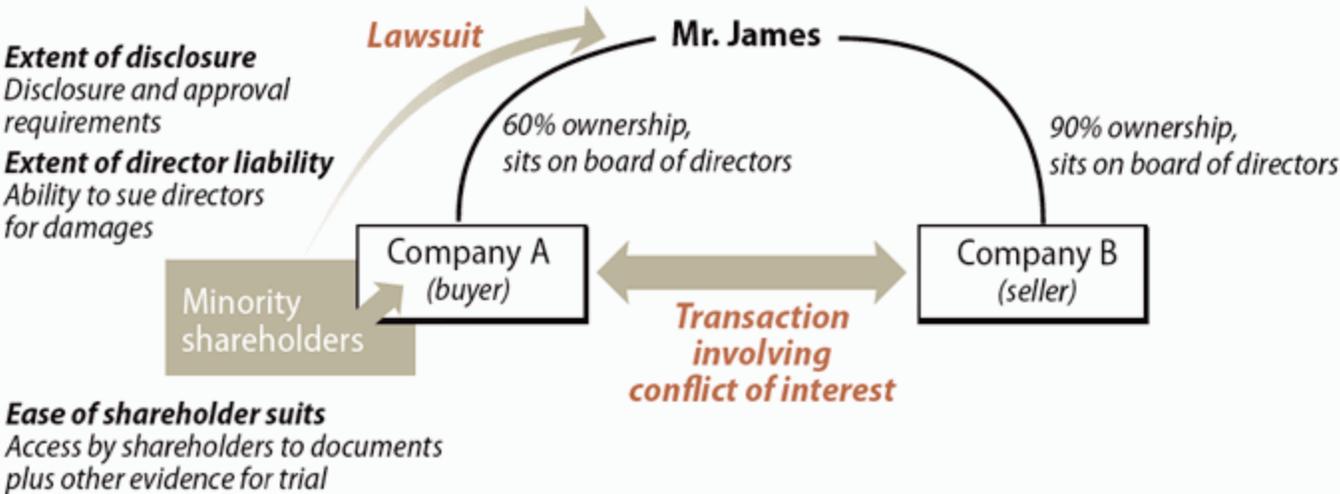

Protecting Investors data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	73	74
Strength of investor protection index (0-10)	5.3	5.3	5.3	5.3

3. The following graph illustrates the Protecting Investors index in Taiwan, China compared to best practice and selected Economies:

Note: The higher the score, the greater the investor protection.

How well are minority shareholders protected against self-dealing in related-party transactions?

The table below provides a full breakdown of how the disclosure, director liability, and shareholder suits indexes are calculated in Taiwan (China).

Protecting Investors Data (2010)	Indicator
Extent of disclosure index (0-10)	7
What corporate body provides legally sufficient approval for the transaction?	2
Whether immediate disclosure of the transaction to the public and/or shareholders is required?	2
Whether disclosure of the transaction in published periodic filings (annual reports) is required?	2
Whether disclosure of the conflict of interest by Mr. James to the board of directors is required?	1
Whether an external body must review the terms of the transaction before it takes place?	0
Extent of director liability index (0-10)	4
Whether shareholders can hold Mr. James liable for the damage that the Buyer-Seller transaction causes to the company?	1
Whether shareholders can hold the approving body (the CEO or board of directors) liable for the damage that the Buyer-Seller transaction causes to the company?	1
Whether a court can void the transaction upon a successful claim by a shareholder plaintiff?	0
Whether Mr. James pays damages for the harm caused to the company upon a successful claim by the shareholder plaintiff?	1

Whether Mr. James repays profits made from the transaction upon a successful claim by the shareholder plaintiff?	0
Whether fines and imprisonment can be applied against Mr. James?	0
Whether shareholders can sue directly or derivatively for the damage that the Buyer-Seller transaction causes to the company?	1
Ease of shareholder suits index (0-10)	5
Whether the plaintiff can obtain any documents from the defendant and witnesses during trial?	3
Whether the plaintiff can directly question the defendant and witnesses during trial?	1
Whether the plaintiff can request categories of documents from the defendant without identifying specific ones?	0
Whether shareholders owning 10% or less of Buyer's shares can request an inspector to investigate the transaction?	0
Whether the level of proof required for civil suits is lower than that of criminal cases?	1
Whether shareholders owning 10% or less of Buyer's shares can inspect transaction documents before filing suit?	0
Strength of investor protection index (0-10)	5.3

Taxes are essential to provide public amenities, infrastructure and services which are crucial for a properly functioning economy. *Doing Business* data show that economies where it is more difficult and costly to pay taxes have larger shares of informal sector activity. More than 60% of economies have reformed in the last 6 years and are starting to see concrete results.

Some reform outcomes

Colombia introduced a new electronic system for social security and labor taxes in 2006 and by 2008 the social security contributions collected from small and medium-size companies rose by 42%, to 550 billion pesos.

Mauritius reduced the corporate income tax rate from 25% to 15% and removed exemptions and industry-specific allowances in 2006 and saw their corporate income tax revenue grow by 27% in the following year, and in 2008/09 it increased by 65%.

What do the Paying taxes indicators measure?

Tax payments for a manufacturing company in 2009
(number per year adjusted for electronic or joint filing and payment)

- Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)
- Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

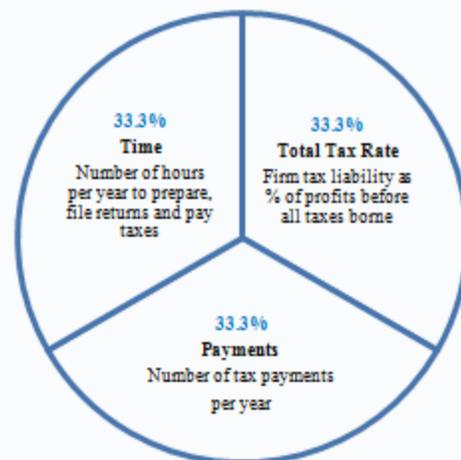

- Collecting information and computing the tax payable
- Completing tax return forms, filing with proper agencies
- Arranging payment or withholding
- Preparing separate tax accounting books, if required

Total tax rate (% of profit)

- Profit or corporate income tax
- Mandatory social contributions and labor taxes paid by the employer
- Property and property transfer taxes
- Dividend, capital gains and financial transactions taxes
- Waste collection, vehicle, road and other taxes

Paying Taxes: tax compliance for a local manufacturing company

Rankings are based on 3 subindicators

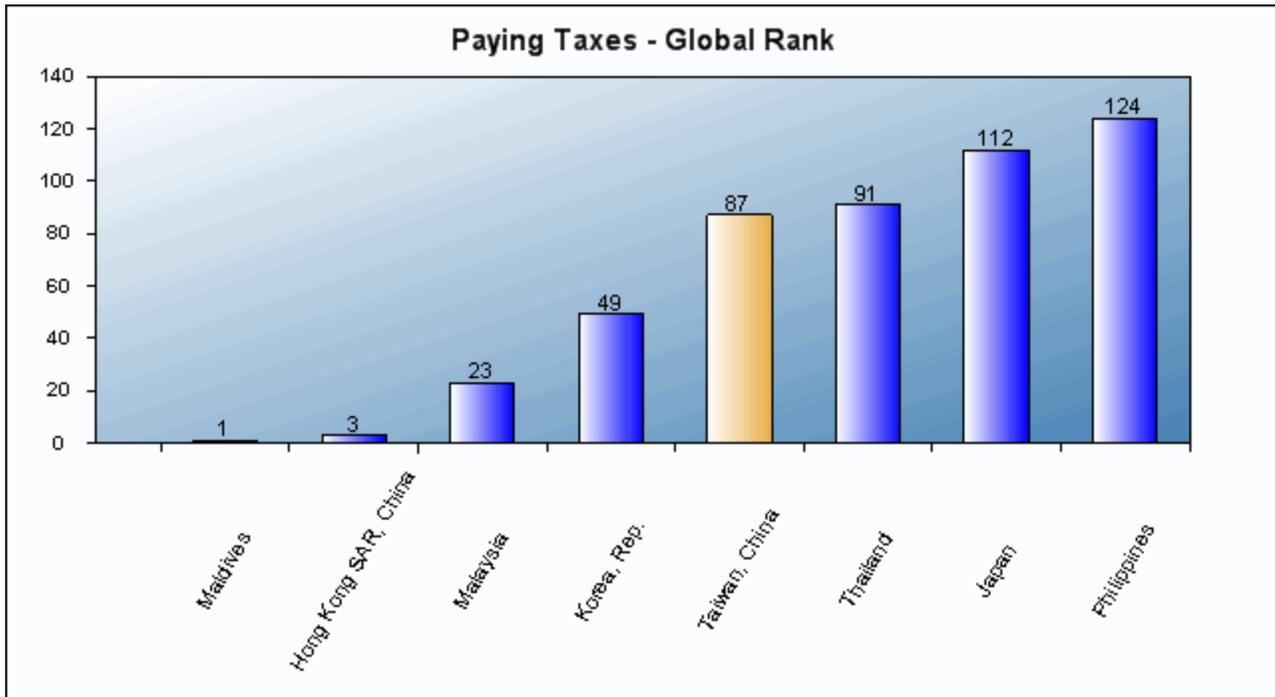

Case Study Assumptions

- TaxpayerCo is a medium-size business that started operations 2 years ago.
- Tax practitioners are asked to review its financial statements, as well as a standard list of transactions that the company completed during the year.
- Respondents are asked how much in taxes and mandatory contributions the business must pay and what the process is for doing so.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions paid during the second year of operation are recorded.
- Taxes and mandatory contributions are measured at all levels of government
- Taxes and mandatory contributions include corporate income tax, turnover tax, all labor taxes and contributions paid by the company.
- A range of standard deductions and exemptions are also recorded.

1. Benchmarking Paying Taxes Regulations:

Taiwan, China is ranked 87 overall for Paying Taxes.

Ranking of Taiwan, China in Paying Taxes - Compared to good practice and selected economies:

The following table shows Paying Taxes data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Payments (number per year)	Time (hours per year)	Total tax rate (% profit)
Maldives*	3	0	
Timor-Leste			0.2

<i>Selected Economy</i>			
Taiwan, China	17	269	41.9

<i>Comparator Economies</i>

Pension contributions	1	online filing		6.0%	gross salaries	6.80
Corporate income tax	1	online filing	209	25.0%	taxable profit	18.90
Totals	17		269			41.9

Making trade between countries easier is increasingly important for business in today's globalized world. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Trade facilitation tools such as electronic data interchange systems, risk-based inspections, and single windows help improve an economy's trading environment and boost firms' international competitiveness. *Doing Business* trade indicators take into account documents, cost and time associated with every procedure for trading a standard shipment of goods by ocean transport. Research indicates that exporters in developing countries have much more to gain by a 10% drop in their trading costs than from a similar decrease of the tariffs applied to their products in global markets.

Some reform outcomes

In Georgia, reducing customs clearance time by a day has led to operational savings of an estimated \$288 per truck, or an annual \$133 million for the country's whole trading community given the growing amount of cross-border trade in recent years.

In Korea, predictable cargo processing times and rapid turnover by ports and warehouses provide a benefit to the Korean economy of some \$2 billion annually.

What do the Trading Across Borders indicators measure?

Trading Across Borders: exporting and importing by ocean transport

Rankings are based on 3 subindicators

Documents required to export and import (number)

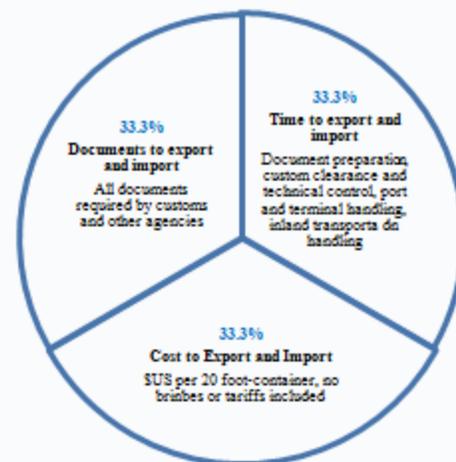

- Bank documents
- Customs clearance documents
- Port and terminal handling documents
- Transport documents

Time required to export and import (days)

- Obtaining all the documents
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Does not include ocean transport time

Cost required to export and import (US\$ per container)

- All documentation
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Official costs only, no bribes

Case Study Assumptions

The Business

- Has at least 60 employees and is located in the economy's largest business city
- Is a private, limited liability company, which exports more than 10% of its sales. It is fully domestically owned and does not operate in an export processing zone or an industrial estate with special export or import privileges

The traded product

- Is transported in a dry-cargo, 20-foot full container load; weighs 10 tons and is valued at \$20,000
- Is not hazardous or include military items; it does not require special phytosanitary or environmental safety standards, refrigeration or any other special environment
- Is one of the economy's leading export or import products

1. Benchmarking Trading Across Borders Regulations:

Taiwan, China is ranked 17 overall for Trading Across Borders.

Ranking of Taiwan, China in Trading Across Borders - Compared to good practice and selected economies:

The following table shows Trading Across Borders data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Documents to export (number)	Time to export (days)	Cost to export (US\$ per container)	Documents to import (number)	Time to import (days)	Cost to import (US\$ per container)

Documents for Export and Import

Export

- Bill of lading
- Certificate of origin
- Commercial invoice
- Customs export declaration
- Terminal handling receipts

Import

- Bill of lading
- Certificate of origin
- Commercial invoice
- Customs import declaration
- Packing list
- Terminal handling receipts

Well functioning courts help businesses expand their network and markets. Where contract enforcement is efficient, firms have greater access to credit and are more likely to engage with new borrowers or customers. *Doing Business* measures the efficiency of the judicial system in resolving a commercial sale dispute before local courts. Following the step-by-step evolution of a standardized case study, data relating to the time, cost and procedural complexity of resolving a commercial lawsuit are collected through study of the codes of civil procedure and other court regulations, as well as through surveys completed by local litigation lawyers (and, in a quarter of the countries, by judges as well).

Some reform outcomes

In Rwanda the implementation of specialized commercial courts in May 2008 resulted in a significant decrease of the case backlog, and contributed to reduce the time to resolve a commercial dispute by nearly 3 months.

In Austria a "data highway" for the courts that allows attachments to be sent electronically has produced savings of €4.4 million in postage alone.

What do the Enforcing Contracts indicators measure?

Procedures to enforce a contract (number)

- Any interaction between the parties in a commercial dispute, or between them and the judge or court officer
- Steps to file the case
- Steps for trial and judgment
- Steps to enforce the judgment

Time required to complete procedures (calendar days)

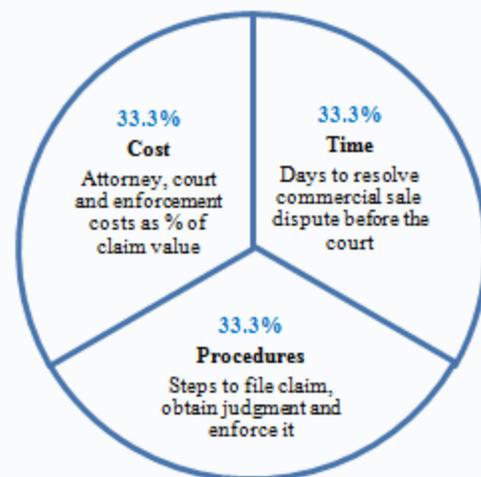

- Time to file and serve the case
- Time for trial and obtaining judgment
- Time to enforce the judgment

Cost required to complete procedures (% of claim)

- No bribes
- Average attorney fees
- Court costs, including expert fees
- Enforcement costs

Enforcing Contracts: resolving a commercial dispute through the courts

Rankings are based on 3 subindicators

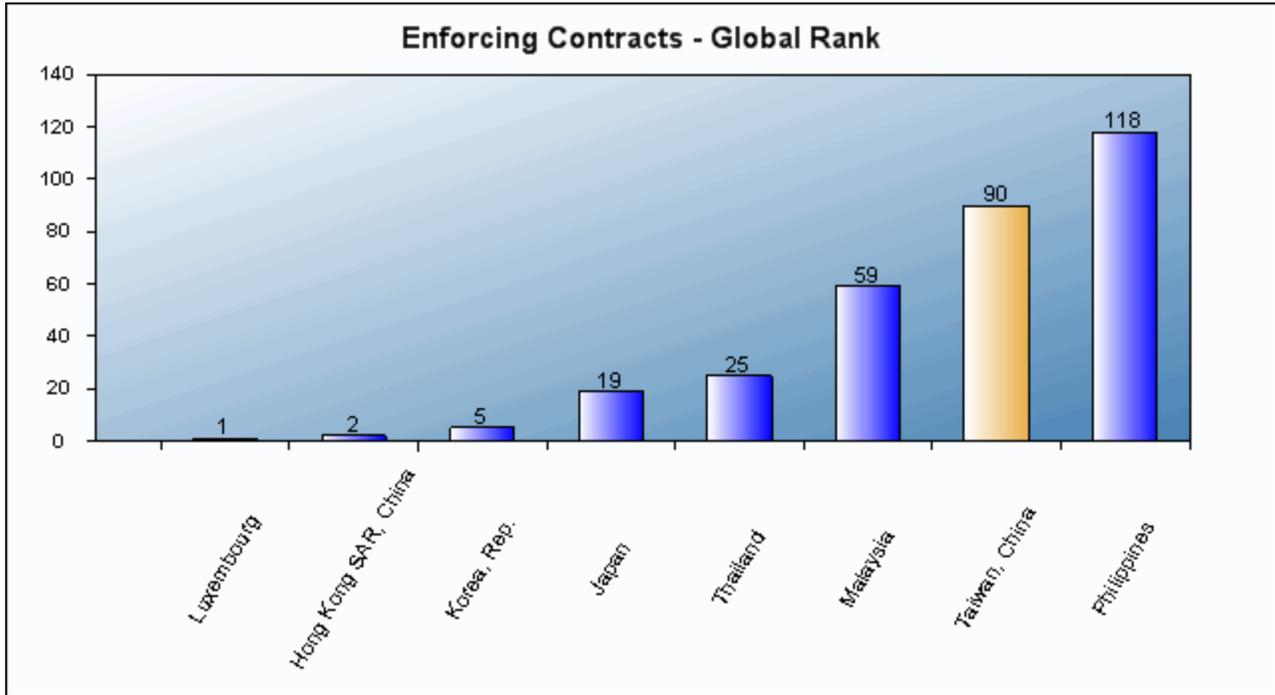

Case Study Assumptions

- Seller and Buyer are domestic companies
- Buyer orders custom-made goods, then does not pay
- Seller sues Buyer before competent court
- Value of claim is 200% of GNI per capita
- Seller requests pre-trial attachment to secure claim
- Dispute on quality of the goods requires expert opinion
- Judge decides in favor of Seller, no appeal
- Seller enforces judgment through a public sale of Buyer's movable assets.

1. Benchmarking Enforcing Contracts Regulations:

Taiwan, China is ranked 90 overall for Enforcing Contracts.

Ranking of Taiwan, China in Enforcing Contracts - Compared to good practice and selected economies:

The following table shows Enforcing Contracts data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Procedures (number)	Time (days)	Cost (% of claim)
Bhutan			0.1
Ireland	20		
Singapore		150	

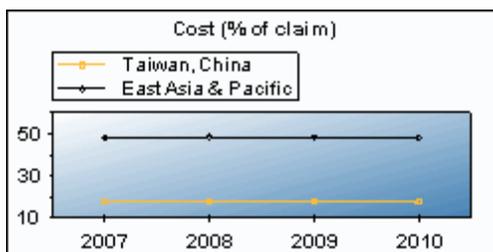

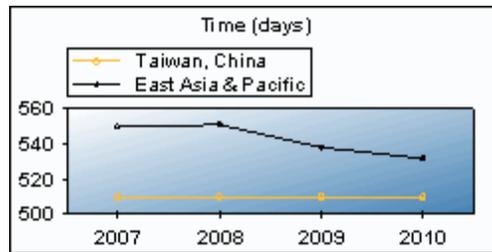

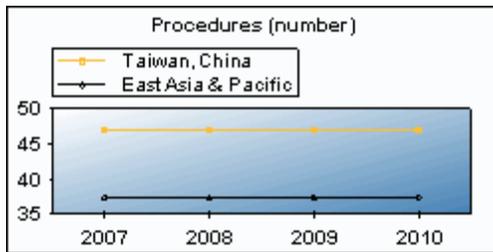

<i>Selected Economy</i>			
Taiwan, China	47	510	17.7

<i>Comparator Economies</i>			
Hong Kong SAR, China	24	280	19.5
Japan	30	360	22.7
Korea, Rep.	35	230	10.3
Malaysia	30	585	27.5
Philippines	37	842	26.0
Thailand	36	479	12.3

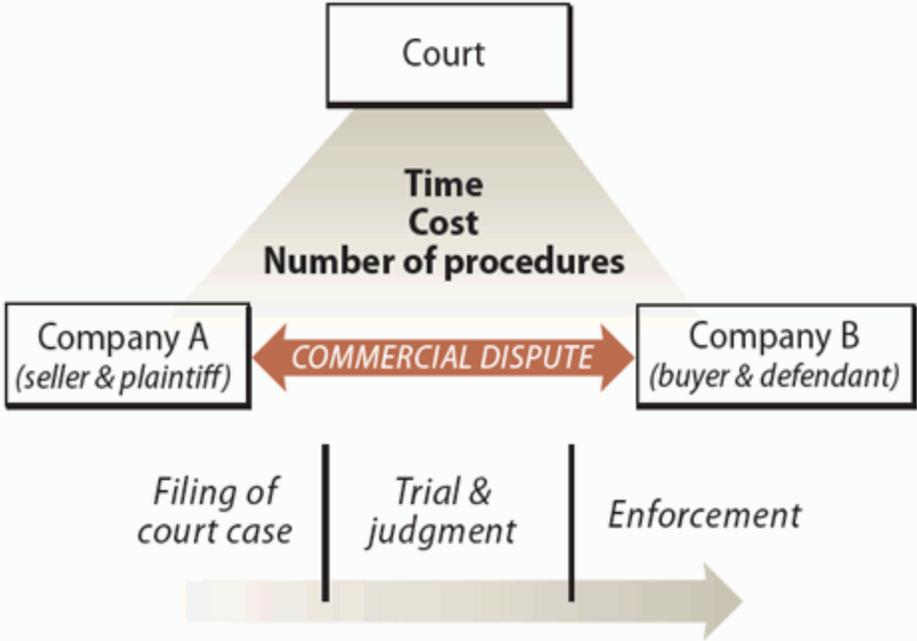

2. Historical data: Enforcing Contracts in Taiwan, China

Enforcing Contracts data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	90	90
Procedures (number)	47	47	47	47
Time (days)	510	510	510	510
Cost (% of claim)	17.7	17.7	17.7	17.7

3. The following graphs illustrate the Enforcing Contracts sub indicators in Taiwan, China over the past 4 years:

What are the time, cost and number of procedures to resolve a commercial dispute through the courts?

This topic looks at the efficiency of contract enforcement in Taiwan, China.

Nature of Procedure (2010)	Indicator
Procedures (number)	47
Time (days)	510
Filing and service	30.0
Trial and judgment	360.0
Enforcement of judgment	120.0
Cost (% of claim)*	17.70
Attorney cost (% of claim)	15.5
Court cost (% of claim)	1.1
Enforcement Cost (% of claim)	1.1

Court information: Taipei District Court ("地方法院")

* Claim assumed to be equivalent to 200% of income per capita.

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in businesses' speedy return to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses, and thereby improve growth and sustainability in the economy overall.

Some reform outcomes

A study of the 2005 bankruptcy reform in Brazil found that it had led to an average reduction of 22% in the cost of credit for Brazilian companies, a 39% increase in overall credit and a 79% increase in long-term credit in the economy. The purpose of the reform was to improve creditor protection in insolvency proceedings.

Following the introduction of debtor-in-possession reorganizations in Korea in 2006, the number of reorganization filings increased from 76 in 2006 to 670 in 2009.

What does the Closing a Business indicator measure?

Closing a Business: insolvency proceedings against local company

Time required to recover debt (years)

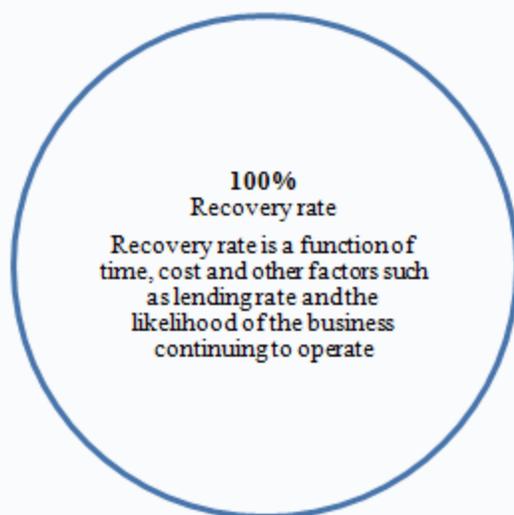

- Measured in calendar years
- Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate value)

- Measured as percentage of estate value
- Court fees
- Fees of insolvency administrators
- Lawyers' fees
- Assessors' and auctioneers' fees
- All other fees and costs

Recovery rate for creditors (cents on the dollar)

- Measures the cents on the dollar recovered by creditors
- Present value of debt recovered
- Costs of the insolvency proceedings are deducted
- Depreciation of furniture is taken into account
- Outcome for the business (survival or not) affects the maximum value that can be recovered

Case Study Assumptions

The Company

- is domestically owned
- is a limited liability company operating a hotel
- operates in the economy's largest business city
- has 201 employees, 1 secured creditor and 50 unsecured creditors
- has a higher value as a going concern and a lower value in a piecemeal sale of assets

1. Benchmarking Closing Business Regulations:

Taiwan, China is ranked 10 overall for Closing a Business.

Ranking of Taiwan, China in Closing Business - Compared to good practice and selected economies:

The following table shows Closing Business data for Taiwan, China compared to good practice and comparator economies:

Good Practice Economies	Recovery rate (cents on the dollar)	Time (years)	Cost (% of estate)
Ireland		0.4	
Japan	92.7		
Singapore*			1

<i>Selected Economy</i>			
Taiwan, China	82.2	1.9	4

<i>Comparator Economies</i>			
Hong Kong SAR, China	81.2	1.1	9
Japan	92.7	0.6	4
Korea, Rep.	81.7	1.5	4
Malaysia	39.8	2.3	15
Philippines	4.5	5.7	38
Thailand	43.5	2.7	36

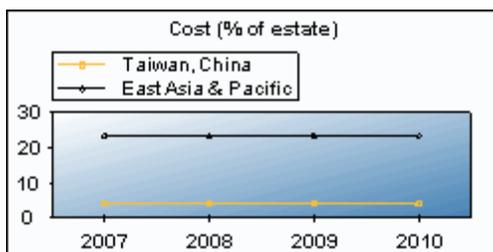

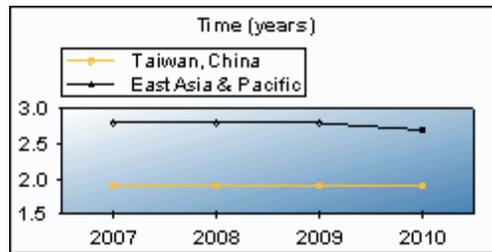

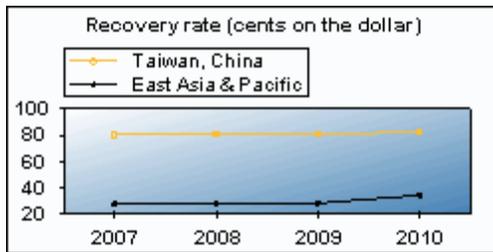

* The following economies are also good practice economies for :

Cost (% of estate): Colombia, Kuwait, Norway

2. Historical data: Closing Business in Taiwan, China

Closing a Business data	Doing Business 2008	Doing Business 2009	Doing Business 2010	Doing Business 2011
Rank	11	10
Time (years)	1.9	1.9	1.9	1.9
Cost (% of estate)	4	4	4	4
Recovery rate (cents on the dollar)	80.2	80.9	80.9	82.2

3. The following graphs illustrate the Closing Business sub indicators in Taiwan, China over the past 4 years:

Since 2004 Doing Business has been tracking reforms aimed at simplifying business regulations, strengthening property rights, opening access to credit and enforcing contracts by measuring their impact on 10 indicator sets . * Nearly 1,000 reforms have had an impact on these indicators. *Doing Business 2011*, covering June 2009 to June 2010, reports that 117 economies implemented 216 reforms to make it easier to start a business. 64% of economies measured by Doing Business have reformed this year, focusing on easing business start-up, lightening the tax burden, simplifying import and export regulations and improving credit information systems.

The top 10 most-improved in Doing Business 2011

* For *Doing Business 2011* the Employing Workers indicator is not included in the aggregate ease of doing business ranking.

Summary of changes to business regulation in top 10 most improved economies in *Doing Business 2011* and selected comparator economies.

Brunei Darussalam	Brunei Darussalam made starting a business easier by improving efficiency at the company registrar and implementing an electronic system for name searches. Brunei Darussalam reduced the corporate income tax rate from 23.5% to 22% while also introducing a lower tax rate for small businesses, ranging from 5.5% to 11%. The introduction of an electronic customs system in Brunei Darussalam made trading easier.
Cape Verde	Cape Verde made start-up easier by eliminating the need for a municipal inspection before a business begins operations and computerizing the system for delivering the municipal license. Cape Verde eased property registration by switching from fees based on a percentage of the property value to lower fixed rates. Cape Verde abolished the stamp duties on sales and checks.
Grenada	Grenada eased business start-up by transferring responsibility for the commercial registry from the courts to the civil administration. The appointment of a registrar focusing only on property cut the time needed to transfer property in Grenada by almost half. Grenada's customs administration made trading faster by simplifying procedures, reducing inspections, improving staff training and enhancing communication with users.
Hong Kong SAR, China	Hong Kong SAR (China) abolished the fuel tax on diesel. Reforms implemented in the civil justice system of Hong Kong SAR (China) will help increase the efficiency and cost-effectiveness of commercial dispute resolution.
Hungary	Hungary implemented a time limit for the issuance of building permits. Hungary reduced the property registration fee by 6% of the property value. Hungary simplified taxes and tax bases. Amendments to Hungary's bankruptcy law encourage insolvent companies to consider reaching agreements with creditors out of court so as to avoid bankruptcy.
Japan	Japan made it easier to deal with insolvency by establishing a new entity, the Enterprise Turnaround Initiative Corporation, to support the revitalization of companies suffering from excessive debt but professionally managed.
Kazakhstan	Kazakhstan eased business start-up by reducing the minimum capital requirement to 100 tenge (\$0.70) and eliminating the need to have the memorandum of association and company charter notarized. Kazakhstan made dealing with construction permits easier by implementing a one-stop shop related to technical conditions for utilities. Kazakhstan strengthened investor protections by requiring greater corporate disclosure in company annual reports. Kazakhstan speeded up trade through efforts to modernize customs, including implementation of a risk management system and improvements in customs automation.
Korea, Rep.	Korea made it easier to deal with insolvency by introducing postfiling financing, granting superpriority to the repayment of loans given to companies undergoing reorganization.
Malaysia	Malaysia eased business start-up by introducing more online services. Malaysia's introduction of online stamping reduced the time and cost to transfer property.
Peru	Peru eased business start-up by simplifying the requirements for operating licenses and creating an online one-stop shop for business registration. Peru streamlined construction permitting by implementing administrative reforms. Peru introduced fast-track procedures at the land registry, cutting by half the time needed to register property. Peru made trading easier by implementing a new web-based electronic data interchange system, risk-based inspections and payment deferrals.
Philippines	The Philippines eased business startup by setting up a one-stop shop at the municipal level. The Philippines made construction permitting more cumbersome through updated electricity connection costs. The Philippines reduced the time and cost to trade by improving its electronic customs systems, adding such functions as electronic payments and online submission of declarations.
Rwanda	Rwanda made dealing with construction permits easier by passing new building regulations at the end of April 2010 and implementing new time limits for the issuance of various permits. Rwanda enhanced access to credit by allowing borrowers the right to inspect their own credit report and mandating that loans of all sizes be reported to the central bank's public credit registry. Rwanda reduced the number of trade documents required and enhanced its joint border management procedures with Uganda and other neighbors, leading to an improvement in the trade logistics environment.

Taiwan, China	Taiwan (China) eased business start-up by reducing the time required to check company names, register retirement plans and apply for health, pension and labor insurance. Taiwan (China) reduced the corporate income tax rate and simplified tax return forms, rules for assessing corporate income tax and the calculation of interim tax payments.
Tajikistan	Tajikistan made starting a business easier by creating a one-stop shop that consolidates registration with the state and the tax authority. Tajikistan strengthened investor protections by requiring greater corporate disclosure in the annual report and greater access to corporate information for minority investors. Tajikistan lowered its corporate income tax rate.
Thailand	Thailand made registering property more costly by repealing a 2-year temporary tax reduction for property transfers. Thailand temporarily lowered taxes on business by reducing its specific business tax for 12 months.
Vietnam	Vietnam eased company start-up by creating a one-stop shop that combines the processes for obtaining a business license and tax license and by eliminating the need for a seal for company licensing. Vietnam made dealing with construction permits easier by reducing the cost to register newly completed buildings by 50% and transferring the authority to register buildings from local authorities to the Department of National Resources and Environment. Vietnam improved its credit information system by allowing borrowers to examine their own credit report and correct errors.
Zambia	Zambia eased business start-up by eliminating the minimum capital requirement. Zambia eased trade by implementing a one-stop border post with Zimbabwe, launching web-based submission of customs declarations and introducing scanning machines at border posts. Zambia improved contract enforcement by introducing an electronic case management system in the courts that provides electronic referencing of cases, a database of laws, real-time court reporting and public access to court records.
